UNLOCKING THE POWER OF TECH FOR READING

7/19/23

Joan L. Green, M.A. CCC-SLP
Speech-Language Pathologist, Assistive Technology Specialist, Online Tech Advisor & Coach
www.innovativespeech.com

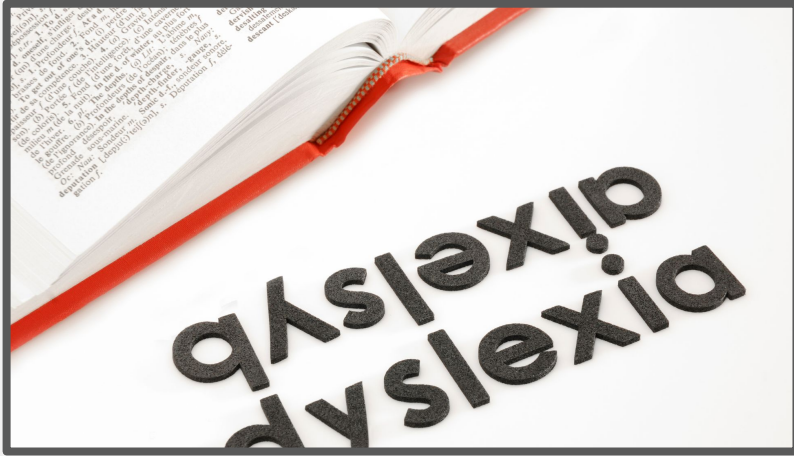

Accessibility Check

- ❖ You are muted 
- ❖ We can't see you 
- ❖ Close extra tabs and refresh if problems 
- ❖ Log out and in again as needed
- ❖ Live captioning enabled 
- ❖ Everyone will have access to on-demand recording- 2 weeks- you'll get an email from Joan@innovativespeech.com with a link

What reading
challenges are you
looking to support
with tech?

Reading Challenges

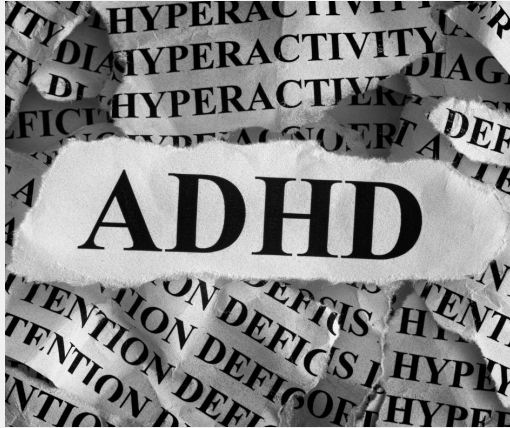

Specific Learning
Disability- Dyslexia

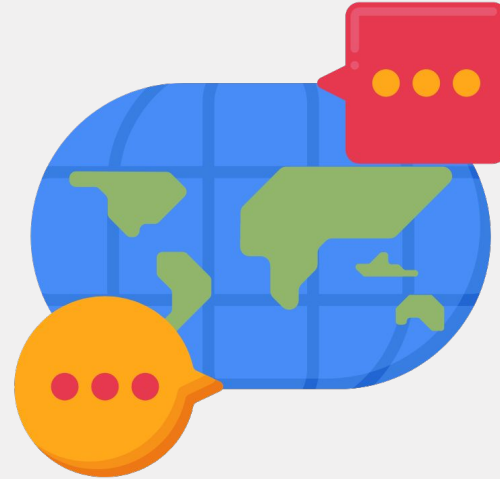

Low Vision/
Visual-perceptual
problems

Reading Challenges

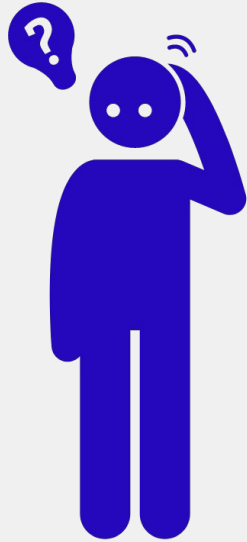

Difficulty Managing
Attention

Different primary language

Reading Challenges

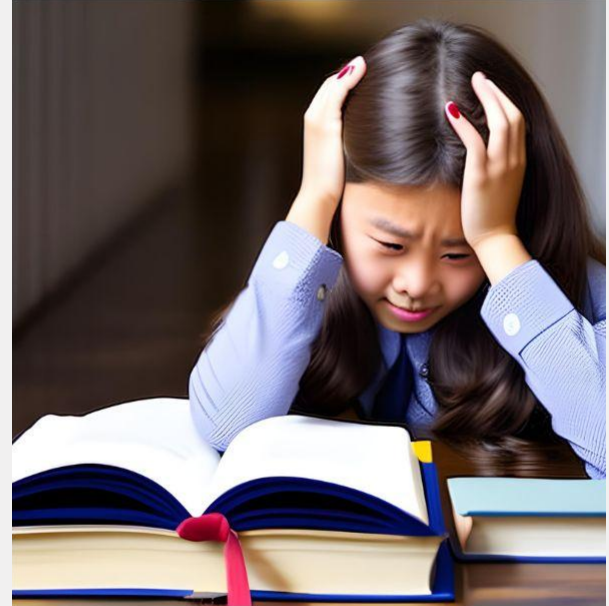

I/DD- Intellectual and
Developmental Disabilities

Brain Injury/ Stroke/ Cognitive Decline

Reading Challenges

- Decoding- sounding out words
- Word recognition
- Slow reading speed
- Connecting words, sentences and paragraphs in a meaningful way
- Understanding main ideas and making inferences.

Reading Challenges

- Retaining information from text
- Spelling
- Letter order, reversing letters or confusing similar letters
- Tracking and skipping lines
- Processing information while reading
- Making connections to text

Instructional Intervention to build reading skills

There are different types of reading specialists to assist! More resources are included at the end of the presentation.

- It's important to know what is causing the difficulty.
- Many specialists are on this webinar.
- Feel free to share your info in chat.
- Private messaging is enabled

This new generation of tech is amazing!

Learn what's possible ★

Match a person's needs
with tech features

Adapt and change as
needed

New Tech Mindset

“How can tech help me read better?”

“What can I do to help someone I know to better understand written content?”

Computers

Microsoft- <https://www.microsoft.com/en-us/accessibility>

Compensatory strategies

As people of all ages strive to improve reading skills, it is important that they be shown how to access the information another way.

We don't want to create a situation where struggling readers fall further behind.

Let's set them up for independence.

Tech Tip #1- Use Text to Speech

- It's a feature on all computers, phones and tablets!
- Voices have come a long way

All devices can read aloud for free!

The process depends on:

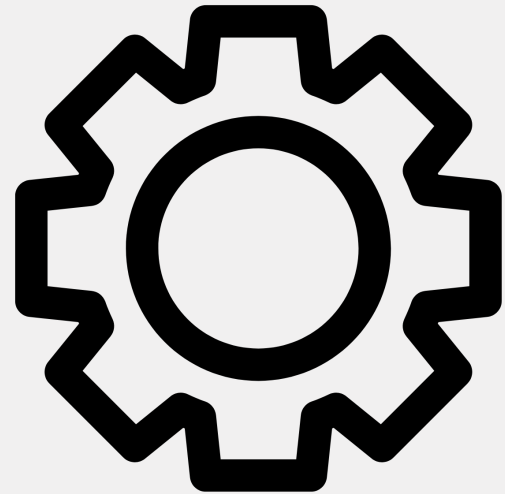

- the device,
- operating system,
- format of the material

It can get complicated.

Tech Tip #2- Customize Read Aloud Settings

- Chromebook
- PC Computer and tablet
- Mac Computer
- iPhone and iPad
- Android phone and tablets- ie Samsung Galaxy, Pixel
- Microsoft Word
- Google Docs

<https://www.youtube.com/watch?v=gz4IXWDzTQ>

5 min YouTube video on Chromebook channel

Chromebook- Select- to- Speak

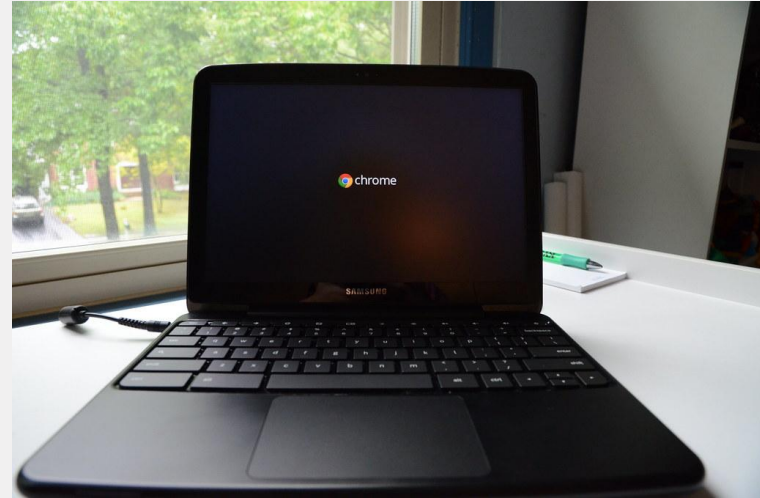

On demand text-to-speech

Listen to text read aloud while reading with your eyes

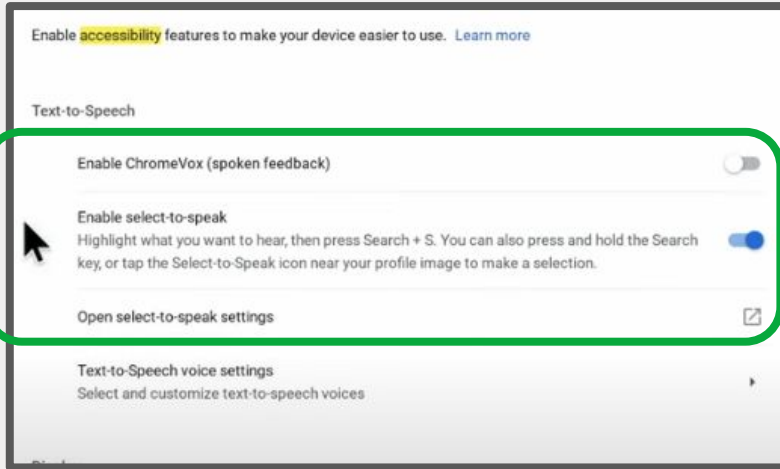

Need to enable in system settings:

- Click the clock on the bottom right
- Accessibility
- Manage Accessibility features
- Enable Select to speak

I find it much easier to use a mouse than touchpad. It might be a generational thing!

Chromebook- Select- to- Speak

1. Highlight words to be read aloud
2. Select Search + S
3. Customize voice, speed, highlighting etc.

Microsoft 365

Immersive Reader

- Reads text aloud with highlighting
- Help with focus and attention
- Use the view menu

Windows

Microsoft Word

How to use Immersive Reader

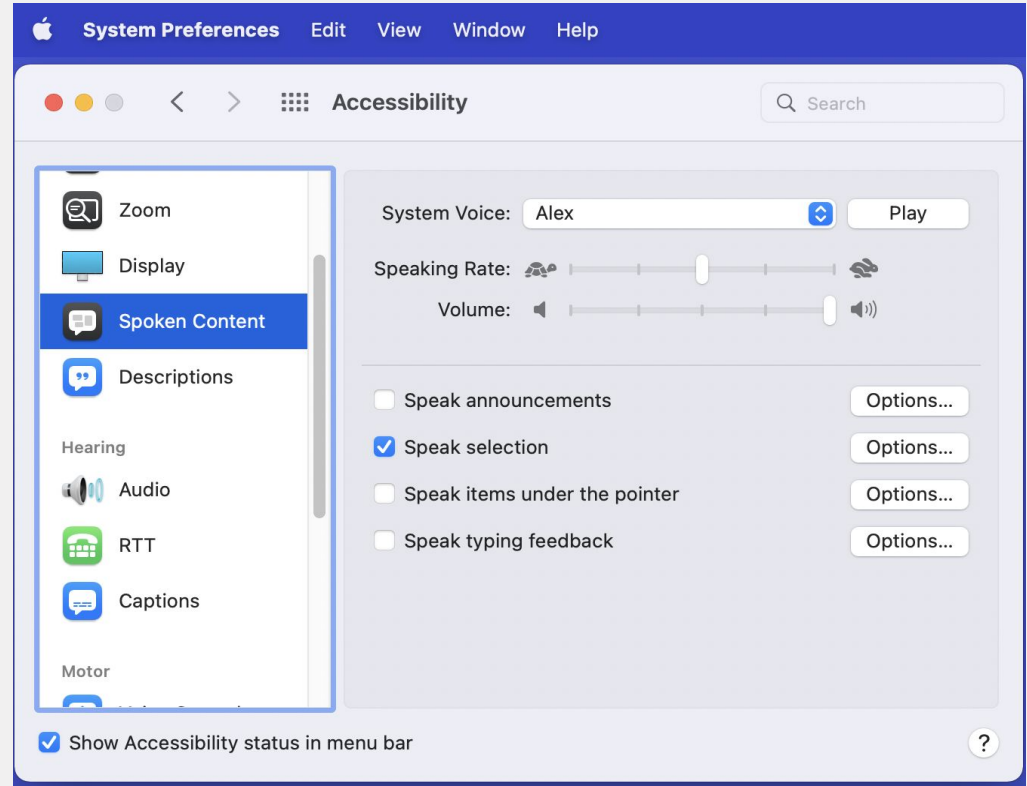

Microsoft Support

<https://support.microsoft.com/en-au/office/use-immersive-reader-in-word-a857949f-c91e-4c97-977c-a4efcaf9b3c1>

Read aloud- Mac

1. Apple menu > system preferences> Accessibility> Speak selected text when the key is pressed
2. Option + Esc

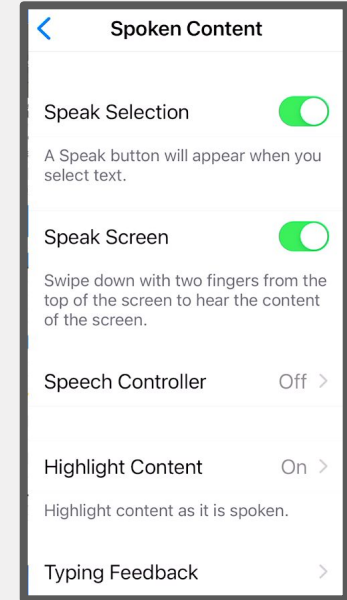

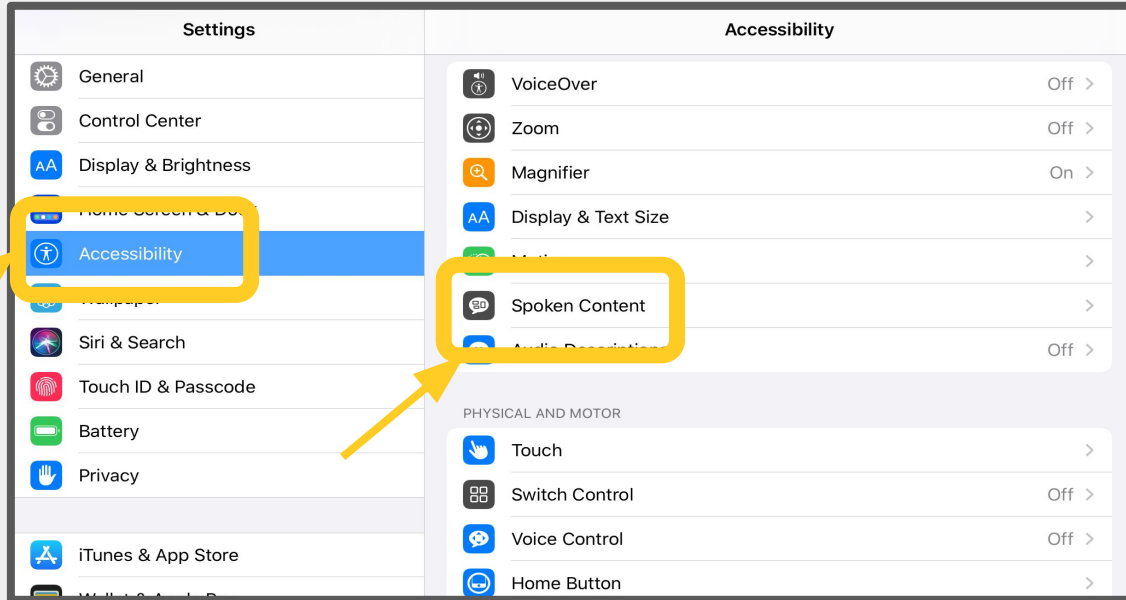

iDevices- Iphones and iPads

Speak Selection Speak Screen

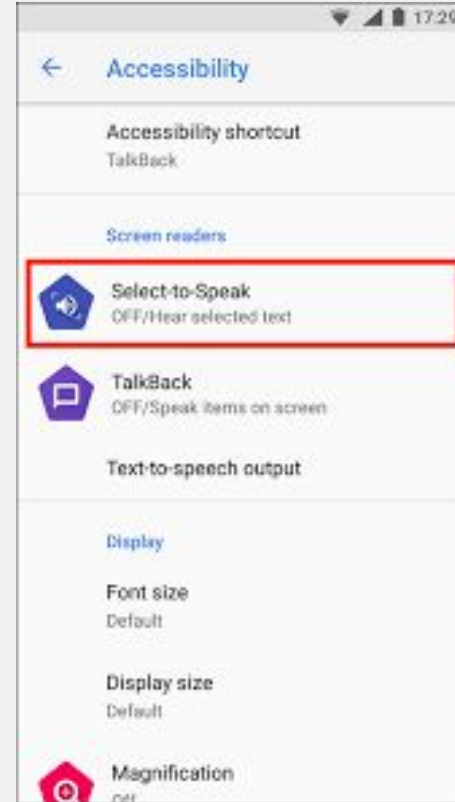

- **Settings** > Accessibility > Spoken Content
- **Speak selection-** select text then touch “speak”
- **Speak screen-** swipe down with two fingers from the top of the screen and then press play (use assistive touch)

Accessibility Features- iPhone and iPad

Android phones (i.e Samsung, Pixel, Motorola)

- Android 11 and up
- Settings > accessibility> Select to Speak
- If doesn't work- go to Google Play store and download the Android Accessibility Suite
- Turn on Select to Speak Shortcut (2 finger swipe up) or 3 finger swipe if TalkBack is on, or tap the accessibility button
- Tap Play

Tip #3- Optimize the view

Google Chrome

Microsoft Edge

Apple Safari

Enhance Readability- Declutter the screen

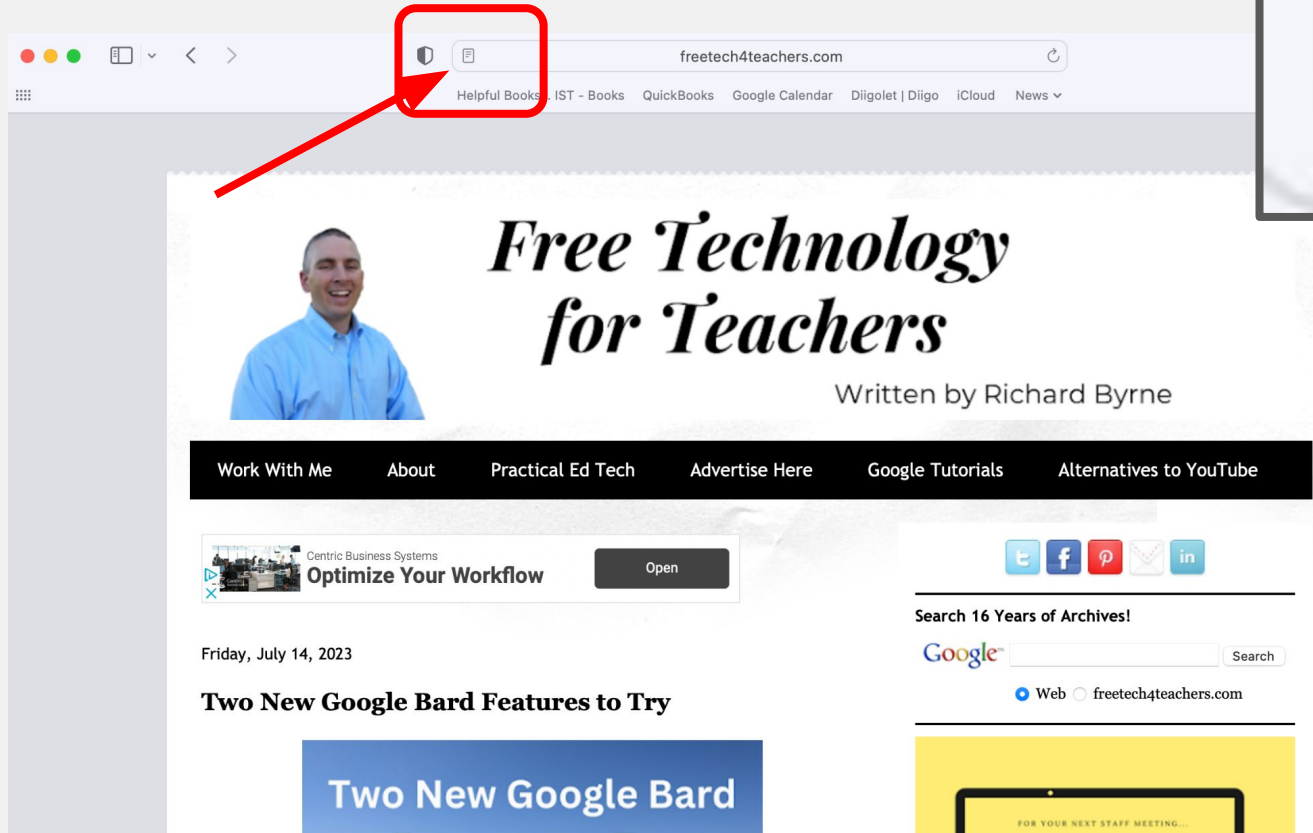

Reader View

(not available for all websites)

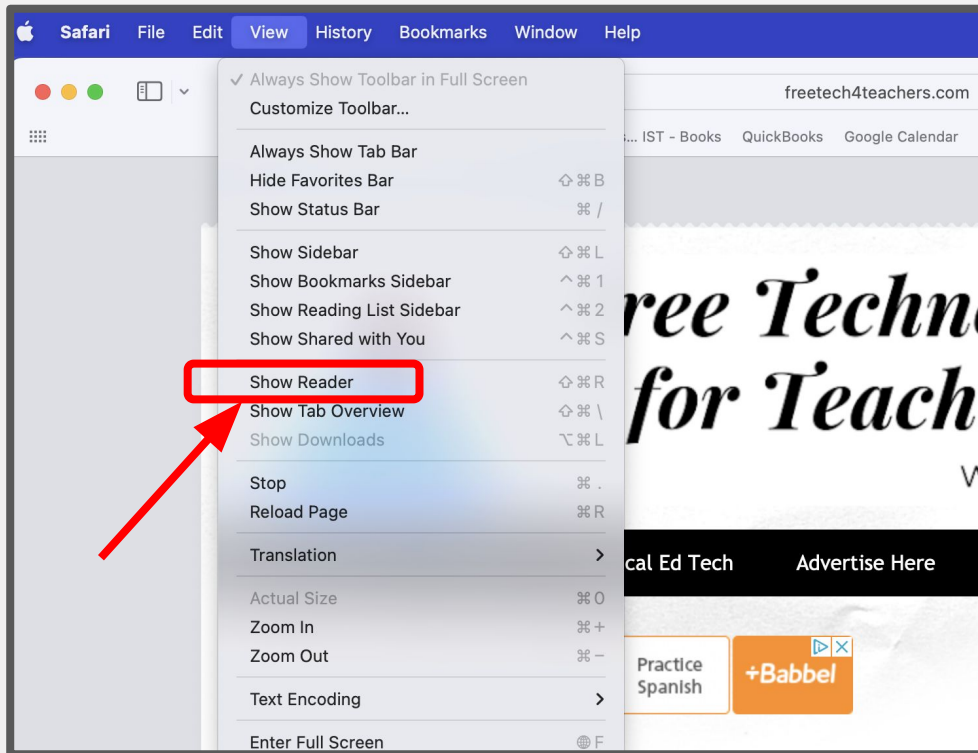

- Built into Safari, Edge, and Firefox
- You may need to enable it in settings
- Remove ads
- Adjust font size and type
- Customize color

Reader view in Safari

Safari

Two New Google Bard Features to Try

This week Google added [a handful of new features to Google Bard](#) including support for many more languages. Two of the new features that jumped out to me were the option to use images as prompts and the option to hear Bard responses read aloud. Both of those features are demonstrated in [this short video](#).

I was excited about the potential for image upload option to help find image sources and or to identify what is in an image. Unfortunately, in my early testing of Bard's image upload feature it didn't do either of those things well. In fact, as you can [see in my video](#) it did a terrible job of handling my image of the Mt. Abram snowfields. However, as you can also [see in my video](#), an unexpected benefit of using the image upload feature is that Bard presented some ideas for future research prompts.

Tech Tip #4- Try Browser extensions & Add-ons

Add functionality to your browser

- **Google Chrome web store**

<https://chrome.google.com/webstore/category/extensions>

- **Microsoft Edge Add-ons,**

<https://microsoftedge.microsoft.com/addons/Microsoft-Edge-Extensions-Home>

- **Safari Extensions,**

Open Safari and choose Safari > Safari Extensions from the menu bar

De-clutter with Postlight Reader (formerly Mercury Reader)

Color Gradients can help

Focus Mode dims online distractions

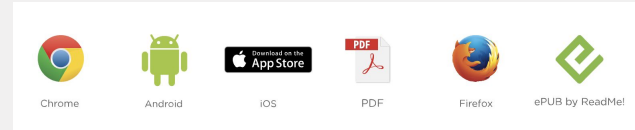

Here's what we knew about the Republican plan. The latest version that the nonpartisan Congressional Budget Office had a chance to analyze would have, over the course of 10 years, cut taxes by \$1 trillion, disproportionately benefiting the rich; cut Medicaid spending by \$839 billion, exclusively harming the poor and sick; and cut the Affordable Care Act's health insurance subsidies by about \$300 billion, mostly hurting older people of modest means. Add it all up, and the CBO estimated that 24 million people would have lost their health insurance as a result. Not only that, but premiums would have increased 15 percent to 20 percent more than they otherwise would have in the next four years before so many older people were priced out of the market that premiums would have started to come down, and deductibles, according to the Kaiser Family Foundation, would have been an average of \$1,550 higher. In short: The GOP would have made insurance more affordable for younger people by making it unaffordable for older people and worse for everyone.

This wasn't just a matter of higher premiums and higher deductibles, though. Trumpcare also would have repealed the "essential health benefits" that plans are required to cover now. States would have been allowed to write their own

Tech Tip #5

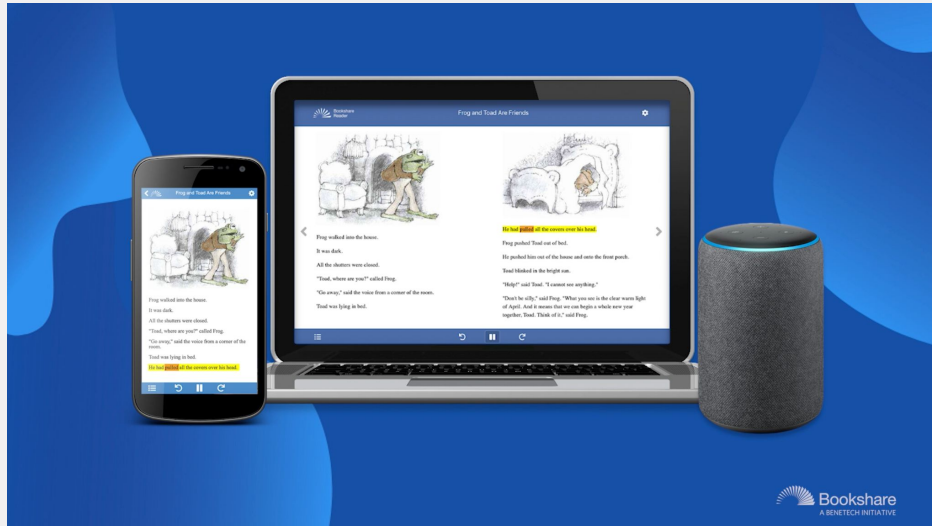

Explore Digital Libraries

Digital Libraries

- **Tarheel Reader**- books for beginner readers of all ages-
<https://tarheelreader.org/>
- **Bookshare**- free- need documented “print disability”,
<https://www.bookshare.org/cms/>
- **Learning Ally**- human narration- need documented “print disability”
<https://learningally.org/>

Bookshare Reader- New and Free

- Listen to books in high quality audio
- Follow along with highlighted text
- Adjust reading speed, font size, and colors
- Navigate by page and chapter
- Bookmark your reading spot
- Stop reading and pick up from your last spot
- On computer- Read MathML
- On Smartphones- can read offline
- For adults who qualify- \$79.99 a year
- Work with several state NLS libraries

Bookshare Reader

Go to https://www.youtube.com/watch?v=zLtnX_U77dg for a 4 min video to get started using it.

Learning Ally

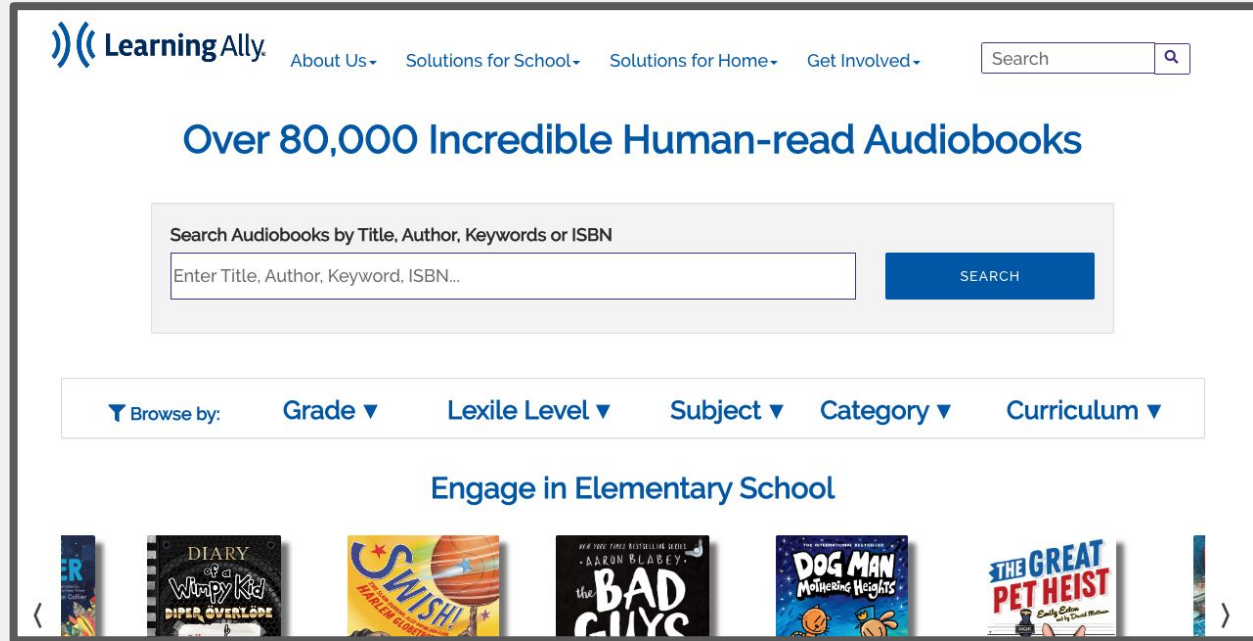

<https://learningally.org/>

Need to qualify with print disability

\$135 a year/ individual

School pricing available

Human narration

The screenshot shows the Learning Ally website interface. At the top left is the Learning Ally logo, followed by navigation links: "About Us", "Solutions for School", "Solutions for Home", and "Get Involved". A search bar is located in the top right corner. Below the navigation is a large blue heading: "Over 80,000 Incredible Human-read Audiobooks". Underneath this is a search box with the placeholder text "Enter Title, Author, Keyword, ISBN..." and a blue "SEARCH" button. Below the search box is a "Browse by:" section with dropdown menus for "Grade", "Lexile Level", "Subject", "Category", and "Curriculum". At the bottom of the screenshot is a carousel of audiobook covers, including "Diary of a Wimpy Kid: Diper Overload", "Swish!", "The Bad Guys", "Dog Man: Mothering Heights", and "The Great Pet Heist".

Digital and Audio Books

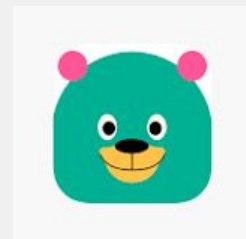

Libby- free audiobooks from library

- <https://www.overdrive.com/apps/libby>

Khan Academy Kids- Free

- <https://learn.khanacademy.org/khan-academy-kids/> (ages 2-7)

More digital libraries

Epic! Kids' books and videos- <https://www.getepic.com/>

- K-5, over 40,000 books, audiobooks and learning videos
- 7 day free trial- then \$11.99 a month for families

Learning A-Z, Raz-Kids,
<https://www.learning-a-z.com/site/products/raz-kids/overview>

- K-5
- 2,000+ digital leveled ebooks- 29 levels. Quizzes
- \$128 for one year

Tech Tip #6 Scan words around you

What about paper based content?

Individuals may need them scanned and digitized.

Schools or work sites many need to provide digital version or scan paper and convert into accessible PDFs or EPUB files for people with reading disabilities.

Scanning tools

Apple Notes App

Notes > Camera >
Scan Document>
Keep scan> Save>
Upload/Share

<https://youtu.be/16nwB3P78GQ>

Upload into Google
Drive for OCR- to
make accessible

More ways to scan documents

VDScan (Formerly Voice Dream Scanner),

<https://www.voicedream.com/scanner/>- includes OCR
\$9.99<https://www.voicedream.com/>

Works well with Voice Dream Reader- <https://www.voicedream.com/>

Microsoft Lens- PDF Scanner- Free

- Scan handouts and annotate them in Word and OneNote
- Scan handwritten notes to digitize and edit later (works with English only)
- Take a picture of the whiteboard or blackboard to reference later, even if you're offline
- Keep class notes and your own research organized with the seamless integration with OneNote

Microsoft Lens

<https://youtu.be/P54FnjJJqjA>

**Get handouts
read aloud**

using
**Microsoft
Lens**

Achieve Now  Transforming Learning
achieve-now.org.au

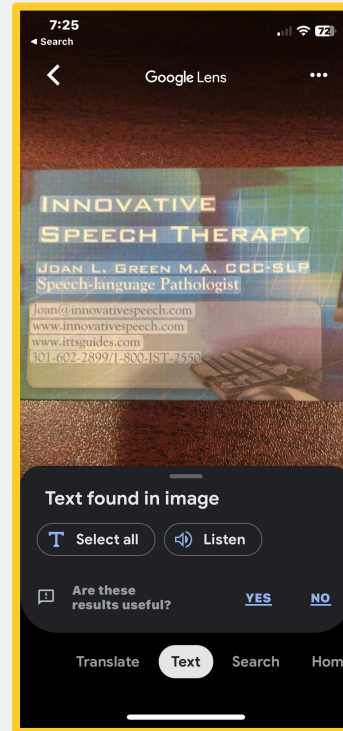

Google Lens

This app uses the camera on a tablet or smartphone

On iOS use the Google app and tap on the Lens icon.

Take a picture of text and it reads it out loud immediately! It can also translate.

Google Lens- Read anything aloud for free!

<https://youtu.be/HmwhC582EJM?t=22>

- Works in real time
- Read aloud anything you see- menu, street signs, medicine labels
- Copy Text
- Translate

Tech Tip #7 Listen to and Annotate on PDF Readers

Accessible vs Inaccessible PDFs

If worksheets are scanned, use a tool to make them accessible (OCR)

Don't just take a picture and upload- use a scanning app.

Need to be able to select text.

Consider ePub format

PDF Readers

Orbit Note by Text Help- (Formerly PDF Reader)

VDSscanner and Voice Dream Reader App

<https://youtu.be/2QZ6zCB5qIM>

Tip #8 Summarize written content

- Not a substitute for reading- but may help with comprehension
- Use with caution
- Can often adjust how long the summary needs to be
- Helpful for scanning articles to figure out what to spend time reading.

Read&Write Extension by texthelp- has a summary tool

On the toolbar

Chat GPT

<https://chat.openai.com/>

Create a free account if you don't have one.

- Summarize the text below into 500 words or less.
- Summarize the text below into one paragraph appropriate for a 7th grader.
- Please summarize this video for me. Here's the YouTube link, (insert link) and the title is: [copy and paste the title of the video]

Output in: English | Tone: Default | Writing Style: Default | Continue

Include [My Profile info](#)

ChatGPT may produce inaccurate information about people, places, or facts. [ChatGPT May 24 Version](#)

ChatGPT

I pasted in Wikipedia info about dyslexia <https://en.wikipedia.org/wiki/Dyslexia>

“Summarize this text so that it can be understood by a 5th grader”

Dyslexia is a learning disability that makes reading difficult. People with dyslexia have trouble spelling words, reading quickly, and understanding what they read. It's something that some people are born with, and it can run in families. Dyslexia is caused by a combination of genes and the environment. It's not related to problems with hearing or vision or not being taught properly.

To help people with dyslexia, teachers can use different teaching methods that meet their needs. While there is no cure for dyslexia, these methods can help reduce the impact of the symptoms. It's important to remember that dyslexia doesn't mean a person is not smart or doesn't want to learn.

Dyslexia is the most common learning disability and affects about 3-7% of the population. However, as many as 20% of people may have some degree of dyslexia symptoms. It's more often diagnosed in boys, but it can affect both boys and girls equally. Dyslexia can co-occur with other learning disorders like ADHD or auditory processing disorder.

Scientists have been studying dyslexia to understand its causes. They have found differences in the brains of people with dyslexia, especially in areas involved in reading. There may also be genetic factors involved. The complexity of the language a person learns can also affect dyslexia.

Dyslexia can be diagnosed through tests that assess memory, vision, spelling, and reading skills. Early intervention and support can help children with dyslexia improve their reading abilities. While dyslexia can present challenges, it's important to remember that individuals with dyslexia can also have unique strengths and talents.
