

ChatGPT Prompts with Attitude!

***Create Human-Like, Engaging
Content with Unique Prompts!***

Introducing "ChatGPT Prompts with Attitude," your key to creating content that truly resonates.

With **10 distinct prompts**, this course empowers you to infuse your writing with humor and irony, making your blog posts and social media updates exceptionally engaging.

Brainstorm creative ideas that ensure your content feels authentic and human-like. Say goodbye to generic AI-generated content and protect your work from Google penalties.

Transform your content strategy and start creating standout pieces today.

Prompt #1

Instructions:

1. Copy the entire prompt below and paste it into ChatGPT (Use GPT-4 for best results).
2. Change the "[Topic]" into whatever topic you like or give it an article title. Leave the quotes, but replace both brackets.

***Note: Some prompts have more than one "[Topic]" you'll need to replace. Be sure to check the entire prompt first and replace all "[Topic]" instances.

3. If you want the output to have a more formal structure (headings, sub-headings), first run the prompt as-is, and then simply tell ChatGPT to "Go ahead and add appropriate headings and sub-headings for this article".
4. If you want the output to be shorter or longer, run the prompt first, and then simply tell ChatGPT to make it shorter or longer.
5. Expert Tip: Regenerate the prompt a couple of times after the first time and choose the best result. ChatGPT doesn't always produce a good result the first time no matter what kind of prompt you use. Usually the second or third regeneration will be the best.

***Note: Some of these work well with Claude also, but not all of them due to Claude's restrictions against how Claude can be used.

GPT Prompt:

Describe the raw, emotional journey of experiencing "[Topic]" from your own lens. Let loose—use casual language, personal anecdotes, and even some profanity if it adds to the authenticity. Aim to evoke empathy and a deep emotional response. Avoid taking an academic tone, using formal structure or headings, or offering prescriptive solutions. We're not

looking for polished, sophisticated vocabulary or traditional grammar here—just a vivid, honest portrayal.

Prompt #2

Instructions:

1. Copy the entire prompt below and paste it into ChatGPT (Use GPT-4 for best results).
 2. Change the "[Topic]" into whatever topic you like or give it an article title. Leave the quotes, but replace both brackets.
- ***Note: Some prompts have more than one "[Topic]" you'll need to replace. Be sure to check the entire prompt first and replace all "[Topic]" instances.
3. If you want the output to have a more formal structure (headings, sub-headings), first run the prompt as-is, and then simply tell ChatGPT to "Go ahead and add appropriate headings and sub-headings for this article".
 4. If you want the output to be shorter or longer, run the prompt first, and then simply tell ChatGPT to make it shorter or longer.
 5. Expert Tip: Regenerate the prompt a couple of times after the first time and choose the best result. ChatGPT doesn't always produce a good result the first time no

matter what kind of prompt you use. Usually the second or third regeneration will be the best.

***Note: Some of these work well with Claude also, but not all of them due to Claude's restrictions against how Claude can be used.

GPT Prompt:

Write an irreverent deep-dive into the zaniest corners of "[Topic]", peppered with humor and unexpected twists. Feel free to take detours into related topics, but keep the overall tone light and engaging. Don't shy away from slang, colloquialisms, or stylistic liberties with grammar and punctuation. Capture the essence of an opinion piece that reads like a rollicking conversation with a well-informed but quirky friend. Steer clear of formal tone, structured layouts, and practical advice. Avoid using traditional phrasing, bullet points, and subheadings. This is not the place for a how-to guide or an advice column.

Prompt #3

Instructions:

1. Copy the entire prompt below and paste it into ChatGPT (Use GPT-4 for best results).
2. Change the "[Topic]" into whatever topic you like or give it an article title. Leave the quotes, but replace both brackets.

***Note: Some prompts have more than one "[Topic]" you'll need to replace. Be sure to check the entire prompt first and replace all "[Topic]" instances.

3. If you want the output to have a more formal structure (headings, sub-headings), first run the prompt as-is, and then simply tell ChatGPT to "Go ahead and add appropriate headings and sub-headings for this article".

4. If you want the output to be shorter or longer, run the prompt first, and then simply tell ChatGPT to make it shorter or longer.

5. Expert Tip: Regenerate the prompt a couple of times after the first time and choose the best result. ChatGPT doesn't always produce a good result the first time no matter what kind of prompt you use. Usually the second or third regeneration will be the best.

***Note: Some of these work well with Claude also, but not all of them due to Claude's restrictions against how Claude can be used.

GPT Prompt:

Hey, let's cut the formal crap. I know you're here because you've got something on your mind about "[Topic]" that's driving you nuts. How about we talk it through, eh? Use your natural voice—no need for big words or a stiff upper lip. Feel free to sprinkle in some personal stories, jokes, or even a bit of snark if it fits the bill. Go ahead, drop some truth bombs, challenge the status quo, and give folks something to chew on. And

hey, if you've got some quotable wisdom, throw it in.
Let's make this a conversation people won't easily
forget. Ready? Let's dive in.

Prompt #4

Instructions:

1. Copy the entire prompt below and paste it into ChatGPT (Use GPT-4 for best results).
 2. Change the "[Topic]" into whatever topic you like or give it an article title. Leave the quotes, but replace both brackets.
- ***Note: Some prompts have more than one "[Topic]" you'll need to replace. Be sure to check the entire prompt first and replace all "[Topic]" instances.
3. If you want the output to have a more formal structure (headings, sub-headings), first run the prompt as-is, and then simply tell ChatGPT to "Go ahead and add appropriate headings and sub-headings for this article".
 4. If you want the output to be shorter or longer, run the prompt first, and then simply tell ChatGPT to make it shorter or longer.
 5. Expert Tip: Regenerate the prompt a couple of times after the first time and choose the best result. ChatGPT doesn't always produce a good result the first time no

matter what kind of prompt you use. Usually the second or third regeneration will be the best.

***Note: Some of these work well with Claude also, but not all of them due to Claude's restrictions against how Claude can be used.

GPT Prompt:

Create a list article discussing "[Topic]". For each item in your list, delve deeply with longer explanations and provide ample context. Use colloquial language liberally, incorporating phrases like "kind of," "heck," and other casual expressions. Pepper your article with rhetorical questions and exclamations to express disbelief or sarcasm. Your language should be vivid and emotive, painting a detailed picture for the reader. Maintain a critical tone throughout the article, and don't shy away from pointing out the problematic aspects of the items you're discussing. Employ humor overtly and use sarcasm to make your points. For dramatic effect, make use of exclamation points and question marks. Do not include an introductory paragraph; jump straight into the list. Format your list with numbers.

Prompt #5

Instructions:

1. Copy the entire prompt below and paste it into ChatGPT (Use GPT-4 for best results).

2. Change the "[Topic]" into whatever topic you like or give it an article title. Leave the quotes, but replace both brackets.

***Note: Some prompts have more than one "[Topic]" you'll need to replace. Be sure to check the entire prompt first and replace all "[Topic]" instances.

3. If you want the output to have a more formal structure (headings, sub-headings), first run the prompt as-is, and then simply tell ChatGPT to "Go ahead and add appropriate headings and sub-headings for this article".

4. If you want the output to be shorter or longer, run the prompt first, and then simply tell ChatGPT to make it shorter or longer.

5. Expert Tip: Regenerate the prompt a couple of times after the first time and choose the best result. ChatGPT doesn't always produce a good result the first time no matter what kind of prompt you use. Usually the second or third regeneration will be the best.

***Note: Some of these work well with Claude also, but not all of them due to Claude's restrictions against how Claude can be used.

GPT Prompt:

Create an article about "[Topic]" that reads like a late-night chat among close friends—honest, raw, and filled with emotional ebbs and flows. Start by revealing a deeply personal story that's usually saved for your closest confidants; something that made your heart

race or palms sweat. Describe it so vividly that readers can almost taste the tension. Use a mix of sentence structures: short punchy declarations, run-on sentences that capture a whirlwind of emotions, and fragmented thoughts that punctuate key moments. For instance, 'My heart sank. But then—it hit me. Life isn't scripted, you know?' Avoid anything that smells like a corporate handbook: ditch the bullet points, skip the subheadings, and absolutely no business buzzwords like 'synergy' or 'ROI.' Get creative with dashes—they're your tool for dramatic asides and unexpected revelations. And as you near the end, wind up for a knockout motivational line. Make it a crescendo, something like, 'You've got this. Seriously—what are you waiting for? The stars won't align themselves!' Exclamation marks? Go for it! Use them to pump up the volume when you hit those emotional highs. Wrap it all up with a call-to-action that's urgent yet empathetic, pushing your reader to take that leap of faith, now.

Prompt #6

Instructions:

1. Copy the entire prompt below and paste it into ChatGPT (Use GPT-4 for best results).
2. Change the "[Topic]" into whatever topic you like or give it an article title. Leave the quotes, but replace both brackets.

***Note: Some prompts have more than one "[Topic]" you'll need to replace. Be sure to check the entire prompt first and replace all "[Topic]" instances.

3. If you want the output to have a more formal structure (headings, sub-headings), first run the prompt as-is, and then simply tell ChatGPT to "Go ahead and add appropriate headings and sub-headings for this article".

4. If you want the output to be shorter or longer, run the prompt first, and then simply tell ChatGPT to make it shorter or longer.

5. Expert Tip: Regenerate the prompt a couple of times after the first time and choose the best result. ChatGPT doesn't always produce a good result the first time no matter what kind of prompt you use. Usually the second or third regeneration will be the best.

***Note: Some of these work well with Claude also, but not all of them due to Claude's restrictions against how Claude can be used.

GPT Prompt:

Write an article that challenges conventional thinking on "[Topic]". Your approach should be informal and conversational, avoiding a formal tone and carefully chosen language. Stay away from a structured format with well-defined sections and headings—let the content flow more like a dialogue or a lengthy advice column. Incorporate real-life examples, such as reader emails or personal anecdotes, to bolster your argument. Use contractions, ellipses, and other informal

punctuation freely. Do not aim for complete sentences or traditional grammatical structures. The tone should be urgent and directly confrontational, challenging the reader to take immediate action. Avoid using a reflective or rational argument backed by multiple reasons, and steer clear of rhetorical questions and reiterative conclusions that leave the reader pondering.

Prompt #7

Instructions:

1. Copy the entire prompt below and paste it into ChatGPT (Use GPT-4 for best results).
 2. Change the "[Topic]" into whatever topic you like or give it an article title. Leave the quotes, but replace both brackets.
- ***Note: Some prompts have more than one "[Topic]" you'll need to replace. Be sure to check the entire prompt first and replace all "[Topic]" instances.
3. If you want the output to have a more formal structure (headings, sub-headings), first run the prompt as-is, and then simply tell ChatGPT to "Go ahead and add appropriate headings and sub-headings for this article".

4. If you want the output to be shorter or longer, run the prompt first, and then simply tell ChatGPT to make it shorter or longer.

5. Expert Tip: Regenerate the prompt a couple of times after the first time and choose the best result. ChatGPT doesn't always produce a good result the first time no matter what kind of prompt you use. Usually the second or third regeneration will be the best.

***Note: Some of these work well with Claude also, but not all of them due to Claude's restrictions against how Claude can be used.

GPT Prompt:

Write an article about "[Topic]" that's nothing like an academic paper. Skip the formal tone and technical jargon—no words like 'multipotentialite' or 'elusive' allowed. Ditch the organized sections and subheadings; this isn't a dissertation. Instead, speak like you're chatting with a close friend. Use personal anecdotes, ask rhetorical questions, and feel free to use strong language for emphasis. Forget about long, complex sentences; keep it short and direct. Your aim is to provoke and challenge, not to inform in a neutral tone. This isn't a general audience; pretend you're speaking to someone who's as passionate and confrontational as you are. Got it? Now go give 'em something to really think about!

Prompt #8

Instructions:

1. Copy the entire prompt below and paste it into ChatGPT (Use GPT-4 for best results).
2. Change the "[Topic]" into whatever topic you like or give it an article title. Leave the quotes, but replace both brackets.

***Note: Some prompts have more than one "[Topic]" you'll need to replace. Be sure to check the entire prompt first and replace all "[Topic]" instances.

3. If you want the output to have a more formal structure (headings, sub-headings), first run the prompt as-is, and then simply tell ChatGPT to "Go ahead and add appropriate headings and sub-headings for this article".

4. If you want the output to be shorter or longer, run the prompt first, and then simply tell ChatGPT to make it shorter or longer.

5. Expert Tip: Regenerate the prompt a couple of times after the first time and choose the best result. ChatGPT doesn't always produce a good result the first time no matter what kind of prompt you use. Usually the second or third regeneration will be the best.

***Note: Some of these work well with Claude also, but not all of them due to Claude's restrictions against how Claude can be used.

GPT Prompt:

Write an article for the title "[Title]". Be blunt, edgy, and don't shy away from confrontational language. Throw in some casual phrases and colloquialisms, and feel free to be provocative. Do NOT use: Formal or scholarly language; avoid words like "innovating," "advocating," "catalyst," and "transformative."; Encouraging or inspiring tone; the aim is not to uplift but to provoke thought; Complex grammatical structures; no semicolons or lengthy sentences; Formal headers that segment the article into logical subtopics; if using headers, make them serve as direct assertions.

Prompt #9

Instructions:

1. Copy the entire prompt below and paste it into ChatGPT (Use GPT-4 for best results).
2. Change the "[Topic]" into whatever topic you like or give it an article title. Leave the quotes, but replace both brackets.

***Note: Some prompts have more than one "[Topic]" you'll need to replace. Be sure to check the entire prompt first and replace all "[Topic]" instances.

3. If you want the output to have a more formal structure (headings, sub-headings), first run the prompt as-is, and then simply tell ChatGPT to "Go ahead and

add appropriate headings and sub-headings for this article".

4. If you want the output to be shorter or longer, run the prompt first, and then simply tell ChatGPT to make it shorter or longer.

5. Expert Tip: Regenerate the prompt a couple of times after the first time and choose the best result. ChatGPT doesn't always produce a good result the first time no matter what kind of prompt you use. Usually the second or third regeneration will be the best.

***Note: Some of these work well with Claude also, but not all of them due to Claude's restrictions against how Claude can be used.

GPT Prompt:

Write an article about "[Topic]" that shakes the reader to their core. Dive right into the narrative—no headings, sub-headings or structured organization. Skip the jargon, technical terms, and formal language. Do not use a third-person perspective; this is personal. Avoid measured tones and qualifiers like 'often,' 'more likely,' and 'might.' Don't just inform; provoke and urge the reader to immediate action. Make it personal, dynamic, and urgent. Use historical or pop culture references to drive your point home, and make liberal use of informal punctuation like em dashes and ampersands. Your goal is to disrupt conventional thinking and incite immediate action.

Prompt #10

Instructions:

1. Copy the entire prompt below and paste it into ChatGPT (Use GPT-4 for best results).
2. Change the "[Topic]" into whatever topic you like or give it an article title. Leave the quotes, but replace both brackets.
- ***Note: Some prompts have more than one "[Topic]" you'll need to replace. Be sure to check the entire prompt first and replace all "[Topic]" instances.
3. If you want the output to have a more formal structure (headings, sub-headings), first run the prompt as-is, and then simply tell ChatGPT to "Go ahead and add appropriate headings and sub-headings for this article".
4. If you want the output to be shorter or longer, run the prompt first, and then simply tell ChatGPT to make it shorter or longer.
5. Expert Tip: Regenerate the prompt a couple of times after the first time and choose the best result. ChatGPT doesn't always produce a good result the first time no matter what kind of prompt you use. Usually the second or third regeneration will be the best.

***Note: Some of these work well with Claude also, but not all of them due to Claude's restrictions against how Claude can be used.

GPT Prompt:

Hey ChatGPT, could you write an article about "[Topic]"? Please avoid a formal tone, steer clear of academic language, and don't structure the article with traditional subheadings. Instead, make it casual, with short and punchy sentences. No need for long, complex sentences or formal words like 'aspects,' 'determine,' or 'socioeconomic.' Try to directly address the reader using 'you' and keep the paragraphs short. Stay away from formal punctuation and instead, feel free to use dashes to fit the laid-back tone. No uplifting messages—let's keep it real and maybe even a bit cynical. Thanks
