How to Use This Guide

If any machine in this guide catches your attention, kindly conduct your own additional research to properly assess its income potential before making any investment.

You are encouraged to:

- Search for the machine anywhere online or on **YouTube** to better understand how it works, its output capacity, and real-life use cases. Consult a qualified professional engineer before installation or operation, if necessary.
- Compare different suppliers and pricing before making a final decision.

Please note:

- You are **not required** to purchase any machine strictly from the links provided in this guide.
- Once you identify a machine you are interested in, you are free to buy it from **any legitimate source** of your choice.
- Machine prices listed in this guide are **not fixed** and may change over time due to market conditions, location, and supplier policies.

How to Import Any Listed Machine from China or Buy Locally

Most of the machine links provided in this guide lead to [Alibaba](#) or [Made-in-China](#), where you can directly contact suppliers, negotiate prices, and place your order. These platforms allow international shipping to most countries.

Alternatively, many of these machines can also be sourced from:

- ✓ [Amazon](#)
 - ✓ [AliExpress](#)
 - ✓ [eBay](#)
 - ✓ [Facebook Marketplace](#)
 - ✓ Local online and offline suppliers in your area.
 - ✓ South Africa: Zhauns Machinery - <https://zhauns.co.za>
-

If a Machine's Link Is Not Working

In rare cases, a link to a particular machine may not open or respond. If this happens, do not panic, Simply:

1. Copy the **name of the machine**
 2. Paste it into the search bar of any sourcing platform such as:
 - Alibaba
 - Made-in-China
 - AliExpress
 - Amazon
 - eBay
 - Facebook Marketplace
 3. Run a search to locate the same or similar machine.
-

Purchase Options

Option 1: Buy Directly from the Alibaba Suppliers (Recommended)

- Click on the link of the machine you are interested in.
- Use the **Chat** or **Send Inquiry** button to communicate with the seller.
- You may need to create and log in to an account on the platform to chat with suppliers.
- **Do not purchase immediately** using the “**Start Order**” button.

- Always negotiate to get the best possible price because all the listed prices are not actual.

Once a price is agreed upon:

- The seller will send you a custom payment link.
- You can complete payment using your credit or debit card.

Important:

This option requires you to provide the seller with a **China logistics address** (a shipping company that will forward the machine to your country).

To find one:

- Run a simple Google search such as:
“freight forwarding or logistics companies in the UK” or “logistics companies in the USA etc”
- Contact a top-rated company to **understand their shipping process and fees.**

Shipping Tip:

Always inform the supplier of your preferred shipping method:

- **Sea Freight** – Recommended for heavy machines
- **Air Freight** – Faster but more expensive

Option 2: Use a Logistics Company or Sourcing Agent to Buy on Your Behalf

You can contact a sourcing agent or logistics company directly, inform them of the machine you want to purchase, and they will:

- Buy the machine for you

- Handle shipping and delivery to your country

This option is convenient for beginners who prefer a hands-off process.

Option 3: Buy Locally

You can also search for the machine within your country, both online and offline. Many of the machines listed in this guide are available locally, which may reduce shipping time and costs.

You can scan around in your location to get local fabricators who can build most machines you will need from scratch according to your specification.

Disclaimer: We are not affiliated with any of the logistics or sourcing agents mentioned. Any transactions, agreements, or dealings are solely between you and the respective service providers. We do not assume any responsibility for their services, pricing, or reliability. Please conduct your own due diligence before making any commitments.

210 Profitable Advanced Business Machines & Ideas

 **BEFORE YOU JUMP TO MACHINE**

NUMBER#1, READ THIS CAREFULLY 📌

While this e-book reveals 210 powerful small business machines, I want to draw your attention to something most people overlook. Out of all the 210 business machines shared in this guide, The **Ultimate Bonus Machine** clearly stands apart from the rest. Why?

Because unlike the rest, this machine doesn't require you to lift a finger to install anything physical. No physical space needed. No physical machine to buy. No tools, no delivery trucks, no space in your garage, no heavy equipment and **zero technical stress**.

It is a **digital income machine**, which means you can activate it using just your phone or laptop, right from home and start seeing results much faster than any physical setup ever could.

If you're someone who wants to start making money from home within a few hours or days after setup, without delays and stress, The **Ultimate Bonus Machine** is hands down your best bet.

It has already helped countless people begin making money even **before they finished reading this ebook**.

It is a high-reward and infinitely scalable income generating system. In fact, **many people who got started with this digital money making machine never even bothered exploring the rest**.

So before you move on to **machine #1**, take a good look at The **Ultimate Bonus Machine**. It just might be the only ones you'll ever need to break through financially without making your hands dirty.

The Ultimate Bonus Machine The Legacy Builders Program. (This Is A Digital Money Making Machine)

Business Idea For This Machine:

The Legacy Builders Program by Michelle O'neil is a comprehensive video training program designed to guide anyone whether a complete beginner or someone with prior experience on how to build a sustainable and profitable online business. This step-by-step program equips you with the skills and strategies to earn \$900, or more daily consistently. This program and community has been active ,working, growing and changing lives since **2022**.

Here's what makes this program stand out:

1. **Clear and Actionable Training:** The program breaks down the process of digital marketing into easy-to-follow steps. You'll learn how to sell high ticket digital products and earn 100% Profit using a proven blueprint!.

2. **Global Accessibility:** Whether you're in the U.S.A, Canada, Uk, Australia , Europe, Africa or any other part of the world, you are eligible to join this program. Your earnings are conveniently paid straight into your bank account. This program currently has a membership of over **58,000 people worldwide**, making it one of the largest business groups on the Skool platform, which you can also join today.

3. **No MLM, Ponzi, or Scams:** This is not a get-rich-quick scheme, MLM, or Ponzi scam. It's a legitimate business model focused on high ticket digital marketing—selling high-quality digital products and earning 100% profit legally and ethically.

4. **Proven Results:** The program is already transforming lives, helping countless people achieve financial freedom by leveraging the power of digital marketing without tech skills, a big following, or even their own product!.

5. **Your Digital Money Machine:** This program empowers you to create a solid online business that works for you 24/7, enabling you to earn money even while you sleep as seen below.

Machine #1 Bamboo Sawdust Board Hot Press Machine.

Business Idea For This Machine:

The Bamboo SawDust Board Hot Press Machine is used to make strong boards by compressing bamboo sawdust and sometimes other plant fibers. The machine uses heat and pressure to turn loose dust into solid boards, which can then be used for making furniture, flooring, wall panels, and packaging materials. It helps reduce waste by recycling bamboo dust into valuable products. These boards are lightweight, durable, and eco-friendly, which makes them popular in the building and furniture industries.

- Manufacture and sell bamboo boards to furniture makers, builders, and interior designers
- Offer custom board production for local carpenters and businesses who need special sizes or thicknesses.
- Partner with bamboo processing factories to buy their waste dust cheaply, then turn it into sellable boards.
- Create and sell eco-friendly furniture like tables, shelves, and cabinets using the boards you make.
- Export bamboo boards to countries where sustainable building materials are in high demand.

Price Range: \$ 52,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #2 Full Set Automatic Bamboo Toothpick Stick Making Machine

Business Idea For This Machine:

The Full Set Automatic Bamboo Toothpick Stick Making Machine is a group of machines used to turn raw bamboo into finished toothpicks. It usually includes machines for cutting the bamboo, shaping it into small sticks, polishing them, sharpening the ends, and drying the toothpicks. The whole process is automatic, meaning once you set it up, it can run with little supervision. This type of machine is often used in factories or small businesses that want to produce bamboo toothpicks in large numbers.

- Start a local toothpick production business and sell the toothpicks to supermarkets, shops, hotels, restaurants, and bars.
- Pack and sell them to international buyers, especially in countries where bamboo toothpicks are popular
- Offer toothpicks printed with logos for restaurants, hotels, and events.

Price Range: \$ 8,000 -\$9,900

Machine Source2: [Click Here For Details Of This Machine](#)

Machine Source3: [Click Here For Details Of This Machine.](#)

Machine #3 Multi Wood Sticks Round Bar Making Machine Wood Shovel Handle Making Machine.

Business Idea For This Machine:

This is a woodworking machine that shapes raw wood into smooth, round sticks or bars. These bars can be used for making things like shovel handles, broom handles, walking sticks, tool handles, curtain rods, and other round wooden products. The machine takes rough wood and shapes it into even, straight rods of different thicknesses depending on what you need. It is mainly used by small factories, wood workshops, and businesses that make wooden tools or furniture parts.

- Make and sell broom and mop handles to local cleaning supply companies or hardware stores.

- Produce shovel and garden tool handles and supply them to tool manufacturers or garden centers.
- Create wooden dowels for carpenters, furniture makers, or DIY stores.
- Offer wood shaping services to local woodworking shops that don't have this machine
- Make wooden rods for curtain rods and sell them to home decor or interior shops.
- Partner with local furniture makers to supply them with parts like chair legs and support rods.

Price Range: \$ 4,200

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #4 Automatic Essential Oil Plastic Bottle Label Sticker Tabletop Double Side Round Bottle Labeling Machine With Date Coder.

Business Idea For This Machine:

The Automatic Essential Oil Plastic Bottle Label Sticker Tabletop Double Side Round Bottle Labeling Machine With Date Coder is a compact machine that automatically places labels on round bottles. It can stick labels on one or two sides of the bottle. It also prints the date on the label, like the manufacturing

or expiry date. It is often used for small products like essential oils, cosmetics, food jars, and medicine bottles. This machine is designed to sit on a table, making it good for small businesses or people who don't have a lot of space. It is easy to use and can label many bottles quickly.

- Start a Bottle Labeling Service and offer to label products for small brands that sell oils, beauty products, and health supplements.
- Create Your Own Product Line, Make and sell your own bottled products like essential oils, homemade juices, sauces, or cosmetics, and label them neatly with this machine.
- Buy plain bottles in bulk, label them, and resell them to small business owners who don't want to deal with labeling.

Price Range: \$ 2,550-\$4,300

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source2: [Click Here For Details Of This Machine.](#)

Machine #5 Customized Rice Mill Production Line Milling Machinery.

Business Idea For This Machine:

This is a medium-scale machine designed to clean, dehusk, separate, and polish rice. It turns raw paddy rice into edible white rice. Since it is "customized," it can be adjusted to handle different capacities based on customer needs, making it ideal for small farms, local rice growers, and small business owners. It usually takes less space and needs less power compared to large industrial rice mills.

- **Start a Small Rice Milling Business:** Set up a milling shop where farmers or individuals bring their paddy rice, and you process it for a fee.
- **Buy raw rice directly from farmers, mill it yourself, and sell the finished white rice in local markets at a higher price.**
- **Package and Brand Your Own Rice:** After milling, pack the rice into branded bags and sell to grocery stores, supermarkets, or directly to consumers.
- **Sell Rice By-Products:** After milling, you get by-products like rice husks and bran, which can be sold to livestock farmers or used for making organic fertilizers.

Price Range: \$ 6,000-\$25,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source2: [Click Here For Details Of This Machine.](#)

Machine #6 FORWARD High Speed Corrugated Roof Sheet Making Machine

Business Idea For This Machine:

This is a heavy-duty machine designed to produce corrugated metal roofing sheets. It takes in flat metal coils (like steel or aluminum) and shapes them into strong, wavy sheets that are commonly used for roofing and siding in construction projects. The machine is built to work fast, making many sheets in a short amount of time. It's often used by roofing companies, steel product manufacturers, and construction supply businesses.

- Start a Roofing Sheet Production Business: Buy metal coils in bulk, make roofing sheets, and sell them directly to contractors, builders, and hardware stores.
- Set up a small distribution network to supply roofing sheets to nearby towns or rural areas where construction is growing.
- Form partnerships with building companies and supply them with roofing sheets for their projects regularly.

Price Range: \$ 8,000-\$11,000

Machine Source4: [Click Here For Details Of This Machine.](#)

Machine #7 Plywood Making Machine Production Line

Business Idea For This Machine:

This is a set of machines used to turn logs into plywood sheets. This process includes several stages like peeling the logs into thin veneers, drying those veneers, gluing them together, pressing the sheets, trimming the edges, and sanding the final plywood. These machines are used in furniture making, construction, and packaging industries. A full production line can include log debarkers, veneer peeling machines, glue spreaders, hot press machines, and cutting machines.

This setup is usually used by plywood manufacturers, but small businesses or groups can also use a smaller version to enter the plywood market.

- Start a Plywood Manufacturing Business and Sell plywood sheets to local furniture makers, construction companies, or wholesalers.
- Sell raw veneer sheets to other factories or carpenters who may not have peeling machines.

- Use the plywood you make to create simple furniture, shelves, or packaging boxes and sell them.

Price Range: \$ 200,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #8 Automatic Garri Processing Machinery Cassava Complete
Cassava Processing Machines

Business Idea For This Machine:

The Automatic Garri Processing Machinery, also known as the Complete Cassava Processing Machine, is used to turn raw cassava roots into garri—a popular West African food. This machine usually includes a washer, peeler, grater, press, fryer, and sifter, all working together to speed up the garri production process. Instead of using manual labor, this setup can process large amounts of cassava in less time. It's helpful for farmers, food business owners, and cooperatives who want to increase production and reduce hard labor.

- Use the machine to produce garri in bulk and supply to local markets, supermarkets, and food vendors.
- Produce and Package your branded garri and supply to companies that export African food products to the U.S., U.K., or Europe. You can choose to do your own bulk export.
- Produce clean, nicely packed garri for shops and online sales platforms. Buyers often pay more for well-packaged products.
- You can go ahead and make packages with some ingredients like milk powder, date powder or sugar to make it readily edible right from the shop just by soaking.
- Charge people who bring their raw cassava to you for processing. You do the work, they pay per batch

Price Range: \$ 7,990-\$22,000

Machine #9 Industrial Tomato Sauce, Tomato Paste Puree Ketchup Processing Plant Tomato Production Line.

Business Idea For This Machine:

The Industrial Tomato Sauce, Tomato Paste Puree Ketchup Processing Plant Tomato Production Line is a large-scale machine system used to process fresh tomatoes into different tomato-based products such as tomato paste, puree, sauce, and ketchup.

This type of production line usually includes equipment for washing, crushing, preheating, concentrating, sterilizing, and packaging the final product. It's mainly used by food processing companies or individuals who want to produce tomato products in bulk for sale. It can handle large volumes of tomatoes daily and helps reduce waste by turning fresh tomatoes into long-lasting, sellable products.

- Produce tomato paste, sauce, or ketchup and sell in small or bulk containers to retail shops or supermarkets
- Package products under your brand and export them to other countries where tomato products are in high demand.
- Offer processing services to tomato farmers during harvest season to reduce waste and preserve their harvest.

- Launch your own tomato sauce, puree, or ketchup brand and sell through online platforms, food expos, or markets.
- Create partnerships to supply them with consistent tomato-based ingredients at lower prices than imported ones.
- Produce for other brands that want to sell tomato products but don't own production equipment

Price Range: \$ 15,000 - \$100,000

Machine #10 Nails Making Machine Equipment Production Line Automatic Screw Nail Making Machine

Business Idea For This Machine:

The Nails Making Machine Equipment Production Line is an automatic machine that makes metal nails in large quantities. It takes in steel wire as the raw material and processes it through cutting, shaping, and forming to produce nails of different sizes and types. The machine runs with little manual effort and can produce thousands of nails per hour. It's used in industries where nails are needed in bulk, such as construction, furniture making, packaging, and carpentry.

- Produce and Supply ready-made nails to local stores, builders, or furniture makers.
- Offer bulk nails for building projects; construction sites often need large amounts.
- Start a local nail production business from your own space and hire workers as demand grows.
- Sell custom nail sizes. Some industries need specific nail types or lengths; you can make and sell to them directly.

Price Range: \$2,000-\$7,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source 2: [Click Here For Details Of This Machine.](#)

Machine #11 Cocoa Powder Processing Machine

Business Idea For This Machine:

This is a processing plant that turns dry and raw cocoa beans into cocoa powder. It typically includes steps like roasting, peeling, grinding, and pressing the beans to remove the fat (cocoa butter) and leave behind dry cocoa solids, which are then ground into fine powder. This powder is what's used to make chocolate drinks, baking ingredients, and other cocoa-based products.

- Buy cocoa from local farmers to start a cocoa powder production business on a large scale and sell to local shops or markets.
- Package and sell branded cocoa powder online (e.g., on Amazon, Jumia, or your website).
- Supply cocoa powder to stores, malls, bakeries, cafés, and food vendors.
- Export cocoa powder in bulk to wholesalers or foreign markets.
- Sell to cosmetic companies that use cocoa powder in skincare products.

- Create chocolate-based products (like hot cocoa mix or baking kits) for sale.
- Partner with schools or canteens to supply cocoa for beverages.
- Find local and international distributors to market your branded cocoa product.

Price Range: \$ 15,900

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #12 Full Automatic Cocoa to Chocolate Bar Making Machinery
Chocolate Deposit Production Line Complete.

Business Idea For This Machine:

This is a large machine setup that takes raw cocoa beans and turns them into finished chocolate bars. It handles everything—from roasting the beans, grinding them into paste, mixing ingredients, shaping the chocolate, and packaging the bars—without much manual work.

This machine is ideal for anyone who wants to start or grow a chocolate-making business at a larger scale. It's fast, efficient, and reduces the need for many workers

- Start your own chocolate brand and sell online or in stores.
- Supply chocolate bars to supermarkets, cafés, or small shops.
- Offer white-label chocolate production for other brands.
- Sell chocolate bars at local markets, fairs, or events.
- Export finished chocolate products to other countries.
- Partner with hotels or bakeries to provide custom chocolate products.
- Use any other form of brand awareness strategy to get your business well established

Price Range: \$12,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #13 RUK NEW MBC Factory Price Carton Box Sample Cutting Machine Vibrating Printing Die Cutting and Creasing Machine

Business Idea For This Machine:

It is a large industrial cnc machine used to cut, print, and crease cardboard or paperboard into boxes. It's designed for people who want to make custom packaging—like boxes for products, gifts, or deliveries. It uses a vibrating knife and printing features to handle everything from cutting shapes to adding fold lines and logos.

This machine is mostly used in packaging businesses, printing shops, or small factories. It helps save time by automating the box-making process and lets you produce professional-looking packaging with ease.

- Start a custom box-making business for small brands or local shops.
- Offer packaging design and production services for e-commerce sellers.
- Make branded shipping boxes for online businesses.
- Sell custom gift boxes for weddings, parties, or corporate events.
- Work with local food vendors to create food-safe takeaway packaging.
- Partner with print shops to provide add-on box production services

Price Range: \$ 22,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #14 1325 3d Woodworking CNC Router Machine for Wood MDF Acrylic

Business Idea For This Machine:

The 1325 3D CNC Router is a machine that cuts and carves materials like wood, MDF, and acrylic into precise shapes and designs. It uses a computer to follow patterns, so you can make the same design many times or create custom projects easily. It's often used by carpenters, furniture makers, and sign makers to speed up work and improve accuracy.

- Make and sell custom wood signs or nameplates.
- Create wall art, decorations, and 3D carvings for home or office spaces.
- Offer engraving services for acrylic displays or plaques.
- Make personalized gifts like cutting boards, clocks, or key holders.
- Create parts for furniture or cabinets and sell to local workshops.
- Offer CNC cutting services to other small businesses.
- Design and sell templates or project files to other CNC users.
- Partner with interior designers or event planners for custom pieces.

Price Range: \$ 2,100

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #15 2 Lines Full Automatic High Speed Plastic Bag Machine T-shirt Bag Shopping Bag Making Machine

Business Idea For This Machine:

This is a machine that makes plastic shopping bags, like the ones used in supermarkets. It has two production lines, which means it can make two bags at the same time. It works on its own with little help, cutting and sealing plastic film into ready-to-use bags.

- Start a plastic bag production business and sell to local stores or markets.
- Offer bag-making services to packaging companies or wholesalers.
- Produce and brand bags for small businesses (custom printing).
- Export plastic bags to nearby countries with high demand
- Get some distributors to market your products aggressively in markets and everywhere.

Price Range: \$ 10,600

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #16 10 tons LPG Gas Cylinder Filling Bottling Plant 20M3 LPG Gas Skid Mounted Station

Business Idea For This Machine:

This is a mobile gas filling station designed to safely store and refill liquefied petroleum gas (LPG) into cylinders. It holds up to 20 cubic meters of gas and is built on a skid, so it can be moved or installed easily in different locations. It includes a tank, pump, filling scale, piping, and safety equipment. It's mainly used for starting a small to medium LPG refilling business without building a permanent plant.

- Set up an LPG cylinder refilling business in a busy urban or rural area.
- Partner with local vendors or shops to supply filled cylinders.
- Offer home delivery of filled LPG cylinders for a fee.
- Charge a service fee for bulk refills for hotels, hospitals, and factories.
- Get multiple stations in other locations to scale up your business faster.

Price Range: \$ 12,000-\$29,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source2: [Click Here For Details Of This Machine.](#)

Machine #16 Industrial Microwave Dryer Ovens Drying Machine.

Business Idea For This Machine:

This is a large machine that uses microwave heat to quickly dry things like food, herbs, wood, or industrial materials. Instead of using air or sunlight, it uses microwave energy to remove moisture, making the drying process faster and more efficient. It's commonly used in factories or by businesses that need to dry products in large amounts.

- Dry and sell agricultural products (e.g., herbs, fruits, vegetables).
- Offer drying services to local farmers or food producers.
- Start a spice or herbal tea business using dried ingredients.
- Partner with woodworkers to dry timber for furniture or crafts.
- Process and package dried snacks (e.g., fruit chips, mushrooms).
- Dry medicinal plants and sell to pharmaceutical or health shops.
- Export dried products to regions with high demand.
- Offer custom drying solutions for niche markets (like pet treats or organic food).

Price Range: \$ 20,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #17 VBJX Industrial Freeze Dryer Oil Free Vacuum Pump Supplies Stopping Tray Freeze Dryer Machine.

Business Idea For This Machine:

This is a machine used to remove moisture from products like food, herbs, medicine, or biological samples by freezing them and then turning the ice directly into vapor without passing through the liquid stage. This process helps preserve the product for a long time without using chemicals. Industrial freeze dryers are larger and more powerful than home models and are used in factories, farms, and laboratories.

They are useful in food processing, pharmaceuticals, and pet food industries because the dried products keep their shape, flavor, and nutrients. These machines are also used to make long-lasting emergency meals and dried herbs for tea or health use.

- Start a freeze-dried food business: Dry fruits, vegetables, soups, or full meals and sell them as ready-to-eat foods online or in local stores.
- Offer freeze-drying services to local farmers or herbal product sellers.
- Dry herbs and flowers for health teas or cooking blends, which are popular in local markets and online.
- Package long-shelf-life meals for campers, hikers, survivalists, and emergency supply stores.
- Dry natural ingredients like flowers or fruits for companies that make organic products.
- Package small portions of dried ingredients with recipes for smoothies, soups, or herbal remedies for sale.
- Offer white-label freeze-dried products to other brands.

Price Range: \$18,500

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source2: [Click Here For Details Of This Machine.](#)

Machine #18 High Speed 15 Degree Coil Roofing Nail Making Machine Wire Nail Making Machine.

Business Idea For This Machine:

This machine is used to make coil nails, which are widely used in roofing, construction, and carpentry. It works by feeding steel wire into the system, cutting it into nail sizes, forming the head, and coiling the finished nails for use in automatic nail guns. It is designed to produce nails quickly in large quantities with minimal manual work.

- Sell coil nails to roofing companies, carpenters, and construction suppliers who use large quantities.
- Supply nail coils to hardware stores, wholesalers, or distributors in your region
- Export coil nails to neighboring regions or countries where such supplies are in demand.
- Sell custom-sized or specialty nails for niche uses (e.g., for pallets or fencing).
- Partner with builders or housing developers to be their preferred supplier.
- Build a strong brand of tiktok, facebook, instagram or youtube to be know as an efficient local nail producer and supplier, this will bring you bulk orders from various sources.

Price Range: \$20,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #19 Washing powder Laundry Detergent Production Line.

Business Idea For This Machine:

It is a machine setup designed to manufacture large quantities of laundry detergent in powder form. It typically includes mixers, conveyors, drying systems, and packaging units. These machines take raw materials like soda ash, sodium silicate, enzymes, fragrances, and surfactants, and turn them into finished detergent powder. The process is semi-automatic or fully automatic depending on the machine model.

- Start your own detergent brand: Produce and package detergent under your own name and sell locally or online.
- Supply local shops and supermarkets: Offer wholesale prices to retail outlets that sell household cleaning products.
- Sell to hotels, schools, hospitals, and laundromats: These places need detergent in bulk and can be a regular client.
- Offer custom packaging services: Some people may want their own brand of detergent without investing in machinery—produce and package it for them.
- Sell unbranded detergent in bulk: Let others handle the branding and distribution while you focus on production.

- Export to nearby countries or underserved areas: Look for markets where detergent supply is limited.
- Partner with distributors or drop shippers: They can sell while you focus on producing and fulfilling orders.

This kind of production line is useful for those looking to start or grow a detergent manufacturing business

Price Range: \$ 10,600

Machine #20 Automatic Single and Double Wire Chain Link Fence Manufacturing Machine

Business Idea For This Machine:

This is a machine used to produce chain link fences from metal wire. These fences are commonly used for security around homes, schools, farms, sports fields, and construction sites. The machine can automatically feed, weave, cut, and roll the wire, reducing manual labor. The double wire version adds strength by weaving two wires at once. It usually requires 1–2 operators and runs on electricity.

- Produce and wire sell fences locally: Offer ready-made chain link fences to local homeowners, schools, contractors, and farms.

- Partner with contractors who need fencing for temporary or permanent use on building sites.
- Combine fence sales with installation to earn more per job.
- Bid for public and organisational contracts that require fencing for parks, schools, and police stations.
- Produce the fence in bulk and sell to local stores for resale.
- You can package and ship the finished rolls to other regions or markets.

Price Range: \$ 9,800

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #21 Automatic Disposable Paper Cup Making Machine

Business Idea For This Machine:

This is a machine designed to produce paper cups automatically. You load it with paper rolls, and it cuts, shapes, and seals the cups without much human effort. It can produce hundreds or even thousands of cups per hour, depending on the model. These machines are often used by people who want to start a small to mid-scale paper cup production business. The final product

paper cups are in high demand for tea shops, coffee vendors, events, offices, and fast-food businesses.

- Manufacture and supply paper cups to local coffee shops, schools, restaurants, companies and caterers under your own brand name.
- Produce in bulk and supply cups to distributors or packaging wholesalers who already have existing customers.
- Offer production services to businesses that want custom-printed cups without owning machinery.
- produce and export cups to nearby countries with demand for disposable items.
- Partner with event organizers and food vendors to supply cups in large quantities for one-off or regular events.

Price Range: \$ 3,000

Machine Source2: [Click Here For Details Of This Machine.](#)

Machine #22 Tissue Paper Making Machine

Business Idea For This Machine:

This is a machine used to convert raw paper material (usually jumbo rolls) into usable tissue paper products. These machines vary in size and complexity—some are fully automatic and require minimal labor, while others are semi-automatic or manual. They typically handle processes such as embossing, cutting, rolling, and packaging.

- Produce and supply tissue paper to local shops, supermarkets, and restaurants.
- Supply bulk orders to hotels, schools, hospitals, or offices.
- Offer custom-printed tissue paper for businesses.
- Set up a distribution network or partner with local vendors.
- Provide white-label production for businesses that want their own tissue brand.
- Export to nearby towns or countries with low local production.

Price Range: \$ 2,500

Machine #23 Complete Natural Fruit Juice Processing and Hot Filling Production Line – Apple, Orange, Mango, Lemon Juicer Machine.

Business Idea For This Machine:

This is an industrial-grade machine designed to extract juice from fruits and bottle it immediately while still hot. This helps preserve the juice without added preservatives. It can handle a variety of fruits like apples, oranges, mangoes, and lemons. The machine typically includes a washing section, juice extractor, filtration, pasteurization, and hot filling unit, plus capping and labeling options.

It is ideal for producing natural juice in bulk—ready for local markets, supermarkets, restaurants, or export.

- Start a juice factory and supply natural juice to local shops, hotels, and restaurants.
- Sell freshly bottled juice at farmers markets, roadside stands, or juice kiosks.
- Package and brand your own organic juice line for supermarkets and online sales.
- Partner with schools, hospitals, and gyms to supply natural juice for health-focused customers.

- Export locally made bottled juice to nearby countries or diaspora markets.
- Get some local marketers to hit the street with aggressive marketing for your juice brand.

Machine #24 Fully Automatic Small Base Cheese Pizza Making Machine
Production Line

Business Idea For This Machine:

This is a cutting-edge, automated solution designed to produce high-quality small-base cheese pizzas efficiently. This production line streamlines the process of dough preparation, flattening, topping, baking, and packaging, ensuring consistent results and high output with minimal manual intervention.

It's ideal for small to medium-scale pizza businesses, food factories, or entrepreneurs in the food production industry.

- Partner with local restaurants, cafes, and fast-food chains to supply fresh or frozen small cheese pizzas in bulk.
- Produce small cheese pizzas, freeze and package them, and sell them to supermarkets, schools, or local shops.
Expand your reach by exporting packaged pizzas to regions with high demand for quick and convenient meals.
- Use the machine to produce large quantities of pizzas for events such as parties, corporate gatherings, or festivals.
- Create a franchise model where you supply ready-to-sell pizzas to franchisees operating small pizza outlets

Price Range: \$11,800-\$29,000

Machine #26 Polyurethane Polyurea Waterproofing PU Spray Foam Machine Multi-functional Sprayer

Business Idea For This Machine:

This is a multi-functional high-pressure spraying system used widely in construction, insulation, waterproofing, and protective coatings. It's commonly used for applying polyurethane foam and polyurea coatings, which are essential in thermal insulation and waterproofing.

- Offer residential and commercial spray foam insulation services.
- Use it for waterproof basements, roofs, tanks, decks, etc., using polyurea coating.
- These services are in demand for both new buildings and renovations.
- You can earn \$3,000 – \$10,000 per project depending on size.
- Provide polyurea coatings for truck beds, undercarriages, and off-road vehicles.
- Rent your machine to contractors who don't have one. Average rental: \$250 – \$500 per day or \$1,500 per week.

Price Range: \$2,400 - \$4,200

Machine #27 Plastic Pelletizing Machine.

Business Idea For This Machine:

This is used to convert waste plastic into small pellets that can be used for manufacturing new plastic products. The process involves melting the plastic and then forming it into pellets of uniform size, which are cooled and hardened for reuse in production.

- Collect plastic waste from households, businesses, or industrial sites, and recycle it into pellets. You can sell these pellets to manufacturers who need raw materials for their production.
- After producing pellets, sell them to plastic manufacturers who use them to create new plastic products like containers, bags, or toys.
- Set up a plastic recycling plant where you collect waste plastic, process it into pellets, and then sell them. This business can be profitable as more companies are looking for sustainable materials.
- You can still produce the pellets to manufacture your own branded plastic products for sale.

Machine #28 Automatic Bamboo Sanitary Pads Process Machine
Manufacturing Equipment.

Business Idea For This Machine:

This is an industrial machine designed to produce sanitary pads made from bamboo fiber. Bamboo is a natural, eco-friendly material that is soft, absorbent, and biodegradable, making it a popular choice for people who want sustainable hygiene products. This machine handles different steps of the production process, such as shaping, layering, sealing, and packaging the pads, with minimal human labor. It's mainly used by businesses that want to manufacture and sell sanitary pads on a large scale.

- Start Your Own Brand: Use the machine to produce bamboo sanitary pads under your own brand name and sell them online or in stores.
- Wholesale Supply: Manufacture pads and supply them in bulk to shops, supermarkets, or eco-friendly brands that don't have their own factories.

- Contract Manufacturing: Offer production services to small brands or startups who want to launch bamboo sanitary pads but can't afford their own machines.
- Export Business: Produce sanitary pads for international markets where eco-friendly hygiene products are in high demand.
- Custom Orders: Take custom orders from organizations, schools, or NGOs that distribute sanitary pads as part of health campaigns.
- Private Labeling: Produce the pads and let other companies put their brand labels on them, so you focus only on manufacturing.
- Local Distributorships: Partner with distributors in different cities or countries to sell your product and expand your reach without needing to handle all the logistics yourself.

Price Range: \$5,500

Machine #29 Mini Truck Food Van Conversion

Business Idea For This Machine:

- Buy a reliable, used truck at a low cost to reduce startup expenses.
- Convert into a Food Van – Outfit the truck with kitchen equipment (grill, fridge, sink, etc.), branding, and necessary permits. Keep the design efficient and appealing.
- Choose a Profitable Niche – Decide on a food concept with high demand and low cost, such as street food, smoothies, local favorites, or quick lunch items.
- Sell Food in High-Traffic Areas – Park in busy areas like business districts, schools, festivals, or night markets to attract hungry customers.
- Earn Daily Profit – Food trucks can bring in consistent cash flow daily. With low overhead and high margins, profits can grow fast.
- Sell for Higher Value (Optional) – Once the food van is successful or well-built, it can be sold for a much higher price than the initial investment, especially to aspiring food vendors.

Machine #29 Plastic Hydraulic Press Baler Machine ,120kg Hydraulic Scrap Metal Compactor & Baler

Business Idea For This Machine:

It is an industrial machine used to compress recyclable materials into compact blocks or bales. This includes items like plastic bottles, aluminum cans, cardboard, or light scrap metal. These compacted bales are easier to store, transport, and sell to recycling plants.

- Start a Recycling Collection Service: Gather plastic bottles, aluminum cans, and light scrap metal from homes, shops, and small businesses. Use the machine to compress them and sell the bales to recycling companies.
- Offer Baling Services to Local Businesses: Many small businesses produce recyclable waste but don't own a baler. You can charge them to bale and remove their waste for them.
- Start a Mobile Baling Business: Mount the baler on a trailer and travel to locations where recycling is collected, offering instant baling on-site.

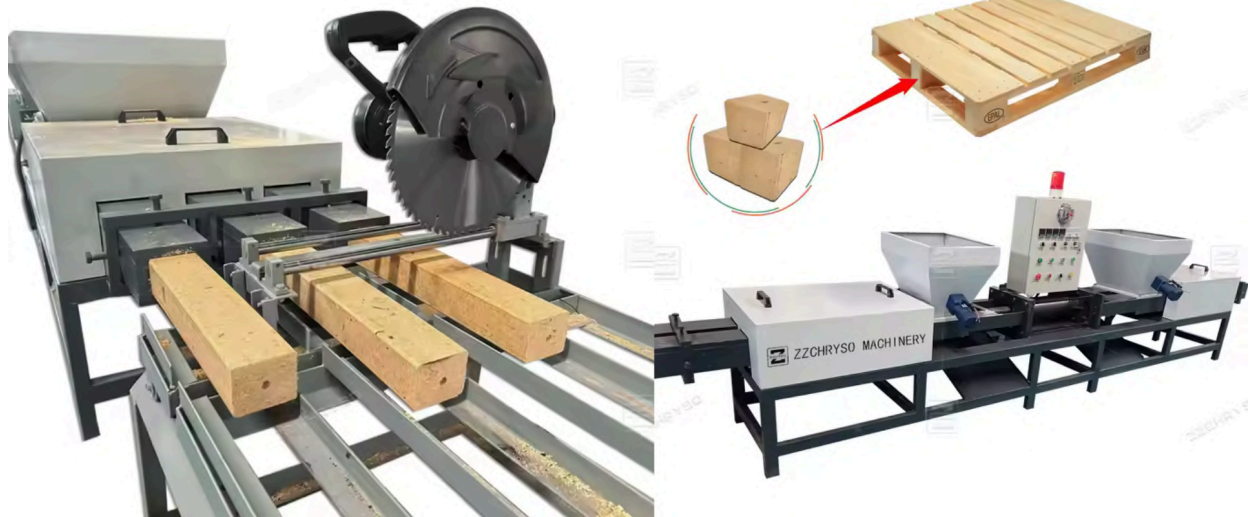

Price Range: \$ 2,500-\$8,200

Machine #30 Wood Sawdust Block Making Machine Hydraulic Sawdust Briquette Press Machine

Business Idea For This Machine:

This machine is used to compress sawdust, wood shavings, and other wood waste into solid blocks or briquettes. These blocks are often used for furniture , fuel, shipping pallets, or construction material.

- Sell Briquettes as Fuel: Many homes, restaurants, and industries use wood briquettes for heating and cooking. You can package and sell briquettes locally or to bulk buyers.
- Compressed wood blocks are used as footers or support blocks in wood pallets. Sell directly to pallet manufacturers.
- Export Briquettes: Some countries have a high demand for biomass fuel. Export your briquettes to countries in Europe or Asia where renewable energy is popular.
- Collect waste wood materials from furniture or carpentry shops for free or low cost, then turn it into briquettes you can sell to furniture makers or use them for your own furniture production for sale.

Price Range: \$ 4,500-\$8,550

Machine Source2: [Click Here For Details Of This Machine.](#)

Machine #31 High-tech Biomass Charcoal Carbonization Furnace.

Business Idea For This Machine:

This is a machine that converts raw biomass materials such as wood, coconut shells, sawdust, rice husks, or agricultural waste into charcoal. It does this through a process called carbonization, where the material is heated in a low-oxygen environment. This machine is often used by small businesses, farms, or entrepreneurs who want to turn waste into fuel or sell charcoal as a product.

- Use this to easily produce and package charcoal, then sell to local markets, restaurants, or export to countries where charcoal is in high demand. You can always run a search for international buyers online.
- This is the machine you will need for carbonization during the production of charcoal briquettes using saw dust, coconut husk etc.
- You can rent out the machine to other people to produce their own charcoal and charge them per batch.

Price Range: \$ 600

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #32 Large Capacity Mobile Sawdust Powder Board Making Machine Wood Crusher

Business Idea For This Machine:

It is a heavy-duty industrial machine designed to crush wood into fine sawdust or powder. It can handle large amounts of raw wood materials like logs, branches, offcuts, and even leftover wood waste. This crushed wood is then used to make compressed boards or other wood-based products such as particle boards, sawdust bricks, or biomass fuel.

- Produce and Sell sawdust in bulk to companies that make plywood, particle boards, or briquettes.
- Set up a factory to produce and sell compressed boards or eco-friendly furniture combining this with the Hydraulic sawdust briquette press machine
- You can as well use this machine to produce a special saw dust for growing and selling mushrooms.

Business Idea For This Machine:

This is a heavy-duty commercial vehicle designed for transporting loose materials like sand, gravel, or demolition waste. You definitely know this truck.

- It is a money machine. Use it to Offer haulage services to individuals and construction companies (transporting sand, stone, or cement).
- Rent it out daily or weekly to local contractors or developers.
- Partner with quarries to transport stones or gravel to buyers.
- Start a bulk delivery business for sand, gravel, or topsoil.
- Lease it to road construction companies for debris removal or material supply.

- Use it to transport mining materials for companies in extractive industries.

Price Range: \$ 11,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #34 138–140 Ton High-Precision Plastic Injection Molding Machine – Manual Operation

Business Idea For This Machine:

It is a heavy-duty machine used in factories to mold plastic products. It works by injecting molten plastic into a mold where it cools and takes shape. This version is manually operated, meaning it needs human handling for setup and operation. It can produce medium to large-sized plastic items like containers, parts, or tools. It is commonly used in small to medium-scale plastic manufacturing setups.

- Start a plastic product factory to produce items like buckets, containers, or plastic housings.

- Partner with local packaging companies to make plastic packaging components.
- Use it to recycle plastic waste into new products for resale.

Price Range: \$ \$8,000- \$16,800

Machine #35 SUS 304 Fried Plantain Long Chips Slicing Deep Frying Deoiling Packing Machine Processing Production Line.

Business Idea For This Machine:

This is a complete setup used to produce and package fried plantain chips, especially the long and thin type. This machine handles everything from slicing the raw plantains, deep frying them in oil, removing extra oil, and finally packing them into bags ready for sale. It is made from stainless steel, which makes it safe for food and easy to clean. This setup is best for factories or people who want to start a plantain chips business on a larger scale.

- Start your own plantain chips brand and supply to shops, supermarkets, malls and online customers.
- Produce and package chips to sell at events like school canteens, bus stations, markets, and church programs.
- Export chips to foreign markets where African snacks are in demand.
- Get distributors to market your chips brand all over the place.
- Produce the plantain chips, and other companies put their own labels and branding on the packaging and sell them as their own products. You will make more money with their Recurring bulk purchases
- You can also private-label premium versions for hotels, airlines, gift shops, etc.
- Do not forget to build your brand on all social media platforms for maximum visibility.

Machine #36 Ginger Powder Production Line Onion Powder Ginger Powder Making Processing Machine.

Business Idea For This Machine:

This is a machine setup designed to process fresh ginger or onion into fine powder. This setup typically includes washing, slicing, drying, grinding, and packaging units. It helps turn raw ginger or onions into long-lasting powder form that can be used for cooking, health products, or sold in bulk. This is ideal for small factories or businesses that want to enter the food processing market.

- Buy fresh ginger or onions in bulk, process them into powder, and sell them to local markets or food shops.
- Package the powder in small sachets and supply to supermarkets or grocery stores.
- Start a brand that sells natural spice powders online through platforms like tiktok, facebook and instagram.
- Sell the powder to herbal medicine producers or health stores looking for natural ingredients.
- Get distributors to market your end product.
- Package and export your product to countries that import dried spices.

Price Range: \$ 15,000- \$21,000

Machine #37 High Efficiency Coconut Palm Fiber Extract Machine Coconut Husk Shredder Coco Peat Coir Pith Processing Machine.

Business Idea For This Machine:

This is a machine used to process coconut husks into different useful materials like coco peat, coir fiber, and coir pith. The husks are fed into the machine, which shreds and separates the fibers from the soft peat. The output can then be dried, packed, and sold for various uses like farming, gardening, mattress making, or rope production.

- Supply coir fiber to mattress, rope, or brush makers who use it as a raw material.
- Make and sell eco-friendly products like coir pots, mats, or pads using the output
- Export processed fiber or peat to countries where it's in high demand for agriculture or construction
- Produce and sell coco peat for agricultural purposes, for example seeds nursery making.

Machine #38 Organic Fertilizer Coconut Shell

Compost Turner Machine for Home Use Manufacturing Plant for Mixing
Animal Manure Food Waste

Business Idea For This Machine:

It is a machine designed to turn organic waste like animal manure, coconut shells, and food scraps into compost. This helps speed up the decomposition process, making it easier to produce natural fertilizer. It's useful for people who want to manage organic waste at home or in small manufacturing settings. The machine works by mixing and turning the waste, allowing air to flow through it and helping bacteria break it down faster

- Use this machine to produce and Sell homemade organic fertilizer: Collect kitchen waste, coconut shells, and animal manure, turn them into compost, and sell to local farmers or gardeners.
- Offer composting services to households, restaurants, or small farms that want to get rid of their organic waste.
- Use compost for personal farming: Grow your own vegetables using the compost and sell the produce at local markets.
- Rent it out to people in your area who need it temporarily.

Price Range: \$ 7,850

Machine #42 20 FT Portable Expandable Prefabricated Folding House for Home and Office Use.

Business Idea For This Machine:

This is a compact, ready-made structure that can be folded and expanded as needed. This type of house is built off-site and delivered ready for quick setup. It can be used as a home, office, shop, or temporary shelter. It usually includes basic features like doors, windows, insulation, electrical wiring, and sometimes a bathroom and kitchenette. This makes it suitable for people who need quick and affordable space solutions. It can be moved from one location to another, which is great for those who don't want to commit to one spot. It comes in various sizes like one, two or 3 bedrooms.

- Import and install these prefabricated homes for others for huge profit.
- Sell it to people who need affordable housing, especially in growing urban or rural areas.
- Rent it out as a temporary living space or office to people who need short-term stays.
- Install it and offer it as a co-working space for freelancers or remote workers in quiet locations.
- Use it as an Airbnb in areas with tourism or high rental demand.
- Convert it into a mini shop or food stall and rent the space to small business owners.

- Use it for events such as ticket booths, changing rooms, or rest areas and charge event organizers
- Start a mobile salon, barber shop, or massage studio and move it to different high-traffic areas.
- Use it to create your own working office space.

Business Idea For This Machine:

This is a virtual reality entertainment machine that lets users experience immersive games, movies, or simulations with moving seats and special effects like wind or vibration. This is commonly used in arcades, malls, theme parks, or event centers. It comes with built-in VR content and supports multiple users at a time, depending on the model. The machine is easy to operate and often includes a touchscreen system for choosing experiences. It creates a fun and exciting way for people to enjoy VR without needing special skills or devices.

- Set it up in a busy shopping mall or arcade and charge people per ride
- Rent it out for private events like birthday parties, school programs, or corporate functions.
- Place it at tourist locations or amusement parks where people are willing to pay for short, fun experiences.
- Use it at trade shows or expos as an attraction and charge event organizers or sponsors.
- Create a mobile VR setup and offer home service or party rentals

Price Range: \$ 9,000

Machine #51 Factory Genyond Industrial Alcohol Ethanol Plant Process
Machine Line From Starch Sugar Beet Cane Molasses Corn Potato Cassava

Business Idea For This Machine:

It is an industrial machine used to produce ethanol (also known as industrial alcohol) from natural raw materials like starch, sugar beet, sugarcane, molasses, corn, potato, or cassava. This machine line includes equipment for crushing, fermentation, distillation, and drying. The process converts these raw materials into fuel-grade or industrial-grade ethanol, which can be used in biofuel, cosmetics, sanitizers, cleaning products, and many other industrial applications.

- Produce and supply ethanol to fuel companies that mix ethanol with gasoline for cleaner fuel.
- Supply ethanol to manufacturers of hand sanitizers, perfumes, and cleaning agents.
- Export ethanol to countries with high demand and low local supply.

- Set up a mini-refinery and sell ethanol in smaller quantities to local industries.
- Produce and sell carbon dioxide by-product used in soft drinks or fire extinguishers.

Price Range: \$ 58,000

Machine #52 Gold Chain Making Machine Automatic Chain Making Machine for Jewelry Necklace.

Business Idea For This Machine:

It is a machine used to produce gold chains automatically. This tool is mainly used by jewelry makers to create different styles of chains for necklaces, bracelets, and other accessories. It is often used in workshops or small factories focused on gold or silver jewelry production.

- Start a small jewelry production business and sell handmade gold chains online or locally
- Create custom necklace designs for clients and charge premium prices
- Supply chains in bulk to jewelry retailers or resellers.
- Combine with other jewelry tools to offer complete jewelry-making packages or services

Price Range: \$ 6,800

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #53 Full Auto Shower Steamer Bath Bomb Press Machine

Business Idea For This Machine:

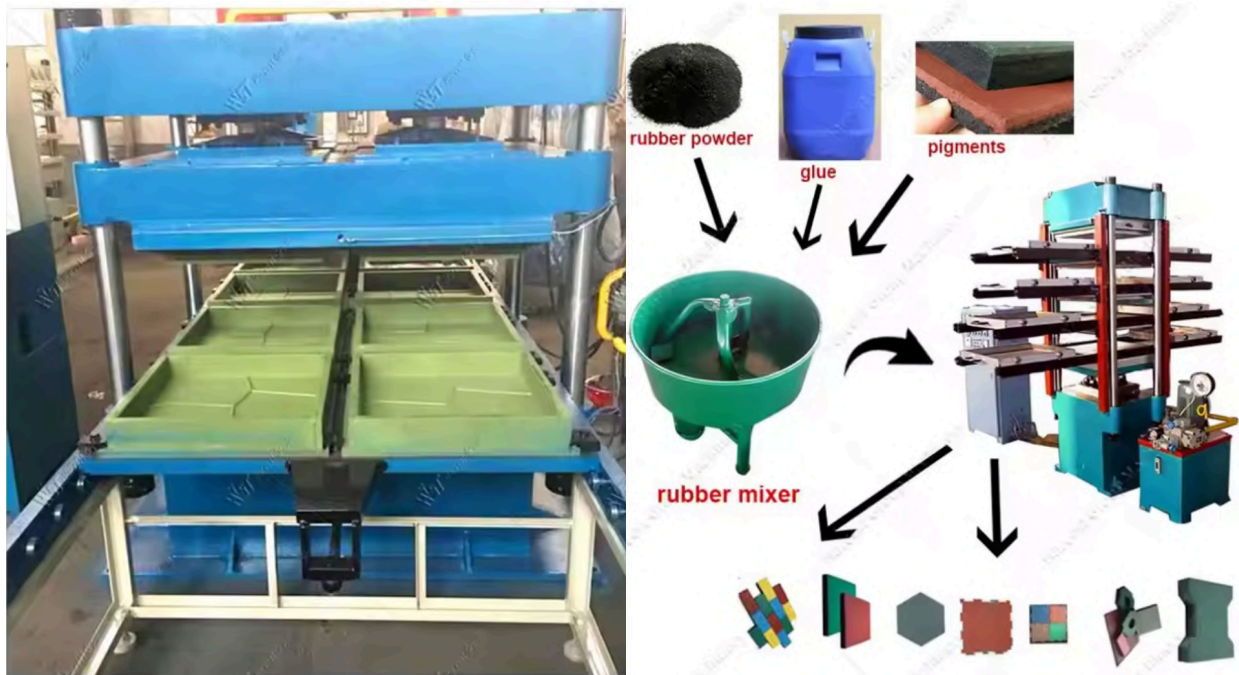

This machine helps you produce bath products in large quantities without needing to shape each one by hand. It works by applying pressure to ingredients placed into a mold, turning them into solid shapes quickly and consistently. This is useful for small businesses or individuals who want to make and sell bath products from home or a small workshop.

- Start a small home-based bath bomb business and sell products online, or local markets
- Offer private label products for spas, hotels, or beauty stores.
- Offer bulk production services to other small businesses who can't afford their own machine

Price Range: \$ 20,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #54 50T Scrap Tyre Powder to Rubber Tile Production Line Rubber Floor Car Mat Making Machine Rubber Mat Making Machine.

Business Idea For This Machine:

This is a machine that turns old scrap tyres into rubber powder and then uses that powder to make rubber tiles, floor mats, and car mats. This setup usually includes machines that shred the tyres, grind them into fine powder, and mold the powder into finished rubber products. These products are used in homes, gyms, playgrounds, and cars. The machine helps recycle waste tyres and turn them into useful items, reducing environmental waste.

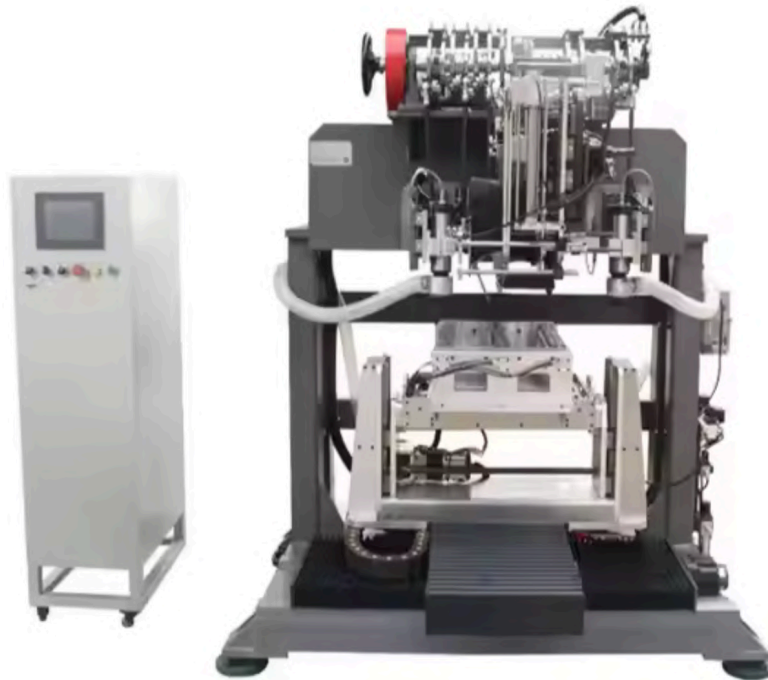

- Set up a small factory and sell rubber tiles and mats to construction companies or car accessory shops.
- Supply rubber tiles to schools and playgrounds for safety flooring.
- Sell processed rubber powder to other businesses that make rubber products.
- Export finished products or rubber powder to countries with high demand for recycled materials

Price Range: \$ 8,000

Machine #55 YT302TO Brush Tufting Drilling Machine Making Brush Maker Machine

Business Idea For This Machine:

It is a machine used to make brushes by drilling holes and inserting bristles into them. This is commonly used in factories that produce cleaning brushes, household brushes, or industrial brushes. The machine handles both the drilling of holes into brush blocks and the placing of bristles into those holes,

helping to produce many brushes quickly. It can be used to make different types of brushes depending on how it's set up.

- Start a small brush-making business and supply local stores or cleaning companies.
- Offer brush production services to companies that need custom or bulk orders.
- Produce different types of brushes (e.g., shoe brushes, toilet brushes, scrubbing brushes) and sell them online.
- Partner with hardware or cleaning supply shops to supply them with brushes regularly.
- Of course get some marketers to sell your product on the street.

Price Range: \$ \$7,500- \$25,000

Machine #56 Automatic CNC Stone Engraving Machine for Marble and Granite Carving with Gearbox Bearing PLC Core Components.

Business Idea For This Machine:

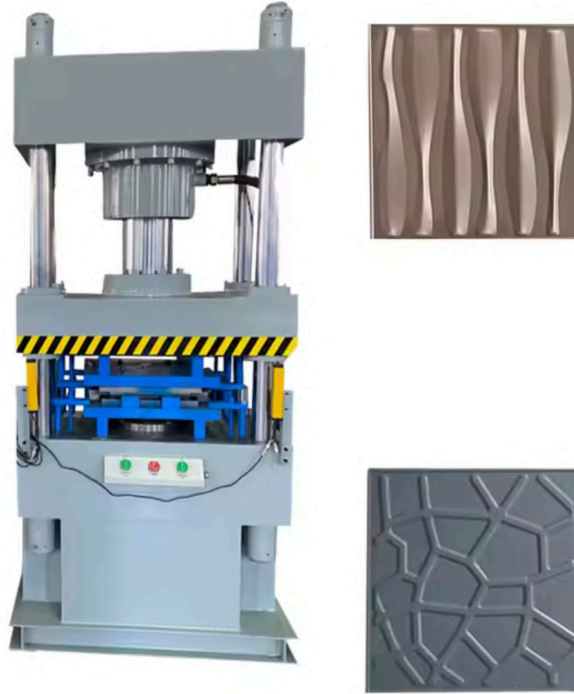

It is a machine used to carve designs, letters, or patterns onto hard stones like marble and granite. It works with the help of a computer program that tells it exactly what to engrave. This setup makes it easier and faster to do detailed work that would take a long time by hand. It is often used in making tombstones, signboards, wall art, and decorative pieces. It uses a strong gearbox and bearing system to move smoothly, and the PLC core helps it follow exact steps during carving.

- Create and sell simple furniture items like stools, racks, or chairs at local markets or online.
- Create custom stone signage for businesses, homes, and hotels
- Make and sell wall art and home décor made from marble or granite
- Provide engraving services to construction companies for building plaques
- Sell engraved memorial stones for pets or special occasions online

Price Range: \$ 10,000

Machine #57 Haide 3d Wall Panel Making Machines Wall Panel Plastic Ceiling Panels Making Machine

Business Idea For This Machine:

This is a machine used to produce 3D wall panels and plastic ceiling panels. These panels are commonly used in home and office interior decoration. The machine melts and molds raw plastic materials into decorative panels with different shapes, patterns, and sizes. It works with materials like PVC and other plastic blends. This setup is suitable for small factories or workshops that want to start producing decorative wall and ceiling panels.

- Start a panel production business and supply builders, interior decorators, or furniture shops.
- Produce and sell custom-designed panels to homeowners who want unique wall or ceiling designs.
- Export finished panels to countries or regions with high construction or renovation demand.
- Partner with contractors to supply panels for ongoing building projects.
- Create a local showroom to display panels and attract walk-in clients or resellers.

Price Range: \$ 8,000

Machine Source2: [Click Here For Details Of This Machine.](#)

Machine #58 38 CNC Tube Bender for Chair Furniture Tube Metal Stainless Steel Pipe Bending Machine.

Business Idea For This Machine:

It is a machine used to bend metal tubes, especially for making parts of chairs and other furniture. This works well with stainless steel, iron, and other types of metal pipes. It is mostly used in furniture factories or workshops that make metal frames. It helps bend the tubes neatly without breaking or damaging them. This makes it easy to shape chair legs, backrests, and other parts.

- Create and sell simple furniture items like stools, racks, or chairs at local markets or online.
- Start a local tube bending service for small furniture makers who don't have this machine.
- Offer custom metal chair frame designs to interior designers or decorators.
- Do contract work for metal workshops that need tube bending but don't want to invest in their own machine.

- Partner with carpenters or furniture makers and supply them with pre-bent metal tubes.

Machine #61 Barrel furniture production

Business Idea For This Machine:

This is a steel barrel that can be reused creatively in DIY furniture projects. It's commonly used to make chairs, tables, sinks, and storage units by cutting,

painting, and assembling parts. These barrels are very cheap and available on the local market.

- Create and sell handmade barrel furniture at local markets or online.
- Offer custom-made barrel items to cafes, bars, or interior designers.
- Start a small local brand focused on recycled or rustic home décor.
- You can rent or build a space in your area where you can showcase your barrel furniture and fabricated products to attract more buyers while building your brand.
- This barrel can be used for many other creations like wheel barrows so be innovative enough to accept custom orders.

Price Range: \$ 140

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source2: [Click Here For Details Of This Machine.](#)

Machine #62 Plastic Water tank Making Machine

Business Idea For This Machine:

This is a large industrial machine used to manufacture plastic water tanks of various sizes, often by a process called rotational molding. These tanks are widely used in homes, farms, and factories to store water. The primary raw material you'll need is polyethylene (PE), especially Linear Low-Density Polyethylene (LLDPE) or High-Density Polyethylene (HDPE). In countries like Nigeria, Ghana, Kenya, etc., there are local suppliers who import and distribute LLDPE/HDPE granules. If you wish you can import that from china for your production.

- Manufacture and sell water tanks in communities with limited access to steady water supply.
- Supply tanks to construction companies, farmers, and real estate developers.
- Create custom-sized or branded tanks for institutions like schools or hospitals.
- Rent tanks for temporary events or construction sites.
- Export tanks to neighboring countries with water storage issues.
- Get some distributors to market your product.

Price Range: \$70,000 - \$ 300,000

Machine #104 Wet Tech Fish Feed Extruder Production Machinery Fish Feed Pellet Equipment Plant

Business Idea For This Machine:

This is a large-scale machine used to produce fish feed pellets. It mixes raw materials like corn, rice bran, soybean meal, and fish meal with water and steam, then cooks and shapes them into pellets. These pellets float in water, making them easy for fish to eat. It's commonly used by fish farms and feed producers.

- Start a local fish feed production business: Supply feed to small and medium-sized fish farms in your area that can't afford their own machine. Offer custom feed mixes based on the species they raise (e.g., tilapia, catfish).
- Supply to commercial fish farms: Partner with large fish farms that need a steady and reliable supply of quality feed. Offer bulk delivery at a competitive price.
- Create branded feed products: Package and brand your pellets for resale to fish farmers, pet stores, or aquarium shops. You can target both freshwater and ornamental fish markets.
- Offer contract feed production: Charge a fee to help others produce their own formula using your equipment. Many farmers may want specific ingredient blends.

- Sell waste by-products: Any leftover or rejected feed material can be sold or repurposed as fertilizer or animal feed for poultry or pigs.

Machine #107 Commercial Bread Oven Electrical / Gas Rotary Rack Oven 32 Tray for Bakery

Business Idea For This Machine:

This is a large bakery oven designed to bake bread and other pastries in bulk. It uses either electricity or gas and holds up to 32 trays at once. The rotary rack rotates the trays for even baking. It's ideal for bakeries, hotels, and large-scale food production.

- Start a bakery business: Bake and sell bread, cakes, pastries, and meat pies to walk-in customers, schools, restaurants, and shops.
- Supply to supermarkets and hotels: Offer freshly baked goods daily or weekly to local stores, hotels, and events needing bulk orders.
- Wholesale baked goods: Produce in bulk and supply small vendors or resellers in markets who don't bake but sell.
- Rent oven time to others: Charge home bakers or small businesses a fee to use your oven for their production needs.
- Host baking classes: Use your bakery space and oven to teach people how to bake bread or pastries. Charge per class or run a weekend boot camp.
- Offer contract baking: Let individuals or businesses bring their recipes, and you bake for them at a fee. Ideal for people without equipment.

- Produce branded baked snacks: Create packaged bread or snacks for retail with your brand. Distribute to schools, shops, and events.

Machine #108 Corn Flakes Production Line Factory Manufactured Processing Machinery

Business Idea For This Machine:

It is a full set of machines used to turn corn and grains into ready-to-eat corn flakes. It includes mixers, extruders, dryers, flavor coaters, and packing machines. The process involves cooking the corn mixture, shaping it into flakes, drying, toasting, and then flavoring or sweetening it.

- Start a cereal production business: Produce and sell your own brand of corn flakes to local stores, supermarkets, and online shoppers.
- Supply to schools and institutions: Package in bulk and offer deals to schools, hospitals, and correctional centers for breakfast supply.

- Sell to distributors: Work with food distributors who will move your corn flakes into retail stores, kiosks, or export markets.
- Offer private label production: Help others start their cereal brand by producing corn flakes for them under their brand name.
- Make flavored variations: Create honey, chocolate, or fruit-flavored corn flakes to target kids and health-conscious consumers.
- Package in small sachets: Sell low-cost options in smaller packs for roadside shops and kiosks in areas with high foot traffic.
- Sell leftover flakes or broken pieces: Offer them at a discount to animal farms or bakeries that use them as ingredients.

Price Range: \$ 12,000

Machine #109 Professional Fruit Dehydrator Machine

Business Idea For This Machine:

This is a machine used to remove moisture from fruits by circulating warm air over sliced pieces. It preserves the fruit by drying it without using chemicals.

The result is lightweight, shelf-stable dried fruits like mango, pineapple, banana, and apple slices.

- Start a dried fruit business: Produce and sell packaged dried fruits to supermarkets, health stores, and online platforms.
- Target health-conscious consumers: Offer sugar-free, preservative-free snacks to people looking for healthy snack options.
- Supply to schools and offices: Package in small portions and market them as convenient and healthy lunchbox or desk snacks.
- Create fruit snack mixes: Combine dried fruits with nuts or seeds to make and sell trail mixes for fitness enthusiasts or travelers.
- Sell to bakeries and food manufacturers: Supply dried fruit in bulk for use in cakes, granola bars, cereal, or yogurt toppings.
- Offer private label production: Produce dried fruits for small brands or individuals who want to sell under their own name.
- Use seasonal fruits: Buy fruits during harvest when prices are low, dehydrate them, and sell at a higher price later in the year.
- Export dried fruits: Package and meet standards to ship to international buyers where tropical fruits are in demand.

Machine #110 Fully Automatic Industrial Sewing Machine Cnc Sewing Machine for Upholstery Suitcase for Sewing Machine

Business Idea For This Machine:

This is a computer-controlled sewing machine designed for heavy-duty stitching on thick materials like leather, canvas, or synthetic fabrics. It's often used in the production of sofas, car seats, suitcases, and other upholstered items. The machine follows digital patterns for fast, uniform, and strong stitches.

- Start a suitcase or bag production business: Use it to manufacture travel bags, laptop cases, and tool bags with neat, strong stitching.
- Produce custom upholstery: Offer high-quality stitching services for furniture makers, car interiors, and home decor businesses.
- Sew industrial or protective gear: Make seat covers, uniforms, safety vests, or protective bags for tools and machines.
- Offer stitching services to local tailors: Partner with small-scale tailors or workshops that need help with thick or complex materials.
- Create branded leather products: Make and sell custom-stitched leather goods like belts, wallets, aprons, or craft items.
- Contract sewing for factories: Work with larger furniture or luggage factories to take on part of their stitching load.

- Train others in automated sewing: Teach people how to use CNC sewing machines for modern production—either online or in a workshop.

Price Range: \$ 1,750

Machine #111 Fully Automatic Rigid Corrugated Drain Electrical Conduit Gas Wiring Flexible PVC CPVC Tube Pipe Fitting Bend Making Machine

Business Idea For This Machine:

This is an automatic machine that shapes and bends rigid or flexible PVC and CPVC pipes. It is used to make fittings such as elbows, curves, or bends that are commonly needed in plumbing, electrical wiring, gas pipelines, and drainage systems. The machine heats the pipe, bends it into the desired shape, and cools it to hold the form.

- Start a pipe fitting production business: Produce and sell bent conduit or drain pipe fittings to hardware stores, building material shops, and plumbing contractors.

- Supply to construction companies: Offer customized pipe bends in bulk for housing projects, electrical installations, or water systems.
- Provide fittings to electricians and plumbers: Serve local professionals who need ready-made bends for daily installations.
- Make and brand your own pipe accessories: Build a name in the building materials market with packaged and labeled products.
- Export to regions with growing infrastructure: Sell to neighboring countries or areas with rising construction demand.
- Offer custom bending services: Work with companies or individuals who bring their own pipes for customized shaping and charge per unit or job.

Price Range: \$ 21,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #112 Cereal Granola Bar Making Machine for Industrial Use

Business Idea For This Machine:

This is an industrial machine used to produce cereal and granola bars in large quantities. It mixes ingredients like oats, nuts, honey, chocolate, or dried fruits, shapes them into bars, compresses them, and cuts them to size. Some versions also include baking or cooling systems depending on the recipe.

- Launch your own granola bar brand: Produce healthy snack bars and sell them under your label through supermarkets, health stores, or online.
- Target schools, gyms, and offices: Offer individually wrapped bars as healthy snacks for kids, fitness enthusiasts, or busy professionals.
- Make custom bars for other brands: Provide private label manufacturing for small businesses or nutrition coaches who want to sell branded bars.
- Sell in bulk to hotels and airlines: Supply snack bars for use in breakfast buffets, travel kits, or guest room amenities.
- Use local and seasonal ingredients: Reduce costs by using ingredients like peanuts, coconut, or honey sourced locally, then market it as a "made with local produce" product.
- Create diet-specific bars: Make keto, vegan, or gluten-free bars to target health-conscious or niche diet markets.
- Offer co-packing services: Help small startups produce and package their bars without investing in machines.
- Export to health-focused markets: If you meet packaging and safety standards, you can sell to international buyers looking for high-quality snack foods.

Price Range: \$ 20,000

Machine #113 ZONESUN ZS-STB150 PVC Stretch Automatic Water Bottle Sleeving Labeling Machine for Aerosol Cans

Business Idea For This Machine:

This is an automatic labeling machine designed to apply shrink sleeve labels onto various bottle types, including round, square, and oval shapes. It works by feeding and cutting film sleeves, placing them over bottles, and then shrinking them to fit tightly. The machine can handle up to 150 bottles per minute and is suitable for labeling products like water bottles, aerosol cans, cosmetics, and beverages.

- Start a labeling service: Offer shrink sleeve labeling for local beverage producers, cosmetic brands, or cleaning product manufacturers who need professional packaging but lack the equipment.
- Produce and sell labeled products: Create your own line of bottled products—such as flavored water, sauces, or personal care items—and use the machine to apply attractive labels that stand out on shelves.
- Contract packaging for small brands: Provide labeling services to startups or small businesses that require short runs of labeled bottles, helping them maintain a professional appearance without large investments.

- Customize promotional items: Offer businesses the option to create branded bottles or cans for events, marketing campaigns, or corporate gifts.
- Partner with packaging suppliers: Work with bottle or packaging suppliers to offer a complete solution that includes labeling, adding value to their offerings and attracting more clients.
- Export labeled products: Use the machine to meet international labeling standards, allowing you to tap into export markets with properly labeled goods.

Price Range: \$ 11,900

Machine #114 Rotary Mould Dog Shortbread Biscuit Make Walnut De Fabrication De Biscuit Extruder Cookie Maker Machine

Business Idea For This Machine:

This machine is used to produce shaped biscuits and cookies, especially shortbread types, by extruding dough through molds. It can create various shapes and patterns, including dog bone shapes often used for pet biscuits.

The rotary mold helps shape the dough continuously for high-speed production.

- Start a pet biscuit business: Make healthy, shaped dog biscuits and sell them online, at pet stores, or at local markets.
- Produce cookies for bakeries: Supply shaped shortbread or walnut-flavored cookies to bakeries, cafes, and grocery stores.
- Create custom-shaped cookies: Offer personalized cookies for events, holidays, or promotions with custom molds.
- Sell to pet food wholesalers: Package in bulk and sell to wholesalers who distribute pet treats or bakery goods.
- Make gift packs or snack boxes: Combine shaped biscuits with other snacks in attractive packaging for gift sales.
- Offer contract baking: Produce biscuits for small brands or startups without production equipment.

Price Range: \$2,400

Machine #115 Plastic Takeaway Food Container Pvc Fitting Making Plastic Bottle Cap Spoon Making Injection Molding Machine

Business Idea For This Machine:

This machine uses injection molding to produce plastic items by melting raw plastic pellets and injecting them into molds. It can make takeaway food containers, bottle caps, spoons, and PVC fittings. The process is fast and suitable for mass production of uniform plastic products.

Start a plastic product manufacturing business: Produce takeaway containers, bottle caps, and spoons to sell to restaurants, food vendors, and supermarkets.

- Supply catering companies and food delivery services: Offer affordable and eco-friendly packaging solutions for businesses needing disposable containers.
- Make custom plastic fittings: Provide PVC fittings for plumbing or construction companies in your region.
- Have a depot where you offer discounted wholesale deals.
- Sell plastic packaging to events and festivals: Target events needing large volumes of disposable food containers and cutlery.
- Export plastic products: Package and sell your molded items to markets with high demand for plastic food containers and accessories.

- Recycle and remold waste plastics: Collect plastic waste, recycle it, and use as raw material to reduce costs and promote sustainability.

Price Range: \$ \$18,000-23,000

Machine #116 100L - 500L Industrial Chemical Shampoo Mixing Tank Liquid Hand Wash Dishwashing Liquid Soap Making Machine With Wheels.

Business Idea For This Machine:

This is a stainless steel mixing tank designed for blending liquid products like shampoo, hand wash, dishwashing liquid, and other chemical or cosmetic liquids. It can mix ingredients evenly using a motorized stirrer, and some models include heating and temperature control. The wheels make it easy to move within a workspace.

- Start your own liquid soap brand: Use it to produce hand wash, dishwashing liquid, or shampoo for sale at markets, salons, or online.

- Supply to hotels, schools, and hospitals: Offer bulk liquid soap or cleaning products to institutions that need constant supply
- Make custom formulas for clients: Mix private-label products for small businesses that want their own branded cleaning or beauty products.
- Produce eco-friendly or herbal alternatives: Make plant-based or organic soap formulas to attract health-conscious consumers.
- Sell in bulk to retailers and supermarkets: Package your product in large or small containers for local shops.
- Offer contract mixing services: Let other producers rent your machine or pay you to mix their ingredients.
- Train others in soap production: Host small workshops or online classes teaching how to make liquid soap using the machine.

Machine #117 Kitchen Sponge Production Machine / Dish Washing Sponge Making Machine

Business Idea For This Machine:

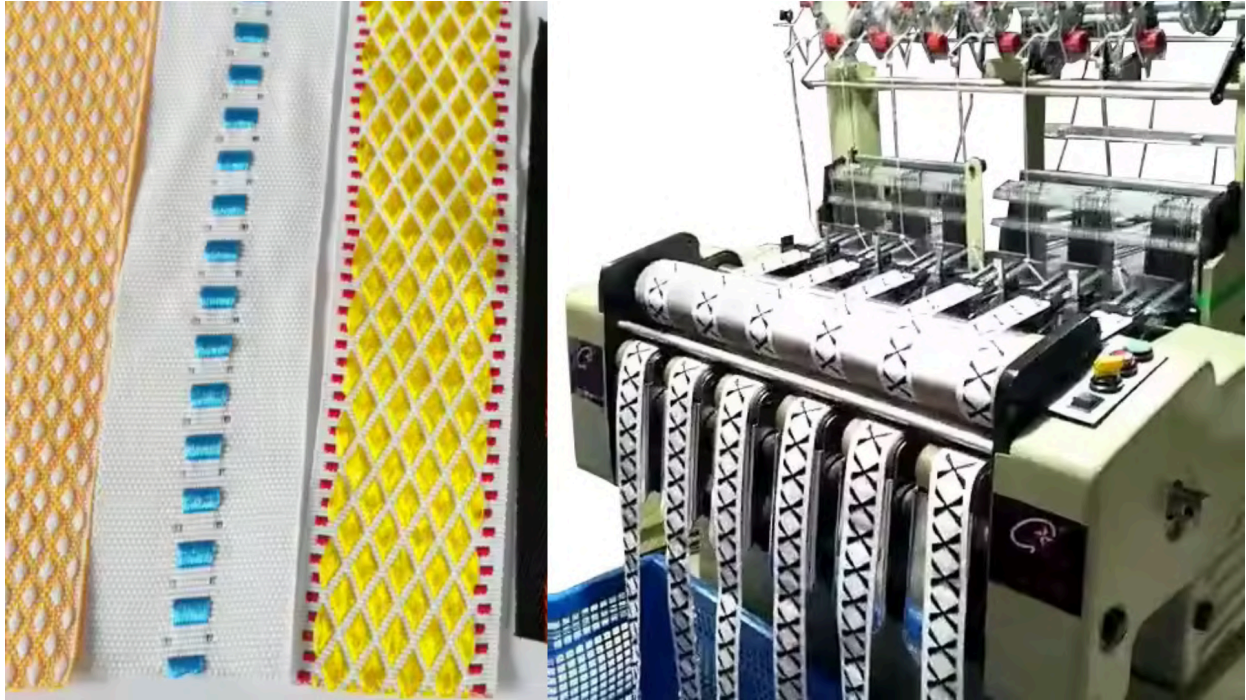

This is a machine used to produce kitchen cleaning sponges, including scouring pads and foam scrubbers. It cuts, shapes, and layers different materials like foam, fiber, or abrasive pads to create sponges used for dishwashing and household cleaning.

- Start a sponge manufacturing business: Produce dishwashing sponges in different shapes and sizes to supply local markets and retail stores.
- Supply cleaning companies: Sell sponges in bulk to cleaning service providers, hotels, and restaurants that use them daily.
- Create branded sponge products: Package your sponges under a private label and market them as premium or eco-friendly options.
- Sell through supermarkets and wholesalers: Partner with retail chains or distributors to get your product onto store shelves.
- Export to high-demand markets: Target countries or regions where affordable cleaning supplies are in demand.
- Produce novelty or custom-shaped sponges: Offer fun or themed sponge shapes for special occasions, gift packs, or promotional items.
- Offer OEM production: Make sponges for other brands or businesses that want to sell under their own name without investing in equipment

Price Range: \$ 1,750

Machine #118 Strap Lifting Belt Seat Belt Ribbon Weaving Machine.

Business Idea For This Machine:

This is a weaving machine used to produce strong, narrow fabrics like lifting straps, seat belts, safety harnesses, and industrial ribbons. It interlaces threads under high tension to create durable, non-stretch webbing used in automotive, construction, packaging, and safety industries.

- Start a strap and belt production business: Manufacture seat belts, lifting straps, or cargo tie-downs for sale to hardware stores, safety equipment suppliers, or automotive markets.
- Supply construction and transport companies: Offer custom lifting belts and heavy-duty webbing used in moving, securing, or lifting goods.
- Produce fashion or utility accessories: Make belts, backpack straps, watch bands, and dog leashes for clothing brands or pet stores.
- Sell safety gear components: Manufacture harness straps or fall protection parts for companies that assemble safety equipment.
- Offer contract weaving services: Provide custom-width or material weaving for clients who supply their own designs or need special fabrics.
- Export industrial webbing: Package and sell your woven straps to international buyers who need quality materials for local production.

Create branded utility gear: Build a line of adventure, survival, or tactical gear like belts, straps, or handles using your woven ribbons.

Machine #119 Full Automatic Toilet Tissue Paper Making Machine

Business Idea For This Machine:

This is a fully automatic machine designed to convert jumbo tissue paper rolls into smaller, ready-to-use toilet rolls. It handles unwinding, embossing, perforating, cutting, and rewinding—all in one continuous process. Some models also include automatic roll packing or core insertion

- Start your own toilet paper brand: Produce and package rolls for homes, offices, and institutions under your own label.
- Supply to wholesalers and retailers: Sell in bulk to shops, supermarkets, or distributors looking for locally made toilet paper.
- Serve high-demand areas: Target schools, hospitals, hotels, and public facilities that use large volumes regularly.

- Offer custom branding: Make toilet rolls with logos or private labels for businesses, events, or promotional use.
- Export to nearby regions: Sell to neighboring markets where toilet paper demand is high but supply is limited.
- Provide contract manufacturing: Run production for other brands who don't own machinery, especially small startups.
- Get a distribution truck and some marketers to aggressively market your product and get them into every home possible.

Machine #120 Sausage Production Line

Business Idea For This Machine:

This is a complete setup of machines used to produce sausages in large quantities. It typically includes equipment for grinding meat, mixing with spices, stuffing into casings, linking, cooking, smoking (optional), and packaging. Some lines are semi-automatic, while others are fully automatic for continuous production

- Start a sausage brand: Produce different types of sausages (chicken, beef, pork, plant-based) and sell them in local markets, supermarkets, or online.
- Supply to restaurants and hotels: Offer bulk sausage supply to kitchens that need consistent quality and quantity.
- Serve catering and event businesses: Package sausages for weddings, parties, and food vendors needing quick, ready-to-cook meat products.
- Produce custom flavors: Create regional or spicy blends that cater to local tastes or dietary needs (e.g., low-fat, halal, or organic).
- Export to neighboring countries: Vacuum-pack sausages and sell to markets that rely on imports for processed meats.
- Provide private label services: Make sausages for other companies who want their own branding but don't have the equipment.
- Create frozen or ready-to-eat packs: Add value by cooking and freezing sausages for quick meal options sold in stores.
- Sell to food trucks and street vendors: Offer smaller, affordable packs ideal for hotdog stands or quick-serve setups.
- Sell sausage in multiple food trucks.

Price Range: \$ 9,000

Machine #121 Double Screw Extruder Texture Protein Soya Meat Processing Making Equipment.

Business Idea For This Machine:

This is a food processing machine that uses a twin-screw extrusion system to turn soy flour or other plant proteins into textured vegetable protein (TVP), commonly known as soya meat. The machine cooks, shapes, and dries the protein to create meat-like textures that can be used as meat substitutes

- Start a plant-based food brand: Produce soya meat for vegetarian and vegan customers and sell it in retail stores or online.
- Supply to food manufacturers: Offer bulk textured protein as an ingredient for companies making ready meals, snacks, or meat alternatives.
- Target health-conscious consumers: Sell protein-rich meat substitutes to customers looking to reduce meat intake for health or ethical reasons.
- Sell to schools, prisons, and hospitals: Provide affordable and nutritious TVP as part of institutional meals in large quantities.
- Export to international markets: Many countries import soy-based meat alternatives—package your product for global distribution.
- Produce flavored or pre-cooked versions: Add spices or sauces and sell as ready-to-cook or ready-to-eat products for busy consumers.

- Offer private label production: Manufacture TVP for other brands that want their own meat substitute line without owning equipment.
- Sell to religious or dietary-specific markets: Promote meat-free options to groups that follow vegetarian diets for religious or cultural reasons

Price Range: \$ 10,000

Machine #122 Multi-Blade Bone Saw Machine Heavy Duty Meat Cutter for Beef Pork and Poultry Processing For Commercial Use

Business Idea For This Machine:

This is a commercial-grade machine with multiple blades designed to cut through frozen or fresh meat and bones. It is used in meat processing plants and butcher shops to quickly and evenly slice large portions of beef, pork, poultry, or fish into smaller, manageable pieces.

- Use it for a cold store business to cut and portion meat for resale to restaurants, markets, or individuals.
- Supply local butcher shops: Offer pre-cut meat portions to butchers who want to save time and labor.

- Serve hotels and restaurants: Provide neatly cut meat and bones for food service businesses that need consistent portions.
- Sell pre-packaged meat cuts: Process and package ready-to-cook meat for supermarkets or frozen food outlets.
- Offer cutting services: Let small farmers, hunters, or meat vendors pay you to process their meat using your machine.
- Create specialty cuts: Offer traditional or custom cuts (e.g., ribs, shanks, stew meat) tailored to local or ethnic market demands.
- Export processed meat: Cut, package, and freeze meat portions for sale to regions where processed meat is imported.

Machine #123 Wire Rod and Steel Bar Straightening Machine High Precision Rebar Processing Equipment for Industrial Fabrication

Business Idea For This Machine:

This is a heavy-duty industrial machine used to straighten coiled wire rods or bent steel bars (commonly called rebar). It pulls the rods through a rotating

set of straightening wheels, cutting them into fixed lengths. It's commonly used in construction material processing and steel fabrication workshops.

- Supply straightened rebar to construction sites: Sell accurately cut and straightened steel bars to contractors and builders who need ready-to-use materials.
- Offer rebar processing services: Let hardware stores, steel dealers, or small builders pay you to straighten and cut their steel stock.
- Serve fabrication workshops: Provide straight bars for welding, metal furniture making, and steel frame construction.
Sell to hardware and building material shops: Package and supply straight steel rods for retail resale.
- Straighten and resize leftover or bent rebar from demolition or construction sites to reuse or sell at a discount.
- Help rebar wholesalers improve product quality by providing clean, straight, ready-to-sell steel.

Price Range: \$ 6,000

Machine #124 Automatic Anisotropic Bending Machine for Flat Iron Bar Forming Stainless Steel Aluminum Pipe Processing Flat Iron Bar Machine.

Business Idea For This Machine:

This is a programmable machine designed to bend flat iron bars, stainless steel, or aluminum pipes into various shapes and angles. It uses controlled pressure and rotation to form curved or bent metal components used in gates, fences, construction, and metalwork projects

- Start a metal fabrication service: Offer custom bending services to welders, builders, and metal artists who need specific shapes for their projects.
- Produce parts for gate and fence makers: Supply pre-bent flat bars or decorative metalwork used in railings, doors, or security structures.
- Serve the construction industry: Provide curved or shaped flat bars for structural or architectural features in buildings and bridges.
- Support signage and furniture businesses: Make parts for metal signage frames, outdoor furniture, or interior decor pieces.
- Offer subcontract bending services: Work with machine shops, automotive fabricators, or industrial manufacturers who need precision-bent parts.
- Sell ready-made components: Manufacture items like metal handles, brackets, or frames and supply them to wholesalers or retailers.

- Make money with this machine by using it for your own DIY metal fabrication master pieces for sale.

Price Range: \$ 11,500

Machine 125 High-Quality Small-Capacity Brass, Copper and Other Scrap Metal Smelting Furnaces.

Business Idea For This Machine:

This is a compact furnace designed to melt non-ferrous metals like brass, copper, aluminum, and zinc. It heats scrap metal at high temperatures until it turns into liquid, which can then be poured into molds to make new parts, bars, or ingots. It's ideal for small-scale recycling and metal casting operations.

- Start a small metal recycling business: Collect scrap copper or brass (from wires, plumbing, old equipment) and melt it into clean ingots for resale.
- Produce custom metal parts: Melt and cast small tools, fittings, or components for artisans, welders, and metalworkers.
- Sell brass or copper ingots: Refine and sell standard-size ingots to jewelers, machinists, or industrial buyers.
- Supply high-quality melted metals to local artists who make decorative or handcrafted items.
- Offer toll smelting services: Let individuals or small businesses bring their scrap, and you process it for a fee.
- Reuse melted metal for your own product line: Create and sell products like door handles, belt buckles, medallions, or plumbing parts using cast molds

Price Range: \$ 2,900

Machine #126 3 Point 3 Row Onion Potato Garlic Planting Garlic Planter 10 Rows Seeders Transplanters for Tractor.

Business Idea For This Machine:

This is a tractor-mounted seeder and transplanter used for planting bulbs or small crops like garlic, onions, and potatoes. It uses multiple rows to plant evenly and at the right depth, saving labor and improving efficiency on farms. It connects to the tractor via a 3-point hitch system and can handle multiple rows in one pass.

- Use the machine to efficiently plant large fields of garlic, onions, or potatoes for commercial harvest and sale.
- Get paid to help small or medium farms save time and labor by handling their planting.
- Focus on contract farming for food processing companies, local markets, or exporters that need large volumes.
- Focus on fast-selling crops like garlic or ginger, which bring in more profit per acre.
- Rent it out during planting season to nearby growers who can't afford to buy their own.
- Use it to plant niche or organic varieties of onions or garlic that sell at premium prices.

Price Range: \$ 1,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #127 15KHz 2600W 3300W Ultrasonic Plastic Welding Machine
220V Ultrasonic Welding Processing Equipment for Plastic PVC ABS

Business Idea For This Machine:

This is a high-frequency welding machine that joins plastic parts using ultrasonic vibrations instead of heat or glue. It works by generating sound waves that create friction at the joint area, melting the plastic and forming a clean, solid bond. It is commonly used to weld plastics like PVC, ABS, and similar materials in industries such as packaging, electronics, automotive, and household products.

- Weld components for items like plastic containers, toys, appliance parts, or packaging.
- Offer ultrasonic welding for companies that need precise and fast bonding of plastic parts in their production.
- Produce and sell welded plastic products: Make things like water filters, plastic boxes, blister packs, or car parts using welded joints.
- Offer welding services to small-scale inventors or startups: Help entrepreneurs build plastic prototypes or short runs of plastic products.
- Specialize in electronics casing assembly: Weld plastic casings for remote controls, power adapters, sensors, or other plastic-encased electronics.

- Repair or modify plastic goods: Use the machine to fix broken plastic joints or modify products that need strong, clean sealing.

Price Range: \$ 1,700

Machine #128 Hot Sale Cashew Nuts Chocolate Coating Machine Sugar Coating Machine

Business Idea For This Machine:

This is a food processing machine designed to coat items like cashew nuts, almonds, peanuts, groundnut and other snacks with sugar, chocolate, or flavored coatings. The machine gently spins the nuts in a rotating pan while pouring coating materials, ensuring even coverage and a glossy finish. It's widely used in snack production and confectionery businesses.

- Start a coated nuts snack brand: Make chocolate-covered or sugar-coated cashews or peanuts and sell them in shops, supermarkets, or online.
- Supply to cafes and restaurants: Package coated nuts in bulk for coffee shops, dessert spots, and lounges as premium snacks or toppings.

- Sell to event planners or gift box makers: Offer attractively packaged coated nuts for party favors, gift baskets, or holiday treats.
- Produce in-demand variations: Create spicy, honey-glazed, cocoa-dusted, or yogurt-coated snacks for niche markets.
- Export coated nuts: Package and ship your finished products to international markets where flavored or sweet snacks are in high demand.
- Offer coating services: Provide contract coating for small nut processors or bakeries that want to outsource this step.
- Sell to health food stores: Use healthier ingredients like dark chocolate, organic sugar, or natural flavors and target wellness markets.
- Bundle and cross-sell: Combine your coated nuts with other items like dried fruits or granola to create snack mixes for retail.

Price Range: \$ 6,000

Machine #129 Agricultural Tractor Palm Fruit conveyor for Palm Oil Plantations

Business Idea For This Machine:

This is a tractor-mounted or trailer-style conveyor system used to transport harvested palm fruit bunches from the field to processing points or collection centers. It reduces manual labor, speeds up fruit movement, and helps plantation workers handle large harvests more efficiently.

- Offer palm fruit transport services: Use the conveyor on your tractor to move harvested fruits for plantation owners who need quick and efficient transport.
- Start a logistics support business for plantations: Partner with multiple smallholder farms to collect and deliver fruit to mills on a daily basis.
- Lease the conveyor to palm farmers: Rent it out during peak harvest periods to farmers who can't afford to own one.
- Support palm oil cooperatives: Work with groups of farmers to streamline fruit movement from various plots to a central collection point.
- Speed up your own palm oil operation: If you grow palm yourself, use this to reduce labor costs and increase harvest output.
- Offer contract harvest services: Combine labor and conveyor transport to provide full harvest solutions to plantation owners.
- Transport other farm products: Use the conveyor system to move bananas, cocoa pods, or other bulky produce in off-seasons.

Price Range: \$ 3,800

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #130 Advanced Ct Scan Machine & Medical High Frequency X-ray Radiography System

Business Idea For This Machine:

This is a medical imaging system that includes a CT (Computed Tomography) scanner and a high-frequency X-ray unit. The CT scanner produces detailed 3D images of internal organs, bones, and tissues, while the X-ray system captures high-resolution images for diagnostic use. These machines are essential in hospitals, diagnostic centers, and specialized clinics.

- Open a private diagnostic center preferably near a hospital or clinic. Set up a medical imaging facility offering CT scans and X-rays to patients referred by clinics and hospitals. You don't need to be an expert to do this. Just train yourself or someone on how to operate the machines to get started.
- Lease to private hospitals: Rent out the machine or imaging room to doctors or specialists on a per-use or contract basis.
- Train radiology technicians: Offer hands-on training with your equipment to students or healthcare workers and charge training fees.

Price Range: \$ 9,800 & \$198,000

Machine #131 Car Brake Pads Hot Press Molding Machine Making Machine.

Business Idea For This Machine:

This is an industrial press machine used to manufacture car brake pads by applying heat and pressure to mold raw materials like resin, metal fibers, and friction powders into solid, finished pads. It ensures consistent size, shape, and density for safe and durable braking components.

- Start a brake pad manufacturing business: Produce and sell aftermarket brake pads for cars, vans, and motorcycles to auto shops and parts dealers.
- Supply to local garages and mechanics: Offer affordable, quality brake pads for installation during routine vehicle maintenance and repairs.
- Sell to auto parts retailers: Package and brand your brake pads for distribution in spare parts shops and online marketplaces.
- Export to developing markets: Manufacture budget-friendly brake pads for regions with high demand and limited access to big-name brands.

- Produce specialty brake pads: Make high-performance or heavy-duty variants for racing, trucks, or industrial vehicles and charge premium rates.
- Offer white-label manufacturing: Create brake pads for other brands or distributors who want to sell under their own name.

Price Range: \$ 10,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #132 Automatic Cashew Processing Machine

Business Idea For This Machine:

This is a machine designed to handle different stages of cashew nut processing, including shelling, peeling, drying, grading, and sometimes roasting. It reduces the need for manual labor and increases the speed and consistency of processing cashew nuts from raw form to edible kernels ready for sale.

- Start a cashew nut processing business: Buy raw cashew nuts, process them using the machine, and sell cleaned, peeled nuts to wholesalers or retailers.

- Supply supermarkets and export markets: Package the processed cashews in small or bulk quantities for local stores or international buyers.
- Sell value-added cashew products: Roast, salt, or flavor the processed nuts and sell them as premium snacks under your own brand.

Price Range: \$ 14,000

Machine #133 Jute Felt Making Needle Punching Machine Produce Geotextile / Felt /Carpet /Headliner/Automotive Interior/Household

Business Idea For This Machine:

This is an industrial machine used to produce non-woven jute felt by mechanically interlocking fibers through needle punching. It transforms loose jute or natural fibers into strong, flat materials that can be used for making geotextiles, carpets, automotive linings, insulation pads, and household items.

- Manufacture and sell eco-friendly felt products: Use jute to produce biodegradable items like carpets, mats, or soundproof panels.

- Create automotive interior materials: Make jute-based liners, trunk mats, and insulation sheets for local car assemblers or upholstery shops.
- Supply furniture makers: Create felt materials used as padding or lining in chairs, sofas, and mattresses.
- Make insulation products: Produce thermal or sound insulation sheets for homes and buildings.

Price Range: \$ 35,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #134 Automatic Stainless Steel Plastic PVC Belt Conveyor Flat Turning Assembly Handling Production Line

Business Idea For This Machine:

This is a conveyor system made of stainless steel and PVC belts designed to move products smoothly across different stages of a production or assembly line. It can include straight and turning sections, making it suitable for transporting items through complex paths in factories, packaging lines, or warehouses.

- Set up a small packaging or assembly business: Use the conveyor to handle products like food items, electronics, or cosmetics efficiently.
- Offer material handling services: Help other manufacturers or suppliers move, sort, or package goods in bulk during production.
- Rent the conveyor system: Lease it to small factories or startups that need temporary automation for specific projects or busy seasons.
- Partner with local industries: Automate part of their manual operations and get paid for speeding up their workflow.
- Start a contract packaging service: Combine this conveyor with sealing, labeling, or filling machines to package products for small brands.
- Sell automation setup services: Help small manufacturers set up and maintain simple conveyor-based systems.

Price Range: \$ 120

Machine #135 Commercial Fully Automatic Cake Production Line Machine.

Business Idea For This Machine:

This is a complete machine system that handles the full cake-making process, from mixing batter, pouring it into molds, baking, cooling, to automatic

demolding and sometimes packaging. It's designed for large-scale cake production with minimal manual labor, making it ideal for bakeries, food factories, and dessert brands.

- Start a commercial cake factory: Produce cakes in large quantities and supply to supermarkets, schools, shops, and events.
- Offer private label baking services: Bake cakes for other businesses that want to sell under their own brand name.
- Supply snack distributors: Make small packaged cakes for retail distribution to kiosks, mini-marts, and vending machines.
- Sell to hotels and catering services: Provide bulk quantities of sponge cakes or muffins for breakfast buffets and large events.
- Export packaged cakes: Target regional or international markets that import baked goods, especially if shelf life is good.
- Produce custom or seasonal cakes: Make themed cakes for holidays like Christmas, Easter, or birthdays and market them in advance.

Price Range: \$ 12,000

Machine #136 Automatic Flexo Flexographic Offset Flat Printing Machine
Plastic Paper Bag Printing Machine Non-woven Tote Bag Printing Machine

Business Idea For This Machine:

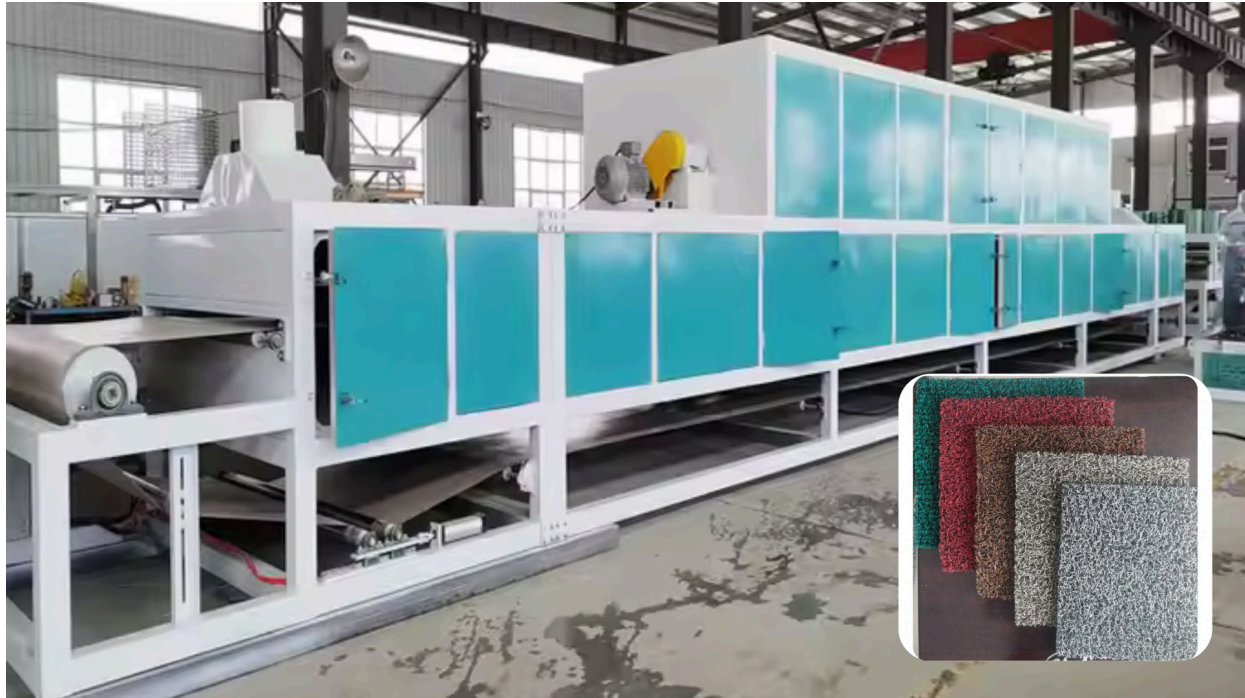

This is an automatic printing machine that uses flexographic (flexo) printing technology to apply ink onto plastic, paper, and non-woven tote bags. It prints quickly on flat surfaces and is ideal for producing custom logos, designs, or branding on packaging bags in bulk.

- Start a custom bag printing business: Offer branded bag printing services to local shops, boutiques, restaurants, and event organizers.
- Work with packaging suppliers: Print logos and designs on bags for businesses that manufacture or supply packaging materials.
- Serve marketing and promotional companies: Print event or campaign branding on non-woven or paper bags for giveaways and advertising.
- Partner with supermarkets and retail stores: Supply them with printed plastic or paper carry bags featuring their store logos.
- Accept bulk print jobs for wholesalers: Provide fast and affordable printing services to bulk bag distributors.
- Sell printed bags online: Design and sell themed or custom-printed bags (e.g. holiday, wedding, business branding) through e-commerce platforms.

Price Range: \$ 2,000

Machine #137 PVC Plastic Coil Mat Carpet Making Machine Anti-Slip Floor Living Room Mat Production Line Manufacturing Plant.

Business Idea For This Machine:

This is a machine used to manufacture PVC coil mats, commonly seen as anti-slip doormats, car floor mats, or bathroom rugs. It melts and extrudes PVC material into a tangled coil design, then cuts, colors, and shapes it into mats suitable for both indoor and outdoor use.

- Start a mat production business: Manufacture and sell coil mats for homes, cars, offices, and shops under your own brand.
- Supply to retailers and wholesalers: Sell finished mats in bulk to local hardware stores, home decor outlets, and cleaning supply shops.
- Produce customized logo mats: Offer custom branding on mats for businesses, hotels, schools, and event organizers.
- Sell through e-commerce: List different designs and sizes of mats online (on Tiktok, Facebook, Jumia, Amazon, or your own website)

- Offer B2B contracts: Supply large orders to companies that need mats for entrances, warehouses, or cleaning services.
- Sell to car accessory dealers: Provide car floor mats in bulk to shops specializing in vehicle interiors.

Price Range: \$ 75,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #138 Plastic Pvc Coil Carpet Making Rubber Mat Manufacturing Floor Door Car Mat Machine.

Business Idea For This Machine:

This is a machine that produces plastic coil carpets and rubber-backed mats. It works by heating PVC and forming it into a curly or coil-like surface structure. The machine can produce mats used at doors, in vehicles, and on floors where durability and anti-slip properties are important

- Set up a mat production workshop: Manufacture doormats, car mats, and floor coverings and sell them directly to customers or stores.
- Sell to car accessory retailers: Make customized or universal car floor mats and distribute them to car parts and accessory shops.

- Produce branded entrance mats: Offer logo printing services on mats for offices, malls, banks, and schools.
- Sell mats to cleaning companies: Provide bulk anti-slip mats to companies that maintain floors in public buildings and businesses.
- List mats on online marketplaces: Sell different styles and sizes of mats through platforms like Jumia, Amazon, or your own online store.
Supply interior and furniture stores: Partner with stores that sell rugs and home accessories to offer PVC coil mats as a budget-friendly option.
- Offer private labeling: Make mats for other brands or businesses that want to sell them under their own name.

Price Range: \$ 5,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #139 High Speed Paper Food Tray Plate Making Machine

Business Idea For This Machine:

This is a machine designed to automatically form and press paper into trays and plates used for serving food. It works with coated or uncoated paper and

can produce a high number of items per hour, making it ideal for commercial food packaging businesses.

- Start a disposable plate and tray business: Manufacture paper food trays and plates for local markets, events, or fast-food vendors.
- Supply food vendors and caterers: Sell trays to street food sellers, caterers, and food courts that need eco-friendly disposable serving options.
- Sell to packaging suppliers: Provide bulk trays to companies that sell food packaging materials.
- Partner with schools and hospitals: Offer bulk trays for serving meals in institutions that require hygienic and disposable options.
- Export eco-friendly paperware: Target regions with growing demand for sustainable packaging and ban on plastics.
- Sell branded trays to food chains: Print restaurant or delivery service logos on trays and charge more for customized orders.
- Offer contract manufacturing: Produce trays for other businesses or brands that want to avoid the cost of buying the machine themselves.

Price Range: \$ 5,600-\$9,000

Machine #140 Multi-Function Metal Sheets Automatic Shearing Machine
Iron Worker Combine Punching and Shearing Machine Ironworker Tools.

Business Idea For This Machine:

This is a heavy-duty industrial machine that combines multiple metalworking tasks—like cutting (shearing), punching holes, notching, and bending—into one system. It processes metal sheets, angles, bars, and pipes, making it ideal for steel fabrication, workshops, and construction-related manufacturing.

- Start a metal fabrication workshop: Offer custom cutting, hole punching, and shaping services for metal parts used in construction, gates, signage, and machinery.
- Work with construction firms: Cut and prepare steel beams, bars, and plates for building frames, roofing, and structural support.
- Produce ready-to-weld parts: Supply pre-cut and punched metal parts for welders and fabricators to save them prep time.
- Sell parts to artisans and engineers: Make brackets, plates, and custom metal parts for local machine builders and repair shops.
- Offer pay-per-use machine access: Let small businesses or local craftsmen use the machine for a fee to do their own metalworking

Price Range: \$ 1,480

Machine #141 YFDC-192FP Hatch Chicken CE ISO 19200 Pcs Egg Incubator in Poultry Farm Automatic Temperature

Business Idea For This Machine:

This is a large-scale automatic egg incubator designed for hatching up to 19,200 eggs at once. It maintains precise temperature and humidity settings and includes turning systems that rotate the eggs for uniform development. It meets CE and ISO standards, making it suitable for use in commercial poultry farms.

- Run a commercial hatchery business: Hatch chicks in large quantities and sell them to poultry farmers, breeders, and local markets.
- Offer hatchery services to local farms: Charge farmers a fee to incubate their eggs using your machine.
- Sell day-old chicks: Start a chick supply business by incubating and selling chicks to rural poultry keepers, retailers, or cooperative farms.
- Breed specialty poultry: Focus on high-value breeds like layers, broilers, or native chickens that fetch better prices.

- Train others in poultry hatching: Host training sessions on chick incubation and charge fees for participation or certification.
- Lease the incubator: Rent the machine to farms on a seasonal or per-hatch basis.
- Supply government or NGO projects: Offer chick hatching and poultry setup services for agricultural development programs.
- Export chicks to other regions: Build a customer base in neighboring countries or rural areas with less hatchery infrastructure.

Price Range: \$ 7,000

Machine #142 UV Resistant 3D Sign Printer Letter 10000pcs/month YDSig
Touching Screen Design Business Name logo 3d Sign Printer

Business Idea For This Machine:

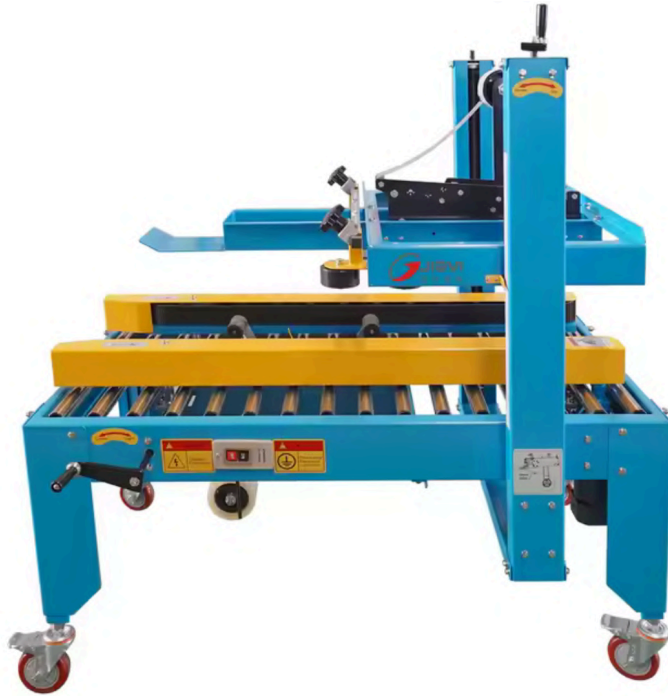

This is a UV 3D sign printer used to create raised, colorful, and durable business logos, letters, and name signs. It prints directly onto surfaces like acrylic, PVC, metal, and plastic using UV-curable ink, which dries instantly and is resistant to fading, even under sunlight.

- Start a 3D signage business: Offer custom logo and name sign printing services for shops, offices, restaurants, and events.
- Partner with branding agencies: Supply signs and 3D lettering for companies involved in corporate branding or store setup.
- Sell to real estate and construction companies: Print stylish signs for property names, house numbers, or project branding.
- Offer wedding and event signage: Create decorative name boards, table signs, or welcome displays for weddings, birthdays, and ceremonies.
- Sell personalized products online: Use the printer to make and sell custom desk names, door tags, or wall décor through online shops.
- Work with advertising companies: Print promotional signage and logos used in indoor and outdoor advertising displays.
- Train and outsource design services: Provide design support for clients or resellers who need ready-to-print 3D signs.
- Accept bulk B2B orders: Print nameplates and signage for institutions, schools, or government buildings in large quantities.

Price Range: \$ 1,229

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #143 Carton Box Sealing Machine

Business Idea For This Machine:

This is a packaging machine used to automatically seal the top and/or bottom of cardboard boxes with adhesive tape. It helps close and secure cartons quickly, neatly, and with less labor. It's ideal for factories, warehouses, and e-commerce packaging centers.

- Start a contract packaging service: Offer box sealing and packaging services for local manufacturers, exporters, or online sellers.
- Support small-scale product businesses: Partner with small companies that pack goods manually and offer faster sealing for large orders.
- Offer fulfillment center services: Combine sealing with order packing and shipping services for online stores and dropshippers.
- Lease the machine to SMEs: Rent it to growing businesses that can't afford a full packaging line but need efficiency.
- Use in your own product business: If you sell physical goods (like books, cosmetics, electronics), this machine speeds up packaging and saves labor costs.
- Work with agro or food processors: Help seal boxes of processed goods like grains, snacks, or packaged foods.

- Offer sealing as part of a printing and packaging service: Bundle sealing with printing of custom boxes and labels for businesses.

Price Range: \$ 965

Machine #144 Intelligent Control Eco Solvent Printer 3.2m Large Format Hd Wallpaper Printing Machine.

Business Idea For This Machine:

This is a large-format printer that uses eco-solvent ink to print high-resolution images on materials like wallpaper, vinyl, banners, and canvas. It has intelligent controls for color and print accuracy, and its 3.2-meter width allows it to handle big print jobs for indoor and outdoor use.

- Start a custom wallpaper printing business: Offer personalized wall designs for homes, offices, hotels, or schools.
- Print banners and signage: Serve event planners, stores, and political campaign teams needing high-quality promotional prints.
- Partner with interior decorators: Supply custom-printed wallpaper and canvas art to decorators and design studios.

- Sell on-demand printed wall art: Create and sell printed murals, motivational quotes, or kids' room designs through online platforms.
- Offer branding services for businesses: Print branded wall wraps, window graphics, and office wallpapers for corporate clients.
- Serve real estate developers: Provide model home wall designs or branding elements for housing projects and showrooms.
- Print exhibition and trade show materials: Offer backdrop banners, booth wall prints, and roll-up displays.
- Take bulk orders from schools or churches: Provide decorative or educational wall graphics for institutions.

Price Range: \$ 9,600

Machine #145 MOORE 2 PRO High-Speed 3D Printer for Pottery & Ceramic Clay
255*255*260 mm Automatic Folding Design

Business Idea For This Machine:

This is a compact, high-speed 3D printer designed to shape pottery and ceramic items using real clay. It uses a layer-by-layer extrusion method to

create vases, cups, sculptures, and other ceramic products. The folding design makes it portable and easy to store, ideal for studios, schools, or home use.

- Sell custom pottery products: Create and sell personalized mugs, vases, candle holders, or home decor on Etsy, social media, or local markets.
- Offer custom orders for gifts: Make name-engraved ceramic items for weddings, anniversaries, or corporate gifts.
- Collaborate with interior designers: Supply unique handmade-look pottery for home styling or office spaces.
- Open a workshop or pottery studio: Charge people to design and print their own pottery items in your space.
- Create product prototypes: Work with ceramic brands or designers who need sample pieces for testing or display.
- Teach pottery printing classes: Host sessions to train others on how to design and print ceramic objects using 3D clay printing.
- Work with art schools: Sell services or rent the printer to institutions teaching ceramics, sculpture, or industrial design.
- Print items for local businesses: Offer branded ceramic cups or promotional decorative items for cafes, hotels, or stores.

Machine #146 YETO-high Viscosity Semi Automatic Rotor Pump Filling Machine Dressing Oil Cosmetic Cream Filler Lobe Pump Filling Machine.

Business Idea For This Machine:

This is a semi-automatic filling machine designed to handle thick liquids like creams, oils, sauces, and gels. It uses a rotor (lobe) pump to push high-viscosity products smoothly into bottles or jars without dripping or clogging. It's ideal for small to medium-sized production setups in food, cosmetics, and chemical industries.

- Start a skincare or cosmetics brand: Use it to fill jars or bottles with lotions, creams, body butters, and sell your own line.
- Bottle and sell food products: Package dressings, sauces, honey, or cooking oils for local or online sales.
- Offer small-scale filling services: Help local businesses or startups fill their thick products without buying expensive equipment.
- Work with herbal product makers: Fill jars of herbal balms, ointments, or natural creams for wellness brands.
- Use it in a contract manufacturing setup: Offer white-label filling and packaging services for small brands.
- Serve pharmaceutical or chemical product makers: Fill tubes or bottles with gels, pastes, or high-viscosity liquids.

- Partner with local producers: Help soap makers, body care product makers, or farmers package their goods more professionally.

Price Range: \$ 1,750

Machine #147 LST Small Chocolate Gummy Making Machine Gummy Jelly Hard Candy Depositing Machine.

Business Idea For This Machine:

This is a compact machine designed to help users make small batches of chocolate or gummy candies. It's often used by small business owners, home-based candy makers, or startup confectionery brands. The machine can heat, mix, and shape gummy or chocolate mixtures into different molds, making it easier to produce uniform candies without using large factory equipment. It's user-friendly, doesn't take up much space, and is ideal for those who want to start small and grow their candy business over time.

- **Start a home candy brand:** Make your own chocolate or gummy products and sell them online through platforms like Etsy, Instagram, or a personal website.
- Sell custom gummies or chocolates: Offer customized candies for birthdays, weddings, or business events. Add company logos or names using molds.
- Supply to local stores: Partner with small local shops, cafes, or supermarkets to stock your unique gummy or chocolate creations.
- Run candy-making workshops: Teach others how to make gummies and chocolates using your machine. You can charge for these classes online or in person.
- Make health-focused gummies: Use natural ingredients to create sugar-free or vitamin-packed gummies for health-conscious customers.
- Create themed candy boxes: Make seasonal or themed gift boxes (e.g., Valentine's Day, or christmas) and sell them during holidays.

Machine #148 Auto Corrugated Box Manufacturing Machinery Trade Carton Cardboard Boxes Die Cut Production Line Making Machine with Printing.

Business Idea For This Machine:

This is a fully automatic machine used to produce corrugated cardboard boxes. It performs several tasks: shaping, cutting (die-cutting), and printing designs or logos directly onto the boxes. It is designed for medium to large-scale packaging businesses that need fast and consistent box production.

- Start a box manufacturing business: Supply custom corrugated boxes to online sellers, manufacturers, and wholesalers.
- Print branded packaging for companies: Offer boxes with custom logos, designs, and sizes for branding and marketing.
- Serve agro and food businesses: Produce packaging for farm products, processed foods, and export-grade items.
- Sell packaging to moving and storage companies: Provide sturdy boxes in bulk for packaging and relocation services.
- Target e-commerce and logistics companies: Supply custom shipping boxes for online stores and delivery businesses.
- Bundle with fulfillment services: Combine box production with packing and shipping for small businesses.

Machine #149 Trendy Nezha V 400 Lite Cutting-Edge SUV New Energy Vehicle

Business Idea For This Machine:

This is a compact electric SUV designed for urban and short-distance travel. It runs on a lithium battery and offers a driving range of around 400 km per full charge. The vehicle is equipped with basic smart features and is targeted at budget-conscious buyers.

- Use it for ride-hailing services: Sign up as a driver on platforms like Uber, Bolt, yango or in local taxi services and save on fuel costs.
- Offer city delivery services: Use the SUV for courier, grocery, or food delivery – ideal for businesses needing affordable transport.
- Rent it out: List it on peer-to-peer car rental platforms or lease it to professionals needing short-term use.

- Start a car-sharing service: Build a local sharing fleet for university students, tourists, or office workers.
- Use it in a local shuttle service: Offer fixed-route transport for schools, apartments, or businesses in areas with limited public transport.
- Offer electric vehicle tours in cities or tourist towns as a quiet, clean transport option.
- Offer last-mile logistics services: Deliver packages from main depots to final customers for e-commerce or logistics firms.
- Buy and resell it for profit.

Machine #150 Self Service Duplicate Key Vending Machine Automatic Key Duplicating Machine Locksmith Tools.

Business Idea For This Machine:

This is an automated vending machine that allows users to duplicate keys without a locksmith. It scans the original key, cuts a new one on the spot, and

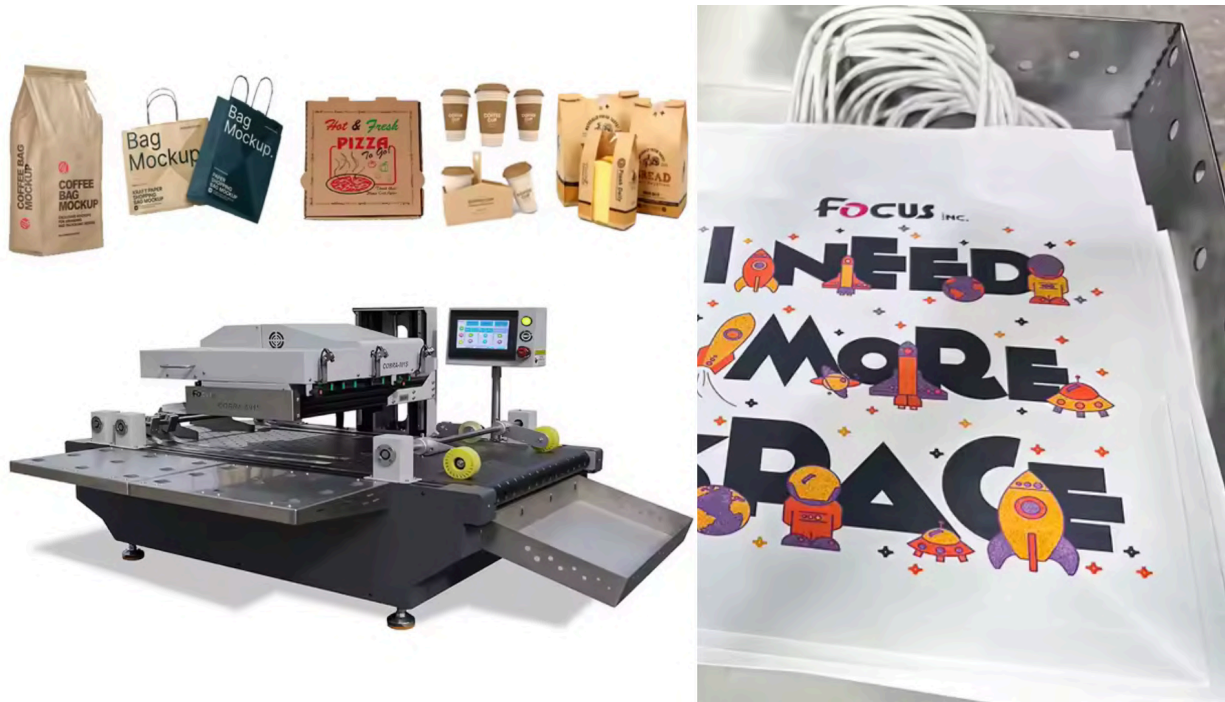

dispenses it within minutes. It's designed for unattended locations like malls, hardware stores, or apartment complexes.

- Install in high-traffic locations: Place the machine in malls, supermarkets, or residential complexes and earn from each duplication.
- Offer 24/7 key copying: Provide a convenient, round-the-clock solution for people needing spare or replacement keys.
- Partner with hardware or convenience stores: Place the machine in small shops that want to expand their service offerings without hiring staff.
- Operate multiple machines: Set up a network of machines in different locations and manage them remotely.
- Offer franchise or revenue share: Partner with property owners and split earnings in exchange for hosting the machine.
Provide branded key blanks: Sell custom key styles (logos, colors, messages) for higher profit margins.
- Serve short-term rental owners: Help Airbnb or guesthouse operators quickly duplicate keys for new guests or staff.

Price Range: \$ 9,500

Machine #151 Hot Selling Automatic Digital Carton Boxes Printer
Corrugated Cartoon Cup Machine Single Pass Printer.

Business Idea For This Machine:

This is a digital printing machine designed to print full-color designs directly onto corrugated cartons, paper cups, or cardboard materials in one quick pass. It works automatically and is ideal for producing custom printed packaging with logos, product details, or decorative designs.

- Start a custom box printing service: Offer branded boxes for small businesses, online sellers, or product manufacturers.
- Print takeaway cup designs: Work with cafés or food vendors to print personalized logos or promotions on their cups.
- Serve packaging companies: Provide contract printing services for companies that don't have in-house digital printers.
- Create packaging for events: Offer customized boxes or cups for weddings, birthdays, festivals, or corporate events.
- Sell to local food vendors: Print bulk orders of custom food containers or drink cups for street food sellers or caterers.
- Offer low-volume printing: Serve clients who need smaller print batches (like startups) that large printers often reject.
- Use it in e-commerce fulfillment: Add value to packaging services by branding every box sent out with unique prints.

- Print marketing material: Use the machine to print QR codes, offers, or social media handles directly on packaging.

Price Range: \$ 9,850

Machine #152 Paint Making Machines,chemical Machinery & Equipment

Business Idea For This Machine:

These are industrial machines used to mix, grind, and blend raw materials into paint. The setup typically includes a mixing tank, disperser, mill, and sometimes a filling unit. They handle different types of paint—emulsion, oil-based, or latex—and can also be used for coatings, inks, and related chemical products.

- Start a paint production business: Produce your own line of wall paints, automotive coatings, or wood finishes for sale in local hardware stores.
- Supply to real estate developers: Offer bulk orders of paint for housing projects, renovations, and construction companies.
- Make paints for schools or government projects: Partner with public institutions to supply large volumes of affordable paint.

- Produce industrial coatings: Create protective coatings for machinery, furniture, or floor surfaces and sell to factories or workshops.
- Offer private label services: Manufacture paint under different brand names for wholesalers or retail chains.
- Tap into the growing market for low-VOC, non-toxic, or plant-based paints.
- Use it to create specialty paints: Produce glow-in-the-dark, waterproof, heat-resistant, or textured paints for niche markets.

Price Range: \$ 4,800-\$12,000 & \$22,500

Machine #153 SUZHOU YUDA 220 Litre Plastic Drum Blow Molding Machine

Business Idea For This Machine:

This is a large-capacity blow molding machine used to manufacture 220-liter plastic drums and barrels. It works by heating plastic material and blowing it

into a mold to form strong, durable containers used for storing liquids, chemicals, or food products.

- Produce plastic drums for resale: Supply to industries that need drums for transporting or storing liquids—like oil, chemicals, and food companies.
- Serve agrochemical businesses: Make containers for fertilizers, pesticides, or irrigation storage.
- Target water and sanitation companies: Offer large water storage drums to homes, farms, or disaster relief projects.
- Sell to packaging suppliers: Partner with wholesalers and distributors of industrial containers.
- Make drums for export: Meet the demand for large-capacity containers in countries with growing manufacturing and logistics needs.
- Offer custom branding: Provide companies with the option to have their logo or label molded into each drum

Price Range: \$ 30,000

Machine #154 3d Scanner with High Quality for Human Face Details Scan
Body Scan Connect with Robot Milling.

Business Idea For This Machine:

This is a high-resolution 3D scanning device used to capture detailed shapes and textures of the human face and body. It creates accurate digital models that can be used in robotics, medical design, animation, fashion, or manufacturing. It can also be linked to robotic arms for automated sculpting or milling.

- Create 3D portraits: Scan people's faces and turn the data into 3D printed statues, busts, or souvenirs.
- Use with robotic milling for sculpting: Create life-like statues or custom mannequins for artists, museums, or retail brands.
- Sell digital avatars or NFTs: Create 3D avatars from scans and sell them for use in virtual worlds or digital collectibles.

Price Range: \$ 4,500

Machine #156 Plastic Chair Making Machine Injection Moulding.

Business Idea For This Machine:

This is a large injection moulding machine designed to produce plastic chairs. It melts plastic granules and injects the liquid plastic into a mould, where it cools and takes the shape of a chair. It can produce various types of plastic chairs including standard, armless, or designer styles.

- Start a plastic chair factory: Produce and sell chairs to wholesalers, schools, event organizers, and retailers.
Supply to event rental companies: Provide bulk orders to those who rent out chairs for weddings, funerals, or conferences.
- Sell to furniture markets: Build partnerships with local furniture stores or open your own retail outlet.
- Make branded chairs for companies: Offer customized chairs with logos for businesses, schools, or political campaigns.
- Export to other countries: Target nearby countries where plastic furniture is in high demand.
- Produce for educational and government institutions: Fulfill bulk contracts for chairs in public schools, churches, or hospitals.
- Sell to hospitality businesses: Supply plastic chairs to hotels, restaurants, and beach resorts.

- Offer chair moulding as a service: Let other businesses use your machine and pay you for chair production by the hour or quantity.

Machine #157 Solar Energy Professional Factory Supply Cold Room Storage Commercial Mobile Walk in Freezer

Business Idea For This Machine:

This is a mobile cold storage room powered by solar energy. It's used to store perishable goods like fruits, vegetables, meat, and fish at low temperatures, especially in areas with unreliable electricity. It's built as a walk-in unit and can be placed on-site in farms, markets, or food processing locations.

- Rent cold storage to farmers: Provide a pay-per-use service for farmers who need to preserve produce after harvest.
- Store fish or meat for sellers: Offer storage space to butchers, fishermen, or meat vendors at markets.

- Use for fruit and vegetable preservation: Extend the shelf life of produce and sell it at better prices later.
- Partner with restaurants and hotels: Rent space to businesses that need backup cold storage.
- Supply for mobile vaccination or medical storage: Lease to health groups needing solar-powered units in remote areas.
- Offer cold storage as a subscription: Set up fixed monthly plans for vendors and traders.
- Move it to different markets: Use the mobile feature to operate in different towns during market days.

Price Range: \$4,000

Machine #158 Large Production Machine Used Copier Multifunction Digital Printer Photocopier for Ricoh PRO C7100 C7200 C9200 C9210

Business Idea For This Machine:

This is a high-capacity digital printing and photocopying machine designed for large-scale production. It prints in high quality and handles tasks like color

printing, copying, scanning, and booklet-making. These Ricoh PRO series machines are commonly used in commercial print shops, corporate print rooms, and publishing businesses.

- Start a digital printing business: Offer printing services for flyers, brochures, catalogs, business cards, and posters.
- Print training manuals and books: Partner with schools, churches, and companies that need frequent document production.
- Offer bulk copy and scanning services: Serve offices, legal firms, and educational institutions.
- Run a photo printing service: Use the color capabilities to print photo albums or framed photo work.
- Print custom branded materials: Produce branded letterheads, invoices, envelopes, and ID cards for businesses.
- Offer wedding and event printing: Print programs, invitation cards, banners, and thank-you notes.
- Lease the machine: Rent to smaller print shops or organizations during high-demand seasons.
- Open a document center near a school or government office: Serve daily walk-in clients who need photocopies, prints, or scans.
- Provide customized packaging inserts: Print marketing flyers or tags for local product sellers and e-commerce businesses.

Price Range: \$45,700

Machine #159 Fully-automatic Steam Universal Presser Laundry Equipment

Business Idea For This Machine:

This is a commercial-grade steam-powered pressing machine used in laundries and dry cleaning businesses. It automatically presses clothes like shirts, uniforms, trousers, and jackets to remove wrinkles and give a smooth, professional finish. It works faster and more evenly than manual irons

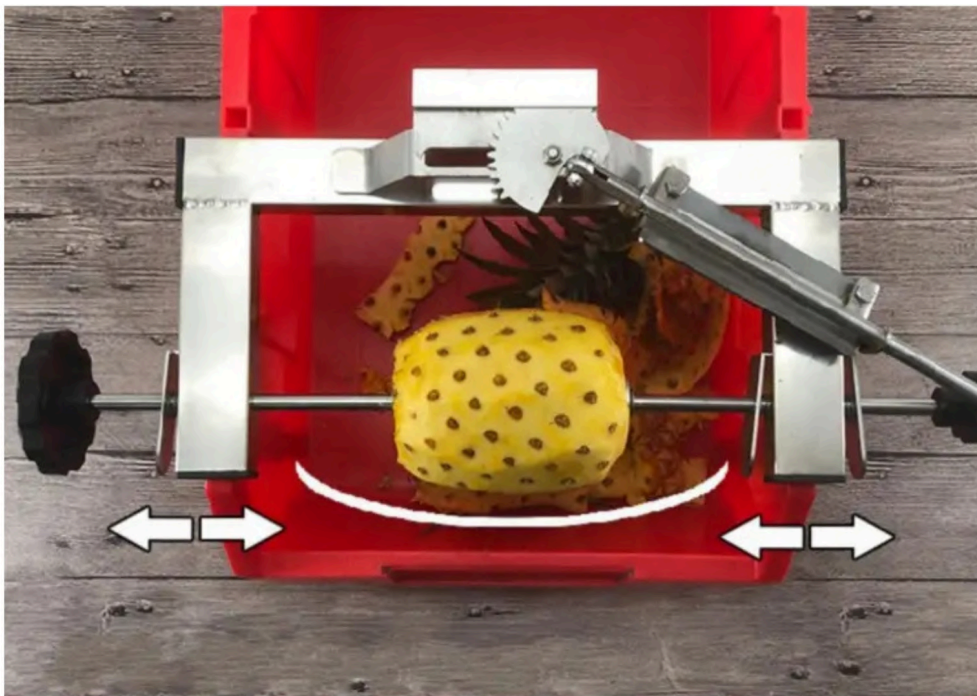

- Start a laundry or dry-cleaning service: Offer pressing and cleaning services to individuals and businesses.
- Serve hotels and guesthouses: Provide professional garment pressing for staff uniforms and guest clothing.
- Handle bulk laundry for hospitals or schools: Partner with institutions that require frequent, clean, and well-pressed garments.
- Mobile laundry services: Set up a pickup and delivery laundry business with the presser as your key equipment.
- Rent to smaller laundromats: Offer machine-use on a time basis to new or small laundry operators.
- Contract pressing service for tailoring shops: Provide finishing for local tailors and fashion designers.

- Work with event planning firms: Press large quantities of tablecloths, napkins, or chair covers used for events.
- Offer home laundry subscription: Give monthly clothing care packages that include pressing.

Price Range: \$2,650

Machine #160 Pineapple/ Mango Peeling Machine Factory Supply Other Fruit Vegetable Machines Ananas Peeling Machine

Business Idea For This Machine:

This is a factory-grade machine used to peel pineapples, mangoes, and similar fruits quickly and cleanly. It removes the tough skin with minimal fruit loss and is ideal for fruit processors, juice manufacturers, and large kitchens. Some models can handle other round or oval fruits as well.

- Start a fresh-cut fruit business: Peel and sell ready-to-eat pineapple and mango slices in supermarkets or local markets.

- Supply peeled fruits to juice bars or smoothie shops: Offer bulk pre-peeled fruits to speed up their operations.
- Work with fruit salad or snack makers: Provide peeled and cubed fruits for ready-made fruit mixes.
- Sell to hotels, restaurants, and caterers: Deliver cleaned and peeled fruits daily to reduce their prep time.
- Open a roadside fruit vending stall: Sell freshly peeled pineapple and mango in hygienic packs.
- Provide services to food processing factories: Offer contract peeling services for small fruit-based product companies.
- Use in jam or dried fruit production: Combine with other machines to make fruit jam, juice, or dried fruit.

Machine #162 Automatic Sugar/salt/beans/granule/seed/chemical Fertilizer Granules Filling Packing Machine

Business Idea For This Machine:

This is a fully automatic packing machine designed to fill and seal granular products like sugar, salt, seeds, beans, and fertilizer into bags or pouches. It accurately measures the product, fills it into packaging, and seals the bags with minimal human effort.

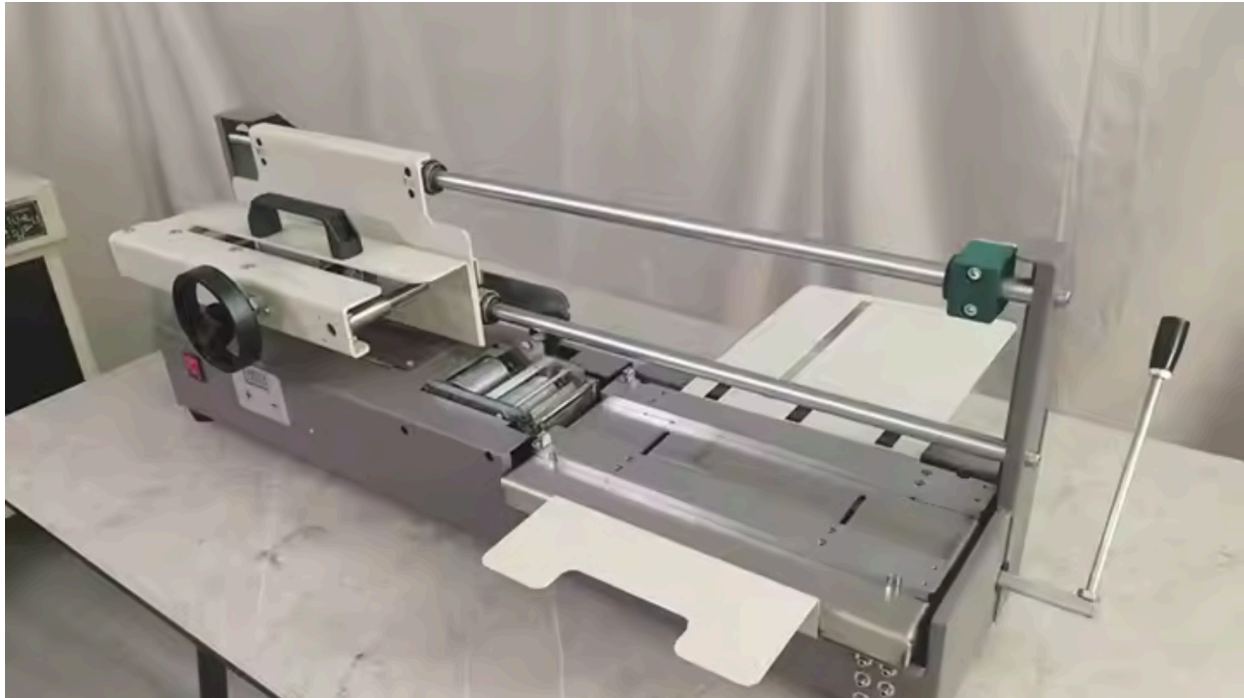

- Start a small packaging business: Buy bulk grains or salt and repackage them into smaller retail bags for sale.
- Offer packaging services to local farmers: Help them pack harvested beans, seeds, or grains for market.
- Package fertilizer for agro dealers: Buy in bulk and fill smaller, market-ready sizes (e.g., 1kg, 5kg).
- Create your own brand: Sell your own line of packaged food items like sugar, beans, or rice.
- Serve chemical product companies: Offer to pack powdered or granular chemicals under contract.
- Support online stores: Pack and label products for small-scale sellers who sell food or gardening supplies.

- Sell pre-packed ration kits: Create ready-to-sell packs of common cooking items for homes or charities.
- Lease the machine: Rent it out to people running short-term or seasonal packaging businesses.
- Use it for export packaging: Meet packaging standards required for exporting seeds or food items.

Price Range: \$6,000

Machine #180 Caterpillar D9R Crawler Bulldozer.

Business Idea For This Machine:

This is a heavy-duty crawler bulldozer used in construction, mining, roadwork, and large-scale land development. It has a powerful engine, wide tracks for stability, and a large front blade for pushing soil, rocks, debris, or other materials. It's built for tough terrain and heavy workloads over long hours.

- Offer land clearing for large farms, real estate developers, or government projects like roads and dams.
- Lease the bulldozer to construction or mining companies on a contract or daily basis. They often prefer renting instead of buying.
- Push and move heavy loads of gravel, rocks, and earth in mining sites. You can charge per cubic meter or per hour.
- Work with contractors on grading and leveling for roads, especially in rural or developing areas.
- Help big farms with terrain reshaping, irrigation canal clearing, or access road development.
- your bulldozer on platforms that connect equipment owners to companies needing short-term use.

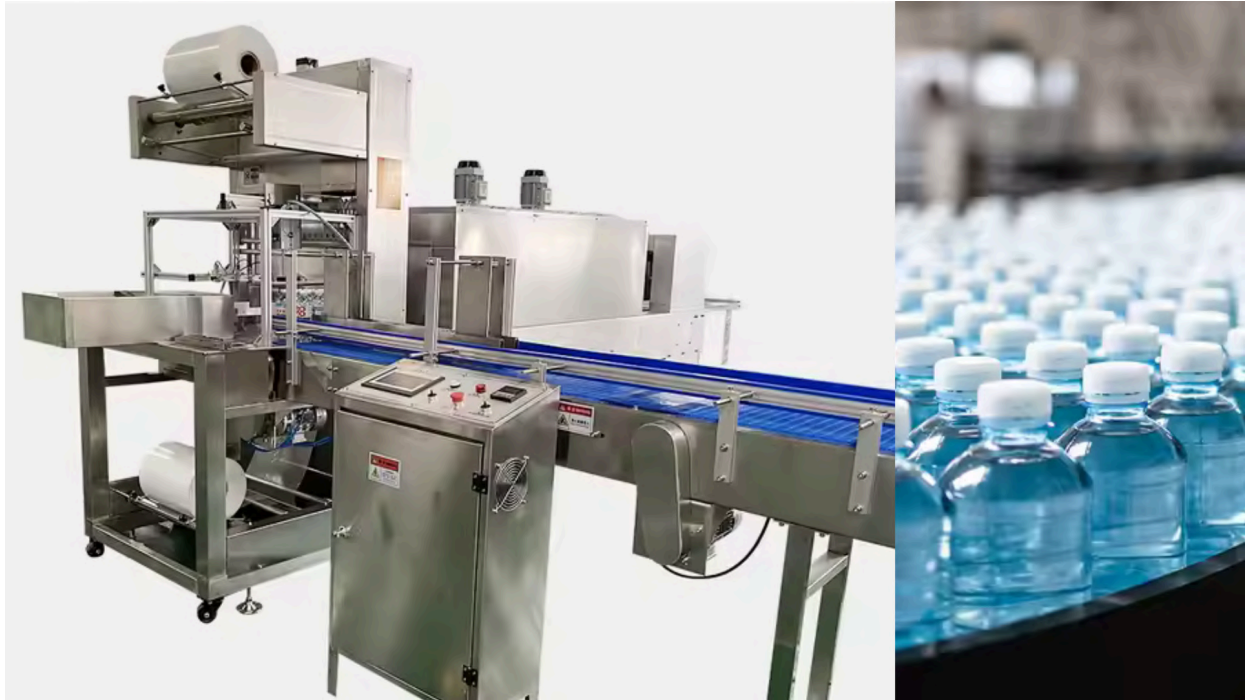

Price Range: \$9000- \$62,000

Machine #181 Factory Turnkey Project Pure Mineral Water Bottle Filling Machine.

Business Idea For This Machine:

This is a complete automatic system used for washing, filling, and capping bottled mineral or pure water. It is commonly used in water bottling plants and is designed to handle large volumes efficiently, producing ready-to-sell bottled water in different sizes (like 500ml, 1L, etc.).

- Start a Bottled Water Business. Set up your own water bottling brand and sell in supermarkets, schools, offices, restaurants, and at events.
- Supply Bottled Water to Distributors. Partner with small retailers, kiosks, and wholesalers who want to stock water but don't have their own brands.
- Offer Custom Bottling Services. Help other businesses (e.g. hotels, churches, corporate events) bottle water with their own label for marketing or resale.
- Provide daily or weekly delivery of branded bottled water to weddings, funerals, sports events, or office spaces.
- Sell Bulk Water to Other Brands. Some small water brands may want to outsource their production. Fill and label for them at a cost.

- Get a distribution truck to supply your bottled water to various communities.

Range: \$13,000

Machine #182 Automatic Food Bread Wrapping and Multi-function Flow Packaging Machines Small Bags

Business Idea For This Machine:

This is an automatic machine designed for wrapping and sealing individual pieces of food like bread, cakes, snacks, or other small items into plastic or foil packaging. It uses flow-pack technology, meaning the item is wrapped in a continuous roll of film, sealed on all sides, and cut into individual packs

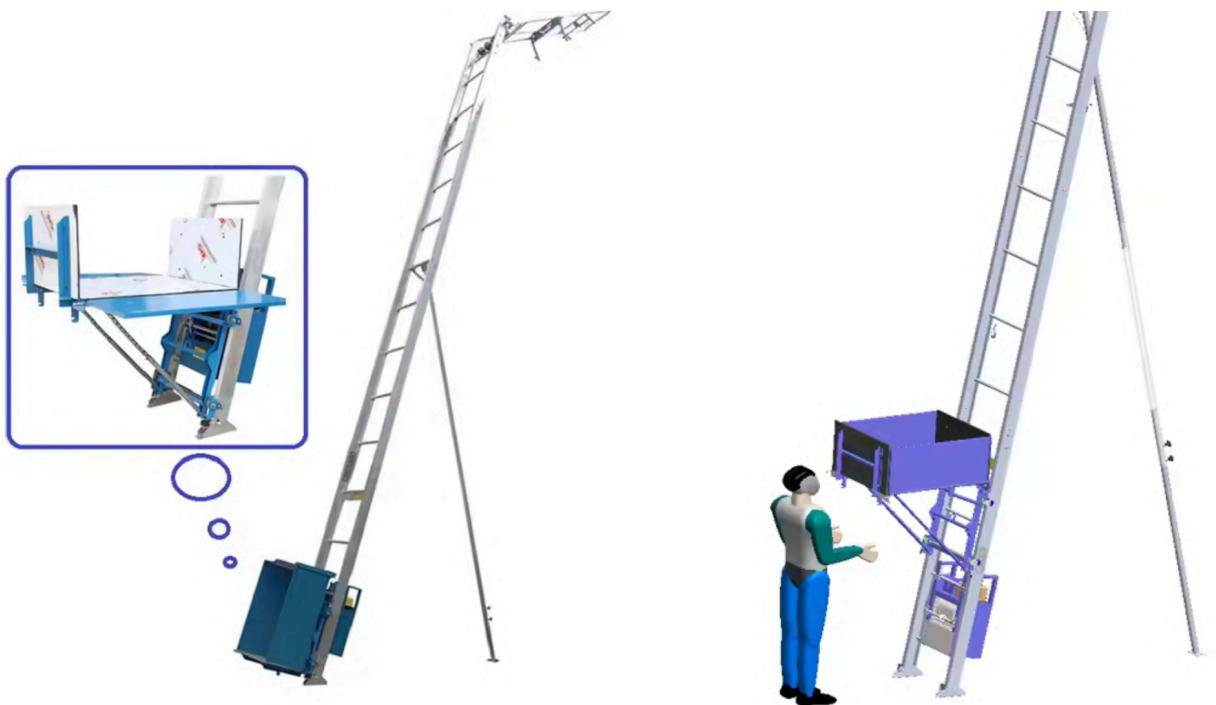

- Offer Packaging Services to Local Bakers. Partner with bakeries that make bread or snacks but lack packaging equipment. Wrap their products for a fee per item or batch.

- Start Your Own Snack or Bread Brand. Produce and package your own baked goods or snacks at home or in a small facility, then sell them to local shops or online.
- Sell Pre-packaged Bread to Schools and Offices. Target bulk orders from institutions looking for clean, individually packaged snacks or breakfast options.
- Supply to Local Stores and Kiosks. Package for small businesses that make items like doughnuts, chin-chin, meat pies, or cookies but need neat, sealed packaging.
- Offer packaging services for festive seasons (like Christmas, Eid, weddings) where custom food gift packs are in high demand.

Price Range: \$5,000

Machine #183 Portable 19m Alum Ladder Hoist Lifting Solar Panel Electric Ladder Lift for Roof

Business Idea For This Machine:

This is a portable aluminum electric ladder lift that can reach up to 19 meters high. It is designed to carry items such as solar panels, roofing sheets, and

tools from the ground to rooftops or upper floors. It works with an electric motor and is often used in construction, solar installation, or roofing projects.

- Many installers need a safe way to lift heavy panels to rooftops. Offer short-term rentals (daily or weekly) at competitive rates.
- Roofers often lift tiles, zinc sheets, or tools. Your ladder lift saves them time and reduces labor stress, making it valuable on construction sites.
- Offer your lift to builders or individuals moving heavy items like air conditioning units, window frames, or furniture to upper floors.

Price Range: \$2,250

Machine #184 High Performance Cassava Planter 2 Rows / Tapioca Planter / Cassava Farm Planting Machinery

Business Idea For This Machine:

This is a high-performance 2-row cassava planting machine designed for efficient planting of cassava or tapioca on large farms. It automates the

process of placing cassava cuttings in the soil at uniform depth and spacing, reducing manual labor and increasing planting speed.

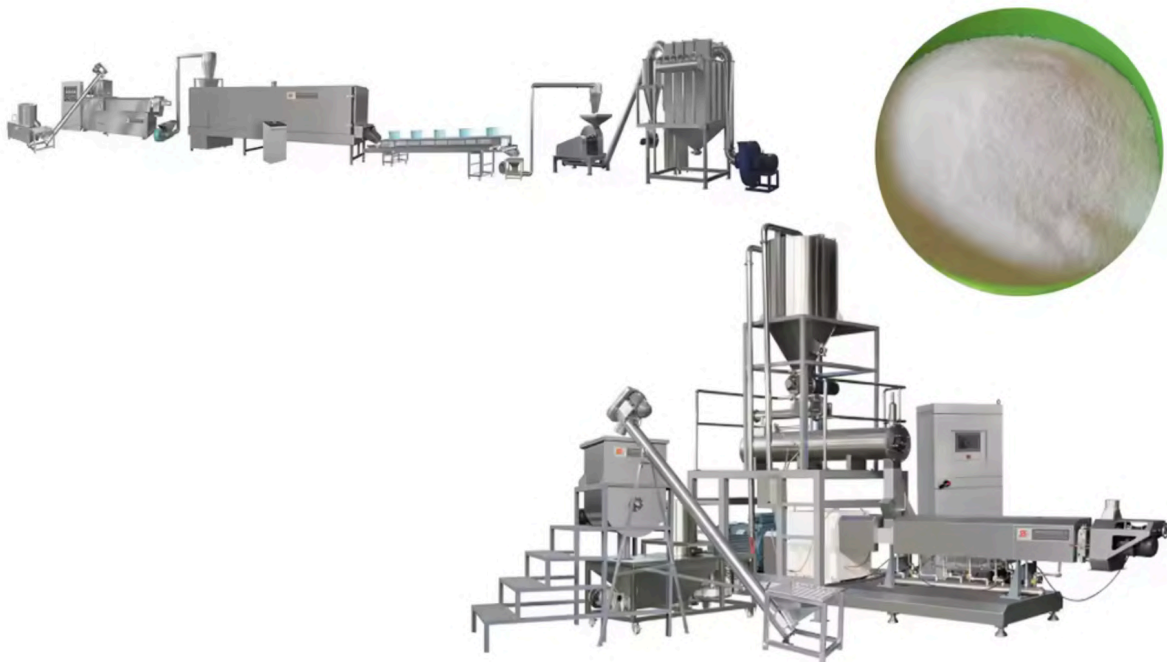

- Start a Cassava Planting Service for Farmers. Offer your machine as a planting service to local farmers who don't have access to machinery. Charge per acre or hectare planted.
- Rent It Out During Planting Season. Let other farmers or cooperatives rent the machine during the cassava planting period. Offer operator support for extra income.
- Work with large farms or government-backed agricultural schemes that promote food security and need mechanized planting solutions

Price Range: \$6,900

Machine #185 Big Capacity Heat Stable Adhesive Cassava Modified Starch Production Line Making Machine.

Business Idea For This Machine:

This is a large-capacity machine used to produce modified cassava starch, particularly heat-stable adhesive types. The process involves cooking, reacting, and drying cassava starch to improve its properties, making it suitable for use in paper, textiles, adhesives, food, and packaging industries.

- Produce and sell to industries that need heat-stable adhesives, especially in packaging, cardboard, and paper manufacturing.
- Sell to Textile and Paper Factories. These sectors use modified starch for coating, sizing, and binding. Approach local factories and offer bulk supply contracts.
- Supply to Food Processors. Some food companies use modified starch in noodles, sauces, and snacks as a thickener or texture improver.
- Export to Countries with High Demand. Partner with exporters to sell the processed starch to markets in Asia, Africa, and Europe where demand for adhesive-grade starch is rising.
- Offer Private Label Packaging. Process and pack the starch under different brand names for clients who want to resell it.
- Supply to Construction or Adhesive Companies. Modified starch is often used in making eco-friendly adhesives and glues—market your product to these businesses.

Price Range: \$8,500- \$30,000

Machine #186 Electrical Concrete Mixer with Pump Cement Machine

Business Idea For This Machine:

This is a concrete mixer combined with a pump, powered by electricity. It mixes cement, sand, gravel, and water to create concrete and pumps it directly to the construction area. It reduces manual labor and speeds up small to medium construction projects.

- Offer Concrete Mixing and Pumping Services. Provide ready-mixed concrete and pumping service for building sites, especially in urban areas where space is limited.
- Rent It to Builders and Contractors. Charge daily or weekly rental fees to local construction companies or individuals building homes, schools, and shops.
- Work With Block Molders and Precast Yards. Supply concrete to those making concrete blocks or precast products like slabs, poles, and beams.

Price Range: \$3,200

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #187 Baguette Maker French Bread Making Machine

Business Idea For This Machine:

This machine is designed to make baguettes, the long, crusty French-style bread. It automates parts of the process like dough shaping, rolling, and sometimes baking. Some models just shape the dough into baguette form, while others include proofing (rising) and baking functions. It's commonly used in bakeries, restaurants, and bread factories to save time and make consistent loaves.

- Start a baguette delivery business and sell fresh baguettes daily to local cafes, hotels, and grocery shops.
- Open a mini bakery at home or in a small shop. Focus on baguettes and sell them alongside butter, jam, or sandwich fillings.
- Supply to restaurants or sandwich shops. Many places want fresh baguettes for sandwiches but don't want to bake them themselves.
- Sell at farmers' markets or roadside stands. People love fresh bread—you can bake in the morning and sell during the day.
- Offer frozen ready-to-bake baguettes. Shape and partially bake the bread, freeze it, and sell to stores or busy families.

- Create a small food business on delivery apps Sell filled baguette sandwiches via Uber Eats, Glovo, Bolt Food, etc.

Machine #188 High-clearance Self-propelled Agricultural Pesticide Tractor Mounted Boom Sprayer

Business Idea For This Machine:

This is a special type of farming machine used to spray pesticides, herbicides, or liquid fertilizers on crops. It's self-propelled, meaning it moves on its own like a tractor, and has high clearance, so it can pass over tall crops like maize or vegetables without damaging them. The boom is a long arm with spray nozzles that spreads the liquid evenly over a wide area. It's used mostly on large farms to cover many acres quickly.

- Use it on your own farm to boost yield and save costs. Instead of hiring someone else, do your own spraying and save money every season.
- Rent the machine to other farm owners. Let other farmers use your machine during spraying seasons and charge daily or weekly rates.
- Start a crop spraying service for farmers. Offer to spray pesticides, herbicides, or fertilizer for local farms and charge per acre.

Price Range: \$3,600-\$11,780

Machine #189 China Weld 6 Axis Arm Robot Laser Weld Machine/ Plasma Cut Industrial Robot Machine for Metal Laser Welder.

Business Idea For This Machine:

This is a robotic machine used for laser welding or plasma cutting of metal parts. It has a 6-axis robotic arm, meaning it can move in multiple directions with great flexibility to reach different angles and positions. It's often used in metalworking, manufacturing, or repair workshops to join or cut metal sheets,

frames, and components. This type of machine offers automated and accurate welding or cutting, which saves labor and improves quality

- Offer laser welding or cutting services. Work with metal fabricators, car repair shops, or construction companies who need clean, strong welds or precise metal cutting.
- Partner with local manufacturers. Get contract jobs from companies that build gates, metal furniture, auto parts, or tools.
- Start a small metal fabrication workshop
Use the robot to create custom metal products like frames, doors, brackets, or grills and sell them.
- Repair broken metal tools, farm parts, or machinery. Many farmers and workshops need welding services—offer mobile repair or accept items in your shop.
- Create and sell art or decor pieces from metal. Use scrap metal and the machine to produce decorative items, signage, or light fixtures.
- Rent the robot to other workshops. Some workshops may need the robot occasionally—charge hourly or per project for them to use it.

Price Range: \$5,500

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #190 Full Automatic Baby Wet Wipes Making Machine

Business Idea For This Machine:

This machine is used to fully automate the production of baby wet wipes. It handles the whole process: folding, wetting with lotion or water, cutting, stacking, and packaging. Some advanced models can also seal the packs. It's fast, efficient, and ideal for small factories or entrepreneurs who want to start their own wet wipes brand or supply businesses that sell baby products.

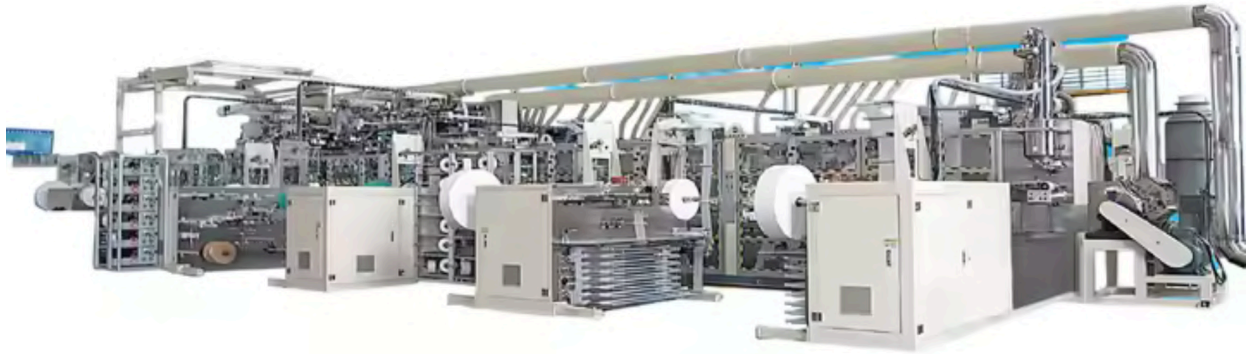

- Start your own baby wet wipes brand. Produce and package wipes with your brand name and sell them in shops, supermarkets, and online.
- Produce and supply wholesale to baby stores, pharmacies, or hospitals. Sell unbranded (or private label) wet wipes in bulk to retailers or clinics.
- Make and supply other types of wipes too. Use the same machine to make facial wipes, hand wipes, or disinfectant wipes for adults or cleaning.

Price Range: \$45,000 - \$165,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source2: [Click Here For Details Of This Machine.](#)

Machine #191 Baby Diaper Manufacturing Machine With Laminating Process Baby Pull up Diaper Product Making Machinery.

Business Idea For This Machine:

This machine is used to produce baby diapers or pull-up diapers on a large scale. It does everything: forms the diaper layers, adds absorbent materials, laminates (seals the diaper layers), and shapes/cuts the final product. Some versions can even do elastic waistbands for pull-ups. It's ideal for businesses that want to start a diaper brand or supply diapers in bulk.

- Start your own diaper brand. Make and sell diapers with your brand to supermarkets, baby shops, pharmacies, and online.
- Supply unbranded diapers to wholesalers. Sell in large quantities to local distributors or hospitals who want affordable bulk options.
- Do contract manufacturing for others. Make diapers for small brands that don't own machines and want to outsource production.
- Sell value packs to mothers online or through Facebook/WhatsApp. Create low-cost bundles (e.g., 100 diapers) and deliver locally.
- Partner with NGOs or government clinics. Supply diapers for health campaigns, mother-and-baby programs, or free distributions.

- Offer private label packaging services. Print and package diapers with another business's brand logo for a fee.

Machine #192 Fruit Raw Cashew Nuts Kernel Separator Machine

Business Idea For This Machine:

This machine is used to separate the raw cashew apple (the fruit) from the nut (seed) that's attached beneath. When cashews are harvested, the nut is stuck to the bottom of the fleshy fruit. This machine quickly separates the two, making it easier and faster to collect the raw nuts for drying and later processing. It reduces labor and helps farmers or processors handle large volumes during harvest season.

- Offer cashew fruit-nut separation as a paid service. Visit farms during harvest season and charge per bag or kg to separate the fruit from the nut.

- Sell the cashew apples to juice or jam producers. Once separated, the fresh fruit can be sold to companies that make cashew apple juice or alcoholic drinks.
- Use the fruit to make your own juice or jam brand. Cashew apples are rich in vitamin C and can be turned into tasty, healthy products.
- Rent the machine to cashew farmers during harvest time. Farmers can't afford a full machine—rent it out daily or weekly for income.

Price Range: \$ 890

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source2: [Click Here For Details Of This Machine.](#)

Machine #193 Portable

Business Idea For This Machine:

This machine is used in leather belt production to create embossed patterns or textures on the surface of leather belts. It works using pneumatic pressure and a scroll wheel that presses designs onto the belt. The patterns can be simple lines, logos, or decorative styles, giving the belt a finished and stylish look. It's ideal for small leather workshops, fashion brands, or custom belt makers who want to add unique designs to their products

- Start a custom leather belt business. Create and sell high-quality embossed belts under your own brand, both online and offline.
- Create stylish designs and sell them on platforms like TikTok , Facebook, Instagram, or a small website.
- Make “name belts” or “anniversary belts” with special dates or initials and sell at a premium.
- Sell belts at local markets or online platforms. Create stylish designs and sell them on platforms like TikTok, Instagram, Facebook On your website or Open a showroom to display your belts.

Price Range: \$ 1,250-\$5,000

Machine Source2: [Click Here For Details Of This Machine.](#)

Machine #194 Fried Cassava Crisp and Sweet Potato Chips Making Machine/ Production Line

Business Idea For This Machine:

This is a complete machine setup used to make crispy fried snacks from cassava and sweet potatoes. The line usually includes steps like washing, peeling, slicing, frying, oil draining, seasoning, and packaging. It can handle a large quantity of root crops and is ideal for making ready-to-eat chips. It's used by food processors or anyone looking to start a small to medium-sized snack production business.

- Start your own chips brand. Produce cassava and sweet potato chips, pack them in branded sachets, and sell to supermarkets, schools, and shops.
- Supply unbranded chips in bulk to retailers. Sell large batches of fried chips to vendors who will package and sell under their own name.
- Sell directly at local markets and roadside stands. Package in small sizes and sell in high-traffic areas, schools, or transport stations.
- Sell to bars, restaurants, and hotels. Offer your chips as a side snack or appetizer to food businesses in your area.
- Create flavored varieties and sell at a higher price. Add spicy, garlic, cheese, or barbecue seasoning for premium packs.
- Export to neighboring countries. If packaged well, your chips can be sold across borders where African snacks are in demand.

Price Range: \$ 8,000 - \$15,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine Source2: [Click Here For Details Of This Machine.](#)

Machine #195 Make Fuel Oil From Plastic Waste Tyre Small Pyrolysis Machine Rubber to Oil Pyrolysis Plant

Business Idea For This Machine:

A Rubber to Oil Pyrolysis Plant is a machine that converts waste rubber (like old tires, rubber shoes, or rubber scraps) into useful oil, gas, carbon black, and steel wire through a heating process called pyrolysis. This process happens in the absence of oxygen, so the rubber doesn't burn—it breaks down into fuel-like products. It's used in recycling plants and is ideal for turning waste into profit while helping reduce environmental pollution.

- Produce and sell the pyrolysis oil as industrial fuel. The oil can be sold to factories, brick kilns, or generators as an alternative to diesel.
- Sell carbon black to plastic or rubber industries. It's used to make plastic products, rubber items, inks, and paints.
- Sell recovered steel wire to scrap dealers. If you're using tires, you can extract and sell the metal parts as scrap.
- Offer tire and rubber waste disposal services. Charge companies or municipalities to process their rubber waste instead of dumping it.
- Use the oil for your own machinery or power generators. Save fuel costs by using the oil in your own operations.
- Sell gas by-products as cooking or industrial gas. The non-condensable gas can be reused as fuel or stored for future use.

- Start a small energy company. Use the plant to produce oil and sell it regularly to fuel dealers or local industries.

Price Range: \$45,000

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #196 1-120t/h Modern Plant Palm Fruit Bunch Thresher Machine

Business Idea For This Machine:

This machine is used in palm oil production to separate palm fruits from fresh fruit bunches (FFBs). After harvesting, the oil palm bunches still hold tightly to the fruits. The thresher spins or shakes the bunches to detach the fruits, which are then processed to extract palm oil. This machine speeds up the job, reduces labor, and is essential for palm oil mills or cooperatives that process large volumes.

- Start a palm fruit processing business. Collect palm fruit bunches from farmers, use the thresher to separate fruits, and sell them to palm oil mills.
- Charge farmers for threshing services. Offer to thresh fresh fruit bunches for a fee (per kg or per bunch) during harvest season.

- Partner with palm oil producers. Provide a clean and ready supply of loose fruits, increasing your value in the supply chain.
- Process and sell palm oil directly. Add an oil press machine to your setup, extract the oil from the fruits, and sell the finished product.
- Rent the thresher to small processors. Let others use your machine on a pay-per-use or daily rental basis.
- Work with cooperatives or village groups. Process large batches together and share profits or earn from service fees.
- Sell the empty bunches as biomass fuel or compost. The leftover bunches can be used in farming or sold to biomass plants. They can also be used for the production of black soaps

Price Range: \$2,860

Machine Source1: [Click Here For Details Of This Machine.](#)

Machine #197 Portable

Business Idea For This Machine:

This machine setup is designed for making large quantities of popcorn, especially caramel-coated popcorn. It uses hot air (not oil) to pop the corn, which makes the product healthier and cleaner. After popping, the popcorn is

coated with caramel (or other flavors), cooled, and packed. It's used by snack factories or entrepreneurs who want to start a popcorn business with unique flavors.

- Start your own branded popcorn snack line. Produce and package caramel popcorn with your own logo and sell in supermarkets, schools, and kiosks.
- Sell flavored popcorn at events or malls. Package fresh popcorn into cups or bags and sell directly at fairs, movie nights, or festivals.
- Supply popcorn to cinemas, hotels, and shops. Partner with businesses that need ready-made snacks for their customers.
- Sell popcorn in bulk to resellers. Distribute large bags of flavored popcorn to vendors who sell it in smaller quantities.
- Export packaged popcorn to other countries. Sell to international markets looking for affordable, ready-to-eat snacks.
- Make different flavors and upsell. Try cheese, chocolate, spicy, vanilla, or fruit flavors for higher-priced, premium packs.
- Offer private label production. Make and package popcorn for other small businesses or shops using their own brand name.

Machine #198 Professional Soundproof Office Room for Music Acoustic Studio, Private Meeting Space

Business Idea For This Machine:

This is a pre-built soundproof room or booth designed for quiet, focused work or recordings. It's made with special materials that block outside noise and control echo inside. These rooms are often used as music studios, podcast booths, private office spaces, or confidential meeting rooms. They come in different sizes and can be placed inside offices, homes, or commercial buildings.

- Rent it out as a private podcast or recording studio. Charge musicians, voice-over artists, and podcasters by the hour or day.
- Provide A WIFI connection inside and Offer it as a quiet space for remote workers or freelancers. Rent it to people who need a peaceful place for Zoom calls, interviews, or focused work.
- Use it for private client meetings or therapy sessions. If you're a coach, consultant, or therapist, it gives you a distraction-free space to serve clients.
- Open a shared creative workspace. Set up multiple booths and rent them out to content creators and entrepreneurs.
- Host virtual events or webinars from it. Use the quiet and professional environment to run high-quality live sessions or training.

- Let musicians rehearse or record demos. Offer low-cost access to those who can't afford a full recording studio.
- Offer branded voice-over or content recording services. Record audio for ads, YouTube intros, or social media content using the booth and charge clients.

Price Range: \$3,860

Machine #199 Industrial Coconut Water Processing Plant Fruit Juice Processing Machinery

Business Idea For This Machine:

This machine setup is designed to extract, filter, process, and bottle coconut water on a large scale. It usually includes dehusking units, drilling or cutting machines, filtration systems, pasteurizers, and bottling lines. The same line can sometimes handle other fruit juices like mango, pineapple, or orange. It's ideal for businesses looking to produce and sell packaged coconut water or mixed fruit juices.

- Start your own bottled coconut water brand. Package and sell fresh, pure coconut water to supermarkets, gyms, health stores, and online.
- Process and sell to large juice companies. Supply clean, ready-to-use coconut water to big brands for blending into their drinks.
- Sell flavored or infused coconut drinks. Add natural flavors (lime, mint, ginger) and sell it as a premium health drink.
- Export bottled coconut water. Target international health markets that are looking for natural and tropical beverages.
- Offer white-label juice production. Produce and bottle juices or coconut water for other brands under their label.
- Sell coconut by-products. Sell the coconut meat for snacks or the husk for fiber, charcoal, cocopeat or animal feed.

Machine #200 Self Tapping Drywall MDF Screw Making Machine

Business Idea For This Machine:

This machine is used to manufacture self-tapping screws commonly used in drywall, MDF boards, and light construction. It typically includes several units: wire drawing, cold heading (forming the screw head), thread rolling (cutting the threads), and heat treatment. Some setups also include surface coating (like black phosphate or zinc). It's ideal for small-scale hardware manufacturers and those looking to enter the fastener industry.

- Start a screw production business. Make and sell self-tapping screws to hardware stores, carpenters, and construction suppliers.
- Supply in bulk to furniture factories and woodworkers. These industries use thousands of screws per day—become their regular supplier.
- Export screws to countries with high construction or furniture demand. Package and sell in cartons to buyers in developing markets.
- Offer custom screw sizes or branding. Make screws with custom dimensions or private labeling for other hardware companies.
- Sell online through hardware e-commerce platforms. List your screws on sites like Alibaba, Amazon, or your own store for global reach.
- Partner with local builders and contractors and wood workers. Supply them directly at discounted prices and earn steady income.
- Sell to packaging and installation companies. Many assembly and installation services need a constant supply of screws.

Price Range: \$6,500

Machine #201 Automatic Standing up Pouch Zipper Bag Beef Jerky Mini Doypack Packaging Machine.

Business Idea For This Machine:

This machine is designed to fill and seal zipper-style stand-up pouches (also called doypacks) with products like beef jerky, dried fruits, nuts, powders, or small snacks. It automatically handles the steps of bag opening, filling, sealing, and labeling. It's ideal for small to medium food packaging businesses looking to speed up production and create professional, shelf-ready packaging.

- Start a packaged beef jerky or dried meat brand. Use the machine to pack your own branded meat and sell online, in shops, or at markets.
- Offer contract packaging services. Help other small food producers package their products into zipper bags for a fee.
- Package dried foods like fruits, nuts, or snacks. Use it for multiple products and sell under your brand or wholesale.
- Sell pre-filled pouches to resellers. Package snacks or dried goods in bulk and supply to vendors or distributors.
- Export packaged food products. Well-packed zipper bags are suitable for international markets and have longer shelf life.
- Create gift packs or travel-size snack bags. Make smaller, attractive packs for retail chains, travel centers, or event souvenirs.

Price Range: \$28,000

Machine #202 Hanvy Factory Automatic Full Set Complete Plywood Making Machines

Business Idea For This Machine:

This is a full production line made up of several machines used to turn raw wood logs into finished plywood sheets. It includes machines for peeling the logs, drying the veneers, gluing, pressing, and cutting the final boards. This setup is ideal for factories that want to produce large volumes of plywood for construction, furniture, or packaging use. It requires a large space and a team to run smoothly.

- Start a plywood production business and supply to hardware shops, carpenters, and construction companies.
- Sell plywood directly to furniture makers who use it for beds, cabinets, and tables.
- Take bulk orders from construction firms that need plywood for building projects.

- Export plywood to neighboring countries or regions with high demand but low supply.
- Supply packaging companies with plywood sheets for crates and boxes.
- Create a warehouse where you offer plywood in wholesale
- Get a distribution truck to supply your plywood to customers in other states or regions of your country.

Machine #203 High Speed Plastic Bottle Preform Making Making Injection Molding Machine for PET Bottle Preform

Business Idea For This Machine:

This is a high-speed injection molding machine used to make plastic preforms, which are the small tube-like shapes that later get blown into PET bottles. It melts plastic pellets and injects them into molds to form the preforms. These are then used in water, juice, oil, and soda bottle manufacturing. It works fast, requires skilled operation, and is ideal for medium to large-scale production.

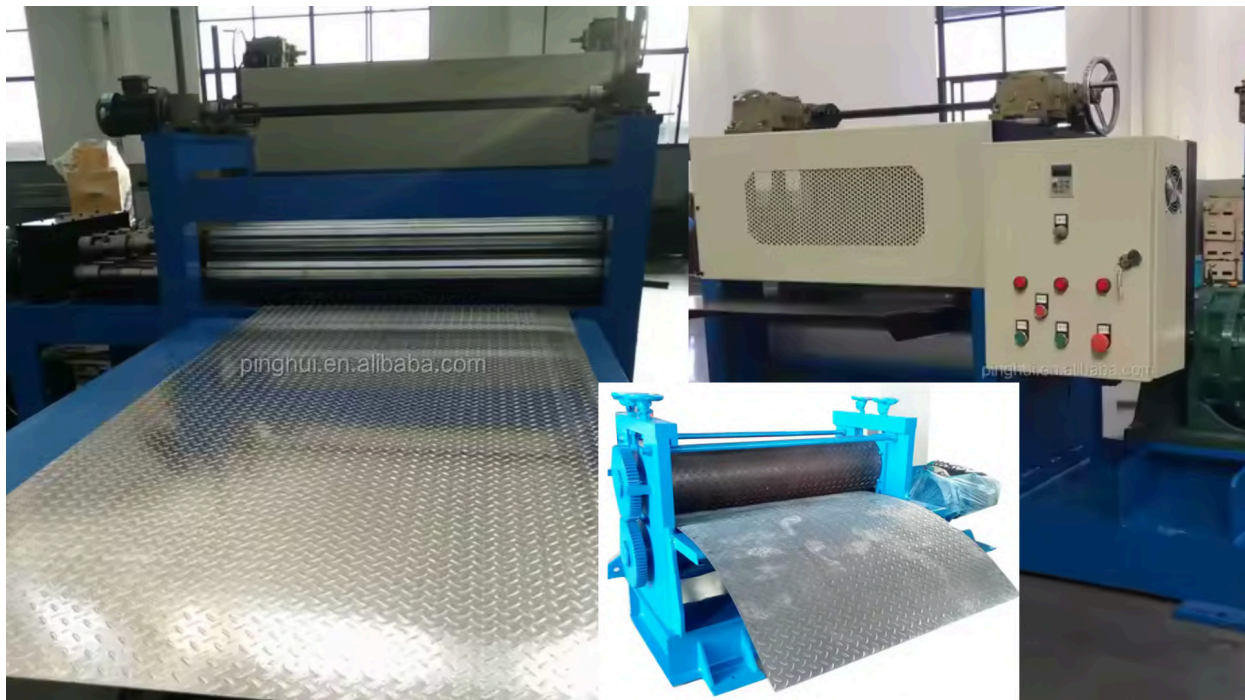

- Start a preform supply business and sell to bottled water or beverage companies.
- Partner with bottle blowing factories that don't produce their own preforms.
- Take custom orders from businesses that want preforms in specific shapes or weights.
- Export preforms to regions where bottle-making is common but preform supply is low.
- Sell in bulk to wholesalers who supply materials to packaging companies.
- Offer contract manufacturing for companies that need preforms but don't want to buy machines.

Machine #204 Steel Sheet Various Pattern Metal Embossing Machine
Checkered Plate Making Sheet Metal Embossing Machine

Business Idea For This Machine:

This is a machine used to press patterns onto metal sheets, especially steel or aluminum. It creates raised designs like checkered or diamond patterns. These patterned sheets are commonly used for flooring, stairs, gates, and decoration. The machine uses rollers or molds to press the designs onto flat metal sheets, improving both looks and grip.

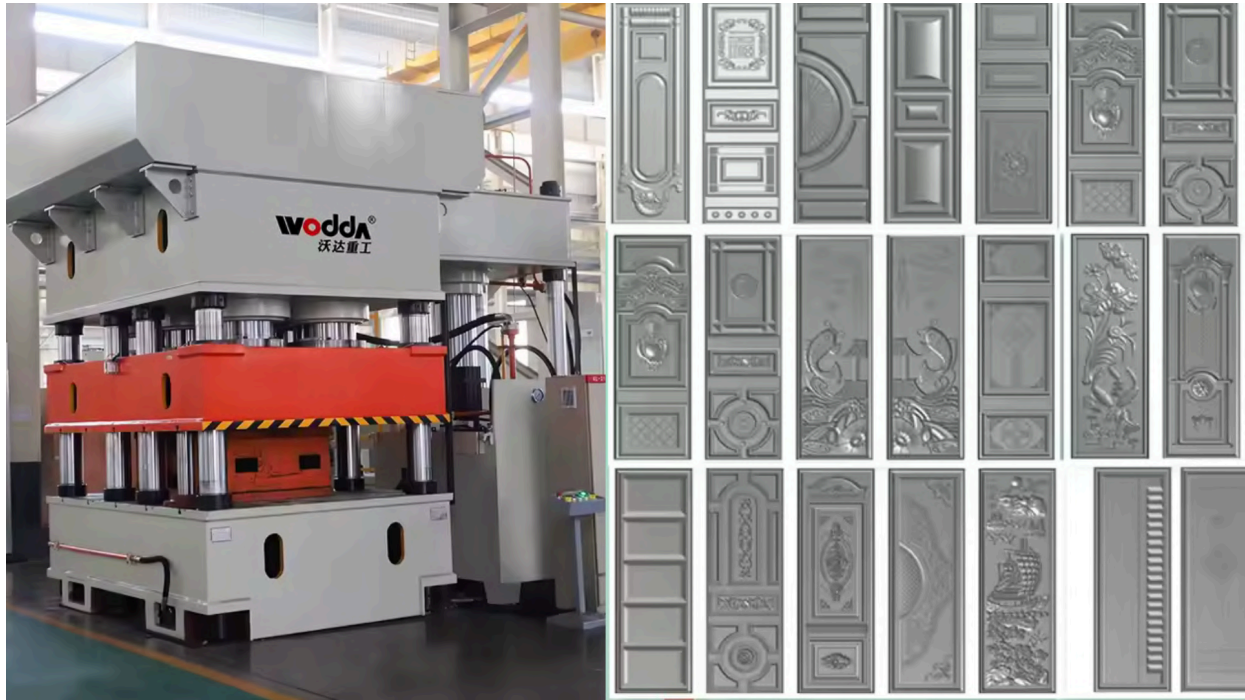

- Produce checkered plates and sell to construction companies for anti-slip flooring.
- Supply patterned metal sheets to fabricators who build gates, doors, or staircases.
- Create decorative panels for interior or exterior design projects.
- Sell to truck and bus builders who use embossed sheets for steps and interiors.
- Take custom orders for embossed designs from workshops and metal dealers.
- Offer embossing services to people who bring their own plain metal sheets.
- Partner with local welding shops to supply patterned sheets in bulk.
- Produce and use this for your own DIY metal fabrication crafts and creations for sale.

Price Range: \$10,620

Machine #205 2000 Ton 3600 Ton Hydraulic Moulding Embossing Press
Machine Price Steel Door Metal Door Skin Making Machine

Business Idea For This Machine:

This is a heavy-duty hydraulic press machine used to make metal door skins by pressing detailed patterns onto steel sheets. It applies strong force (2000 to 3600 tons) to mold the metal into decorative or standard door designs. It is commonly used in steel door manufacturing plants. The machine can produce high volumes of uniform door skins used for security and interior doors.

- Start a steel door skin production business and supply to door manufacturers or welders.
- Sell ready-made metal door skins to carpenters and contractors.
- Take custom embossing orders for companies or individuals who want unique door designs.
Offer embossing services to door factories that don't own a machine.
- Partner with real estate developers to supply door skins for new housing projects.
- Export finished door skins to areas where demand is high but supply is limited.
- Work with local door frame makers to supply complete metal door kits.
- Start your own steel door manufacturing business.

Machine #206 PS Foam Dish Plate Production Line Take Away Food Container Making Machine.

Business Idea For This Machine:

This is a production line that makes disposable foam plates, trays, and takeaway food containers using PS (polystyrene) material. It heats and molds the foam sheets into different shapes, then trims and stacks them. This machine is commonly used by packaging companies, especially those that supply restaurants, fast food joints, and catering services.

- Start a disposable food container business and sell to local food vendors and restaurants.
- Supply bulk plates and trays to catering companies and event organizers.
- Sell to wholesalers who distribute packaging items to retailers.
- Offer custom branding on trays and containers for restaurants and food chains.

- Export finished products to countries or towns with high demand for takeaway packaging.
- Take contract orders from businesses that need disposable food containers but don't own machines.
- Bundle and sell with other packaging items like paper bags or cutlery.

Direct Cooling Featuring Essential Motor Gear PLC

Business Idea For This Machine:

This is a large-scale machine used to make block ice in different sizes, ranging from 2 tons to 50 tons per day. It uses a direct cooling system, which means it freezes the ice blocks without using saltwater. The machine includes essential components like a motor, gearbox, and a PLC control system for

easy operation. It is commonly used in fish preservation, food storage, and industrial cooling.

- Start an ice block business and supply to fishmongers, cold stores, and markets.
- Sell block ice to food vendors who need to preserve perishable items.
- Supply ice blocks to event organizers for cooling drinks and food. Partner with fishing companies that need daily ice for storage and transport.
- Rent ice blocks to cold storage users who don't have access to constant electricity.
- Export ice blocks to nearby regions during hot seasons or high-demand periods.
- Offer ice production services to people who bring their own containers.
- Work with beverage companies to supply block ice for short-term storage and delivery.

Price Range: \$3,500

Machine #208 Automatic 3D Silicone Heat Embossing Machine for Embossing logo on Fabric Textile T-shirts

Business Idea For This Machine:

This is a machine used to press 3D silicone logos or designs onto fabrics like T-shirts, hoodies, or sportswear. It uses heat and pressure to bond the silicone to the fabric surface, creating a raised, rubber-like effect. It is widely used in the garment and fashion industry to make clothes look unique and branded

- Start a custom T-shirt printing business offering 3D logo embossing for brands and events.
- Work with clothing brands to produce their branded designs on hoodies, caps, and uniforms.
- Offer logo embossing services to fashion designers or boutique owners.
- Sell personalized items like embossed T-shirts for birthdays, weddings, or company promotions.
- Partner with sports teams to add team logos on jerseys and training wear.

Create your own fashion line featuring embossed designs and sell online or in shops.

- Rent embossing services to others in the garment business who want short runs.

Price Range: \$3,000

Machine #209 Bottle Cap Molding Machine for Plastic Caps.

Business Idea For This Machine:

This is a machine designed to produce plastic bottle caps using an injection molding process. It melts plastic pellets and injects them into molds shaped like caps. The machine can produce caps for water bottles, soft drinks, juices, oils, and other packaged liquids. It runs continuously and is suitable for medium to large-scale production.

- Sell in bulk to wholesalers who serve bottling industries.
- Start a bottle cap production business and sell to bottled water and beverage companies.
- Supply caps to packaging suppliers who distribute them to smaller factories.
- Take custom orders for branded or colored caps from companies wanting unique designs.
- Export plastic caps to regions with high demand and fewer suppliers.

- Partner with bottle makers who need caps to match their bottles.

Price Range: \$15,000

Machine #210 High Speed Atomizer Centrifugal Stainless Steel Milk Powder Coffee Spray Dryer

Business Idea For This Machine:

This is a high-speed spray dryer used to turn liquid materials like milk or coffee into fine powder. It works by spraying the liquid through a nozzle into a hot chamber, where the moisture quickly evaporates, leaving dry powder behind. It is made of stainless steel, which keeps it clean and food-safe. This type of machine is used in food processing, especially for making milk powder, coffee powder, and similar products.

- Start a powdered milk or coffee production business and supply to local shops and supermarkets.
- Offer drying services to farmers or small food producers with liquid dairy or juice products.

- Produce herbal or spice powders from liquid extracts and sell in health stores or online.
- Partner with food brands that want to outsource their spray drying needs.
Create private label products like coffee creamers or flavored powders for resale.
- Export powdered products to regions where shelf-stable goods are in demand.
- Make and sell instant food products such as soups, sauces, or baby formula.

Price Range: \$4,000

Bonus Machine #1 High Speed Dispenser Vacuum Tank Toothpaste Making Machine.

Business Idea For This Machine:

This is a high-speed machine used to produce toothpaste by mixing and blending ingredients like fluoride, sweeteners, and gels in a vacuum tank. The

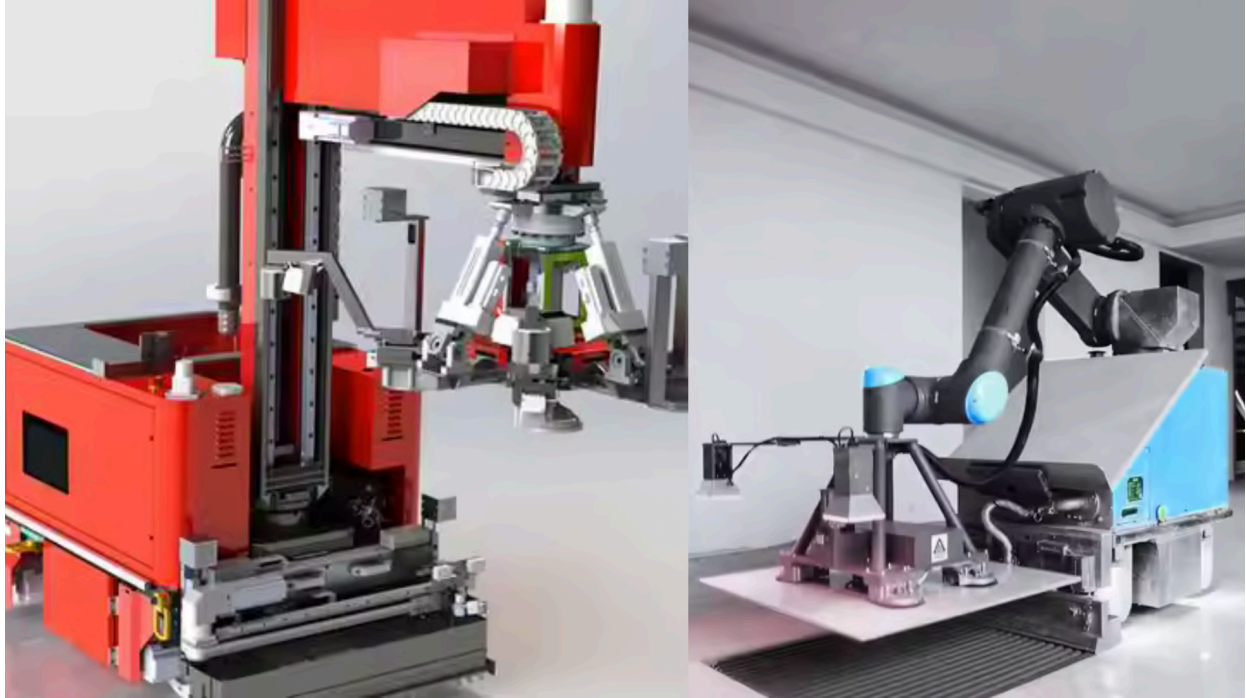

vacuum removes air bubbles, making the final product smooth and stable. It also includes a dispenser for easy filling into tubes. It is commonly used in cosmetics and personal care product factories.

- Create a toothpaste brand and sell to supermarkets, pharmacies, or online.
- Produce herbal or natural toothpaste and target health-conscious buyers.
- Offer manufacturing services for cosmetic brands that want to outsource toothpaste production.
- Supply toothpaste to schools, clinics, or NGOs under bulk contracts.
- Make and package private label products for other businesses to sell under their own names.
- Export unique toothpaste formulas to markets with limited local production.
- Create small-batch specialty products like kids' or whitening toothpaste for niche markets.
- Provide training or consulting for others who want to start their own toothpaste line.

Bonus Machine #3 Top Quality Automatic Aluminum Foil Container/Tray/Plate Making Machine

Business Idea For This Machine:

It is a machine that automatically forms aluminum foil into containers of different shapes and sizes. These containers are commonly used for food storage, baking, takeout, and frozen meals. The machine feeds, cuts, and presses the foil into trays without needing much manual labor. It is fast, efficient, and suitable for bulk production.

- Produce and sell containers to food vendors: Supply to chop bars, restaurants, street food sellers, and caterers.
- Distribute to supermarkets and shops: Package and sell in bulk for resale or direct consumer use.
- Work with event planners: Provide food trays for parties, weddings, and outdoor events.
- Offer custom container services: Print business logos on containers and charge a premium.
- Export to other regions or countries: Sell to markets where local production is low.
- Supply bakeries and grill shops: Offer containers for baking, grilling, and take-home meals.

- Start a wholesale business: Sell to other small shops and resellers who need steady stock.

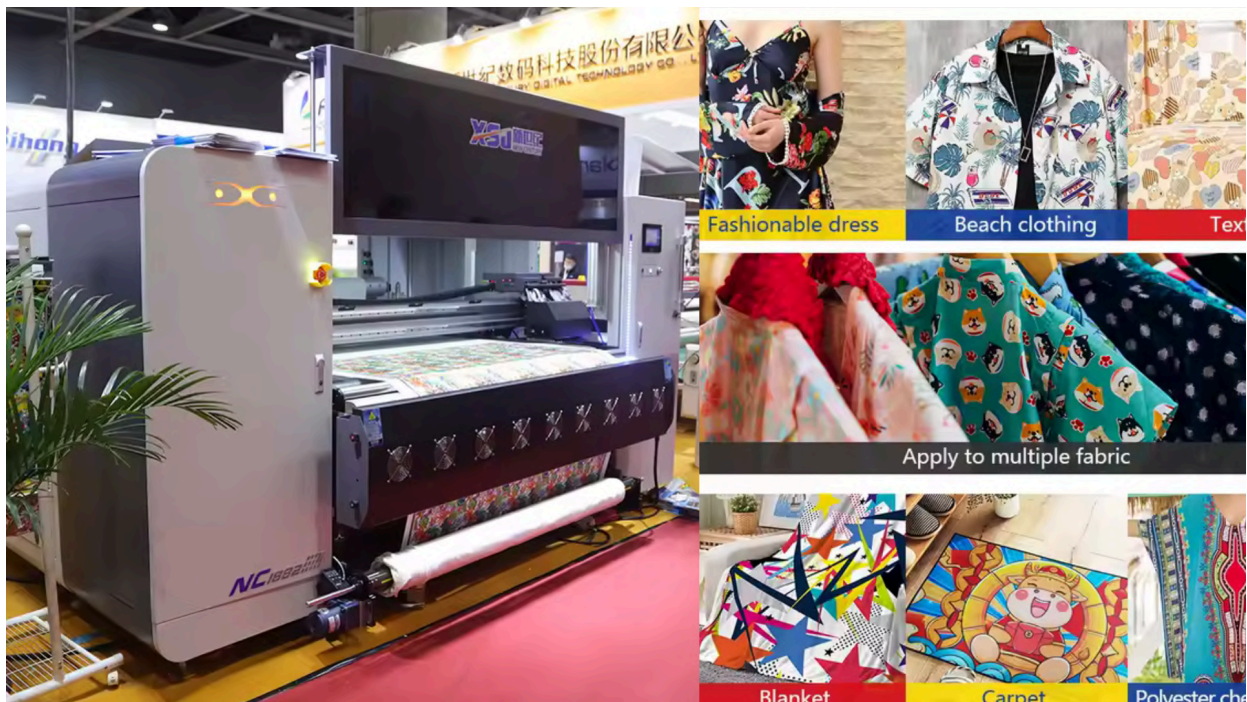

Price Range: \$10,000-\$40,000

Bonus Machine #4 Direct Printing on Fabric Digital Textile Printing Machine Polyester Belt Silk Printer

Business Idea For This Machine:

This is a machine used to print designs directly onto fabrics like Cotton, polyester and silk. It uses digital technology, which means designs are printed from a computer file without needing plates or screens. It produces clean and colorful prints and is mostly used in the fashion, home décor, and custom clothing industries. It works well for both small and large print jobs.

- Start a custom clothing business: Print unique designs on fabric and sell clothes, scarves, or accessories.

- Offer fabric printing services: Print for fashion designers, tailors, or small clothing brands who need custom fabrics.
- Sell printed fabrics: Create and sell your own fabric designs to shops or online.
- Work with decorators: Print curtains, tablecloths, or pillow covers for home décor businesses.
- Create event materials: Print customized fabrics for weddings, parties, or corporate events.
- Print and sell art fabrics: Turn digital art into printed fabric for use in creative projects.
- Partner with schools or institutions: Offer fabric printing for uniforms or school merchandise.

Price Range: \$16,900

Bonus Machine #5 Full Automatic Refreshing Cleaning Single Wet Wipes
Wet Tissue Flushable Wipes Sachet Making Machine

Business Idea For This Machine:

It is a machine that produces single-pack wet wipes automatically. It mixes the liquid solution, cuts the non-woven fabric, folds it, and seals it inside small sachets. The wipes can be used for cleaning hands, face, baby care, or personal hygiene. It is suitable for businesses that want to produce disposable wet tissues for sale or distribution.

- Start a wet wipes brand: Create and sell your own line of hand wipes, baby wipes, or hygiene wipes.
- Supply to hotels and restaurants: Provide single-use wipes for guests and customers.
- Sell to hospitals and clinics: Offer medical-grade wipes for cleaning or patient care.
- Partner with event organizers: Supply branded wipes for conferences, weddings, and outdoor events.
- Produce for other brands: Offer private label manufacturing services to companies that want their own packaging.
- Distribute to retail shops: Sell in supermarkets, pharmacies, and convenience stores.

- Export wipes: Ship to countries with high demand and limited local production.

Bonus Machine #7 J23 10 - 16 Ton Mini Power Press Open Tilting Mechanical Press Machine.

Business Idea For This Machine:

This machine is used to shape, cut, punch, and press metal sheets into specific forms using high pressure. It is commonly used for stamping, bending, blanking, and forming metal parts. The open tilting design makes it easy to remove finished pieces quickly, improving production speed. It is ideal for small workshops and mini factories producing metal components.

- Produce metal washers, brackets, hinges, and clamps and sell them to hardware stores and fabrication shops.
- Offer metal punching, stamping, and bending services to welders, metal fabricators, and small factories.
- Manufacture door, window, and roofing metal fittings and supply them to construction companies and building material dealers.
- Produce small automobile and motorcycle metal parts and sell them to mechanics and spare parts sellers.
- Create custom metal components based on client specifications and charge per batch or contract.

Price Range: \$2,500-\$2,800

Bonus Machine #8 Hydraulic Press Brake Sheet Metal Bending Machine.

Business Idea For This Machine:

This machine is used to bend and shape metal sheets into precise angles and forms using hydraulic pressure. It is commonly used for fabricating metal doors, cabinets, enclosures, frames, roofing components, and other sheet-metal products.

- Bend and shape metal sheets for welders, fabricators, and construction companies and charge per job or per meter.
- Produce metal doors, gates, frames, and window components and sell them to builders and property developers.
- Manufacture electrical panels, cabinets, and metal enclosures and supply them to electrical contractors and factories.
- Fabricate roofing accessories, gutters, and metal brackets and sell them to building material dealers.
- Offer custom sheet-metal bending services based on customer designs and specifications for steady contract income.

Price Range: \$18,000 - \$38,000

Bonus Machine #9 Dog Food Making Plant Full Automatic Pet Food Processing Production Line.

Business Idea For This Machine:

This is a fully automatic production line used to process raw ingredients like grains, meat, vitamins, and additives into finished dog food in dry or semi-moist form. It handles mixing, extrusion, shaping, drying, and packaging, producing consistent, ready-to-sell pet food at scale.

- Produce packaged dog food and sell it to pet shops, supermarkets, and veterinary clinics.
- Manufacture private-label dog food for pet brands and retailers that want their own packaging and formula.
- Supply bulk dog food to kennels, breeders, security companies, and animal shelters.
- Create specialized dog food formulas for puppies, adult dogs, or working dogs and sell through distributors.
- Export locally produced dog food to neighboring regions where pet food is mostly imported.

Price Range: \$12,000 -\$18,000

Bonus Machine #10 Waste Oil Recycling Machine, Used for Cooking Oil
Cleaning Waste Treatment Machinery

Business Idea For This Machine:

This machine is used to clean, filter, and regenerate used engine oil, transformer oil, and industrial lubricants, turning waste oil into reusable fuel oil or base oil by removing impurities, water, and sludge.

- Collect used engine and industrial oil, recycle it, and sell the regenerated oil to mechanics, factories, and equipment operators.
- Offer waste oil recycling services to garages, transport companies, and industries and charge per liter processed.
- Process waste oil into fuel oil and sell it to industries, furnaces, and boilers that use heavy fuel.
- Sign long-term waste oil collection and recycling contracts with workshops, plants, and institutions for steady income.
- Export regenerated base oil or fuel oil to regions with high industrial demand and limited recycling capacity.

Price Range: \$2,000 -\$2,600

Bonus Machine #11 Desktop Mini Injection Molding Machine for Processing Small Plastics

Business Idea For This Machine:

This compact machine is used to melt plastic pellets and inject them into molds to produce small plastic parts with consistent shape and quality. It is ideal for prototyping, small-batch production, and home or workshop-based plastic manufacturing.

- Produce small plastic items like caps, clips, buttons, and fittings and sell them to retailers and small manufacturers.
- Offer custom plastic molding services for startups, inventors, and local businesses and charge per piece or batch.
- Manufacture replacement plastic parts for appliances, electronics, and tools and sell them to repair shops.
- Produce branded promotional plastic items and supply them to companies, schools, and event organizers.
- Create prototype plastic parts for product developers and charge for design testing and short production runs.

Price Range: \$2,500 - \$3,000

Bonus Machine #12 Multifunction Water Jet Cutter for Metal Stone Glass Rubber Foam Price Cnc 3d 5 Axis Waterjet Cutting Machine.

Business Idea For This Machine:

This machine uses high-pressure water (with or without abrasive) to cut metal, stone, glass, rubber, foam, and composite materials into precise shapes without heat distortion. The 5-axis CNC design allows complex 2D and 3D cutting for industrial and custom fabrication work.

- Offer precision water-jet cutting services for metal, stone, and glass fabricators and charge per job or per meter.
- Cut custom metal and stone parts for construction, interior design, and architectural projects and supply contractors.
- Produce decorative stone, glass panels, and artistic designs and sell them to interior designers and luxury builders.
- Manufacture industrial components from rubber, foam, and composites and supply factories and equipment makers.
- Take outsourced cutting jobs from workshops that lack advanced CNC cutting capability for steady contract income.

Price Range: \$35,000 - \$40,000

Bonus Machine #13 Caramel Popcorn Machine Production Line.

Business Idea For This Machine:

This machine is used to pop corn kernels, coat them evenly with caramel syrup, cool, and package the finished caramel popcorn in large or small quantities. It is designed for consistent taste, uniform coating, and high-volume production.

- Produce packaged caramel popcorn and sell it to supermarkets, mini-marts, and grocery stores.
- Supply freshly made caramel popcorn in bulk to cinemas, event centers, schools, and amusement parks.
- Create branded caramel popcorn for parties, weddings, and corporate events and sell through event planners.
- Produce flavored popcorn varieties and sell directly to consumers through online orders and retail outlets.
- Offer private-label popcorn production services for snack brands and distributors.

Bonus Machine #14 Mushroom Farming Equipment Smart Mushroom Growing Container System

Business Idea For This Machine:

This system is a controlled mushroom growing container that manages temperature, humidity, airflow, and lighting automatically, creating ideal conditions for high-yield mushroom cultivation in a compact and efficient space.

- Grow fresh mushrooms and sell them to restaurants, hotels, supermarkets, and open markets.
- Produce mushrooms in bulk and supply wholesalers, food processors, and catering companies.
- Cultivate specialty mushrooms and sell them at premium prices to health-focused stores and chefs.
- Supply fresh or dried mushrooms to exporters and regional buyers.
- Offer mushroom farming training, setup services, or grow kits using your system for additional income.

Price Range: \$15,000 - \$23,000

Bonus Machine #15 Ice Cream Popsicle Packing Machine With Three Servos

**Business Idea For This Machine:**

This machine is used to automatically count, align, and pack ice cream popsicles into bags or wrappers using a three-servo system for high speed, accuracy, and consistent packaging, making it ideal for frozen food production lines.

- Package ice cream popsicles for your own brand and sell them to supermarkets, kiosks, and cold stores.
- Offer contract packing services to small ice cream producers who lack automated packaging equipment.
- Supply neatly packed popsicles in bulk to schools, event centers, hotels, and distributors.
- Produce private-label packed popsicles for retailers and frozen food brands.
- Increase production speed and reduce labor costs to boost profit margins on frozen snack sales.
