Clinical Research Institute **CAREERINPHARMA** Transformation, not information

For doctors, healthcare professionals, and life science graduates looking to embark on a new career in the medical field, pursuing opportunities in the pharmaceutical industry can be highly rewarding. With your specialized knowledge of medical conditions, clinical care, and the healthcare sector, you can excel in a pharmacy researcher or consultant, ultimately benefiting both patients and public health. However, the transition can be challenging and often requires expert guidance. This is where CareerInPharma steps in, offering curated services that address individual challenges. The institute is specifically committed to transformation rather than merely providing information, empowering healthcare professionals and life science graduates to find their ideal career paths, while also actively supporting women in advancing their careers providing them with tailored resources and opportunities.

From the Scratch

In an interview with Dr. Neema Bhatt, the Director and Co-Founder of CareerInPharma, she shared insights into how the institute was established. Dr. Neema, a healthcare professional and dentist, initially sought non-clinical roles after realizing that clinical practice was not her passion. This led her to join the pharmaceutical industry in 2017 as a safety associate at a prominent multinational corporation.

During the COVID-19 pandemic, she noticed that many doctors were reaching out to her, seeking corporate positions that offered weekends off, flexible schedules, and work-from-home opportunities. While providing guidance to these professionals, Dr. Neema recognized that her knowledge of the pharmaceutical industry should be shared, as many doctors were in need of corporate jobs and did not find clinical work viable. This insight ultimately inspired the founding of CareerInPharma, aimed at helping healthcare professionals and life science graduates transition into fulfilling corporate careers.

Empowering Healthcare Professionals for Transformative Careers in Pharma

CareerInPharma is proud to hold a 4.9-star rating on Google, backed by over 350 reviews. Additionally, the institute has achieved notable milestones across social media, surpassing 25,000 followers on both YouTube and LinkedIn, while building a strong community of over 16,000 followers on Instagram.

The institute currently offers a range of diploma programs, including clinical research, pharmacovigilance, clinical data management, drug safety physician training, and medical writing. Alongside these core courses, it provides training in soft skills and IT, specifically designed for doctors who may lack familiarity with technology. All programs are job-focused, with the institute

offering ongoing support to participants throughout the interview process, ensuring they are well-prepared for their career advancement.

Also, the institute prioritizes community engagement and job placement over merely promoting its programs. With a thriving community of 20,000+ members—many of whom have remained connected for more than five years—CareerInPharma emphasizes ongoing support and development for its participants, distinguishing itself from other institutes in the field.

Importantly, to maintain high standards and accessibility, CareerInPharma holds all necessary certifications, including ISO certification. The programs are delivered entirely online, featuring a combination of pre-recorded lectures and live classes, allowing students from any time zone to learn at their convenience. The institute's robust support system ensures that students, whether in India, the UAE, or elsewhere, receive the guidance they need throughout their learning journey.

Tomorrow-ready Institute

CareerInPharma ensures that its programs and training are aligned with the evolving demands of the pharmaceutical industry. To achieve this, the institute brings in experienced trainers from various pharmaceutical companies, who are well-versed in the latest trends, technologies, and automation in the field. Additionally, CareerInPharma actively participates in conferences, seminars, and industry meetings to stay informed about new developments, while encouraging trainers to deepen their expertise. The institute also pursues strategic collaborations with companies, industry leaders and institutes such as Jamia Hamdard for various events and endeavors.

Career Transformations at CareerInPharma

CareerInPharma has numerous success stories, with new ones being added each month. Two standout examples illustrate the institute's impact:

Dr. Kaveesh Khatri, after 20 years of clinical practice, successfully transitioned into the non-clinical sector at the age of 49. While many consider retirement at this stage, Dr. Khatri chose to acquire new skills by studying clinical research and pharmacovigilance at CareerInPharma. In just two months, he secured a role as a Medical Reviewer at a prestigious multinational company, enabling him to work from home—a long-held aspiration of his.

Hema Shaji, who completed her B.Pharmacy in 2020, took a four-year gap to prepare for the UPSC exams. After this gap, she felt uncertain about her future in the pharmaceutical industry. However, after joining CareerInPharma, her fortunes changed. Within just one month, she secured a position as a Pharmacovigilance Associate at a leading MNC, fulfilling her career dreams as well.

In the Days to Come

CareerInPharma has set ambitious goals for its future, with a primary focus on introducing new programs in emerging fields like biotechnology and regulatory affairs. Another key objective is to expand its student reach by enhancing its online presence and forming partnerships with educational institutions, ensuring its programs are accessible to individuals pursuing pharmaceutical careers, regardless of location. And lastly, the institute is dedicated to supporting the growth of the pharmaceutical industry by producing highly skilled professionals who can meet its changing demands, by preparing students for successful job placements and impactful contributions to their organizations.
