

🔥 25 AI Prompts-JobHunter Pro (Premium Collection) 🤖

Organized by strategy. Every message follows the **Netflix Formula**:

Hook → Open Loop → Micro Ask

- ✓ Start specific
- ✓ Create curiosity
- ✓ Make it easy to say yes

🧠 HOW TO USE THESE PROMPTS:

Option 1: Use the Ready-Made Examples Each prompt includes a pre-written message template. Simply replace the bracketed placeholders [like this] with your specific information and send immediately.

Option 2: Generate Custom Messages with AI Copy the "🤖 AI Prompt" section and paste it into ChatGPT, Claude or Perplexity(my 3 favorite). Fill in all the required context fields, and the AI will create personalized messages in your unique voice and style.

👉 **Tip:** Be sure to log in (Gmail works best) so your prompt threads are saved. That way, you can easily return to them and ask follow-up questions later.

Pro Tip: The AI-generated approach creates more authentic, tailored messages that stand out in crowded inboxes. Use the examples for speed, use the AI prompts for maximum impact. Change words to make it feel like your own voice before sending.

Netflix Formula = 🔑 • Hook: Start with something specific about them • **Open Loop:** Create curiosity (don't give it all away) • **Micro Ask:** End with a small, easy request

CONNECTION / INTRO PROMPTS (1–3)

1. LinkedIn Connection Note to a Hiring Manager Hi [Name], noticed your work on [project] at [Company]. I've worked on something similar and thought it'd be smart to connect — open to connecting?

Netflix Formula: • Hook: Specific reference to their project • Open Loop: Mention similar work without details • Micro Ask: Simple connection request

 **AI Prompt:** "Write a LinkedIn connection note under 200 characters to a hiring manager. Use the Netflix Formula: specific hook, open loop, soft ask."

Context needed:
