[Systeme.io In A Box 1.0 & 2.0 In A One Package](#): Use this offer in your downsell, I use this for \$7, and it's original price is \$14. You can resell this too. So keep this offer price between \$7 & \$14. You will find tutorials, email swipes, bonuses, social media content, funnels and canva templates in this offer. [Grab it from here for \\$7...](#)

Continue below

2024

Profitable PLR

Thank you for checking out this guide!

I'll show you, step by step, how to set up the Systeme.io 8 PLR course package.

First, make sure you've bought the PLR course package. [If you haven't, you can get it here.](#)

Don't have a Systeme.io account yet? No worries, [you can create a free one here.](#)

Just a heads-up, since you're interested in the PLR course, you'll need the webinar plan to import all 8 courses and funnels. Good news – you can [get the webinar plan at a 30% discount!](#)

2024

Profitable PLR

So without wasting any time let's get started.

Step 1: Purchase Systeme.io 8 PLR Course

If you don't have it yet, grab it from below with FREE bonuses.

Get PLR Bundle

Step 2: Download Bonuses On Thank You page

Once you've purchased the PLR bundle, you will be taken to a thank you page. There, you can download all your free bonuses.

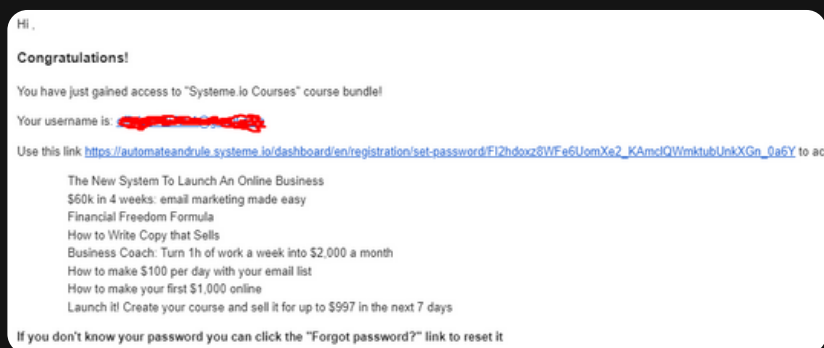

2024

Profitable PLR

Step 3: Check Your E-mail Inbox

You will get e-mail from Systeme.io with your course access.

Click the link and log in to your account. If you don't have a Systeme account yet, [you can create one here.](#)

After you logged in , **Go to > Dashboard > Student Dashboard > Enrollments Tab.** You'll find your course there.

Step 4: Account Setup

If you've already added a custom domain, set up a payment method, and sorted out your email integration, then you're good to go!

Haven't done these yet? No worries.

Check out the articles below for easy steps on how to get everything ready:

- [Adding a custom domain to your Systeme.io account.](#)
- [Fixing the CAA error when connecting your domain.](#)
- [Setting up a payment method.](#)

- [Connect custom business email in Systeme.io](#)

One important thing, avoid using a Gmail address for sending email campaigns.

Using Gmail can harm your email deliverability. Make sure you have a custom domain and a business email set up before you fire up your campaigns.

If you don't have a business email, you can [create a free Zoho business email here](#). It's free for life.

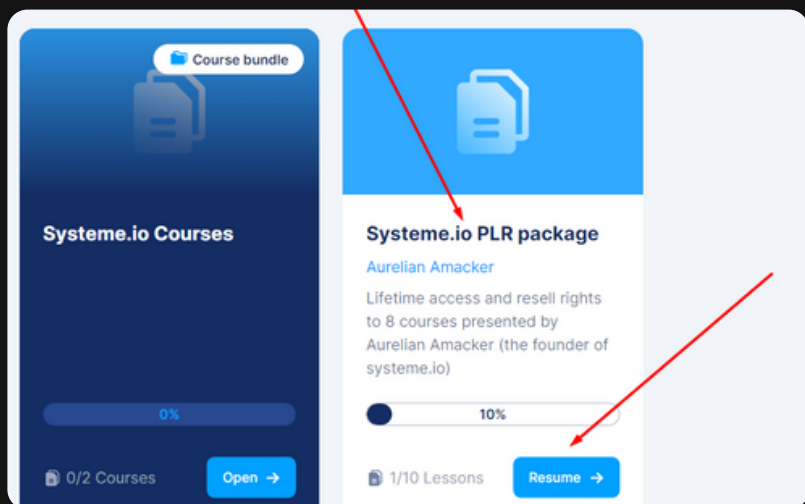

Then, you can use this Zoho email with systeme.io.

Step 5: PLR Package Setup

Cool, now that everything is set up, let's begin setting up your PLR course.

As I mentioned before, **Go to > Dashboard > Student Dashboard > Enrollments Tab.**

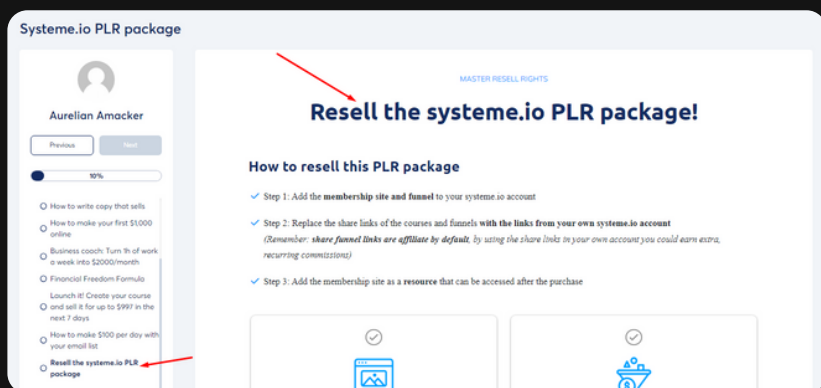

Open your course **"Systeme.io PLR Package."** Open it to get started.

When you open the course, on the left side, you will find all the courses modules. This includes email swipes, funnel scripts, course and raw videos.

Now, let's start by importing the PLR package into your account, so you can resell this course.

Scroll down a bit on the left side panel, and you'll see the last module titled **"Resell the Systeme.io PLR package"**. Open that module.

Now let's click on **"Step 1: Click here to download the membership site"**.

This will take you to the course section, where all the packages will be imported into your course area.

Resell the systeme.io PLR package!

How to resell this PLR package

- ✓ Step 1: Add the **membership site and funnel** to your systeme.io account
- ✓ Step 2: Replace the share links of the courses and funnels with the links from your own systeme.io account
(Remember: share funnel links are affiliate by default, by using the share links in your own account you could earn extra, recurring commissions)
- ✓ Step 3: Add the membership site as a **resource** that can be accessed after the purchase

Step 1: Click here to download the membership site

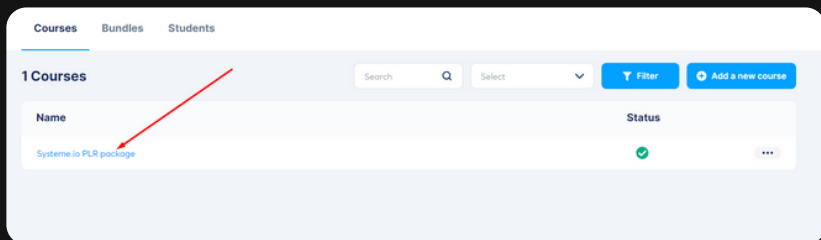

Step 2: Click here to download the sales funnel

2024

Profitable PLR

Now that the PLR package is in your account, go back to the previous module and select **"Step 2: Click here to download the sales funnel."**

When you click on it, the entire sales funnel will be imported into your account.

How to resell this PLR package

- ✓ Step 1: Add the **membership site and funnel** to your **systeme.io** account
- ✓ Step 2: Replace the share links of the courses and funnels with **the links from your own systeme.io account**
(Remember: share funnel links are affiliate by default, by using the share links in your own account you could earn extra, recurring commissions)
- ✓ Step 3: Add the membership site as a **resource** that can be accessed after the purchase

Step 1: Click here to download the membership site

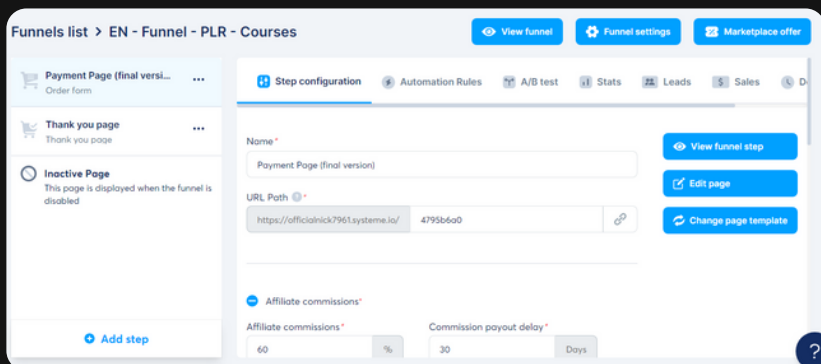

Step 2: Click here to download the sales funnel

2024

Profitable PLR

Once you click that, it will look something like this. Now main PLR sales funnel is in your account.

Note: If you are on the free plan and you have more than 3 funnels activated already, you will need to deactivate one funnel to be able to import the sales funnel.

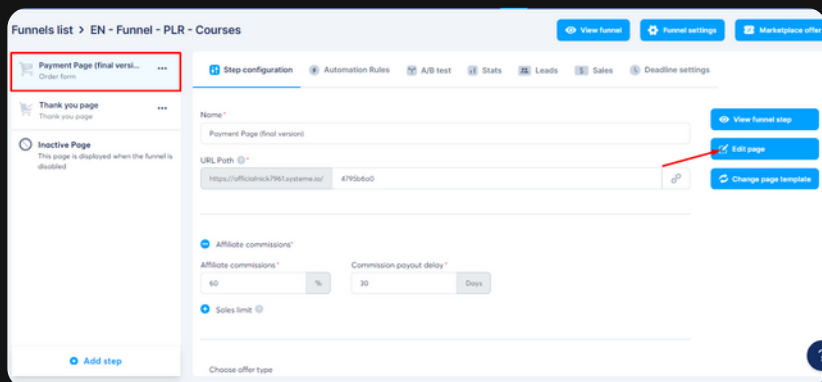

This sales funnel allows you to be able to resell the PLR course bundle and package.

Step 6: Funnel Customization & Setup

Now that you've installed the **PLR package** and **sales funnel**, let's get started on setting up and customizing your funnel pages.

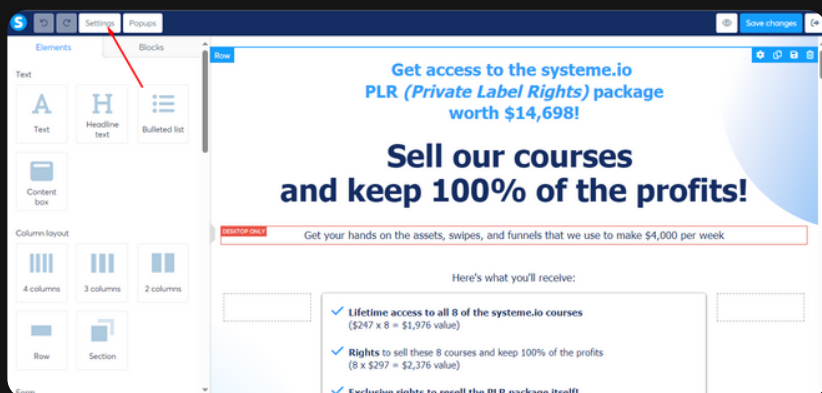

Go to **funnels**, on top menu, click on funnel you just imported, maybe it named as **"EN - Funnel - PLR - Courses"**.

Click on that. Now let's **"edit the page"**.

Once you click on that, Systeme.io will open its page editor. Here, you can change anything you want – the text, colors, images, etc.

Feel free to add your own touch.

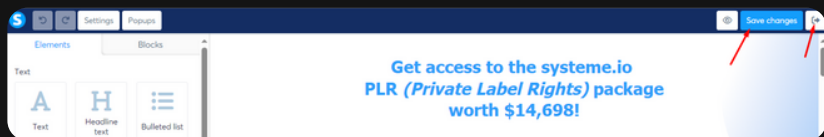

Next, head over to the **settings**. You'll find this on the top left side panel. Scroll down to the bottom, and you'll see a **checkbox labeled "Hide from search engines."** Make sure to uncheck this because you want your page to show up in Google searches.

Just scroll up a little from there, and you'll find the **SEO fields**. Here, you can add your **Meta title**, **Meta description**, and the **keywords** you want to use to rank your page on Google.

After you've made all the changes, be sure to save them. To do this, click the **"Save Changes"** button. Then, to exit the page, click the **"arrow"** button located on the top right side.

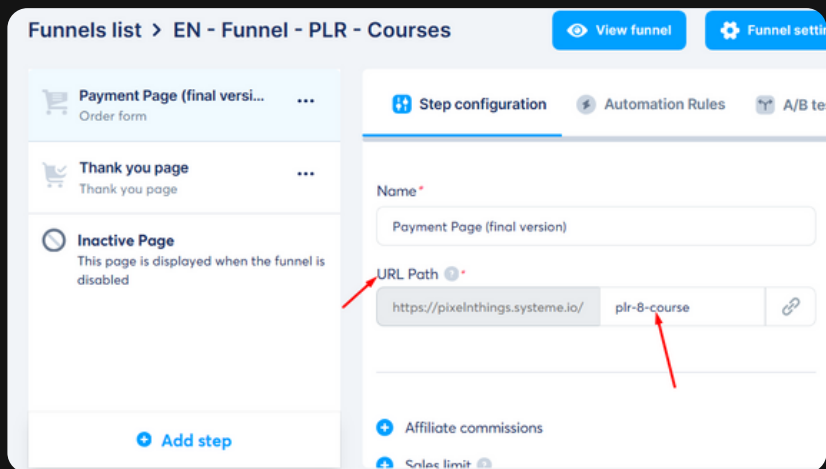

Step 7: Order Form Setup, Tags & Order Bump Creation

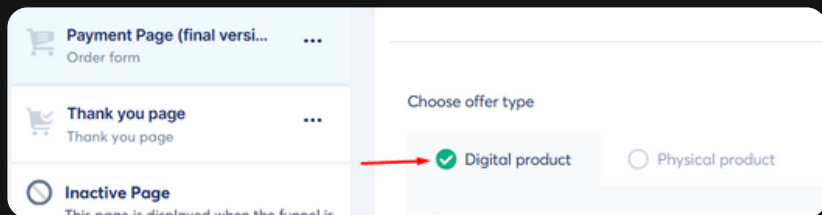

Now, change the default page number “URL path” to whatever you want.

But make sure it's easy to remember.

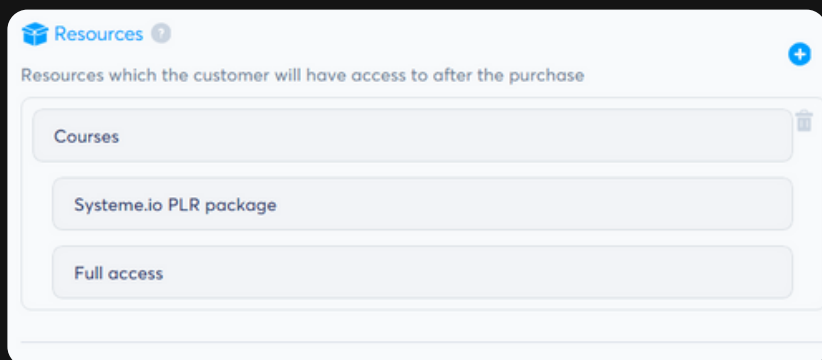

For example, you could use something like `/plr-8-course`

After setting the URL, scroll down a little and select the offer type as **"Digital Product."**

Now, click on the **"plus"** icon next to **"Resources"**. From the options, select **"Courses"**, and then pick **"Systeme.io PLR Package"**. After that, set the access type to **"Full Access"**. Then hit **save**.

When someone purchases a course from you, Systeme.io will automatically send them access to the course via email.

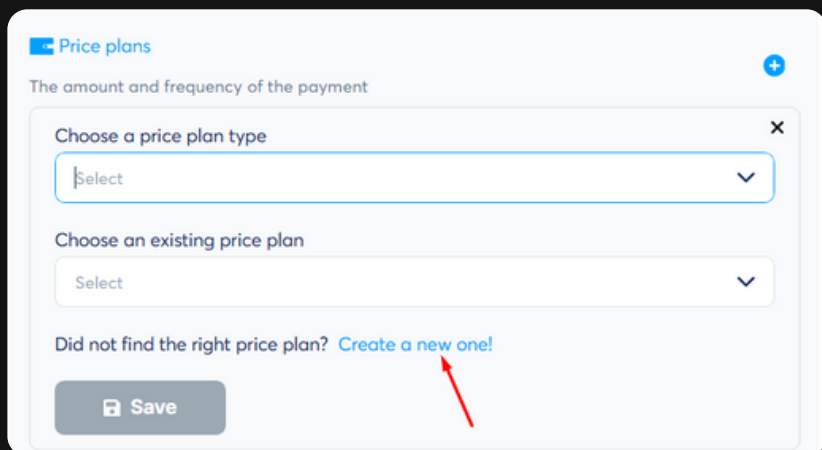

Next, let's decide on the price for your course. You have the flexibility to choose the price - it can range from \$57 to \$197. Feel free to offer discounts if you wish.

For now, we'll set the price at the original \$97.

Scroll down, and you'll find the "Price plans" section below "Resources".

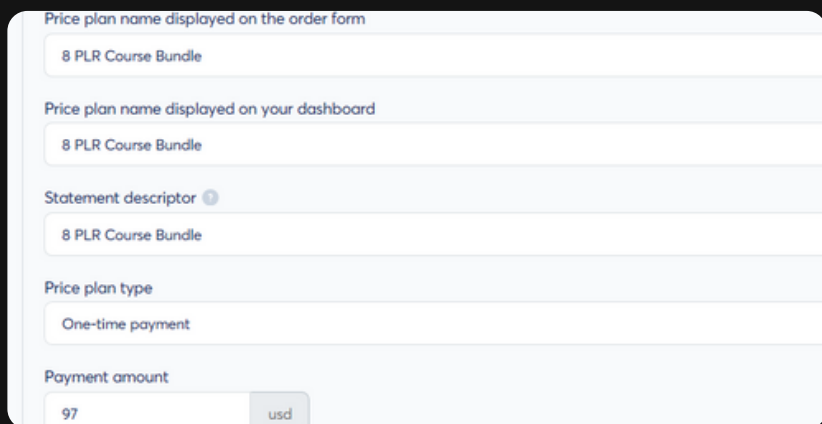

Click on the "plus" icon next to the "Price plans". If you have an existing plan, you can select it directly.

If not...then click on **“Create a new one”**.

The screenshot shows a 'Price plans' form with the subtitle 'The amount and frequency of the payment'. It contains two dropdown menus: 'Choose a price plan type' and 'Choose an existing price plan', both with 'Select' as the placeholder text. Below these is a link that says 'Did not find the right price plan? [Create a new one!](#)'. A red arrow points to this link. At the bottom left is a 'Save' button with a lock icon.

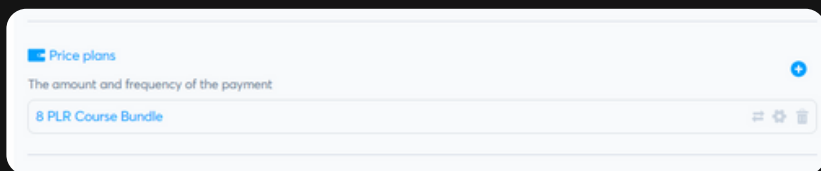

In first 3 fields, type **“8 PLR Course Bundle”**. Next choose **“One Time Payment”** as your price plan type. Enter the payment amount as **“97”**

This screenshot shows the form filled out with the following information:

- Price plan name displayed on the order form: 8 PLR Course Bundle
- Price plan name displayed on your dashboard: 8 PLR Course Bundle
- Statement descriptor: 8 PLR Course Bundle
- Price plan type: One-time payment
- Payment amount: 97 (with a 'usd' currency selector)

Now hit **save**.

The next section is "**Coupons**". Whether or not to offer them is entirely your choice, it's optional.

You can provide a fixed amount or a percentage discount. Feel free to try this feature if you're considering offering a discount.

Okay, moving on, you'll see a blue "**Order Bump**" button. This is also optional and can be used if you want to increase the value of the cart. Set it up if you're interested in this option.

2024

Profitable PLR

If you want to offer tech support or another digital product along with your PLR course, you can add an order bump for that.

Here are some examples of order bumps, like **Tech Support, An eBook, Mockups or various templates.**

Set the order bump price between **\$1 to \$57**, making sure it's related to your main product.

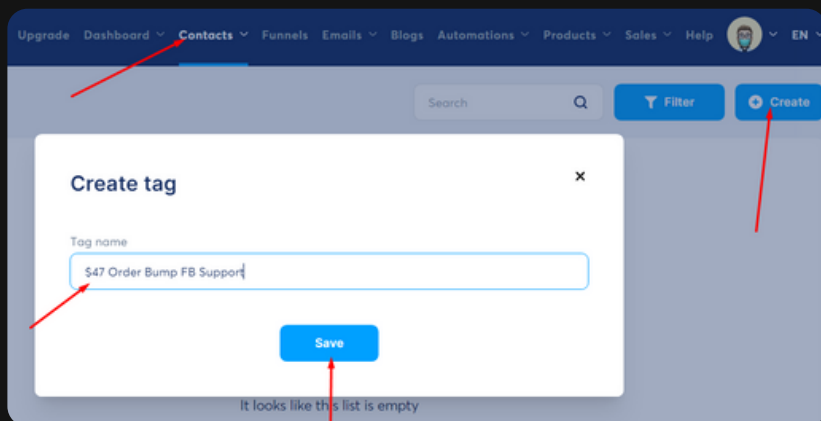

For example, if you're selling a PLR course, the order bump could be a "Setup PLR Checklist Guide", "Email Swipes Related to PLR", "PLR Sales Funnel Template" or "Social Media Posts To Promote PLR Courses" etc.

Let's say you want to add an order bump for "1:1 FB Messenger Support" priced at \$47.

First, create a tag by going to the top menu and selecting **Contacts > Tags > Create**.

Name your tag something descriptive like "\$47 Order Bump FB Support". This helps you easily identify it later.

Then hit **save**.

Let's create another tag, and I'll explain why later.

Click the **"Create"** button again. Name this new tag **"8 PLR Course Buyer"** and then hit **save**.

Now you have 2 tags, one for **"\$47 Order Bump FB Support"** and second one for **"8 PLR Course Buyer"**.

We'll use these tags to send emails to users about purchasing the course and the order bump.

Next, **go back to > funnels > and select the funnel you're working on, "EN - Funnel - PLR - Courses"**. In the order form, scroll down and click on the **"Order Bump"** button.

Hmmmm, looks familiar, right???

Order bump

Add this offer to your payment page using the "Order bump" element

Choose offer type

☒ Digital product ☐ Physical product

Resources ⓘ

Resources which the customer will have access to after the purchase

Price plans

The amount and frequency of the payment

Change the offer type to **"Digital Product"** since it's a digital and you're selling tech support through FB.

Then, in the order bump section, click on **"Resources"** and select **"Tags"** from the options. Choose the order bump tag you created earlier, **"\$47 Order Bump FB Support"**.

Finally, remember to hit **save**.

Order bump

Add this offer to your payment page using the "Order bump" element

Choose offer type

☒ Digital product ☐ Physical product

Resources ?

Resources which the customer will have access to after the purchase

Tags x v

\$47 Order Bump FB Support x v

With the tags now set up, let's create a price plan for your order bump.

First, in order bump section, click on **"Price Plans"** Since I don't have one already, I'll create a new one.

Price plans

The amount and frequency of the payment

Choose a price plan type x

Select v

Choose an existing price plan

Select v

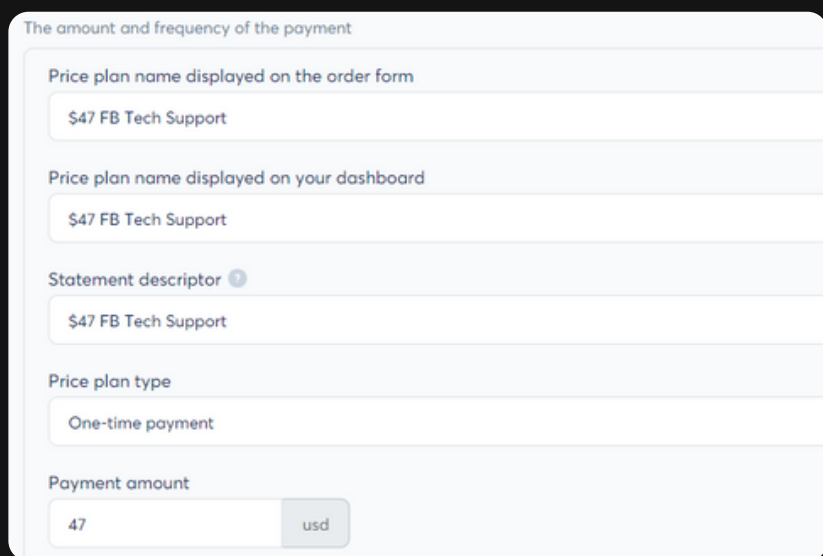

Did not find the right price plan? [Create a new one!](#)

Save

Click on **"Create a new one"**. In the first 3 fields, enter something like **"\$47 FB Tech Support"**. So you can know what it is in future.

For the price plan type, select **"One-time payment"**.

Then, set the **"Payment amount"** to **"47"**. Don't forget to hit **save**.

The screenshot shows a form titled "The amount and frequency of the payment". It contains five input fields, each with a label and a text input area. The first three fields are for the price plan name, and the last two are for the price plan type and payment amount. The "Payment amount" field has a separate "usd" button next to it.

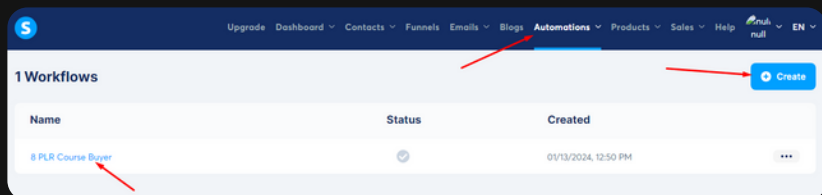

Field Label	Value
Price plan name displayed on the order form	\$47 FB Tech Support
Price plan name displayed on your dashboard	\$47 FB Tech Support
Statement descriptor ⓘ	\$47 FB Tech Support
Price plan type	One-time payment
Payment amount	47
Currency	usd

Step 8: Automation Setup For PLR Course & Order Bump

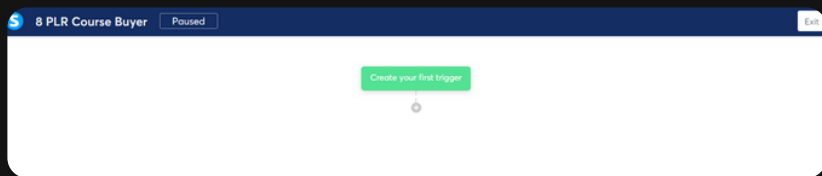

Now let's set up an email for those who purchase the PLR course and the order bump.

Head to **Automations** (in the top menu) > then to **Workflows**. Click the blue **"Create"** button.

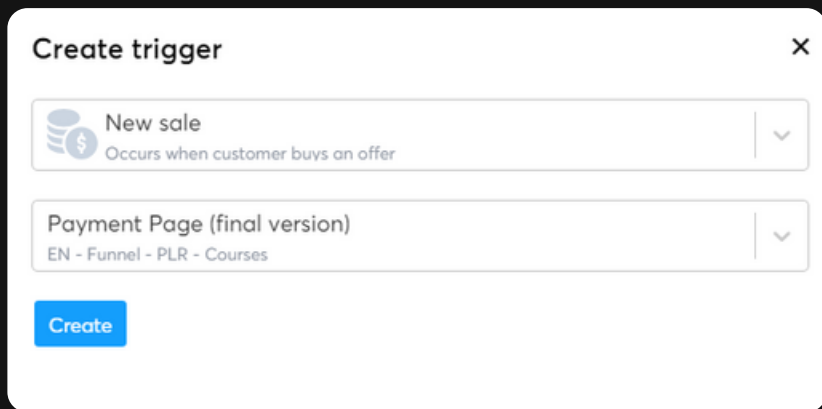

I'll start by creating an automation for the PLR course buyers. Name it **"8 PLR Course Buyer"** for clarity. It's helpful to use descriptive names so you can easily remember what each automation is for.

Click on **"8 PLR Course Buyer"** to open the workflow builder.

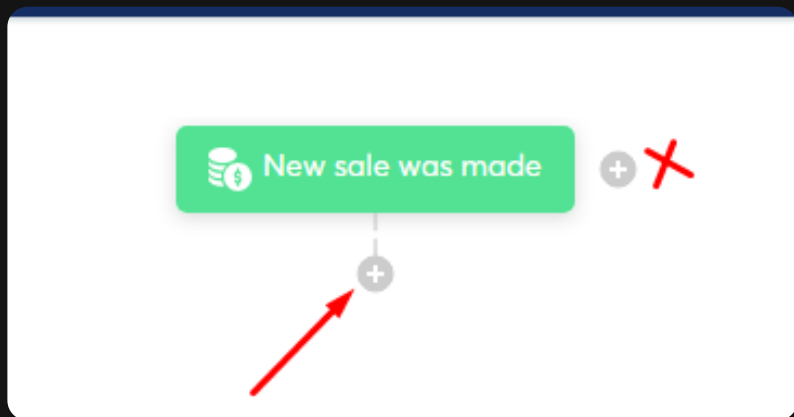

Next, let's set up your first trigger. Click the green button (**not the "+" sign**) and select **"New Sale"** as your trigger. Then, it will ask you to choose the order form funnel. For your setup, select **"Payment page (final version)"** found under the **"EN - Funnel - PLR - Courses"** sales funnel.

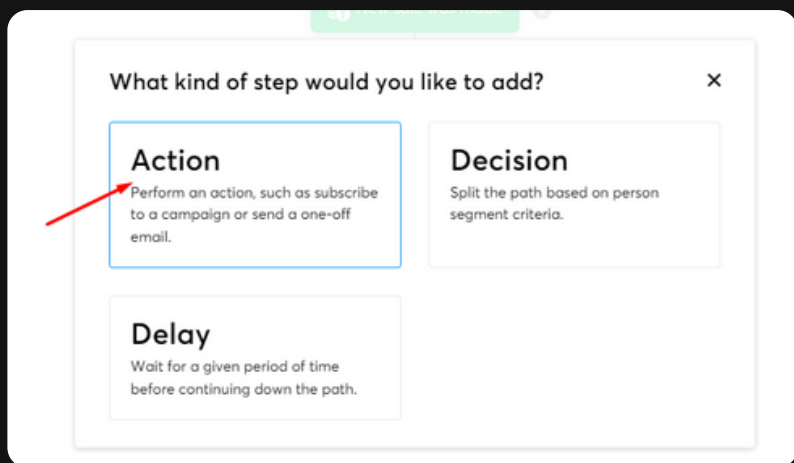

Click on "Create" button.

Then, click the "+" icon down below the green button (not the one next to it).

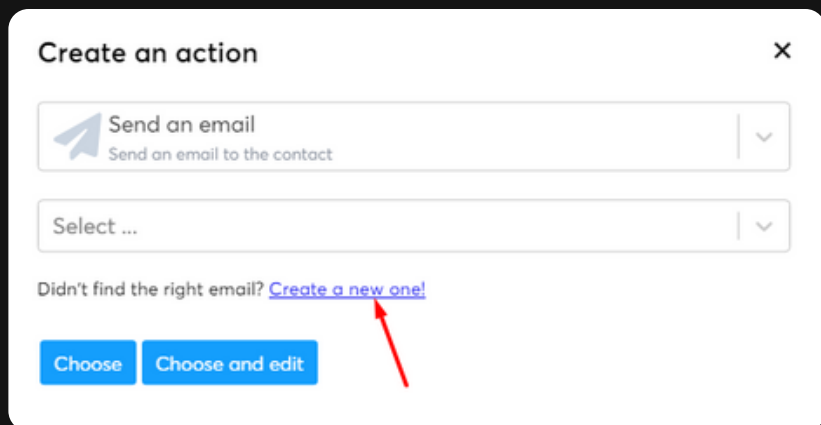

After that, select "Action".

Now, decide what action you want to take. For example, if you want to send an email to a user when they purchase your PLR course.

Choose the **“Send An Email”** action. Then, the system will ask you to select an email. Since you don’t have one yet, you’ll need to **“create a new one”**.

Create an action ×

 Send an email
Send an email to the contact

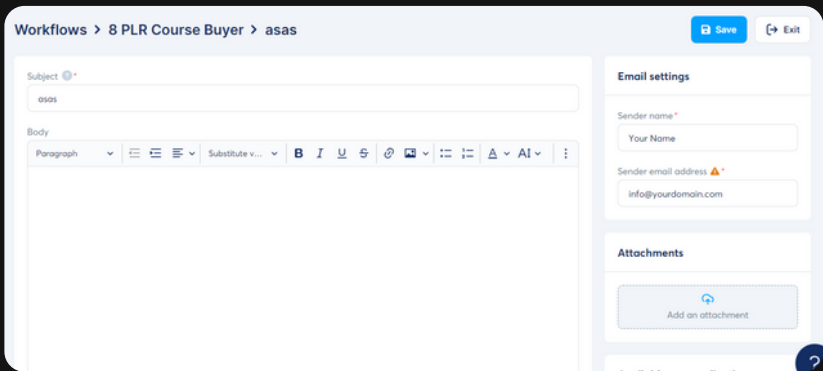

Select ...

Didn't find the right email? [Create a new one!](#)

Choose Choose and edit

Now it asks you to enter the subject for an email...just add a placeholder for now. You can change it in the email editor.

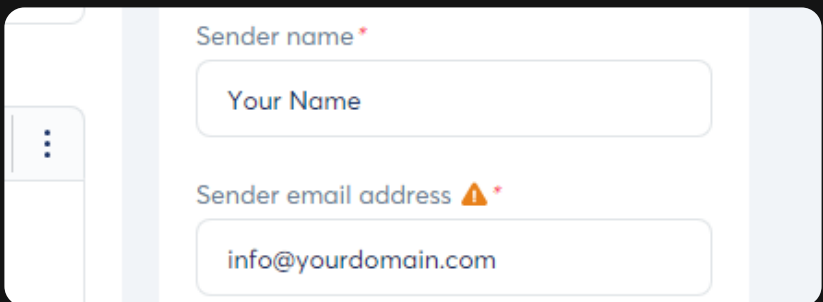

Click "**Save and edit email**" to go to the email editor.

The screenshot shows the email editor interface. At the top, there's a breadcrumb trail: "Workflows > 8 PLR Course Buyer > asas". On the right, there are two buttons: "Save" (with a floppy disk icon) and "Exit" (with a right arrow icon). The main area is divided into two sections. The left section has a "Subject" field with a plus icon and a text input containing "9999". Below it is a "Body" section with a rich text editor toolbar (including Paragraph, Bold, Italic, Underline, Link, Image, List, and Text color) and a large text area. The right section is titled "Email settings" and contains two fields: "Sender name" with a red asterisk and a text input containing "Your Name", and "Sender email address" with a red asterisk, a warning triangle icon, and a text input containing "info@yourdomain.com". Below these is an "Attachments" section with a button labeled "Add an attachment" and a question mark icon in the bottom right corner.

Before sending any email, it's important to verify your email. If you don't verify it, the emails won't work.

On the right side, in the email settings, make sure to update the sender's name and your business email.

This is a close-up of the "Email settings" section from the previous screenshot. It shows the "Sender name" field with a red asterisk and a text input containing "Your Name". Below it is the "Sender email address" field with a red asterisk, a warning triangle icon, and a text input containing "info@yourdomain.com".

Check this article [how to verify your sender email.](#)

Check this article [how to authenticate your personal domain name.](#)

And other articles [related to email if you face any issue.](#)

After your email is verified. It's time to write your email.

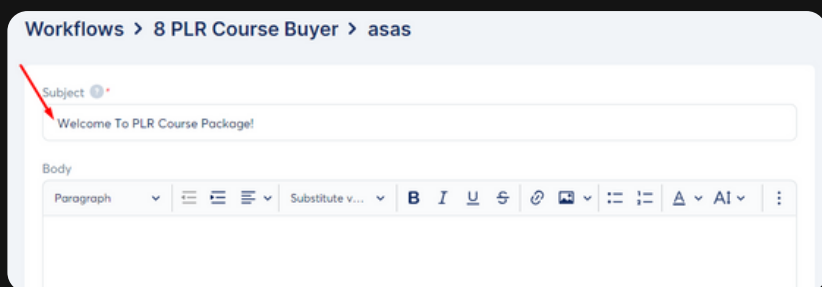

Think about what you want to say to the user after they buy the 8 PLR course package.

Since Systeme.io automatically provides course access, we don't have to worry about anything. So we just create a thank you email.

Now, in the email editor, add a subject using your own words.

Ex:

Subject: Welcome To PLR Course Package!

Next, write the email body in the next field. Refer to the script on the next page for guidance, but remember not to copy it exactly.

Use your own words and mention any bonuses you're offering with the PLR packages.

Subject: Welcome To PLR Course Package!

Body:

Hi, {first_name},

I'm thrilled to welcome you and thank you for picking up your PLR Package! Here you'll find all the essential links related to your purchase.

Step 1: Join My Private Facebook Community

Got questions? Join our FB group for any queries or support you might need. [\[FB Link\]](#)

Step 2: Visit the Thank You Page
Don't forget to download all the bonuses on the Thank You page.
[\[Thank you page Link\]](#)

>>>> Continue email on next page

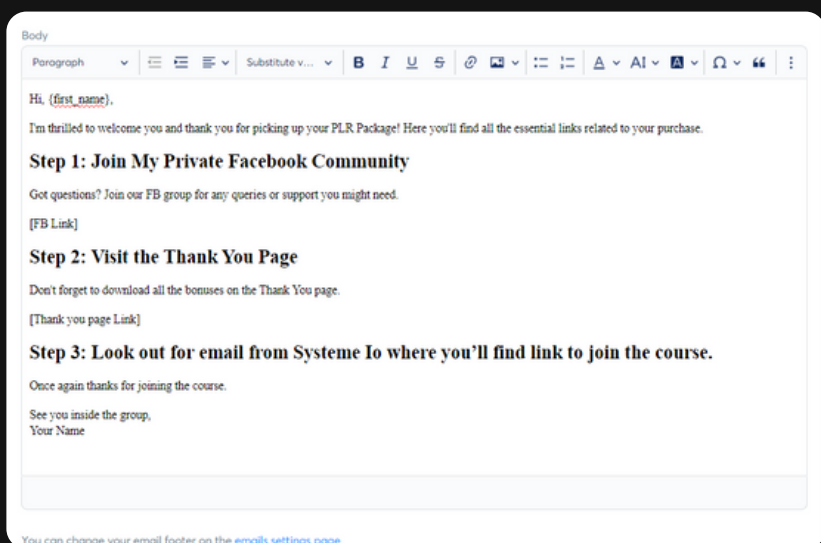

>>>> 2024 — Profitable PLR

Body Continue:

Step 3: Look out for email from Systeme.io where you'll find link to join the course.

Once again thanks for joining the course.

See you inside the group,
Your Name

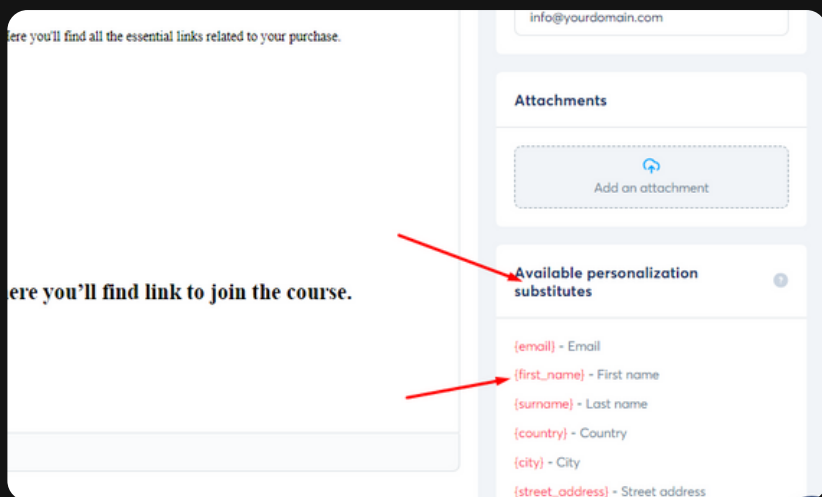

2024

Profitable PLR

You might have noticed that we used placeholders like {first_name}. When you send an email, Systeme.io replaces these placeholders with the user's actual name.

More placeholders can be found on the right side, below the “Email Settings” and “Attachments” sections, if you need them. You will also find these placeholder settings in the body editor as well.

Subject 

Welcome To PLR Course Package!

Body

Paragraph    Subst...                 

Hi, (first_name).

I'm thrilled to welcome you and thank you for your purchase. You'll find all the essential links related to your purchase.

Step 1: Join My Private Facebook Group

Got questions? Join our FB group for any questions you may have.

[FB Link]

Step 2: Visit the Thank You Page

Don't forget to download all the bonuses on the Thank You page.

[Thank you page Link]

Phone number

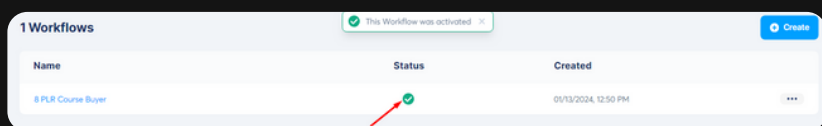

Once you finish writing your email, click on **"Save"** blue button (on right hand side on top).

Now you will see workflow something like this.

Then, click on the “exit” button at the top right side.

Now activate the workflow by clicking on the 3 dots (...) on the right-hand side and select “Activate”. Click “Confirm” after that.

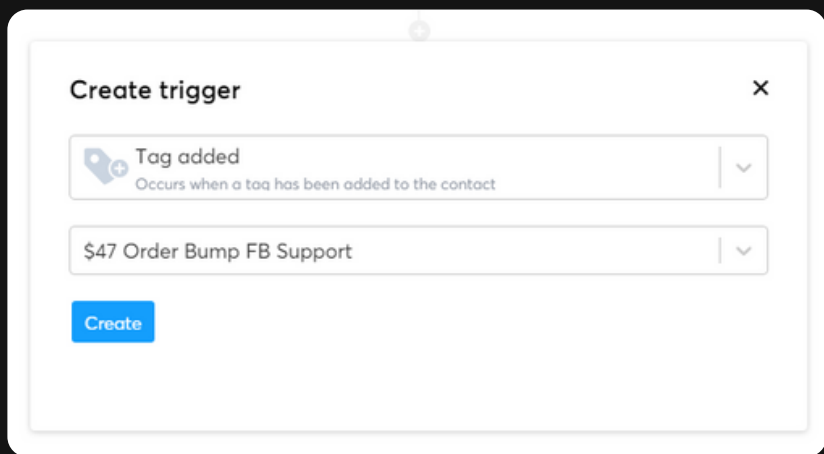

Now, your “8 PLR Course Buyer” automation is set up. It will send email when someone purchases the course from you.

Let's set up the next automation for the order bump.

Click the blue “Create” button, name it “\$47 Order Bump FB Support”, and then hit “Save”.

After that, click on “\$47 Order Bump FB Support” to enter the workflow builder. Next, click the green “Create your first trigger” button and select the “Tag added” trigger this time.

It will ask you to choose a tag. For the order bump, remember we’ve already created and added a tag to our order bump resources. So, select the “\$47 Order Bump FB Support” tag. And hit “Create”.

Create trigger

Tag added
Occurs when a tag has been added to the contact

\$47 Order Bump FB Support

Create

Now, hit the “+” icon below the green button and select “Action”. Then choose the action “Send An Email” as we did in the first automation.

It will ask you to select an email, but since you don’t have one yet, go ahead and “Create a new one”. You got the gist, right?

For now, just enter a temporary subject to get into the email editor.

Once you're in the editor, write your email relevant to your order bump. In my case, it's about FB support, so I'll write about that.

You'll find a script on the next page as a demo.

Subject: Congrats! Your Exclusive FB Support Starts Now 🎉

Body:

Hi {first_name},

First off, thank you for choosing our \$47 Order Bump for 1:1 FB Messenger support. You've made a great decision!

This support is designed to help you with anything related to funnels, automation, offers, and any tech issues you might encounter. Remember, this personalized assistance is valid for one month from today.

Body

Paragraph ▾ [Rich Text Editor Icons]

Hi, (first_name),

First off, thank you for choosing our \$47 Order Bump for 1:1 FB Messenger support. You've made a great decision!

This support is designed to help you with anything related to funnels, automation, offers, and any tech issues you might encounter. Remember, this personalized assistance is valid for one month from today.

Feel free to reach out with any questions or challenges you're facing. Whether you're setting up a funnel, tweaking your automation, or need advice on offers, I'm here to guide you.

To get started, just send me a message on FB Messenger. I'm ready to assist you in making the most of your online ventures.

[\[FB Messenger Link Or Group Link\]](#)

Looking forward to our chats and seeing your success!

Cheers
Your Name

Once you're done writing the email, click on the "Save" button.

Now, your workflow should look something like this.

Added "\$47 Order Bump FB Support" tag

Send "Congrats! Your Exclusive FB Support Starts Now 🥳"

2024

Profitable PLR

Now, click the "Exit" button at the top and then hit "Activate" on the workflow. If you don't activate it, it won't work.

Cooooool, now you set up 2 workflows. Make sure both of them active with the "green check" status.

Now, let's go back to > Funnels > Choose the PLR funnel we were working on.

Go to order form "Payment Page (final version)".

Scroll down a bit > Resources (not in order bump) > Click the blue "+" icon > Select Resource > Tags > Choose Tags > 8 PLR Course Buyer.

The screenshot shows a web interface for configuring a digital product. At the top, there are two tabs: 'Digital product' (selected with a green checkmark) and 'Physical product'. Below the tabs is a 'Resources' section with a plus icon and a subtitle 'Resources which the customer will have access to after the purchase'. This section contains two main categories: 'Tags' and 'Courses'. Under 'Tags', there is a text input field containing '8 PLR Course Buyer'. Under 'Courses', there are two text input fields: 'Systeme.io PLR package' and 'Full access'. A blue plus icon is visible in the top right corner of the Resources section.

Step 9: Import All Courses And Their Funnels

Now that you've installed the PLR package, sales funnel, added important tags and workflows.

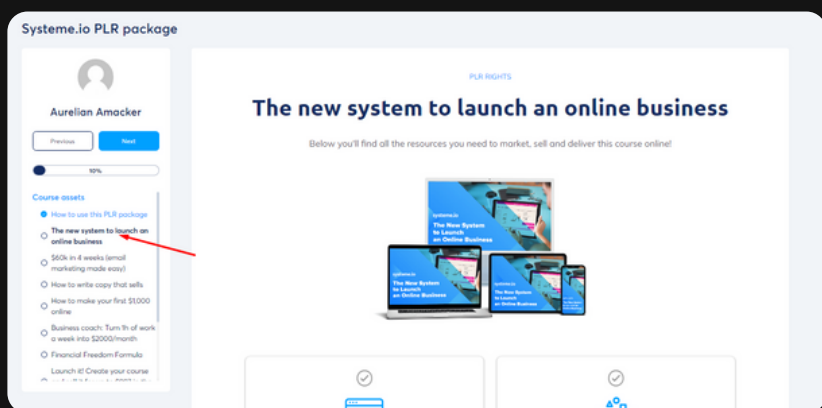

Next, go through each module and import all the sales funnels and courses into your account.

I'll guide you through setting up one module. The process for the rest of the 7 module is the same.

Now go to > Dashboard > Student Dashboard > Enrollment Tabs > Open course "Systeme.io PLR Package".

As we did for the last module, now we need to go through every module and import it's sales funnel and course.

I'm starting with the 1st course which is "The new system to launch an online business".

2024

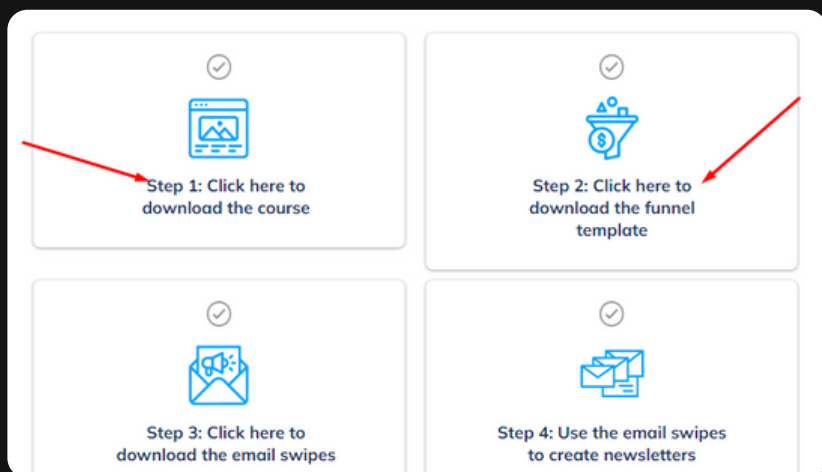

Profitable PLR

Open that module, scroll down a bit, and click on **“Step 1: Click here to download the course”**.

Once you click on that it will import the course into your course area.

Now come back on the module page, click on **“Step 2: Click here to download the funnel template”**.

When you click on that it will import sales funnel related to that course.

If you noticed, every module has 5 steps, and each module comes with it's own sales funnel, course videos and email swipes.

Why is that???

Because it's totally up to how you want to sell the course. You can sell all the 8 courses in one bundle for \$97.

Which we already created in the main sales funnel with a \$97 price and the "PLR Buyer" tag and "\$47 order bump", remember?

That was our main funnel to sell all our courses in one bundle.

Now, another option you have...

Sell each course separately for \$7...It means you can sell every single course for its own price.

For example, let's say I want to sell my first module for \$7. So what I'll do is... Use that module funnel to sell my course.

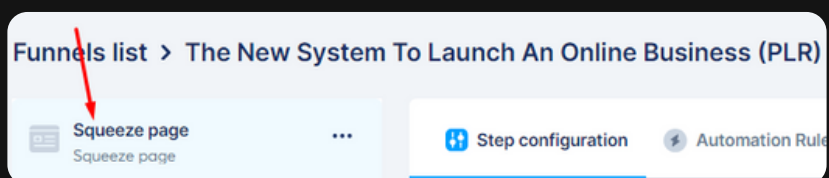

I'll import the funnel and course for that module and edit my funnel if I want to style colors, text, or anything.

After that, in the order form, I'll change the page URL if I want. And then I create a new tag "\$7 Course Launch An Business".

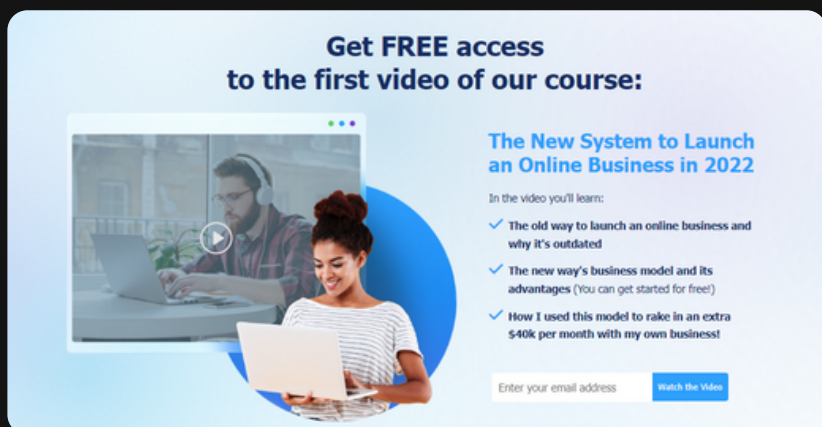

Remember, each tag should be descriptive so we can know in the future what it is about.

Each course funnel has 3-4 main pages;

1. Squeeze page: Where you collect emails from users. In return, you might offer them the first video from the course or an eBook, depending on what that module's funnel is about.

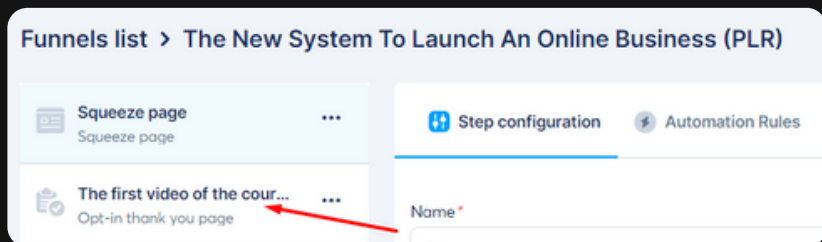

On front your squeeze page would look like this...asking users to provide their email to access the first video.

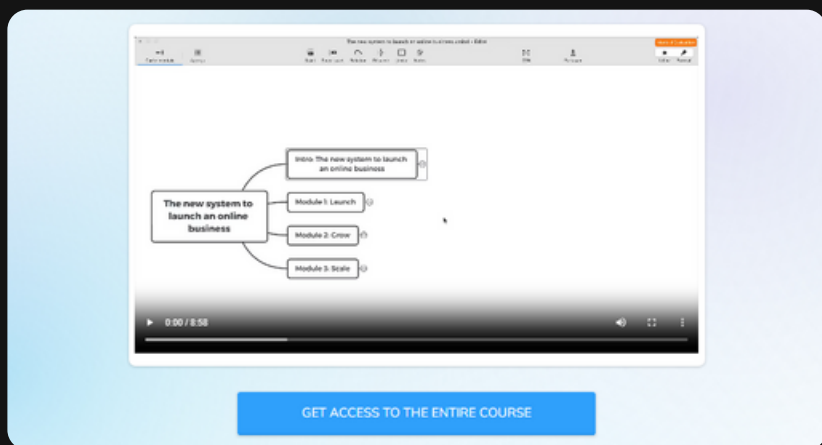

>>>> 2024 — Profitable PLR

2. Opt-in Thank You Page: Where you give them access to the first video from your course after they give you their email.

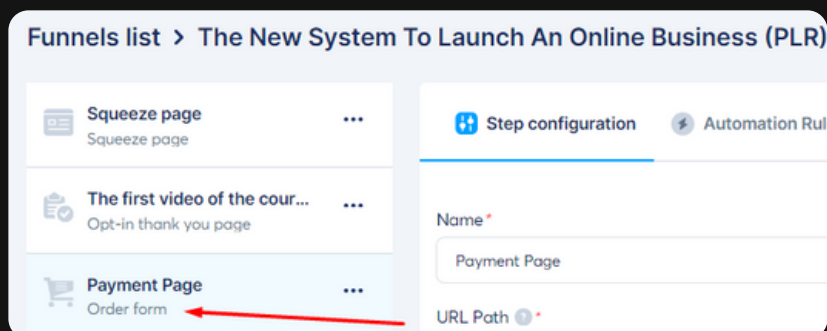

This is how it looks in the frontend. After they click on the blue button below video, they will be redirect to payment page, where they can pay you \$7 to access this course videos.

>>>> 2024 — Profitable PLR

3. Order Form: On this payment page, you add the price, order bump, tags, resources, and other details related to the purchase.

This is how it looks on front, asking user to add their payment details.

Fill in the form down below to take advantage of this offer:

First name	Enter Last Name
Enter Email Address	 Enter Phone

Place your order as :

☒ Individual ☐ Company

Enter Your Mailing Address	Enter Your City
Zip code	India 

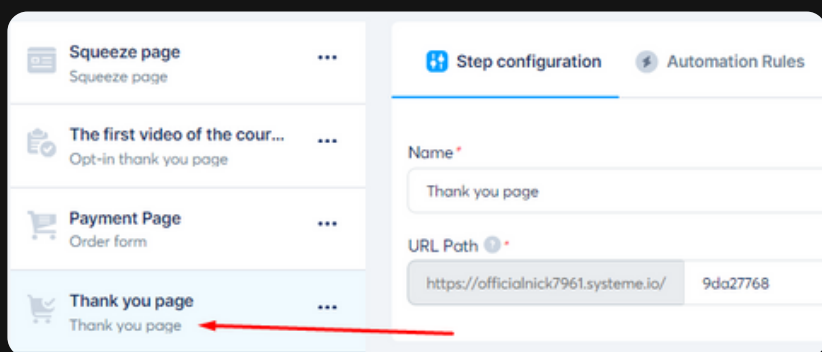

Billing Details

Payment options

What You'll Get

>>>> 2024 — Profitable PLR

4. Thank You Page: After users make a payment, they can access the thank you page. This page may include a small video introduction, complete course access steps, or a button to download an eBook.

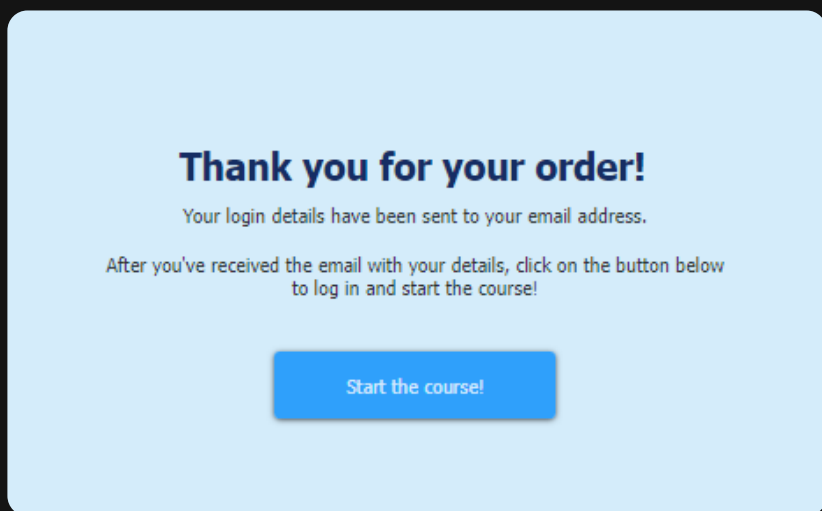

The screenshot shows a user interface for configuring a page. On the left is a sidebar with a list of page types, each with an icon and a three-dot menu:

- Squeeze page (Icon: document with checkmark)
- The first video of the cour... (Icon: video camera)
- Payment Page (Icon: shopping cart)
- Thank you page** (Icon: shopping cart)

A red arrow points to the 'Thank you page' option. The main panel on the right is titled 'Step configuration' and 'Automation Rules'. It contains the following fields:

- Name ***: A text input field containing 'Thank you page'.
- URL Path ***: A text input field containing 'https://officialnick7961.systeme.io/' and a small icon.
- ID**: A text input field containing '9da27768'.

The screenshot shows a 'Thank you for your order!' page with a light blue background. The text on the page is as follows:

Thank you for your order!

Your login details have been sent to your email address.

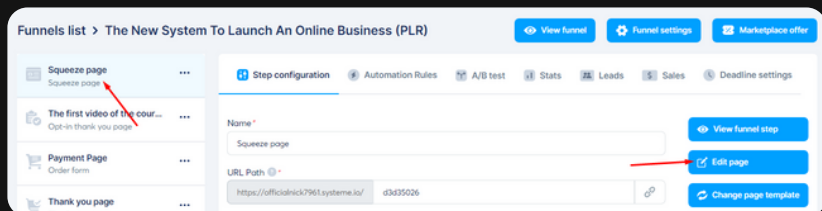

After you've received the email with your details, click on the button below to log in and start the course!

Start the course!

Now that you've imported the course and funnel from the 1st module, let's set up the course and funnel.

Note: All the steps we'll do for the 1st module, you need to do the same for the next 7 modules if you want to sell each course separately for \$7. If you want to sell in bundle, then skip these steps and [go to page 69](#).

So let's [go to funnels > Open that funnel "The New System To Launch An Online Business \(PLR\)" > Squeeze Page > Edit Page](#).

Now it's totally up to you to change colors, text or images. BUT...

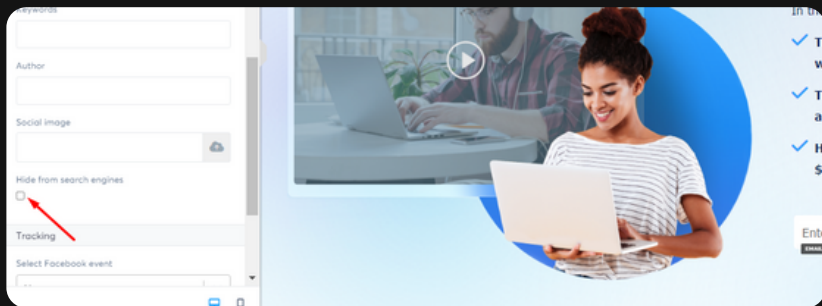

>>>> 2024 — Profitable PLR

Since I'm selling the funnel with course whose gonna buy from me...and it's original designed from systeme.io.

So I 'll keep the design same as it is.

I won't bother to change anything in design but of course you can do that if you want.

Now, similarly, with this squeeze page, when you **open editor > go to settings on top left > uncheck "Hide from search engine"**.

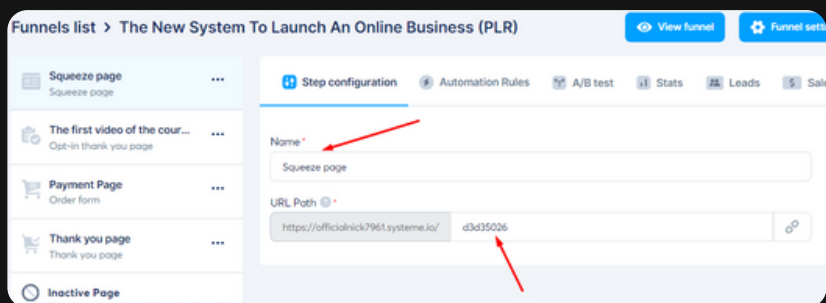

2024

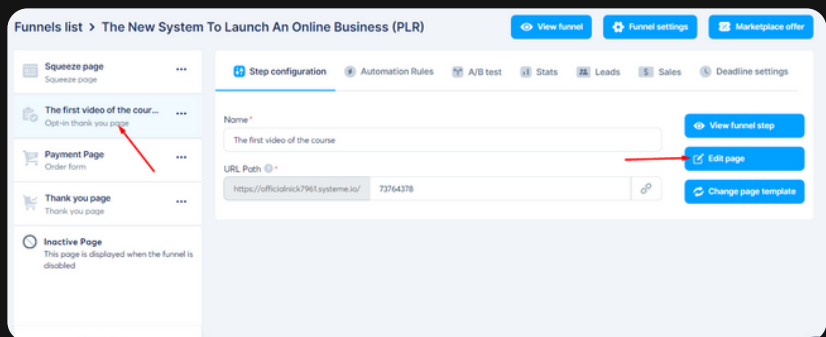

Profitable PLR

After you done making changes to your squeeze page, make sure to **save it**. Now exit the page. On this squeeze page, you can change it's **name** or **URL path** if you want. It's optional.

Now open next page, which is “**Opt-in thank you page**”.

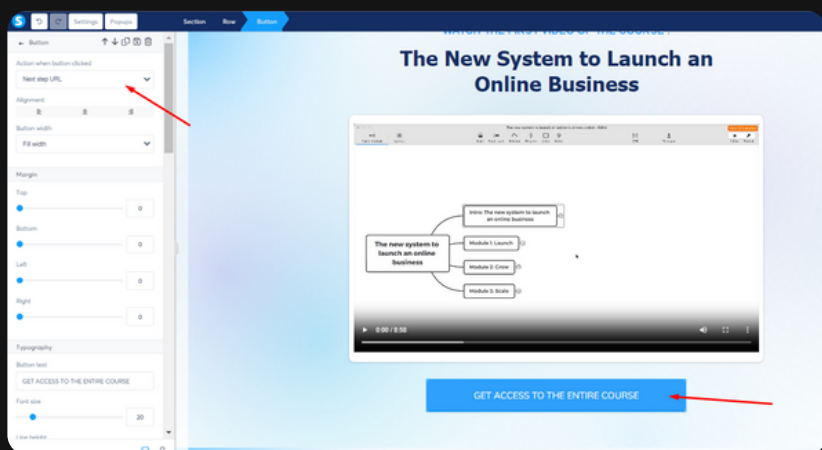

Let's **edit** it in page editor...

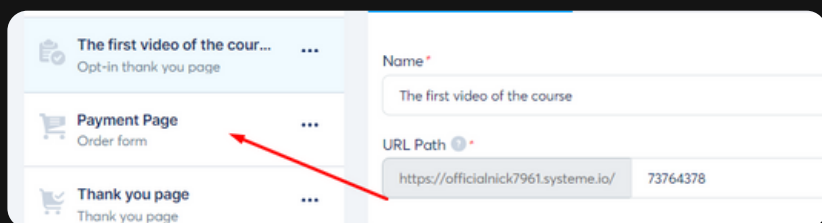

➡➡➡➡ **2024** — **Profitable PLR**

Now change whatever you want, like fonts etc.

Make sure your blue button “**Get Access To Entire Course**” should have “**Next Step URL**” action.

It means when someone click on that blue button, it will go the **next step** which is **payment page**.

➡➡➡➡ 2024 — Profitable PLR

Alright, once you make any changes on the page, make sure to **save it**. Now **exit** the page. Now similarly here, change the **page name** or **URL path** if you want. Otherwise, leave it as it is.

Let's go to the next step, which is **payment page**. Scroll down just a bit, you will see "**Affiliate Commission**" option. Make it **40%** to **0%**. Cuz' it's a low-ticket product. You will use this option when you want to give your affiliates a commission when they make sale for your product. It's whole another topic, you can learn it from Youtube.

>>>> 2024 — Profitable PLR

In the next option, "Choose Offer Type", select "Digital Product". Now click on the "+" icon in "Resources" > Select a resource > Find the course "The New System To Launch An Online Business" > Choose Access Type > Full Access. Then hit save.

Now you can create a tag called "\$7 Course Launch An Business". So you can send an email once they buy the course from you, as we did for the main funnel.

1. Click on **contacts** (on top menu) > **Tags** > **Create Tag**.

2. Now go to **Automations** > **Workflows** > **Create New Workflow** > "\$7 Course Launch An Business".

3. Edit the workflow.

4. Click green button "Create your first trigger" > Choose trigger > "Tag added" > Select tag "\$7 Course Launch An Business" > Create.

5. Click "+" icon below green button > Action > Choose Action > Send An Email.

6. Since you don't have one "create a new one".

Now you know how to write an email, just add a thank you message and any other important links, and hit save.

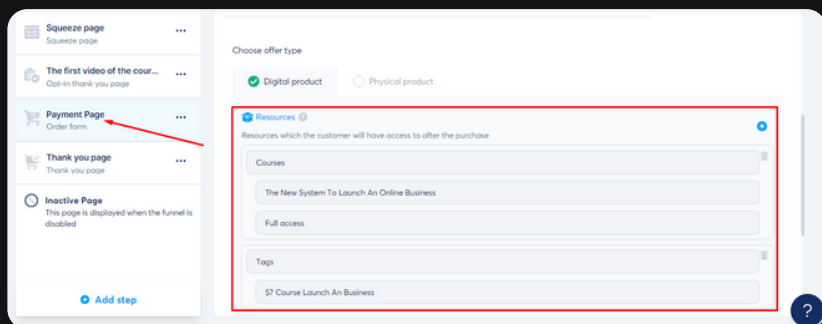

Now, when someone purchases the \$7 course from you, systeme.io will send access to the course to the user.

Now your automation is done for that \$7 funnel, don't forget to activate the workflow.

Let's go back the **funnels** > Open funnel "The New System To Launch An Online Business (PLR)".

Go to payment page, in **resources**, click "+" icon again, select **resource tag**, choose tag we've just created "\$7 Course Launch An Business". and hit **save**.

Your resources should look like this 📌

2024

Profitable PLR

Now let's set the price for your course. It could be anything, but I will set it at \$7, making it a no-brainer deal for people to purchase the course.

Below "Resources", you will see "Price plans". Click on the "+" sign > Create a new one.

In first 3 fields put something like "\$7 Online Business" > Price plan type "One-time payment" > Payment amount "7". And hit "Save".

Profitable PLR

So pricing is in place, the next option is the “**Order Bump**”, which is totally optional. If you want to increase your cart value, you can do that.

You already know how to set that up. If you forgot, just check **pages 26-29** in this PDF.

Now, we'll quickly use the same order bump as we created before cuz' I forgot to mention how to include that in the payment page.

Click the “**Order Bump**” blue button, choose the **offer type** > **digital product** > **Resources** > click the “+” icon > Choose “**Tags**” in resources > then add the tag “**\$47 Order Bump FB Support**” > hit “**save**”.

Tags

\$47 Order Bump FB Support

Next, set the price. Since we already set the price previously for order bump, you can just use the same one.

Click "+" on **price plans** > Choose a price **plan type** > **One-time payment** > Choose an **existing price plan** > **\$47 FB Tech Support** > hit "Save".

Save

Great, now we have everything in place. Just scroll up and **edit the payment page** to add the “**Order Bump**”.

Once the page editor is open, on the left side panel, scroll down and find the “**Order bump**” element. Drag and put that above the payment button in the **order form**.

Change its content colors, fonts, text whatever your order bump is about. Mine is \$47 FB support, so I'll change it accordingly.

What You'll Get

➡ 1:1 FB Messenger Support For \$47

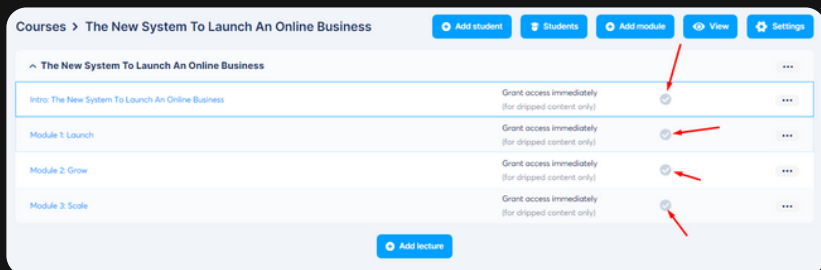

Need help with funnels, automation, or any tech-related queries? Our dedicated support is here for you. Elevate your Systeme.io experience with personalized assistance on FB Messenger for smoother operations. Limited-time offer to boost your success! Add it to your cart now!

Get the New System!

Once you're done with editing, click **save** and **exit** the page. Now we've have set up our order bump.

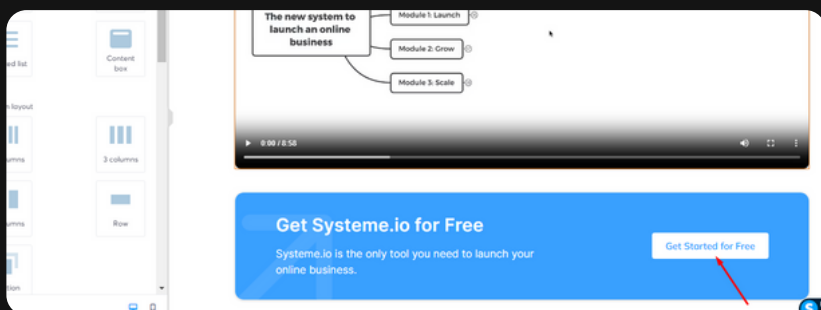

Step 10: Course Setup & Editing Lectures

Next, click on **"Products"** (on top menu) > then **"Courses"**. You will see your course there from module 1, the one we were working on, **"The New System To Launch An Online Business"**. Click on that course.

Now you'll see something like this 🙌
 One thing to note, you'll see a **grey check icon**, indicating they are **deactivated** now.

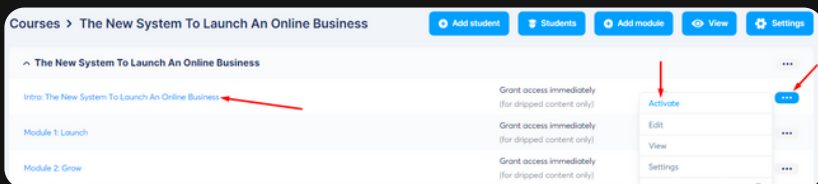

Click on the **lecture** > **edit** it in the page builder. Change fonts, colors according to your preference, but it's optional. In the editor, you will see a blue banner CTA promoting Systeme.io.

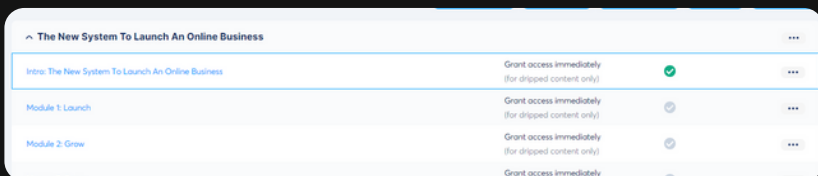

>>>> 2024 — Profitable PLR

This is Systeme.io affiliate link, not yours. You can add your affiliate link in there. When someone goes through the course and wants to create an account, they can use your affiliate link. This way, you can make money through affiliate commissions when they upgrade their plan.

After you're done editing, click **save** and **exit**. Now, click on the three dots (...) and **activate** the lecture.

Now your 1 lecture is **active**. You can see that green check arrow 🖱️

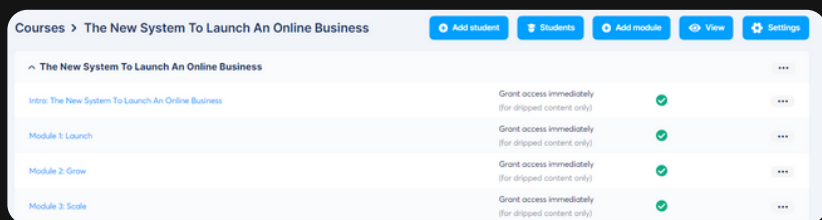

➡➡➡➡ **2024** — **Profitable PLR**

Now, you want to go through **every lecture** and make changes to the affiliate link, fonts, text, etc., and then **activate** each one.

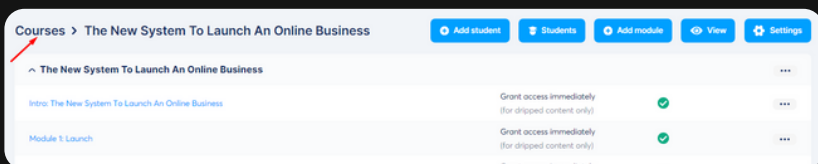

As I mentioned earlier, this is entirely optional. You don't have to change anything except your affiliate links in the banner.

You can leave the design as it is since you're planning to sell these courses. You want to provide users with the exact product.

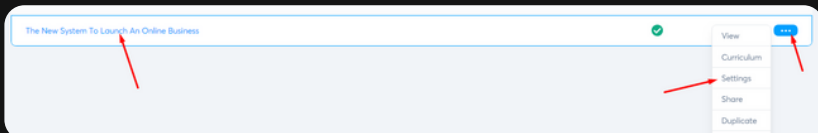

I just added my affiliate link in each lecture banner CTA and activate it.

Now you've activated all the lectures.
Click on **"Courses"** in breadcrumbs navigation.

Click on the three dots **"..."** on the right hand side of the course **"The New System To Launch An Online Business"**. Select **"settings"**

Scroll down, find the option **"Sales Page"** > Choose a funnel **"The New System To Launch An Online Business"** > next Funnel step > **payment page**.
Scroll up and **save** the page.

>>> screenshot in next page...

The screenshot shows a course setup interface with three main sections at the top: 'Teacher's photo', 'Logo', and 'Course cover'. Each section has a 'Click to upload' button and a list of allowed formats (png, jpg, jpeg, gif) with a recommended aspect ratio of 1:1. Below these sections are two dropdown menus: 'Sales page' and 'Funnel step'. The 'Sales page' dropdown is set to 'The New System To Launch An Online Business (PLR)' and the 'Funnel step' dropdown is set to 'Payment Page'. A checkbox labeled 'Show module titles for students' is checked. At the bottom, there is a text area for 'Embedded HTML/JS code'.

Great! You've completed the setup for 1 module.

Now, go back to **Dashboard** > **Student dashboard** > Open course “**Systeme.io PLR Package**”.

Open every module one by one and import the funnel and course. Create new workflows, new tags, new pricing plans for each course.

Edit the course, change the affiliate link, and add the funnel in the course page settings, as we did on the previous page.

IMPORTANT NOTE:

If you're planning to sell **each course separately** for **\$7**, you'll need to repeat the same steps outlined from **page 48 to 68** for each course you import.

Like you need to create **new workflow**, **new tag**, and **new price plan** with it's **course name** (order bumps are optional) for each course – that means **8 tags**, **8 workflows**, and **8 price plans** related to each course.

But but but...

If you're planning to sell the **complete 8 PLR package** in **one bundle**, you don't have to go through the entire setup again.

Like we did from page 48 to 68 for the 1st module...Now, you just need to create one bundle.

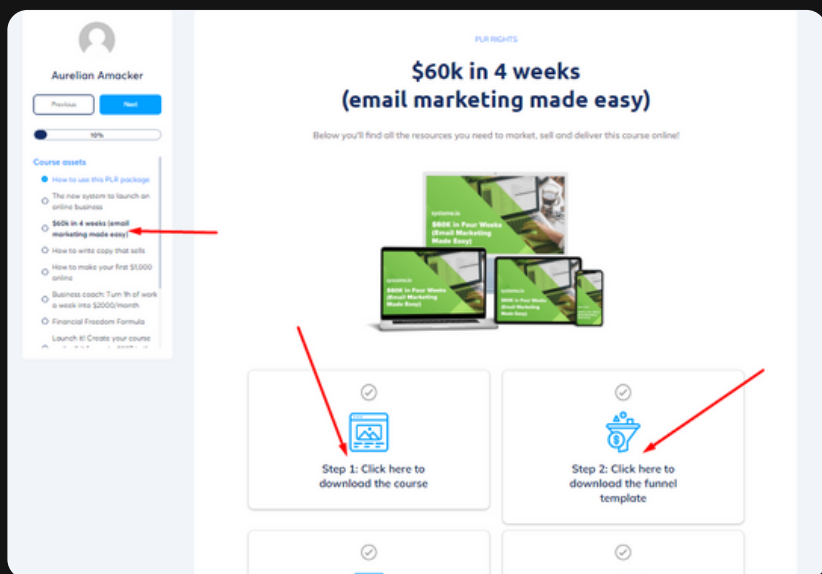

We'll give users access to their course and funnels with our main sales page that we created initially (on page 16).

If you can recall, we've already created a tag for that, "8 PLR Course Buyer", and a workflow automation, "8 PLR Course Buyer".

So we'll continue from there...But first import all module funnels and course into your account.

Same steps, go to Dashboard > Student dashboard > Open course "Systeme.io PLR Package".

And start importing one by one...Let's go.

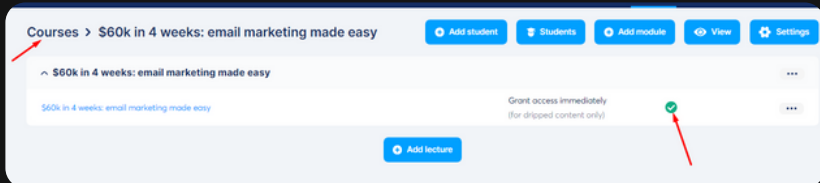

Go to the **2nd module**, click on **step 1** and **step 2**...It will import the course and funnel into your account.

Now, since we're selling these courses as **one bundle**, we don't need to create new tags, workflows, price plans or order bumps etc. in our funnel.

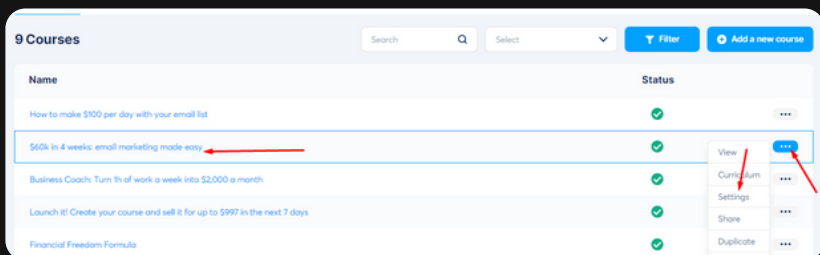

We just need to **edit our course**, as we did on pages **69–73**.

Here's a quick way to do it:

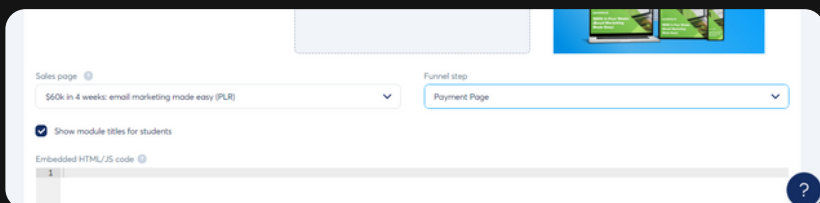

1. Open a new browser tab and enter **"systeme.io/dashboard"**. Don't close PLR package tab. Keep that open.
2. Go to **"Products"** (on top menu), click on **"Courses"**.
3. **Edit the course**, you just imported maybe **"\$60k in 4 weeks: email marketing made easy"**.
4. Change the **affiliate link** in every lecture in the blue banner CTA, and save changes. And make sure to **activate** the lecture.

5. Go back to “Courses” in breadcrumb navigation. And click on three dots (...) and then click on “Settings”.

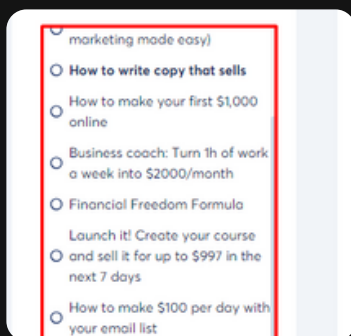

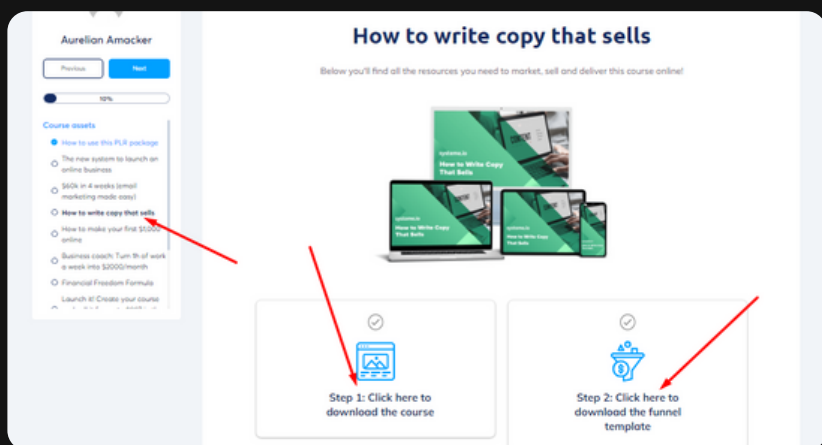

6. Now scroll down and find “Sales page”, choose this course funnel “\$60k in 4 weeks: email marketing made easy (PLR)” and funnel step “payment page”. Then hit save on top.

➡➡➡➡ 2024 — Profitable PLR

That's it, your 2nd module is done too.

Now go back to the **"PLR Package"** browser tab and import the next course. Repeat this process for the next 6 courses one by one. So you don't confuse with too many funnels and courses.

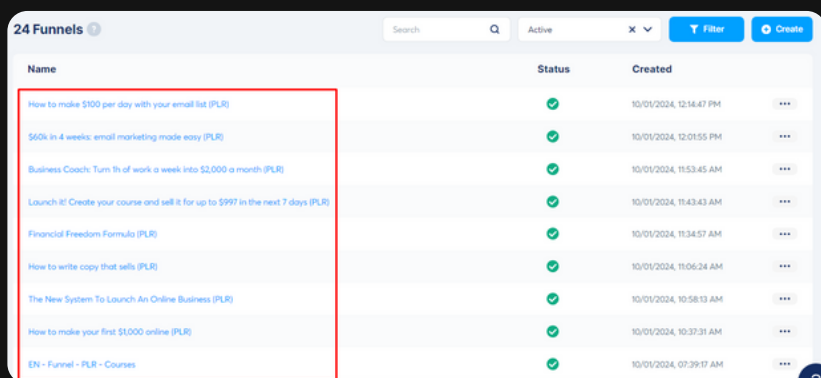

2024

Profitable PLR

So, I assume you've imported all the funnels and courses in your account.

Now, this is how your funnels area should look like. You should now have a **total of 9 funnels**. (don't look at 24 funnels text above cuz' I've other funnels in my account 😊)

The **1st 8 funnels** with **(PLR)** word are for individual course funnels. The **9th funnel**, "**EN - Funnel - PLR - Courses**", is our **main sales page** we'll use this funnel to sell the **complete 8 PLR Course package**.

>>>> 2024 — Profitable PLR

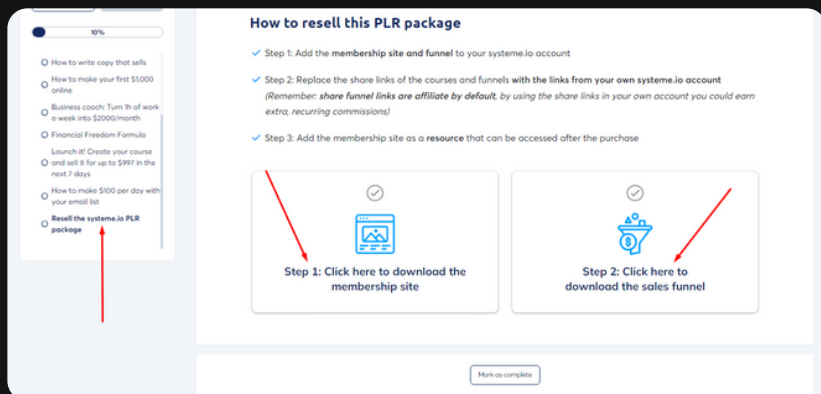

Now, let's look at the course area.
You'll see **9 courses** listed.

Name	Status
How to make \$100 per day with your email list	✓
\$60k in 4 weeks: email marketing made easy	✓
Business Coach: Turn 7h of work a week into \$2,000 a month	✓

How to Write Copy that Sells	✓
The New System To Launch An Online Business	✓
Systeme.io PLR package	✓
How to make your first \$1000 online	✓

You might be wondering why there are **9 courses** when we have **8 PLR courses**.

The second-to-last course is named "**Systeme.io PLR Package**". This is our **main PLR package** course where we will add our main funnel link and PLR package link. So other people can then import into their account and use that.

Remember, initially, we imported the **main sales funnel** and **Systeme.io PLR package** in our course area on **page 12 to 14**.

Now, let's change these all modules steps URL to our affiliate URL's.

Step 1: Open **"Systeme.io PLR Package"** in new tab in your course area. **Don't open** in the same tab. Right click **"Open link in new tab"**.

>> screenshot in next page...

I'll show you how to change the links for the **2nd module** and the **last module**, the process is the same as the 2nd module for the rest of them.

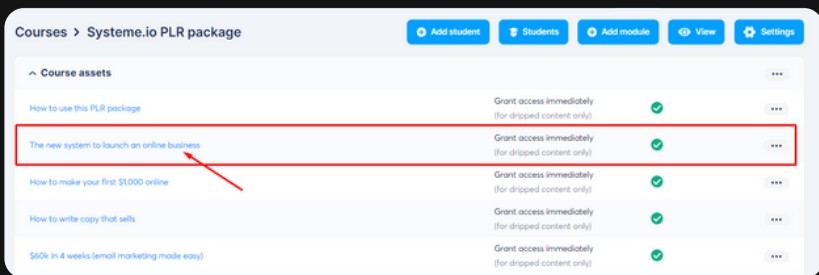

>>>> 2024 — Profitable PLR

Note: Before you **edit** the course, open a **new tab** and enter **"systeme.io/dashboard/funnels"**.

Now, you should have 3 tabs open simultaneously, one for the funnels, the 2nd for courses, and the 3rd for the course you're editing.

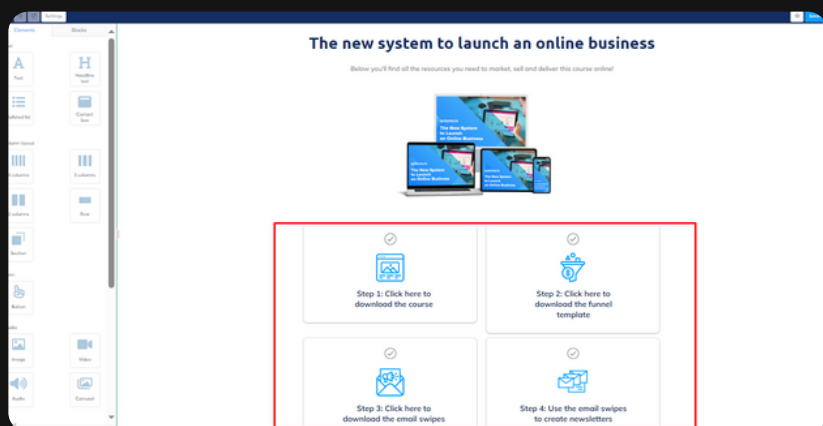

Let's edit 2nd module in **"Systeme.io PLR package"** course.

>>>> 2024 — Profitable PLR

It will open the page editor, and you will see links for 5 steps on the page

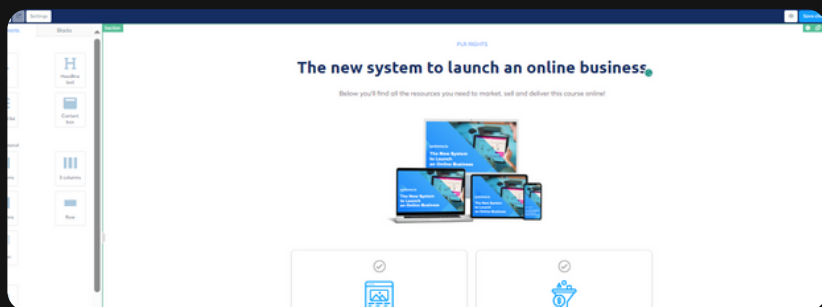

We only need to change step 1 and step 2.

Step 1: Click here to download the course

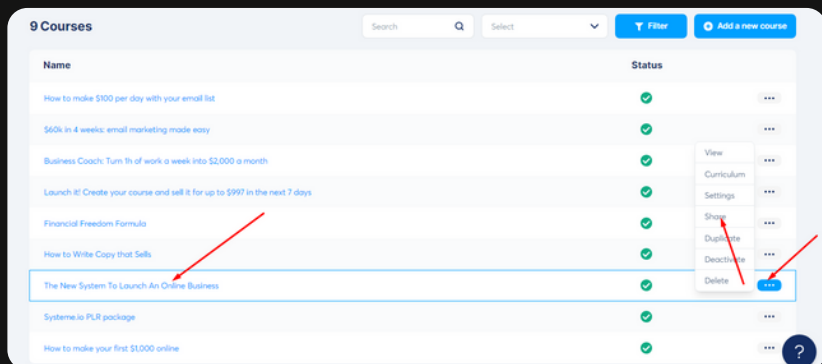

Add your course link in step 1. Go to the 2nd tab (courses), where you'll find a list of 9 courses. Locate the course you're editing...

In my case, I'm editing, **2nd module** in the **PLR package**, titled "**The new system to launch an online business**".

In the **course area**, find the right course, click on the three dots "... " on the right-hand side, and then click **"share"**.

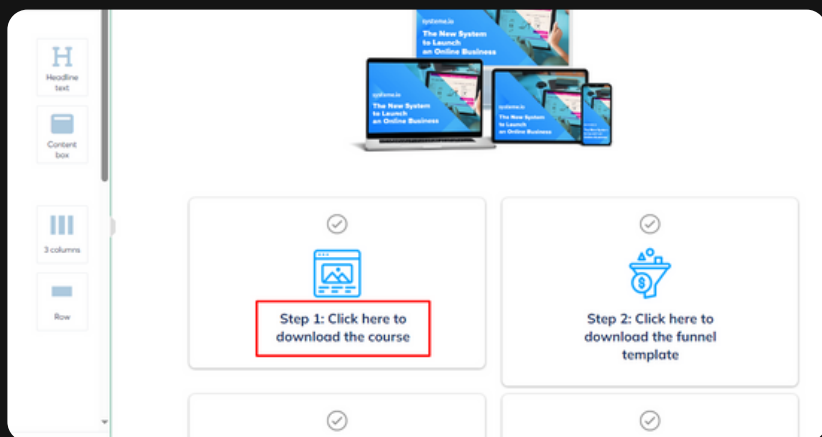

And then **"Copy To Clipboard"**.

Make sure to copy the link exactly from the right course. Pay close attention, as things can get a bit complicated here sometimes.

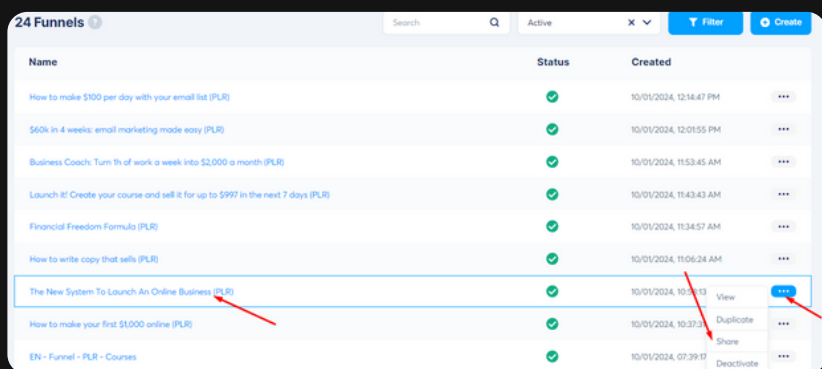

Once you copy the link, come back to **page editor tab** you were working on and change the **Step 1 URL** To **your course URL**.

Double click on text and **remove the old URL** and paste **your new URL**.

Step 2: Click here to download the funnel template

Now let's change **step 2 URL**, go back to **funnels browser tab** > find the **funnel** related to your **current module**.

Name	Status	Created	
How to make \$100 per day with your email list (PLR)	✓	10/01/2024, 12:16:47 PM	...
\$60k in 4 weeks: email marketing made easy (PLR)	✓	10/01/2024, 12:01:55 PM	...

EN - Funnel - PLR - Courses	✓	10/01/2024, 07:39:57	Deactivate

Which is “The New System To Launch An Online Business (PLR)”.

Click on three dots “...” > **Share** > **Copy link to clipboard**.

Now go back to **page editor tab**, **remove old URL** from **step 2** and add...

your URL.

Now, click on the "Save" button at the top blue button and click on the "eye" icon to view the module as it appears to other users.

Your 2nd module is complete. Now, do the same with the next 7 modules. As you did with module 2, add their dedicated funnel and course links in the editor.

2024

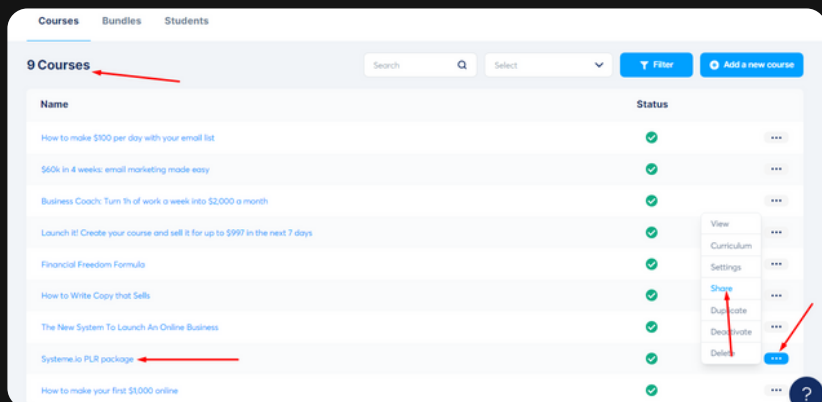

Profitable PLR

Once you complete **all 8 modules**, let's edit the **last** module, "**Resell the Systeme.io PLR package**".

Click to **edit**. Now, it's asking you for **2 links**, one for your "**Systeme.io PLR Package**" and the 2nd one for the "**main PLR funnel**". Let's add that here.

Go back to the **main courses page** (where 9 courses are listed), find "**Systeme.io PLR package**", click on three dots "... > then "**Share**" > and "**Copy link to clipboard**".

Now go back to **page editor**, add this share link into **Step 1: Click here to download the membership site...**

Remove old URL first and then add the URL. Make sure you paste the right URL.

Now let's change **Step 2 URL**, go back to **funnels** > find the **main PLR funnel** > "EN - Funnel - PLR - Courses" and click three dots "..." > **Share** > "Copy link to clipboard".

24 Funnels				Search	Q	Active	X	Filter	Create

Paste the share link into the "Step 2:
Click here to download the sales
funnel" in the page editor.

Headline text

Content box

3 columns

Row

Resell the systeme.io PLR package!

How to resell this PLR package

- ✓ Step 1: Add the membership site and funnel to your systeme.io account
- ✓ Step 2: Replace the share links of the courses and funnels with the links from your own systeme.io account
(Remember: share funnel links are affiliate by default, by using the share links in your own account you could earn extra, recurring commissions)
- ✓ Step 3: Add the membership site as a resource that can be accessed after the purchase

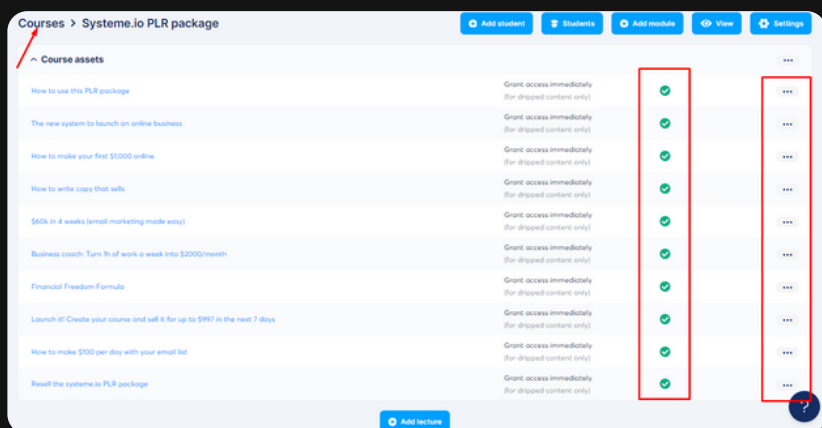

Step 1: Click here to download the membership site

Step 2: Click here to download the sales funnel

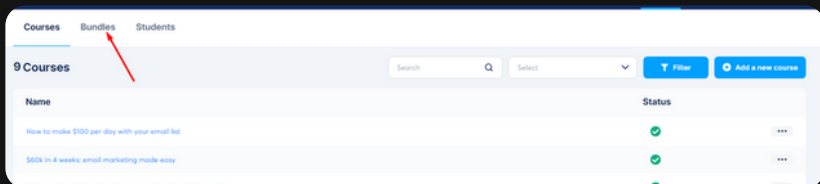

After you've done adding the 2 links,
click on the "Save" button on the top
right-hand side. Then, "Exit" from there
by clicking the "arrow" icon.

Now **activate** every module in **"Systeme.io PLR Package"**, it should show green check icon.

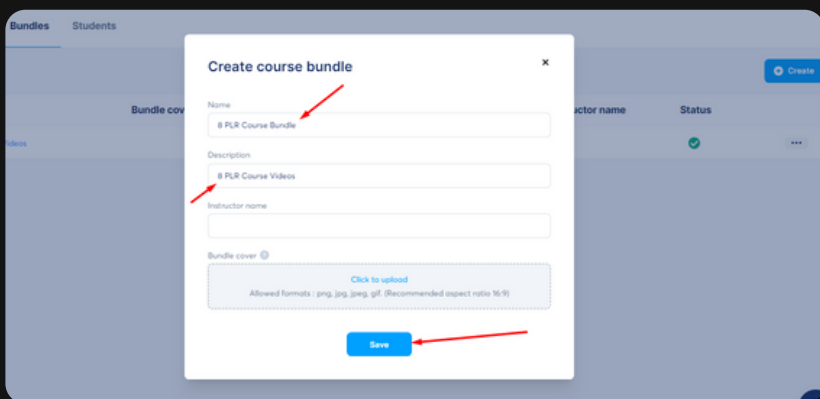

You will find **"Activate"** option in **"..."** dots.

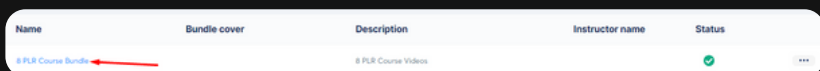

Once you **activate all 10 modules**, click on **"courses"** in breadcrumbs navigation. You'll be redirected in courses area. Now click on second tab **"Bundles"**. Here we add all courses in one bundle. (screenshot in next page...)

Click on **"Create"** blue button. Add name **"8 PLR Course Bundle"** and in description **"8 PLR Course Videos"** and hit **"Save"**.

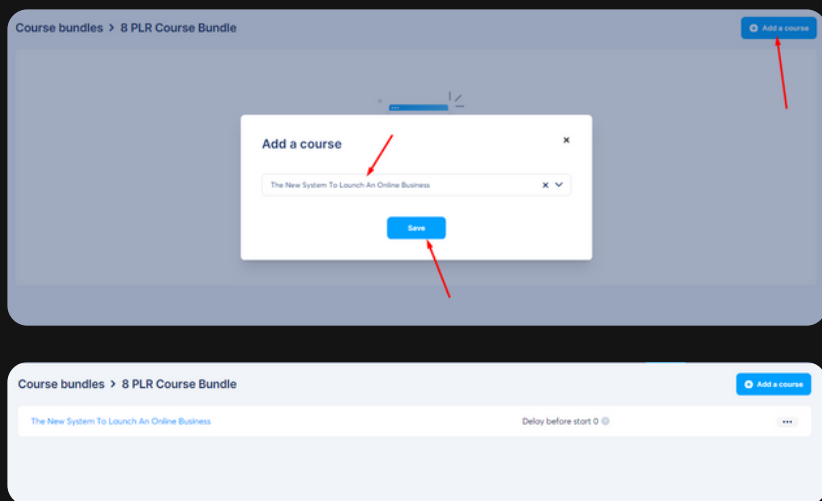

Click on the bundle, you've just created. Now add courses one by one.

>>> Check next page for screenshots...

Now, click the “Add a course” button.
Choose a course and hit “Save”.

Alright, now do this one by one until
you add all 8 courses. Add a new
course > select course > save.

Don't add "Systeme.io PLR package" in
this course.

After you done adding 8 courses your
bundle should look like this...

Course bundles > 8 PLR Course Videos Add a course

If you remember, on **page 20**, we added a “**Systeme.io PLR package**” in the **order form** under “**Resources**”. Now add another resource with bundle.

Make sure you're in the **order form**, click the "+" icon in **resources** (not in the order bump section), select a resource "**Course Bundles**," then choose "**8 PLR Course Bundle**" > **Full Access** > **Save**.

That's it! You're done.

Of course, creating campaigns is pending, yet. But that would make this guide too lengthy.

I recommend watching this email video for that.

Give yourself a pat on the back...I know it feels complicated in the beginning to set up this whole system.

I felt the same way at first. Once you set up 1 or 2 courses, it will become easier to set up the complete PLR.

If you find it too challenging or hard to set up, **feel free to reach out to me on FB.** I provide a service to set up the complete PLR course for \$150, including the entire PLR funnel setup, course setup, workflows, tags, and campaigns.

One thing to note here, in the PLR package, Systeme.io does provide email swipes for campaigns in each module.

If you remember that every module had the 5 steps, one of the steps had the swipes doc, which you can include in your campaigns.

But I don't recommend using them...

Of course, you can take motivation from those email swipes for what to create in campaigns.

But add your own touch and story to it because mostly people use the same email swipes.

That being said...

Good luck with setting up the PLR course.

If you feel stuck anywhere or need help or need services, [send me message on FB.](#)

I usually reply within 1 hour.

*Thank
you for
reading!*
