You've Unlocked The Business Frequency Custom GPT

Welcome to The Business Frequency Custom GPT — a personal interpretation tool for Healy Aura and Coaching Analysis scans developed by me because I love to work with the Healy so much in my consciousness work & business coaching with clients and I love to share my experience with other Healy fans.

I designed this GPT for all Healy users who want to deeply understand what their scans are actually showing in-depth, without second-guessing, doubting, or generic advice.

It helps you translate frequency information into clarity for life, work, leadership, money, visibility, and purpose.

The Business Frequency GPT is accessible through the private ChatGPT link below, it is only for you in person, or in sessions with your clients. You can use it as often as you like. Enjoy using The Business Frequency GPT.

[Access Here](#)

What This GPT Does

The Business Frequency GPT interprets your Healy scan data and puts into perspective all the details of the scan, like conscious & subconscious patterns, relevance, intensity, potencies (D, C, LM), present and desired states. So you can read your report like a pro.

The GPT helps you understand the chakras and how they influence you in your business (Chakra Analysis). Also it focuses on how all your life themes, personal or family patterns influence your lived reality and business. The GPT simply helps you see what matters most right now and why.

What This GPT Is Not

This is not business coaching, strategy, marketing advice, or therapy. It does not replace private sessions or professional support.

What You Can Upload

You can upload one of the following PDF reports:

- Healy Aura Analysis PDF (with present and desired states)
- Healy Coaching Analysis PDF (with focus and coaching wheel)

Do not upload Aura recordings. They do not contain the information needed for interpretation.

How to Use The GPT

1. Open The Business Frequency Custom GPT using the private access link.
2. Choose what you want to explore.
3. Upload your PDF scan.
4. Read the interpretation slowly and integrate.
5. Use the insight alongside your own Healy calibration practice.

How to Get the Most Out of This GPT

Approach your scan with curiosity rather than trying to fix anything.

Pay attention to the present state descriptions. They often point to lived experiences, emotional patterns, or family dynamics that are still active. After all, if they did not have an effect on your life and business anymore, they would not come up energetically.

Notice where themes show up in your work, leadership, money, visibility, or sense of purpose. When subconscious themes appear, allow yourself to feel rather than analyze.

Use the desired states as a direction of alignment, not as a goal to force.

Make use of the meditations & breathing exercises often suggested, preferably during the calibration.

Consistency matters more than intensity. Let insight integrate over time.

Using This Together With Your Healy

Recommended calibration:

- 12 to 60 minutes per day or follow your intuition
- for 7 to 30 days
- running a monthly analysis plus calibration is advised for business purposes
- While calibrating, keep gentle attention on the desired state and how it feels in your body.

About Karina

I have worked with Healy Information Field analyses for over six years, supporting people in understanding their patterns, direction, and next level in life and business.

As a Quantum Guide & intuitive, I know how intense these times can feel, especially for those who are sensitive, visionary, and deeply committed to inner work. Even with awareness and personal growth, it's easy to lose touch with inner clarity & deeper knowing.

Despite all the work you may have done, moments of confusion, stagnation, or energetic noise can still arise. Yet we always hold the ability to shift. To return to alignment and make a conscious leap into a clearer, more coherent version of ourselves.

My work is helping people reconnect with that inner signal. Not by forcing change, but by creating awareness, presence, and space for what is already ready to emerge.

That has always been why I love the Healy and the information field analyses so much.

If you feel called to deeper integration, purpose clarity, or guidance, I'd love to work with you 1:1 or my group programs.

This guide, and The Business Frequency GPT — are here to support you exactly where you are.
