

# 3-Page Mini Funnel Blueprint

*How to Turn One PDF Into a Lead-Generating Funnel in Under 30 Minutes Using Systeme.io*

This simple guide walks you step-by-step through creating a high-converting funnel using free tools inside Systeme.io. From custom domains to automation—this is everything you need to duplicate the process and start collecting leads today.

## Step 1: Get a Free Systeme.io Account

Ask the person for their affiliate link and create a free account. You'll be able to build up to 3 funnels with automation for free. (Keep in mind, this is a free system but can create commissions if you ever decide to upgrade. This means if you choose to license the website – See step 5, you yourself will be able to become an affiliate as well.)

## Step 2: Purchase a Domain

Buy a custom domain from a provider like Namecheap or GoDaddy. This makes your funnel look professional and builds trust.

## Step 3: Connect Your Domain to Systeme.io

Inside Systeme.io, go to 'Settings' > 'Custom Domains'. Add your domain and follow the DNS instructions provided by Systeme. Then verify it through your domain provider's dashboard.

## Step 4: Set Up PayPal as Your Payment Gateway

In Systeme.io, go to 'Settings' > 'Payment Gateways'. Choose PayPal and follow the prompts to connect your PayPal account securely. This will allow you to collect payments for your \$4.50 playbook directly through your funnel.

## Step 5: Import Your Funnel Using a Share Code

Use the two funnel share links provided (you'll get this from your team/upline). This instantly copies the entire funnel and email campaign into your Systeme.io account. (There is a one time \$39 license fee for this)

## Step 6: Set Up the Thank You Email in Systeme.io

Inside the funnel, go to 'Emails'. Edit the email that gets sent after someone purchases. Add the download link for the book and thank them personally.

## Step 7: Add a Tag and Automation Rule

Under 'Automation', set a rule: 'When someone buys the book → Add tag [book\_buyer] → Send email [thank\_you]'. This keeps your leads organized and ensures everyone gets followed up with.

### **Step 8: Test Everything**

Use a different email to test your funnel. Make sure the purchase works, the thank you page loads, and the email with your book arrives in the inbox.

### **Optional Step: Customize Your Funnel**

Feel free to change text, branding, or images. The goal is to make it feel like yours while keeping the system duplicable.

### **Keep in mind, there are three ways to profit.**

1. 100% of every \$500/Week Playbook sale. APPROVED
2. Earn \$30 everytime someone pays \$39 to license the website.
3. Earn as an affiliate anytime someone upgrades their Systeme.io marketing site.
