

Hi Fellow Trader:

We are excited about this new service we are offering during our Beta launch called "Rogue Wave Trader." These are stocks that are generally in various stages of a "super-cycle" and we are monitoring for a trade entry.

During this time you are highly encouraged to use a trade simulator until you get comfortable with this style of trading.

Pay attention to the overall market demeanor and know that in a sketchy market (this is one) you should only trade with 25% of your account until you get up to speed with any new style of trading.

And even at that, ideally limit maximum trade amount to 20% of that 25% (Ex: \$100K account-trade with \$25K and limit position size to a maximum of \$5K per trade). If you take a 50% loss on a position then the maximum portfolio exposure would be \$2500 of the overall portfolio or 2.5%.

These reports will be abbreviated reports from our usual report length in the past since we are simultaneously putting out four other reports at the same time during this Beta launch to determine which ones have more demand.

We'll be gauging the level of interest in this service to determine if it can manage as a standalone service or if we'll roll it into one of our other services.

If you find value and like the analysis we provide, please share it with your social media tribe and maybe we will lead with this report when we fully open our trading club in 2024.

Rogue Wave Trades coming off of price squeezes can be very powerful trades. In a hot market, they can make you a lot of money. Hopefully, market conditions will improve soon so that we do see more of these setups.

Prevailing macro-economic headwinds with a bloated federal deficit, high inflation and high interest rates make that premise questionable but we generally try to trade what we see and not what we "think."

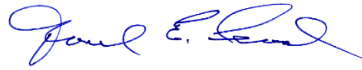

We hope that you will appreciate the simplicity of our trading system and if you like what you see, spread a good word about TSS Cycle Trading and the Big Kahuna Trading Club.

So, we are going to keep this simple for now until we see if there is significant demand for this product. You'll be able to access the Rogue Wave Trader Stocks report generally by late Sunday and Wednesday evening (generally by 10-PM) via our Twitter feed at www.twitter.com/kahuna_club Set notifications so that you don't miss out on the report.

You can learn more about Rogue Wave trading and the Big Kahuna Trading Club [HERE](#)

And again, if you like the analysis and think it would be helpful to other traders, please share our Twitter and social media links.
