A **secured line of credit** is a type of revolving credit facility where the borrower pledges an asset as collateral to the lender. This collateral acts as security for the loan, reducing the risk for the lender in case the borrower defaults on payments. You can walk into the bank with \$200-\$500 and give it to the bank and they will give you a revolving credit card to start using and they will bank your money to gain interest for 1 year.
