TOP RATED INSTITUTE IN INDIA

About Us:

CareerInPharma is **India's first ISO-certified and largest online clinical research training institute, based in Bangalore. Founded in 2019 by Dr. Neema Bisht and Mr. Harshit Mohan**, it serves professionals from medicine, pharmacy, nursing, life sciences, and IT, helping them transition into the pharmaceutical industry.

Dr. Neema Bisht, a former dentist, shifted to pharmacovigilance in 2018, seeking financial stability and work-life balance. During the COVID-19 pandemic, she began mentoring healthcare professionals via LIVE Zoom sessions, which eventually led to the creation of CareerInPharma. Recognizing the gap between qualifications and career opportunities, she provides expert guidance, training, and career support to help professionals secure well-paying jobs in the pharmaceutical sector.

Today, the institute offers specialized training in **clinical research, pharmacovigilance, Medical Writing, Drug Safety Physician, Regulatory Affairs, Medical Coding and more, with new courses continually added to meet industry demands.**

BEST PHARMA TRAINING INSTITUTE

Our Vision

We aim to become the leading career transformation partner for healthcare professionals, doctors, and life science graduates by helping them **smoothly transition into pharmaceutical industry roles** and achieve long-term career success and financial independence.

Our Mission

Our mission is to address the career challenges faced by healthcare professionals, especially women, by creating **awareness about non-clinical opportunities** in the pharmaceutical sector. We offer personalized, industry-relevant training in Clinical Research, Pharmacovigilance, Medical Writing, Drug Safety Physician, Clinical Data Management, and Medical Coding. We have conducted over **200+ webinars** and career sessions to educate professionals, and we are committed to training and placing 100,000 individuals in top companies like Parexel, Tata, IQVIA, Accenture, Novartis, Cipla, Zenrise CRO and so on.

CareerInPharma why?

Get Training from India's first online ISO certified leading training Institute in Clinical Research and Pharmacovigilance.

Support for **Prestigious Certifications** (ICH-GCP Certification from NIH, USA & WHO Uppsala Certification).

Industry-Aligned Course Content. Lifetime Access to **Course Materials**.

E-Certification Upon Completion for Added Credibility.

Flexible **Online Learning** – Anytime, Anywhere with Recorded session for future review.

Interactive Sessions with Instant Doubt Resolution.

Job & Research-Oriented Courses at **Affordable Prices**.

Convenient Timings for Students & Working Professionals.

Our Placement Process

Get Your Customized **ATS resume** DONE BY US.

Get Your Customized Expert **LinkedIn Profile** DONE BY US.

Training by Expert Industry Professionals-Most of our faculty is doctor by degree who have now made their career in the pharma industry. All our faculty members are working in the industry from a long time and teach practical insights which they get in daily professional life

Job Updates for Career Advancement: We provides Job Assistance and also help in transformation through our never ending constant **24x7 support**. Always available over email, phone call or whatsapp for a discussion

We also provide **emotional counselling** on regular basis by bringing experts to address our student's stress or any other emotional disturbance so that they get success in getting job.

Mock Interviews & Interview Preparation Assistance for Job Readiness. We don't just focus on technical training we also equip our students for real-world success. Our support includes interview preparation, placement assistance, and opportunities for professional networking to ensure a smooth transition into the industry.

What is Drug Safety Physician? (Medical Reviewer)

A Drug Safety Physician monitors and manages the safety of pharmaceutical products by analyzing clinical and post-marketing data, investigating adverse events, and developing risk management plans. They prepare key regulatory documents like **CSRs, PSURs, and RMPs**, ensuring compliance with global standards such as **ICH-GCP, FDA, and European laws**. Their expertise in case processing, signal detection, and risk mitigation is crucial for maintaining drug safety and pharmacovigilance.

Scope of Drug Safety Physician

The rapidly growing pharmaceutical and healthcare sectors are increasing demand for skilled drug safety and pharmacovigilance professionals. The role of **Drug Safety Physicians (Medical Reviewers)** is now vital in assessing drug safety, monitoring adverse events, and ensuring compliance with **global regulations like ICH-GCP, FDA, and European laws**. The global pharmacovigilance market is projected to reach **USD 20.64 billion by 2033**, offering lucrative career opportunities in drug safety, risk management and regulatory affairs. This course provides expertise in case processing, signal detection, safety data analysis, and medical reviews, preparing you for high-paying roles in pharma companies, **CROs**, and regulatory agencies. Enroll to gain the skills necessary to excel as a Drug Safety Physician and improve healthcare outcomes worldwide.

Who Should Apply for the Course?

Candidates should have a minimum of 55% in his/her graduation.

- Any UG/PG degree in Medical Doctor (MBBS)
- (Non-MCI also eligible)

Focus of the Program

- Understanding the fundamentals of pharmacovigilance, including its role in drug safety and patient care.
- The drug development process and clinical trial phases, including BA/BE studies and regulatory approvals.
- Key regulatory frameworks such as ICH GCP, IRBs, and ethics committees.
- Adverse drug reactions (ADRs), adverse events (AEs), and serious adverse events (SAEs), along with their classification and management.
- The importance of informed consent and protocol adherence in clinical research.
- Causality assessment techniques, including dechallenge and rechallenge methods.
- Signal detection, risk management, and reporting of safety concerns in pharmacovigilance.
- Case processing methodologies, including data entry, narrative writing, and MedDRA coding.

Skills You Will Learn

- Expertise in clinical trial processes, ethical considerations, and regulatory frameworks.
- Mastery of adverse event reporting, case processing, and medical narrative writing.
- Proficiency in safety databases like ARGUS and ArisG for data entry and report generation.
- Hands-on experience with signal detection methods and risk management planning.
- Knowledge of different pharmacovigilance reports, including ICSRs, PSURs, and DSURs.
- Understanding of medical coding systems like MedDRA and WHO-DD.
- Strong communication skills for regulatory submissions, audits, and compliance reporting.
- Preparation for pharmacovigilance job interviews with essential Q&A guidance.

What job roles are available for Drug Safety Physician in companies?

Entry-Level Roles

- Drug Safety Officer
- Medical Reviewer
- Pharmacovigilance Physician

Mid-Level Roles

- Senior Drug Safety Physician
- Risk Management Specialist
- Aggregate Report Reviewer (PSUR/DSUR Specialist)

Specialized Roles

- Signal Detection and Management Expert
- Benefit-Risk Assessment Specialist
- Clinical Safety Scientist

Leadership and Strategic Roles

- Drug Safety Manager
- Medical Director, Pharmacovigilance
- Head of Drug Safety

Regulatory and Consultant Roles

- Regulatory Safety Liaison
- Compliance and Safety Oversight Physician

Emerging Roles with Technology

- Real-World Evidence (RWE) Analyst
- AI and Automation Specialist in Drug Safety
- Digital Health Safety Expert

Curriculum

Modules:
