

Hi Fellow Trader:

During our Beta launch of our Big Kahuna Trading Club, we are thrilled to offer FREE access to several services for a limited time to gauge public interest.

One of these services is 'Bermuda Triangle Stocks.' Learn more about it here:

[Bermuda Triangle Stocks](#)

'Bermuda Triangle Stocks' are unique in that they align with specific points in a cycle-based TSS Channel. These stocks are poised for explosive breakouts in the weeks ahead, driven by 'cycle-based' price squeezes. These price squeezes are generated by our proprietary BMI (Breakout Momentum Indicator) and VR (Vector) indicator. They often respond in spectacular fashion at these cycle junctures, signaling significant potential for 'big moves' in the near future.

Of course, market conditions can play a significant role, either dampening or fueling these opportunities, depending on the overall market sentiment.

As price action traders, our role is to monitor unfolding cycles and seize opportunities to 'get in ahead of the crowd' when market conditions favor such actions. Bermuda Triangle stocks can be some of the market's biggest movers, occasionally leading to stratospheric breakouts, like TOP (3600% gain in two days) and HKD (10,700% gain in 8 days)—no, it's not a typo—following these momentum and stock cycle price squeezes.

If you find stocks generated by this system appealing, trade them prudently while keeping an eye on overall market conditions. During this phase, we strongly encourage you to use a trade simulator until you become comfortable with this trading style. Be vigilant regarding the market's temperament, especially in a volatile market like this one. In such cases, it's advisable to trade with only 25% of your account until you master this new approach.

Even then, consider limiting each trade's size to 20% of that 25% (e.g., for a \$100K account, trade with \$25K and restrict your position size to a maximum of \$5K per trade). In case of a 50% loss on a position, your maximum portfolio exposure should be \$2,500, representing 2.5% of your overall portfolio.

Please note that these reports will be more concise during this Beta launch as we are simultaneously launching four other reports to gauge demand.

We will assess the level of interest in this service to determine if it can stand alone or if it should be integrated into our other services. If you find value in our analysis, please consider sharing it with your social media network. Your support may lead us to prioritize this report when we fully launch our trading club in 2024.

Bermuda Triangle trades resulting from high-tension price squeezes can be highly powerful, especially when combined with the right options trades. They often offer explosive returns with minimal capital risk (as low as \$100). In a strong market, they have the potential to yield substantial profits.

More information on Shockwave Power Options can be found at: <https://www.bigkahunatradingclub.club/swpo-landing>

We hope for improved market conditions soon, as they may bring more of these setups. However, prevailing macroeconomic challenges, including a bloated federal deficit, high inflation, and high interest rates, are currently affecting the market. Therefore, it's essential to manage your expectations and understand that even the best setup may struggle in challenging market conditions.

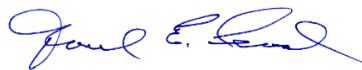

We never force trades. If a good setup isn't available, we'll let you know.

We trust that you'll appreciate the simplicity of our trading system. If you find our content valuable, please help us spread the word about TSS Cycle Trading and the Big Kahuna Trading Club.

So, we are going to keep this simple for now until we see if there is significant demand for this product. You'll be able to access the Bermuda Triangle Stocks report generally by late Sunday and Wednesday evening (generally by 10-PM) via our Twitter feed at www.Twitter.com/kahuna_club Set notifications so that you don't miss out on the report.

And again, if you like the analysis and think it would be helpful to other traders, please share our Twitter and social media links.
