

Mitigate Insider Threats

xSIGNAL's AI + Workflow driven threat mitigation platform identifies threats and breaches in real-time. Once a breach or threat has surfaced, xSIGNAL's omnichannel communications platform will alert the appropriate people via prescribed channels such as Teams, Slack, SMS, WhatsApp, Email.

Our Services

xSIGNAL*threat*

Surface, alert and mitigate suspicious behavior before it adversely affects business applications

xSIGNAL*erp*

Administrative staff is overburdened. Budgets are being slashed. Our data-to-action orchestration platform will change that.

xSIGNAL*campus*

Advisors and staff are overburdened. Budgets are shrinking. At-Risk students are falling through the cracks. We are here to change that.

Why Us?

xSIGNALthreat's Communications Governance Matrix reduces the reliance on overloaded dashboards by supporting creation of a company-wide anomaly notification protocol.

For example, handle known threats differently than false positives, minimize time-to-action, and maximize mitigation by ensuring the right message goes to the right person or team via the optimal communications channel.
