

STYLE REMIX PROMPTS

You're about to get your hands on four of my favorite Faux Style Remix Prompts – the same ones I use to turn old designs into fresh, Etsy-ready bestsellers without starting from scratch.

These prompts work with any AI image tool and let you instantly flip your artwork into trending styles like faux embroidery, rhinestone, patchwork, and knitted yarn. Copy, paste, tweak, and watch your design library explode (in a good way, not a “why is my coffee on fire” way).

Use these to refresh old products, create new variations, or build entire bundles fast. Enjoy the creative freedom – and the extra sales that tend to come with it.

Let's make some magic. ✨

FAUX RHINESTONE PROMPT:

Turn the uploaded design into a detailed faux-rhinestone mosaic. Replace every shape with tightly packed rhinestones that match the original colors and shading – using colored stones, metallic stones, and clear crystals where needed. Keep the same layout and details, but rebuild everything with small, uniform rhinestones arranged in neat rows for a clean, polished look. Add bright sparkle highlights, gemstone shine, and crisp edges. White background

BEFORE

AFTER

FAUX CHUNKY YARN PROMPT:

Turn the uploaded design into a chunky faux-yarn illustration. Replace every shape with thick knitted or crocheted yarn texture – visible loops, woven strands, and soft fiber detail. Use cozy, hand-crafted stitches with natural depth and slight shadows. Keep the original layout, just recreate it entirely with yarn, knitted rows, braided edges, and rich fiber texture.

BEFORE

AFTER

FAUX PATCHWORK PROMPT:

Turn the uploaded design into a realistic stitched patchwork appliqué. Make every shape look like a cut-out fabric piece with soft wrinkles, frayed edges, visible stitches, and slightly uneven seams. Use printed cotton fabrics with simple patterns (plaids, florals, dots, stripes). Add hand-stitched outlines and layered appliqué pieces with soft shadows. Keep the original layout, just convert it fully into cozy patchwork fabric. Put the design on a clean, white background.

BEFORE

AFTER

FAUX EMBROIDERY STYLE PROMPT:

Turn the uploaded image into a machine-embroidery design with dense satin stitches, raised thread texture, shiny stitch direction lines, and crisp embroidered edges. Design should be on a clean, white background.

BONUS: THE TOOLS I USE

Below is a list of all the tools I use and what I use them for. Every single one of these is essential to running my business without working 16-hour days. I work about 4 hours a day and I'm still a top 1% Etsy seller – because the right tools do the heavy lifting.

MyDesigns - Use coupon code **RHONDA25** to save 25%

My go-to for listing fast. I create all my mockups and publish new designs in about 30 minutes. Their DreamAI feature also lets me design inside the platform – huge time saver. Bulk listing to Etsy, Shopify, and WooCommerce is the cherry on top.

ListingView - Use coupon code **JustRhondaJ** for 50% off

My keyword and product research tool. It pulls real Etsy data, tags, pricing, and product insights so I can see exactly what's selling right now.

Kittl Use coupon code **RHONDAYT** for 25% off all plans.

Where I do a big chunk of my designing – especially text-based designs, SVG-friendly layouts, and anything that needs clean vector work.

Artistly

Another design tool I use a ton. It's powerful, super easy to work with, and it's a one-time purchase – no monthly subscriptions, which I know everyone loves. Great for PNGs, clipart, character sets, holiday art, and all the fun stuff.

WANT TO TURN THESE IDEAS INTO A REAL INCOME STREAM?

Join the AI Profit Society

If you want help actually building your shop, creating consistent designs, and staying ahead of trends – this is where we do it.

Inside, you get:

- Daily design prompts you can use immediately
- In-depth trainings that walk you through what's working right now
- A growing vault of resources, templates, and tools
- Access to 10+ custom GPTs built specifically for digital designers
- Free access to all my courses – current and future

If you're ready to create more, work less, and grow your digital-design business without burning out, this is where you'll want to be.

Come hang out with us – you'll fit right in.
