Manage Your Account Notifications

Choose the account notifications you want to receive. Available options may depend on your account and the features you use.

Find notification settings

1. Log in to Savvy Funnels and select your profile picture in the top-right corner.
2. Choose Settings, then Notifications.
3. Read the available notification options before changing them.

Review and save

1. Select or clear the available notification checkboxes to match your preferences.
2. If you have paid subscriptions and see My subscription invoices, review whether you want invoice emails for the relevant subscription.
3. Save your changes if prompted, then return to the page to confirm your selections.

Notifications for new leads or sales

1. These may require a separate automation rather than a general notification setting.
2. For new lead or sale alerts, use a funnel step automation rule and a Send email to a specific email address action. See the Automations Quick Guides.

Before You Finish

[ ] Your preferred notification options are selected.

[ ] You have checked whether any lead or sale alerts need an automation.
