

CREATIVE SPARK

The Creative Spark

You're the soul who sees beauty in the ordinary and magic in the messy. Whether you're painting, writing, gardening, or dreaming up ideas at 3 am, your world is rich with imagination. You're not just creative – you're expressive, and that's your superpower.

Your Superpowers:

You feel deeply and channel those feelings into beautiful things.

You can light up a dull space or conversation with your ideas. You're intuitive, original, and always finding new ways to connect the dots.

When It Gets Tricky:

Routines and rules can feel suffocating.

Your energy comes in bursts – you're not always “on.”

You can be hard on yourself when your creativity isn't flowing.

A Little Nudge:

You don't have to “earn” your creativity – it's who you are.

Create for you, not just for a result – the joy is in the process.

When the spark dims, go outside, change your view, or just rest – it always returns.
