

Reimagine Communication With Intelligent Messaging™

**We don't just send messages.
We drive business *impact*.**

xSIGNAL helps organizations communicate smarter by turning routine alerts and notifications into intelligent messages that drive action, improve response, and keep critical operations moving.

Where traditional systems fall short by flooding inboxes and missing follow-ups, xSIGNAL enhances notifications with context, timing, and action, so teams never miss a step.

Smart Message Prioritization

Surface what matters most with intelligent notifications, logic embedding and AI-optimized routing.

Built-In Actions & Escalation

Accelerate decisions and minimize delays with real-time event triggers and response tracking.

Omni-Channel Delivery

Deliver the right message, to the right person, at the right time on any channel your people actually use.

Intelligent Messaging™

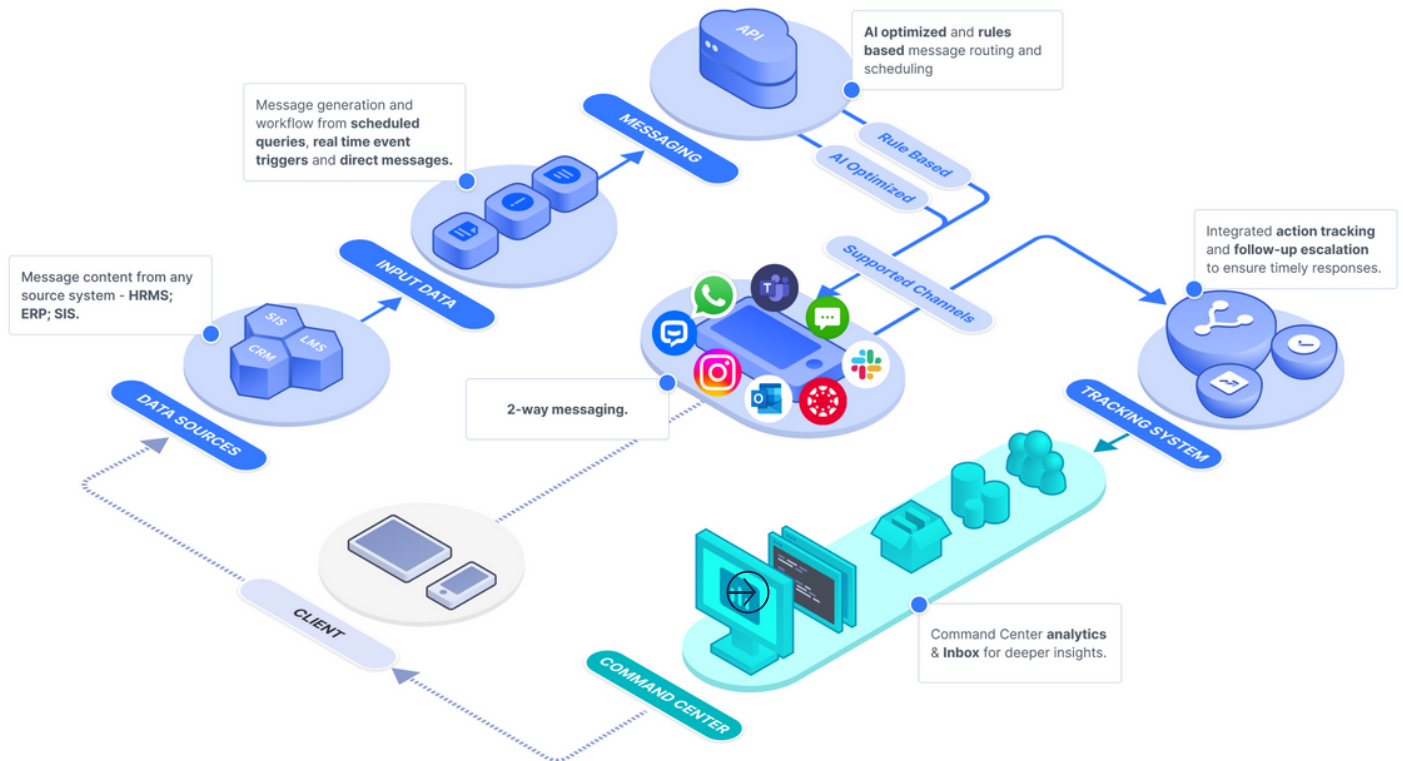

Enterprise systems generate alerts every day but most go unread, untracked, and unacted on. xSIGNAL introduces a new category: Intelligent Messaging.

Whether it's approving a purchase, escalating a missed deadline, or sending critical updates during a crisis, our platform delivers communication that's not just fast and contextual, but compliant, consistent, and controlled.

Why Us?

xSIGNAL addresses challenges faced across multiple industries and use cases not typically addressed by an organization's systems of record. Our founding team has spent decades deep inside the systems that power organizations—HCM, FSCM, ELM, CS—witnessing firsthand how critical information gets lost in the cracks.

The common thread? Emails went unread. Notifications piled up. Action items disappeared into the void. xSIGNAL was born to fix that. Supporting both private and public large complex enterprises, our Intelligent Messaging ensures the right message reaches the right person at the right time.
