

Data Viewer App - Quick Start Guide

1. Install Python 3.10 or later (<https://python.org>).
2. Open your terminal or VS Code terminal.
3. Navigate to the folder containing data_viewer_app.py.
4. Run this command to install the libraries:

```
pip install streamlit pandas plotly
```
5. Launch the app by running:

```
streamlit run data_viewer_app.py
```
6. Your browser will open. Click 'Choose CSV file' and upload customer_data.csv.
7. Select your X-axis and Y-axis columns and choose either a Bar or Pie chart.
8. Enjoy instant visual insights and explore your data visually!
