Vision And Mission

Our Vision

To be the best training partner for organizations and healthcare professionals alike for their training needs pertaining to the job roles in pharma companies

Our Mission

To help create awareness among healthcare professionals about career opportunities in various roles inside pharma industry and help them get employed through our assistance

Origins of the Company

It all started when Dr Neema decided to quit her clinical dental practice to join a pharma company as Drug Safety Associate in Bangalore in 2018.

Looking at the numerous queries she was getting from her friends on how to make career inside pharma industry, she started giving guidance on LIVE zoom sessions.

This gradually evolved to become a full fledged training company catering to all healthcare professionals and helping them get a job

Clinical Research Institute **CAREERINPHARMA** Transformation, not information

For doctors, healthcare professionals, and life science graduates looking to embark on a new career in the medical field, pursuing opportunities in the pharmaceutical industry can be highly rewarding. With your specialized knowledge of medical conditions, clinical care, and the healthcare sector, you can excel as a pharmacy researcher or consultant, ultimately benefiting both patients and public health. However, the transition can be challenging and often requires expert guidance. This is where CareerInPharma steps in, offering curated services that address individual challenges. The institute is specifically committed to transformation rather than merely providing information, empowering healthcare professionals and life science graduates to find their ideal career paths, while also actively supporting women in advancing their careers providing them with tailored resources and opportunities.

From the Scratch

In an interview with Dr. Neema Bisht, the Director and Co-Founder of CareerInPharma, she shared insights into how the institute was established. Dr. Neema, a healthcare professional and dentist, initially sought new clinical roles after realizing

During the COVID-19 pandemic, she noticed that many doctors were reaching out to her, seeking corporate positions that offered weekends off, flexible schedules, and work-from-home opportunities. While providing guidance to these professionals, Dr. Neema recognized that her knowledge of the pharmaceutical industry should be shared, as many doctors were in need of corporate jobs and did not find clinical work suitable. This insight ultimately inspired the founding of CareerInPharma, aimed at helping healthcare professionals and life science graduates transition into fulfilling corporate careers.

Empowering Healthcare Professionals for Transformative Careers in Pharma

CareerInPharma is proud to hold a 4.9-star rating on Google, backed by over 350 reviews. Additionally, the institute has achieved notable milestones across social media, surpassing 25,000 followers on both YouTube and LinkedIn, while building a strong community of over 16,000 followers on Instagram.

The institute currently offers a range of diploma programs, including clinical research, pharmacovigilance, clinical data management, drug safety, physician training, and medical writing,

offering ongoing support to participants throughout the interview process, ensuring they are well-prepared for their career advancement.

Also, the institute prioritizes community engagement and job placement over merely promoting its programs. With a thriving community of 20,000+ members—many of whom have remained connected for more than five years—CareerInPharma emphasizes ongoing support and development for its participants, distinguishing itself from other institutes in the field.

Importantly, to maintain high standards and accessibility, CareerInPharma holds all necessary certifications, including ISO certification. The programs are delivered entirely online, featuring a combination of pre-recorded lectures and live classes, allowing students from any time zone to learn at their convenience. The institute's robust support system ensures that students, whether in India, the UAE, or elsewhere, receive the guidance they need throughout their learning journey.

Tomorrow-ready Institute

CareerInPharma ensures that its programs and training are aligned with the evolving demands of the pharmaceutical industry. To achieve this, the institute brings in experienced trainers from various pharmaceutical companies, who are well-versed in the latest trends, technologies, and automation in the field. Additionally, CareerInPharma actively participates in conferences, seminars, and industry meetings to stay informed about new developments, while encouraging trainers to deepen their expertise. The institute also pursues strategic collaborations with companies, industry leaders and institutes such as Jamia Hamdard for various events and endeavors.

Career Transformations at CareerInPharma

CareerInPharma has numerous success stories, with new ones being added each month. Two standout examples illustrate the institute's impact:

Dr. Kantesh Khetani, after 20 years of clinical practice, successfully transitioned into the non-clinical sector at the age of 49. While many consider retirement at this stage, Dr. Khetani chose to acquire new skills by studying clinical research and pharmacovigilance at CareerInPharma. In just two months, he secured a role as a Medical Reviewer at a prestigious multinational company, enabling him to work from home—a long-held aspiration of his.

Hema Shaji, who completed her B.Pharmacy in 2020, took a four-year gap to prepare for the UPSC exams. After this gap, she felt uncertain about her future in the pharmaceutical industry. However, after joining CareerInPharma, her fortunes changed. Within just one month, she secured a position as a Pharmacovigilance Associate at a leading MNC, fulfilling her career dreams as well.

In the Days to Come

CareerInPharma has set ambitious goals for its future, with a primary focus on introducing new programs in emerging fields like biotechnology and regulatory affairs. Another key objective is to expand its student reach by enhancing its online presence and forming partnerships with educational institutions, ensuring its programs are accessible to individuals pursuing pharmaceutical careers, regardless of location. And lastly, the institute is dedicated to supporting the growth of the pharmaceutical industry

Our USP

Highly Qualified Faculty

Most of our faculty is doctor by degree who have now made their career in the pharma industry

Industry Experience

All our faculty members are working in the industry from a long time and teach practical insights which they get in daily professional life

24x7 Support

We not only provide but also help in transformation through our never ending constant 24x7 support. Always available over email, phone call or whatsapp for a discussion

Job Preparation

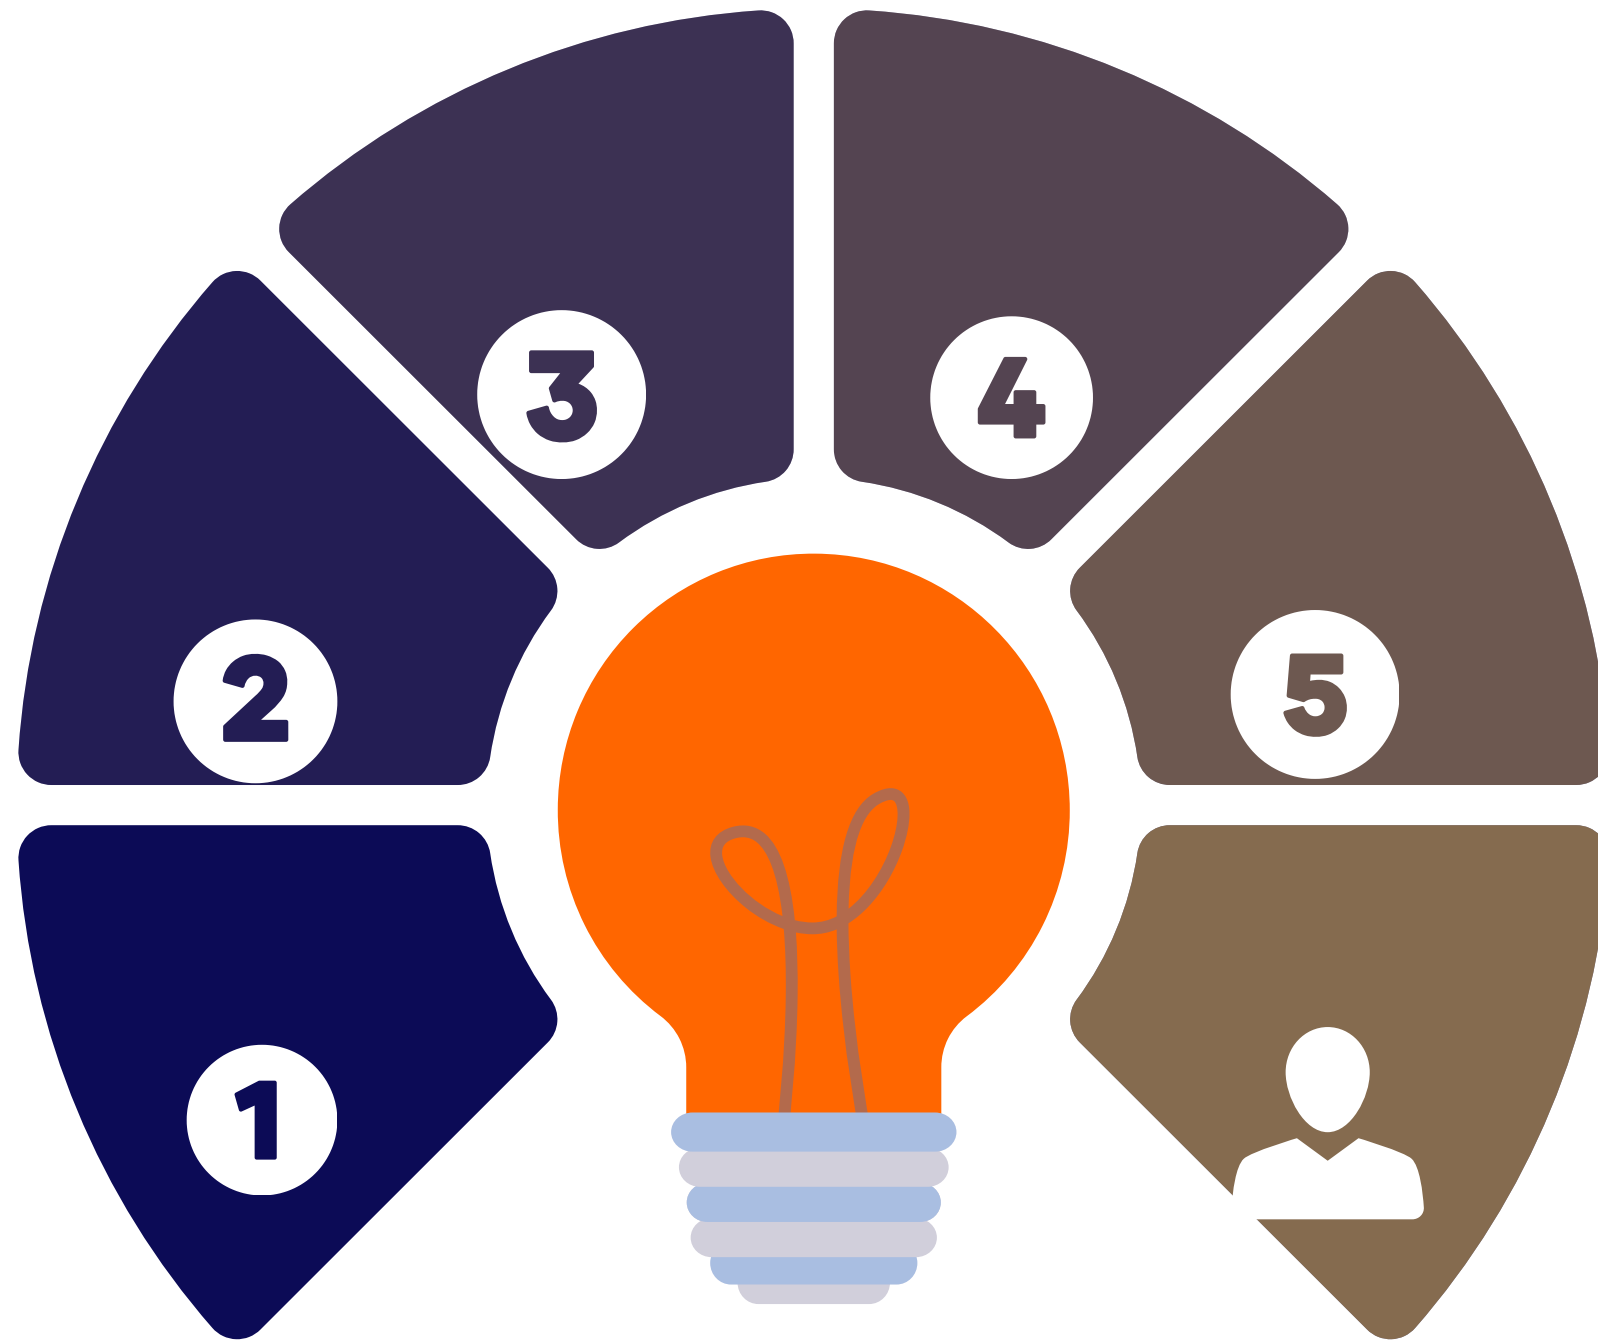

We not only provide technical knowledge but also prepare our students for jobs by working on their CV & preparing for interviews

Emotional Counselling

We also provide emotional counselling on regular basis by bringing experts to address our student's stress or any other emotional disturbance so that they get success in getting job

Some Key Statistics

1

1,00,000+ People Made Aware

Till date, we have spread awareness about this career in more than 1,00,000 people across India and world through our webinars and guest speaker sessions

2

1500+ Trained

We have trained more than 1500 students so far in our training programs

3

Degrees

We have students having degrees - MBBS, BDS, BAMS, BHMS, BUMS, BSMS, BPT, BPharma, B.Sc(Nursing), BSc(Microbiology/Biology/Zoology/Biotechnology)

4

Students Locations

We have students not only from all over India but also from abroad such as Gulf countries, USA, Australia etc

5

Job Locations

Our students are working in multiple cities across India and world such as - Delhi, Chandigarh, Bangalore, Chennai, Hyderabad, Pune, Mumbai, Dubai, Sydney, Washington etc. Many are doing WFH as well.

It's a great platform for learning.. I have enrolled in clinical research and pharmacovigilance. They conduct live lectures every week and also provide complete module and recorded lectures.. They help in every aspect of learning phase and also keep us motivated all the time.. They also help even after completion of course

Dr. Akanksha Jujgar

Hello,im Dr. Akanksha Jujgar. I have just completed my Advanced PG Diploma in Pharmacovigilance and Clinical Research from Career in Pharma. And i must say the course was worth it. Dr. Neema Ma'am explained all the concepts very well and made it easy for us to learn . Dr. Manjula Ma'am also cleared our each and every doubt at every session. The sessions were very informative. Beside the course, the CIP team helped in resume building,LinkedIn profile building and everything. No matter what the time is , they are always ready to help. They are with us from start of the course till we get jobs. So im very glad that i joined the course. Lastly, I will refer anyone who wants to get into PV and CR field to join the CIP. Thank you Dr. Neema Ma'am and the whole CIP team.

Both valuable and informative course with the certification every way useful to the life science graduates which makes us stand out in the crowd. Dr Neema Mam's lectures are very simple and understandable. The way she explains things and clears doubts is top notch. Dr Manjula mam's weekly QA sessions, wednesday's sessions and other informative sessions helped us a lot throughout the course. Team work by CIP in WhatsApp groups and telegram groups are inspiring, igniting our spirits, motivating, helping in every ways for job hunting as well. Thank you so much Dr Neema mam, Dr Manjula mam, Dr Bavna mam, Dr Kratika mam and everyone of Team CIP for your great teaching and good work. Expecting job soon.Keep rocking 🙌🔥

★★★★★ 5 months ago

I came to know about a Career In Pharma through an Instagram ad. I was contemplating a career change while seeing the ad, but I had doubts because not all education ads are genuine, and some try to take money from you. I contacted them with my doubts. I attended Dr. Neema's webinar, and it provided me with a clear idea. They helped me address all my concerns and educated me about the pharmaceutical industry and its opportunities. They are 100% genuine; they don't guarantee you a job, but they assist you in various ways to pursue a job that aligns with your priorities. Even after completing your course, they continue to support you with education and interview training, providing encouragement. I want to express my gratitude to the Career In Pharma team for their assistance.

This course helped me to gain knowledge in this Pharmacovigilance and clinical research field and provides an outline of it. It was well organized, clear, and easy to follow. Their way of teaching is very easy to understand and staffs are genuinely care about your progress. It was a good experience for me to learn in CIP. 😊
