

WHAT IS KANGEN WATER™?

Electrolyzed Reduced Ionized Water

produced through a process called electrolysis – where an electric current is passed through the water to separate water into oxygen and hydrogen gas, dissolving large amounts of Molecular Hydrogen (H₂) into the water.

Rich in Active Molecular Hydrogen + Negative ORP

aids your body in neutralizing free radicals that cause aging and disease - the more free radicals we neutralize, the more toxins we can effectively flush from our system.

Creating Antioxidant-Like Effects

has been shown to have potent antioxidant-like affects in the body and decreases free radical formation due to the richness of the molecular hydrogen that is present in Kangen Water™.

7 Types of pH Water... All From Your Tap!

ranging from 2.5pH to 11.5pH- from sanitizing your house, to drinking alkalized micro-clustered water...this machine will be used throughout all aspects of your life.

**Strong
Alkaline
11.5pH**

**Clean Water
7.0pH**

**Kangen
8.5- 9.5
pH**

**Beauty
Water
6.0 pH**

**Strong
Acidic
2.5pH**

Strong Acidic: Kills pathogens, microbes, disinfects and is stronger (and 100% less toxic) than bleach

Beauty: most similar to the pH of rain water and our natural skin. (Think hydrating skin, hair and plants!)

Clean: suggested use for baby formula, pets and medication.

Kangen: the highest quality drinking water!

Strong Alkaline: emulsifies oils and oil-based pesticides, acts as produce cleaner, degreaser and stain remover.

Did you know that **64% of BOTTLED WATER** is actually **TAP WATER?**

You're just paying 2000x more for it!
Click [here](#) to find out more.

Did you know that a study of 259 bottles of water found 93% contained microplastics? Check it out [here](#).

The trend of water bottlers increasingly turning to tap water sources for bottling threatens our public water resources and is a bad deal for consumers who pay hundreds to thousands of times more for a product they can get from the tap. (Article [Here](#))

How much does bottled water cost you per year?
Look on the next page... you will be shocked!

BOTTLED WATER COMPANIES AND THEIR STANDARDS
YOUR TAP WATER IS TREATED BY WATER TREATMENT PLANTS AND MUST MEET A HIGH STANDARD OF WATER QUALITY, AS DEFINED BY THE U.S. ENVIRONMENTAL PROTECTION AGENCY (EPA). BOTTLE WATER COMPANIES DO NOT HAVE TO MEET THESE WATER QUALITY STANDARDS. ([ARTICLE HERE](#))

How Much Are You Spending on

Water Type	Product	Retail Price	Water Price Per Gallon	Annual Household Water Cost	25 Year Total Cost
Kangen 8		\$5,480	\$.0037	(\$1.71 plus \$150 for filter yearly) \$151.71	\$9,272.75
Dasani		24/ 16.9oz \$4.99	\$1.57	\$729.07	\$18,226.75
Aquafina		24/ 16.9oz \$5.39	\$1.70	\$787.54	\$19,688.50
Fiji		6/ 16.9oz \$6.99	\$8.82	\$4,085.27	\$102,131.75
Smart Water		15/ 33.8oz \$18.59	\$4.69	\$2,172.97	\$54,324.25
Essentia		12/ 12oz \$13.99	\$12.43	\$5,757.52	\$143,938.03

Note: The average household (in the US) is 2.53 people. The average person consumes 183 gallons of water per year. Pricing is based off of current bulk pricing in large retail stores. A Kangen Machine's average lifespan with proper maintenance is 25 years!

WHY THE HIGHER PRICE, ENAGIC?

Is it because I'm paying into a pyramid scheme?

No! This is a huge misconception. Let's talk about it!

54% of the cost of a kangen machine is paid out in commissions. What does that mean?

A K8 model machine costs \$5,480. When a machine is bought, Enagic sends out \$2,960 in commission checks. That seems like a lot, right? It is! But it's not that it's a lot of profit for the company. Companies of many different types see that percentage of profit margin. However, when we agree and say that it's a lot, we mean it's a lot going right into distributors pockets.

Distributors are people- just like you and us... young families, single parents, college graduates, individuals who decide to distribute for their "second job"... It's an incredible amount of potential income and it's what makes Enagic's compensation plan truly unique. Let's dive deeper.

Famous Footwear Shoe Stores buys a pair of Nike sneakers for \$100. They profit \$50. However, the average retail sales associate makes \$11.36/ hour. The rest of that money goes to things like upkeep of stores, advertisements, and paying those on top(owner, managers, etc).

A 30-second commercial for Super Bowl 54 in 2020 cost about \$5.6 million. During the LIV Super Bowl in 2020, Anheuser-Busch earned the title of the top ad spender, having invested 42 million U.S. dollars in promoting its products.

Consumer packaged goods (CPG) companies often incur substantial costs to get their products in- store, secure premium placement, and run promotions. Slotting fees average \$1500 per store per SKU. If you consider that a range review may introduce 7-12 new SKUs, listing these products in a 1000-store retail chain nationwide has a huge impact on a CPG's bottom line.

Enagic doesn't invest their time or energy into any advertising. That's why you won't ever see a Kangen machine sitting on a Target shelf, or a commercial advertising them during an evening TV session.

They chose to let "independent distributors" sell their machines and spread the word, instead of spending that money on ads and promotions. In a way, they are putting money back into our communities.

And it makes sense: Enagic sees the value in having their distributors actually owning a machine, and understanding the machine. A person will be more motivated to sell their products when they are truly experiencing health benefits from the water themselves, and are motivated to understand the ins and outs of the products and company.

Enagic takes care of their distributors, and in return, distributors are happy to work with them.

pH: WHAT IT IS

One of the important parameters of water quality is the pH. A pH measurement reveals whether the solution is acidic, neutral, or alkaline.

In the most basic sense, pH refers to the negative logarithmic (log) measurement of the H⁺ ion concentration in solution. The more H⁺, the more acidic; the less H⁺, the more alkaline. The 'p' refers to the German word 'potenz' or power. The pH of water is a very important measurement concerning water quality.

& WHY pH BALANCE IS IMPORTANT

Our bodies live and die at a cellular level and the cells must maintain alkalinity in order to function and stay alive. An acidic state causes lack of oxygen at a cellular level. A pH of below 7.4 is suboptimal- providing the perfect environment for bacteria, mold and viruses to grow. Many bottled water companies try to profit on labeling their water as Alkaline, however its pH is only temporarily altered by adding a synthetic chemical. Kangen Water™ is created through the process of electrolysis.

A Kangen machine produces these pH's:

2.5

6.0

7.0

8.5

9.0

9.5

11.5

ACIDIC

What is ORP?

OXIDATION REDUCTION POTENTIAL (ORP)

Oxidation reduction potential, or ORP, is a measure of a substance's ability to either oxidize or reduce another substance. It is measured by the electrodes of an ORP meter. A positive reading on an ORP meter means that the substance is an oxidizing agent; a negative reading indicates that the substance is a reducing agent.

Oxidation Scale

Negative ORP

-400

-300

-200

-100

0

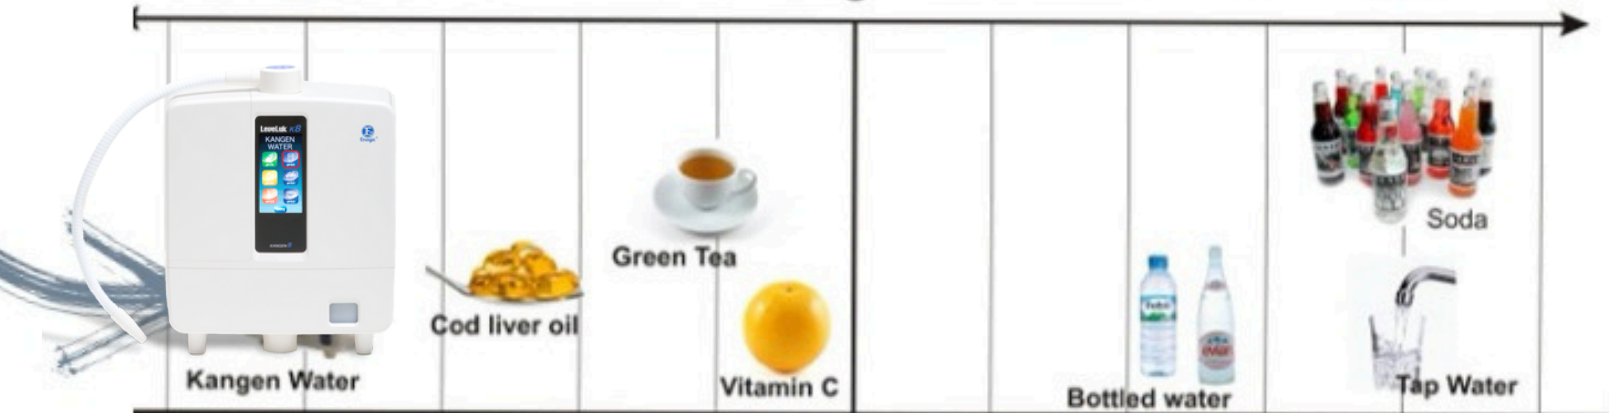

Positive ORP

100

200

300

400

What does the ORP of Kangen Water™ Look Like? -400 ORP!

~75% of Americans are chronically dehydrated, meaning they lack the hydration necessary to thrive. Kangen Water™ permeates the cellular wall and hydrates on a cellular level. Alongside this, it is anti-oxidizing. Oxidation is naturally occurring in us all the time but is amplified due to our high stress lifestyle and toxic environment, and is at the center of many diseases. This water is rich in Molecular Hydrogen, allowing it to have a low ORP to help neutralize free radicals. This decreases oxidative stress and slows the aging that is happening in our body. Just like pH, ORP values are an important measurement for determining the quality of water.

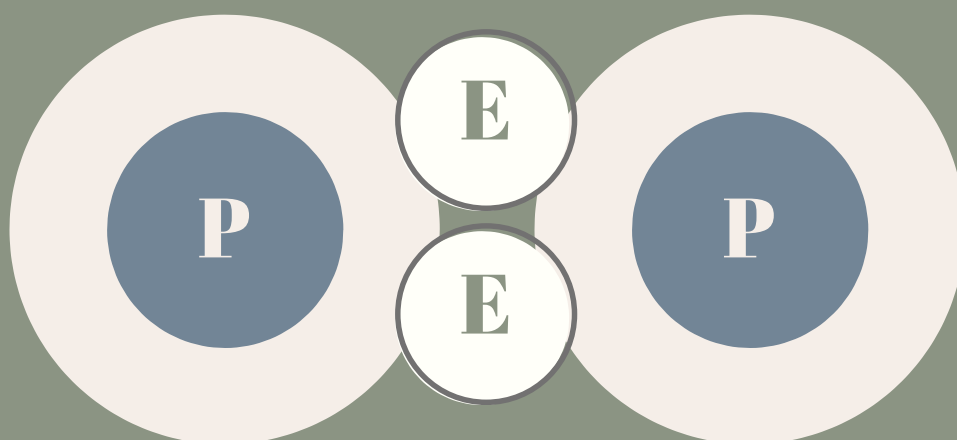

WHAT IS **MOLECULAR HYDROGEN**?

Molecular Hydrogen is a form of hydrogen that has been shown to have a wide range of therapeutic effects on over 150 Human Diseases! It is the strongest antioxidant known to man because it hydrates and detoxifies on a cellular level. Some articles refer to this as "hydrogen-rich water".

Molecular Hydrogen is the smallest molecule in the universe. This extremely small size and its high lipid solubility allows it to easily diffuse into the sub-cellular compartments of the mitochondria and other locations. (This is often referred to as 'micro-clustered'.) Read more and check out the studies [here](#)!

Interested in learning more about Molecular Hydrogen?
Check out the Molecular Hydrogen Institute online by clicking [here](#).
Wanting to read peer-reviewed articles on it's health benefits?
Head to PubMed.Gov and search "Molecular Hydrogen Water" (or [click here](#).)

Two hydrogen atoms (H) are covalently bonded (a type of chemical bond) together as H-H and form a molecule; so, H₂ is also referred to as molecular hydrogen. The hydrogen molecule contains two protons and two electrons making it a neutrally-charged molecule.

100 USES

Eliminate Toxic Chemicals and

OF YOUR K8

Plastic Consumption in Your Home

SKIN CONDITION REMEDIES:

Acne:

1. Rinse with pH 11.5 Strong Alkaline Water to remove excess oils from the skin.
2. Cleanse with non-soap cleanser and pH 4-6 Mild Acidic Water.
3. With a cotton swab dab pH 2.5 Strong Acidic Water on any active blemishes or broken skin.
4. Tone with pH 4-6 Water in a glass bottle with a fine spray mister.
5. Repeat morning and bedtime.
6. Tone multiple times per day to keep skin hydrated.

Eczema and Psoriasis:

1. Rinse with pH 11.5 Strong Alkaline Water to remove excess oils from the skin.
2. Cleanse with non-soap cleanser and pH 4-6 Mild Acidic Water.
3. With a cotton swab dab 2.5 Strong Acid Water on any broken skin.
4. Tone with 5.5 Beauty Water in a glass bottle with a fine spray mister.
5. Repeat morning and bedtime.
6. Tone multiple times per day to keep skin hydrated.

Rashes and Burns:

1. Rinse with pH 11.5 Strong Alkaline Water to remove excess oils from the skin.
2. Cleanse with non-soap cleanser and pH 4-5 Mild Acidic Water.
3. With a cotton swab dab 2.5 Strong Acid Water on any broken skin.
4. Tone with pH 4-6 Mild Acidic Water in a glass bottle with a fine spray mister.
5. Repeat morning and bedtime.
6. Tone multiple times per day to keep skin hydrated.

Diaper Rash:

1. Cleanse with non-soap cleanser and pH 4-5 Mild Acidic Water & pat dry.
2. With a cotton swab dab 2.5 Strong Acid Water on any broken skin and let dry.
3. Hydrate the skin with pH 4-6 Mild Acidic Water in a glass bottle with a fine spray mist setting.
4. Repeat after each diaper change.

Next replace baby wipes with a container filled with soft cloths or unbleached paper towels and Mild Acidic Water. Use to cleanse diaper area each time you change your baby, pat dry and then apply a very fine mist to the skin. This assists in keeping the pH of the skin balanced.

Body Odor:

simply mist with pH 2.5 Strong Acid Water to stop the odor.

KANGEN WATER™ USES

Continued...

11.5pH WATER STRONG KANGEN

1. GOOD NIGHT SLEEP: Drink 1/2-1 ounce of 11.5 before bedtime to help release Melatonin for a great night sleep
2. EYE WASH: Rinse eyes with an eye cup. Upon removing the eye cup from its packaging, soak in Strong Acid Water (pH 2.5) for 1-2 minutes to clean and disinfect. Rinse the eye cup thoroughly with Strong Alkaline Water (pH 11.5) Fill the cup, following package directions, with Strong Alkaline Water (pH 11.5) Place cup firmly around one eye, keeping your eye open, tilt your head back and gently roll your eye as though you were attempting to look up, down, and from side to side. Continue this for approximately 1 minute. Now that you have completed one eye, toss the water away. Rinse the eye cup thoroughly with Strong Acid Water (pH 2.5) Repeat steps for your other eye. To maintain healthy eyes follow this protocol 1-3 times per week. When working to improve any eye condition, follow this protocol at least 2 times daily and up to 10 times per day.
3. GREASE IN EYE: Spray 11.5 as needed to soothe and heal eye.
4. MAKE UP REMOVER: Spray on eyes to dissolve and remove make up.
5. PUFFY EYES: Spray on to eyes to reduce puffiness.
6. HOT BATH SOAK: Use one gallon of 11.5 added right at the end of filling the tub. This replaces Epsom Salts or any other remedy. This works even better if you have the Anespa from Enagic.
7. ALLERGIES, COLD SYMPTOMS, SNORING: Use as a nasal wash when sinuses are plugged. Due to the reduction in inflammation of nasal passages this technique can also reduce snoring!
8. BUG SPRAY REPELLENT, SUNBURN, PAIN, BUG BITES, SWELLING: Spray or soak areas with towel soaked in 11.5 and keep wet by adding small amounts of 11.5 to the towel for a minimum of 30 minutes twice a day...better if one hour twice daily.
9. HEAT BURN, INDIGESTION, FOOD POISONING, STOMACH FLU: Drink ¼ cup FRESH 11.5 immediately followed by 25 ounces of 9.5 then do not eat or drink anything for 45 minutes. Repeat the next day only if necessary.
10. ARTHRITIS, GOUT, MUSCLE SORENESS OR TISSUE INJURIES: Since high alkalinity draws out acids, you can utilize 11.5 to soak in to “pull out” acids associated with inflammation, injury and pain.
11. HANGOVERS & MIGRAINES: can prevent hang overs, as soon as feel migraine coming on, drink several oz.
12. CHEMOTHERAPY: Drink the water with chemotherapy. The benefits are that side effects are lessened, it reverses metabolic acidosis, and the antioxidants are good for any point on chemo. Put 11.5 on the skin twice a day for burns from chemo.
13. STROKE: Drink as much as able if feel a stroke coming on to provide potent alkalinity to overcome severe acidosis causing the stroke.
14. FRUITS & VEGGIES: Soak for a minimum of 5 minutes to clean off pesticides.
15. ICE CUBES: To help off-set acidic drinks (think iced coffee!).
16. RICE, BEAN, LEGUMES: Soak for 5 to 10 minutes and rinse clean with low flow 9.5.
17. MEATS: Soak all for 5 to 10 minutes for cleaning and tenderizing.

KANGEN WATER™ USES

Continued...

11.5pH WATER STRONG KANGEN

- 18. LAUNDRY SOAP: Use 1 to 2 quarts per load in place of laundry soap. Works beautifully for greasy smells like Fast-food Restaurant work clothes.
- 19. STAINS ON CLOTHES, RUGS, CARPETS: Use as a degreaser for any type of cleaning. Clean oil based stains by soaking the area and letting sit for 10 to 20 minutes and then blot out of carpets and wash if laundry stain as mentioned in step 17.
- 20. CLEAN OVEN, CLOGGED SINKS & TUBS, REPLACE 409 CLEANER & DRANO: Clean with a scratch pad. Replaces 409 cleaner when dissolving grease and grime in kitchen. Use instead of Drano or other chemicals for clogged sinks and bathtubs.
- 21. POLISH SILVER: Soak and polish.
- 22. PAINT THINNER: After using oil base paints, use to clean up.
- 23. USE INSTEAD OF "GOO GONE": Removes greasy, gooey, gummy, sticky problems.

2.5pH WATER: STRONG ACIDIC

- 1. ASSIST WITH KILLING MICROBES: Pre-rinse all fruits, vegetables and meat and let sit for one minute before soaking in 11.5. It is also recommended to use on infections.
- 2. DISINFECTING: Use for disinfecting anything.
- 3. ANTI-BACTERIAL SOAP: Use in place of anti-bacterial soap.
- 4. HARD WATER SPOTS & RUST: Clean hard water spots off of chrome and rust off of metal.
- 5. FACIAL LIFTING & TIGHTENING: Spray face and neck (not eyes) and rub skin upward until dry. Finish with Beauty Water to tone skin.
- 6. BRUSH & GARGLE, ASSIST RESOLVING PERIODONTAL DISEASE & THRUSH, ROOT CANALS: Wait one minute and then rinse with 9.5 water for 30 seconds to restore the natural pH. This procedure will work to prevent/ assist with resolving periodontal disease & thrush, & root canals.
- 7. VOMITING: To stop vomiting take 1-2 Tbsp.
- 8. OPEN WOUNDS, BURNS, INFECTIONS, STOP BLEEDING, CANDIDA: has been shown to kill bacteria and pathogens. Use on cuts, scrapes to help stop bleeding. Clean twice daily until healed. Do not use any other ointments as they only attract microbes by keeping the area moist and sticky.
- 9. INFECTED SINUSES: Spray in nose 2x/day for 2 days. Wait 2 minutes, then flush with 11.5.
- 10. NAIL FUNGUS: Spray twice a day or soak.
- 11. PINK EYE: Spray infected eye several times thru the day and will clear up.
- 12. SORE THROAT, STREP THROAT, COUGH: Gargle 3-4 times per day or put in spray bottle and spray into throat.
- 13. POISON IVY: Spray on infected area as often as needed. Will slow down itching and dry up poison ivy much quicker.
- 14. FEVER BLISTERS, CANKER SORES: Spray or gargle to stop and dry up both.
- 15. MOLES & WARTS: If you see something abnormal on your skin you may want to soak a gauze pad on a band aid with the 2.5 and apply over the area. Change the band aid at least once a day. Often this process requires 30-60 days before seeing results.

6.0pH BEAUTY WATER

pH is similar to rain water and our natural skin

1. FACIAL SOAP: Clean face twice a day. Spray after cleaning.
2. HAIR CONDITIONER: Spray hair after showering as this conditions your hair. Try not to use conditioner of any kind as this coats the hair.
3. TONE SKIN: Use as final rinse in shower or bath to tone and firm skin.
4. RASHES, DIAPER RASH: Spray on skin to soothe and heal rashes, including diaper rash.
5. PETS: Bathe pets for more lustrous coats.
6. PLANTS: Water indoor and outdoor plants for vigorous growth. Can revive dying plants.
7. PASTA: Use to boil pasta.
8. FREEZING FOOD: Spray on foods before freezing including fish and shrimp so that foods do not lose their flavor.
9. ANTHOCYANINS: For washing and preparing fruits and vegetables containing anthocyanins: plums, grapes, cherries, strawberries, red cabbage, eggplant, soy beans, asparagus.
10. FABRIC SOFTENER: Use in rinse cycle during laundry. One gallon per load.
11. EYEGLASSES: Clean lenses.
12. REPLACE WINDEX: Replace all window and mirror cleaners with Beauty Water.
13. HARDWOOD FLOORS & CERAMIC TILE: For polishing and housecleaning: hardwood floors, ceramic tiles, etc.

8.5pH TO 9.5pH KANGEN WATER™

1. SOUPS: Cook all soups with 9.5 water.
2. STIR FRY: Stir fry with 9.5 to steam.
3. VISION: Can improve eye vision.
4. GREY HAIR: Often can return original hair color.
5. WEIGHT LOSS: Drink before you snack and before meals...wait 30 minutes and eat meal or if still hungry eat snack... most people are so dehydrated that their thirst mechanism is so weak, that they think they are hungry.
6. SPIDER VEINS: Over time of drinking the water and cell repairing, spider veins can improve.
7. AROMA THERAPY/SPRITZER: Put any herb like rosemary or lavender in a spray bottle filled with Kangen water™, let set for a couple of hours and use as a spritzer in your house for aroma therapy and an air freshener.

7.0 pH CLEAN WATER 1. Drink with meals only if necessary. 2. Use for making baby formula. 3. Drink with fast dissolving medication 4. Give to pets to drink

KANGEN WATER™ USES 6.0pH, 7.0pH, 8.5pH-9.5pH

READY TO GET STARTED AND ORDER YOUR KANGEN WATER™ MACHINE?

1. Connect with your ORE distributor & discuss which machine model is best for you/your lifestyle.
2. Complete order form and return policy. If you are interested in getting a distributor ID, you can also request that form.
3. You can choose between pay in full (can split between different cards) or take advantage of financing options via credit card, loan or payment plans.
4. Shipping takes approximately 5-7 business days once Enagic receives your order.
5. You receive your personal distributor ID number should you wish to refer others to this water and earn commission.

Bleach in the Electrolysis Enhancer?!

Excerpt from the January 2016 edition of
Executive News: Enagic's Independent Distributor Newsletter

Inaccurate information has been floating around the internet about the Enhancer Fluid used to make 2.5 pH Strong Acidic Water and 11.5 pH Strong Kangen Water™. So, let's set the record straight.

The enhancer fluid is 99%+ purified water. There is also a very small amount of sodium chloride, also known as "table salt". Other ionizer sellers have been known to use scientific terms to try to trick consumers into thinking an ingredient is somehow dangerous, or even diabolical. The salt in the enhancer fluid does two things; first, it allows the machine to maximize power during ionization; the salt acts as an added electrical conductor. There is also a reaction between the salt, the water and the electricity that creates a natural form of "bleach". The last component is an even smaller amount of sodium hypochlorite, which is the "chlorine" that is used to safeguard tap water. The amount used in tap water is typically 0.05% by volume. The enhancer fluid is 0.01% by volume. This means that there would be more sodium hypochlorite (chlorine) in a glass of tap water, than in an entire bottle of enhancer fluid. Yet some other ionizer sellers act like the enhancer fluid is hazardous, which is usually for no other purpose than scare tactics. This small amount of chlorine is used as a preservative to ensure quality of the enhancer fluid, that's all. Besides, the waters created when using the enhancer fluid are not recommended for drinking. Be assured, Enagic would never knowingly provide an additive that was dangerous.

ONLINE RIPPLE EFFECT

Watering Our Lives

Why is water so important to body function?

Water is essential in every system and function of the body, and has many responsibilities

Water is a building block of new cells and the key nutrient that every cell relies on for survival. It metabolizes and transports proteins and carbohydrates from the food you eat to nourish your body, helps flush waste mainly through urine, and helps maintain a healthy body temperature through sweat and respiration when the temperature rises. Water is also part of the 'shock absorber' system in the spine, protects sensitive tissue, is part of the fluid that surrounds and protects the brain and a baby in the womb, is the main ingredient in saliva, and helps keep joints lubricated.

To calculate how much water you should drink daily to maintain a healthy amount of water in your body, divide your weight in pounds by 2 & drink that amount in ounces.

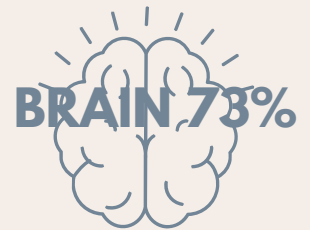

HEART & BRAIN 73
KIDNEY 79
BONES 31

90%

PLASMA

LUNGS 83
SKIN 64
MUSCLES 79

fatigue
dark urine
less-frequent urination
dry mouth
dizziness
confusion

While thirst is certainly the most obvious sign of dehydration, your body is actually becoming dehydrated before you feel thirsty.
Other symptoms of dehydration include:

Infants and young children experiencing dehydration may have those same symptoms, as well as dry diapers for a long period and crying without tears.

SOURCE: <https://www.healthline.com/health/body-water-percentage>

ONLINE RIPPLE EFFECT

IT IS TIME TO CLEANSE CONSCIOUSLY.

Did you know?

CHLORINE WAS FIRST ADDED INTO OUR WATER IN THE 19TH CENTURY TO COMBAT DISEASES SUCH AS TYPHOID AND CHOLERA. SHORTLY AFTER, PEOPLE BEGAN DYING FROM HEART DISEASE, RESPIRATORY DISEASE AND CANCER.

THE RISK OF DEVELOPING CANCER IS 93% HIGHER IN PEOPLE WHO DRINK
(OR ARE OTHERWISE EXPOSED TO) CHLORINATED WATER.

CHLORINE IS A HEALTH HAZARD TO BOTH CHILDREN AND ADULTS.

YOUR BODY ABSORBS MORE TOXIC EXPOSURE FROM SHOWERING IN TAP WATER THAN YOU DO FROM DRINKING IT. DURING THE COURSE OF ONE 10 MINUTE LONG SHOWER, YOU ABSORB MORE CHLORINE THAN YOU WOULD WHEN DRINKING 8 GLASSES OF TAP WATER.

YOUR SKIN ABSORBS HUNDREDS OF CHEMICALS FROM YOUR SHOWER.

WHEN WE TAKE HOT/STEAM SHOWERS IN CHLORINATED WATER WE INHALE + INGEST CHEMICAL GASES. RESEARCH AT BOSTON UNIVERSITY SHOWS THAT WE ABSORB UP TO 6X MORE VOLATILE CHEMICALS THROUGH OUR LUNGS AND SKIN WHILE BATHING, THAN FROM DRINKING CHLORINATED WATER.

SHOWERING IS THE PRIMARY CAUSE FOR ELEVATED LEVELS OF "CHLOROFORM" IN THE AVERAGE AMERICAN HOME. CHLOROFORM IS A POTENT CARCINOGEN THAT CAUSES VITAMIN E DEFICIENCY, CHRONIC KIDNEY AND LIVER FAILURE AS WELL AS RESPIRATORY DEFICIENCIES.

THE USE OF CHLOROFORM IN MEDICAL PROCEDURES IS NO LONGER ALLOWED.

CHLORINATED BATHING WATER IS ATTRIBUTED TO HAIR LOSS & DRY SCALP/ DANDRUFF. IT CAN ALSO BE ATTRIBUTED TO BIRTH DEFECTS, DENTAL DAMAGE AND INCREASE IN ALLERGY SYMPTOMS.

What is the long term solution?
SHOWER SMARTER.

How to Properly Search for Scientific Studies

Start Here:
PUBMED.GOV

PubMed® comprises more than 32 million citations for biomedical literature from MEDLINE, life science journals, and online books. Citations may include links to full text content from PubMed Central and publisher web sites.

Keywords to Search:

Electrolyzed Reduced Water (ERW)

Molecular Hydrogen

Hypochlorous Acid (2.5pH)

Sodium Hydroxide (11.5pH)

Astringent Water (compared to 'Beauty Water')

note: 'Kangen' is the name of the company/ brand, just like Kleenex is the name of a tissue brand. You will have an easier time finding credible research by searching the scientific name of the water compared to the brand name.

FURTHER YOUR SEARCH:

" _____ and _____ "

for example:

Electrolyzed Reduced Water and Diabetes

Electrolyzed Reduced Water and Muscle Recovery

Molecular Hydrogen and Inflammation

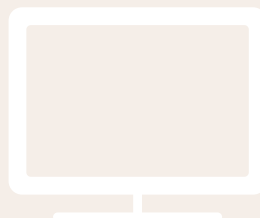

Hypochlorous Acid and Food Preparation

Other Resources:

We also highly recommend the [Molecular Hydrogen Institute](#).

MHI provides easy-access to the peer-reviewed scientific articles on molecular hydrogen, research collaboration, and many educational articles on molecular hydrogen and its associated misconceptions.

Tyler LeBaron, Director of MHI, joined us for two calls that you can find within the Community Call course on the ORE platform.
