And how about this... you can resell my chat bots and keep the profit! You and your clients can benefit from dozens of custom GPTs that are like have an experts, specialists and coaches right in your pocket!

GPT = BOT?

WHAT IS A GPT OR A BOT?

Custom GPTs (Inside ChatGPT)

A GPT is a custom chatbot you can create inside ChatGPT to help with specific tasks.

- You choose the tone, topic, and abilities.
- Great for teaching, coaching, content creation, customer support, and more.
- Think of it as a digital assistant tailored exactly to your needs.

 **Example:** A coach can create a GPT that delivers daily affirmations, prompts, and tips for clients.

WHAT DOES “GPT” STAND FOR?

GPT = Generative Pre-trained Transformer

A GPT is a custom chatbot you can create inside ChatGPT to help with specific tasks.

- A type of AI model built by OpenAI.
- Trained on huge amounts of text and code.
- Designed to understand language and respond like a human.

It powers ChatGPT's ability to carry on conversations, answer questions, and generate helpful content.

 **You can build your own GPTs to save time, support others, and grow your ideas—on autopilot!**

SO, WHAT IS A CUSTOM GPT?

A custom GPT is like a personalized version of ChatGPT that you can tailor for a specific purpose. You get to decide how it responds, what it focuses on, and even what tools or files it can access. Whether you want a friendly writing assistant, a podcast planner, or a mindset coach, you can create a custom GPT that's aligned with your tone, goals, and audience. No coding needed—just clear instructions and a creative vision.
