

THE RADIANCE RESET: MIDLIFE SKINCARE FOR “GLOWING CONFIDENCE”

Hey gorgeous, Let's be real—have you found yourself looking in the mirror and not recognize the face looking back at you?—midlife skin has its own personality. Between hormones, collagen loss, sun damage, and just plain life, our skin starts asking for a little more TLC. The good news? With the right clean, barrier-friendly routine (and a little Korean skincare magic), your skin can bounce back, glow, and stay strong.

Do You Feel Like You Have Tried it All?

Here's what's really going on: Collagen loss starts in our 20s, but menopause speeds it up. Dryness increases because oil production slows down. Sun damage from the past shows up now. Hormonal shifts bring sensitivity, redness, and sometimes breakouts.

As a former Esthetician and being in professional skincare sales I feel like I have tried it all.

- Retinols
- AHA's
- Chemicals in general
- Hydroquinone, Tretinoin

All with the promise of a “youthful” glow but all they left me with was dry , dull flakey looking skin...I never achieved that “glow” they promised and no real results. They are actually continuing to break down that protective skin barrier and constantly stripping it.

HYDRATE PROTECT NOURISH REPAIR

The Skin Barrier

Your Bodyguard for your Face

Your skin barrier is like cling-wrap for your face—it locks the good stuff in (hydration, nutrients) and keeps the bad stuff out (pollution, irritants). Over-exfoliation, harsh cleansers, or strong fragrance? Barrier bullies. Hydrating layers, ceramides, and peptides? Barrier builders.

Why Clean Skincare Matters

Forget the harsh chemicals, dyes, and fillers—your skin deserves better. Clean skincare means: No harsh chemicals that strip or inflame. Gentle but effective actives that work with your skin. Better absorption without the junk. Consistency without irritation.

Your Core Skin Routine

Step 1:

Gentle Cleanse – no soap-stripped nonsense & why the “double cleanse” is important:

- The Oil Cleanse: Dissolves make-up and oil based impurities including waterproof make-up and sunscreen.
- Follow with a cleanser that offers gentle exfoliation while protecting the skin barrier.
- The Snow Enzyme Cleanser: soft and gentle enzyme infused cleansing that offers gentle exfoliation while removing dead skin cells and impurities.
- Cleansing Powder Wash: Powder cleanser for a brighter skin texture, powder based enzymatic cleanser whisks away dead skin cells and impurities.

Step 2:

Hydrating Layers – essences, serums that penetrate in deep featuring :

- Giant Byoungpool plant, this is our very own PATENTED trademarked plant that is grown in the pristine Jeju lava water. No one else has this unique technology.
- JeJu Lava Energy Water is found beneath the volcanic bedrock of Jeju Island Volcano this untouched water is full of minerals and has gone through a natural filtration system yielding amazing Hydrating and nutrient benefits to the skin.
- Combine these with Liposome Technology for deep penetration into the skin layers for ultimate hydration and repair.
- Find our unique “Boo Se Boo” system [HERE](#) also known as our Dermatology First Package

Step 3:

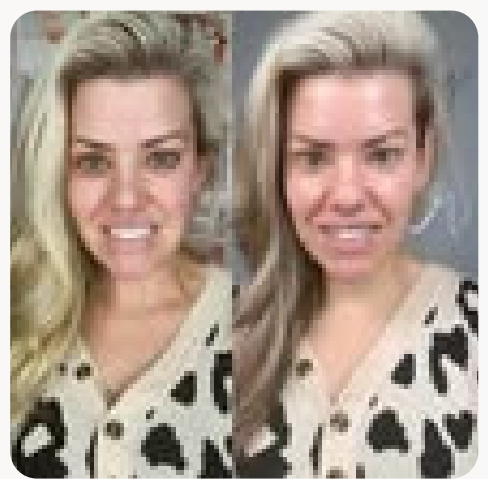

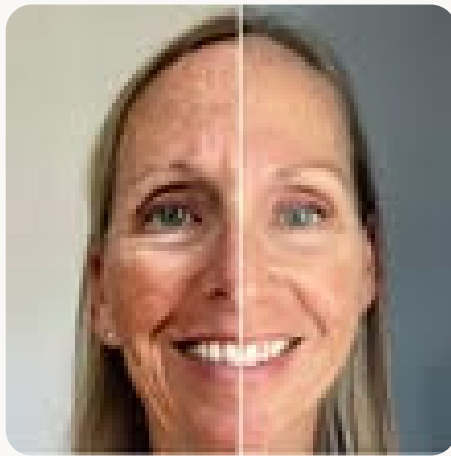

- Protect – Seal the deal with our number ONE selling moisturizer!
- Infuse moisture and nutrients.
- Improve skin elasticity and protect the skin barrier with a glow.
- A hypoallergenic formula great for all skin types
- Over 40 million jars of this cream have been sold in a country of 50 million people, that's a true testament !
- Find the Number one selling Moisturizer HERE also known as our Dermatology Cream
