

Beauty Base Video Tutorials

Training Welcome

0:00

So let's dive into our training for using the Simple Pure Beauty Base. The Database View and the Snapshot View have most of the same characteristics and you're going to be able to do a lot of the same things. There's just a few things that you can do in the Database View that you can't do in the Snapshot View. But generally the filters are all going to be the same and you're going to be able to sort the same.

Just as a quick reminder, I recommend when open up your Beauty Bases that you do add them to your favorites in your browser, whichever browser you're using. I use Chrome and I usually go over here to the three dots and I will click on bookmarks and bookmark this tab. That way whenever you are doing some research, you won't have to log back into your members area to find the links.

So in our training videos, these are going to be short, quick videos on specific things you can do with the Beauty Base and they're going to just give you a jumpstart on getting started. So we're going to go through display basics, grouping and sorting, filtering and printing options if you're wanting to print. Welcome to the video tutorials. I'm excited for you to learn how to use this very simple but powerful tool for your research.
