

WHITE PAPER

Five Pillars Token (5PT)

Introduction

Introduction - Five Pillars Token

Backed by Real Assets. Driven by Real Value.

The Five Pillars Token is a next-generation, community-driven Utility Token designed to thrive on real usage and sustainable transaction flows. Instead of relying on speculation, the token's value is fueled by transaction fees:

- Debit Cards
- Marketplace
- Community Treasury
- Lottery

By anchoring its ecosystem in continuous transaction activity, the Five Pillars Token creates a self-sustaining model for long-term value and community empowerment.

The Five Pillars of Value

The name isn't just symbolic — the Five Pillars Token is literally backed by five distinct, value-generating asset categories:

1) Gold & Precious Metals

Time-tested stores of value, providing a hedge against inflation and economic volatility.

2) Digital Currencies & Crypto Assets

Access to the dynamic and rapidly evolving world of blockchain innovation and decentralized finance.

3) Real Estate

Stable, income-generating property investments that ensure a solid asset base.

4) Corporate and Project Equity Participation

Equity stakes in promising businesses and projects, allowing token holders to benefit from entrepreneurial success.

5) Transaction Fee-Based Ventures

Investments in business models with recurring, transaction-based revenue, adding cash flow stability to the portfolio.

Introduction

Introduction - Five Pillars Token

Empowered by Community - Secured by Assets

With a mission to create asset-backed, community-driven value, Five Pillars Token offers its holders the opportunity not only to benefit from asset appreciation, but also to directly participate in selected projects and products. Token holders gain early access, exclusive ownership options, and a transparent view into how their investment is being used.

A New Benchmark for Asset Tokenization

In an era where digital assets are often driven by speculation, the Five Pillars Token takes a grounded, value-oriented approach. It aims to set a new standard in tokenized finance by combining the transparency and efficiency of blockchain with the stability of real-world assets.

Benefits for Investors

Investor Benefits - Five Pillars Token

1. Long-Term Value Growth

Through automated token burns and reduced token circulation — all managed via smart contracts — the Five Pillars Token creates consistent upward pressure on value, fostering sustainable long-term price growth.

2. Fairness

- **Low Market Capitalization at Launch:** Enables fair and accessible entry for all participants.
- **Transparent Fees:** All fee structures are predefined and executed automatically via smart contracts — no surprises.
- **No Insider Advantage:** With zero team tokens allocated, the system is truly community-first.

3. Community Stability

A smart-contract-enforced distribution model prevents manipulation by large holders (“whales”) and supports ecosystem stability through structured, fair incentives.

4. Full Transparency

All rules, logic, and mechanisms are encoded on-chain and fully auditable. Investors can independently verify how every aspect of the token operates — in real time.

5. Fully Decentralized & Autonomous

- **No Admin, No Manager:** The entire protocol runs autonomously through self-executing smart contracts — no human intervention needed.
- **Audited Code:** Security and trust are ensured by thorough third-party audits of the smart contract infrastructure.

Token Details

Tokenomics - Five Pillars Token

The Five Pillars Token is a utility token on the Binance Smart Chain, leveraging a burn/mint mechanism for supply control. Its design ensures seamless integration with the network's staking and reward systems.

Token Details

- **Name:** Five Pillars Token
- **Symbol:** 5PT
- **Initial Supply:** 100,000,000,000 Pre Mint
- **Token Type:** Utility Token
- **Mechanism:** Burn/Mint
- **Taxation on Trading:** None – Buying and selling Five Pillars tokens on decentralized exchanges is completely tax-free.

Token Distribution

Tokenomics - Five Pillars Token

The Five Pillars Token distribution is designed to support participation, growth, and reward mechanisms while ensuring a transparent and fair allocation.

Allocation Breakdown

Category	Allocation (Tokens)	% of Total Supply	Purpose
Airdrop Campaign	29,714,285,714	29.70%	\$60 million worth of tokens distributed over 12 years (daily distribution)
Presale + Referral (10%)	5,000,000,000	5.00%	Fundraising (\$500k-\$9M) and 10% referral bonus in tokens
DEX Liquidity (Locked)	5,000,000,000	5.00%	Initial liquidity on DEX (12 years locked - daily distribution)
Treasury (Locked)	10,000,000,000	10.00%	Ecosystem development, team allocation, operational costs (locked for 10 years)
CEX / Marketing / Ambassadors (Locked)	20,000,000,000	20.00%	Listings, promotions, influencer partnerships, market-making (12 years locked - daily distribution)
Reserve (Burn, DAO, Staking) (Locked)	30,285,714,286	30.30%	Flexible reserve for burns, staking rewards, and governance (12 years locked - daily distribution)

Token Distribution

Tokenomics - Five Pillars Token

The Five Pillars Token distribution is designed to support participation, growth, and reward mechanisms while ensuring a transparent and fair allocation.

Token Distribution

Tokenomics - Five Pillars Token

Financial Valuation at Launch

Market Cap at Listing:

- **Circulating Supply:** ~6,000,000,000 tokens (Presale + DEX)
- **Token Price:** \$0.00175

$$\text{Initial Market Cap} = 6,000,000,000 \times \$0.00175 = \$10,500,000$$

➔ **Market Cap (Initial): \$10.5 million**

Key Features

- **Burn Mechanism:** Tokens invested into the platform are burned, reducing the circulating supply. This creates scarcity and benefits participants through a rising token-to-value ratio.
- **Presale:** A total fundraising cap of \$9,000,000 to ensure fair distribution and prevent whale dominance.
- **Smart Claim Mechanism:** When rewards are claimed, 50% is automatically reinvested into the system (added to the staking deposit), while the remaining 50% is paid out to the user.

This approach ensures:

- Consistent ecosystem growth through automatic reinvestment
- Rising earnings over time for users thanks to the compound effect
- A scalable incentive model for the referral network, as reinvestment drives higher future volumes
- This claim structure aligns participant and network incentives — growing value for both over time.

Smart Contract Taxes & Token Buybacks

Tokenomics - Five Pillars Token

Ecosystem Strengthening Through Intelligent Redistribution

To further reinforce token value and stability, the Five Pillars ecosystem integrates a 10% transaction tax on all deposits and withdrawals executed via smart contract.

Redistribution Mechanics:

- A portion of every transaction is automatically redirected into the token treasury.
- These funds are used to buy back tokens, reducing circulating supply and creating continuous upward pressure.

UpOnly Share Participation - <https://uponly.space/>

- Five Pillars has secured equity in "UpOnly", a high-potential asset ecosystem.
- Part of the revenue and upside generated from this participation is also reinvested into 5PT, directly benefiting token holders.

This dual mechanism creates a sustainable feedback loop — fueling long-term value appreciation, ecosystem growth, and community rewards.

How it works

Five Pillars Staking - Five Pillars Token

How Five Pillars Staking Works

Sustainable Returns. Community Power. Smart Contract Driven.

Staking is a key utility of the Five Pillars Token and plays a central role in stabilizing the ecosystem while rewarding committed participants. Through an automated, smart contract-based mechanism, staking reduces token supply, increases scarcity, and delivers daily bonuses to loyal holders.

1. Staking Process

- **Invest & Burn**

When users stake their tokens, those tokens are permanently burned. This reduces the circulating supply, enhancing scarcity and supporting long-term value. Once burned, the staked tokens cannot be withdrawn or reclaimed, as they are permanently destroyed.

- **Earn Daily Bonus**

Stakers receive a daily bonus of 0.3% on their staked amount — automated and executed by smart contract.

- **Access to Reward Pools**

Participants can qualify for one of nine staking pools (including exclusive whitelist-only pools), each offering proportional daily rewards based on the volume of burned tokens.

How it works

Five Pillars Staking - Five Pillars Token

2. Pool Mechanics

Entry Requirements:

To join a pool, the following conditions must be met:

- **Personal Investment:** Minimum staking volume in Five Pillars Tokens
- **Direct Referrals:** A set number of personally invited participants
- **Total Referred Volume:** Combined token volume from referred participants

Pool	Personal Invest	Direct Referrals	Total Direct Invest	Daily Pool Share
1	550k Token (~\$1,000)	1	550k 5PT (~\$1,000)	0.0175%
2	1.45M Token (~\$2,500)	3	1.45M 5PT (~\$2,500)	0.0175%
3	3M Token (~\$5,000)	5	6M 5PT (~\$10,000)	0.0175%
4	5.5M Token (~\$10,000)	10	11M 5PT (~\$20,000)	0.0175%
5	14.25M Token (~\$25,000)	15	28.5M 5PT (~\$50,000)	0.0175%
6	28.5M Token (~\$50,000)	20	85.5M 5PT (~\$150,000)	0.01%
7	57M Token (~\$100,000)	20	171M 5PT (~\$300,000)	0.01%
8	Whitelist Only (limited to 50 seats)	---	---	0.02%
9	Whitelist Only (limited to 80 seats)	---	---	0.02%

Note: Pools 8 & 9 are exclusively available to **Presale Participants** through a whitelist.

How it works

Five Pillars Staking - Five Pillars Token

Reward Structure:

- **Daily Pool Bonus:**

- Seven pools are filled daily with **0.1075%** of the burned token volume (deposits).
- Pools 1–5: **0.0175%** of the burned token volume.
- Pools 6–7: **0.01%** of the burned token volume.

- **First-Level Rewards:**

- Participants earn **0.025%** daily on the deposited amount from direct referrals.

- **Downline Rewards:**

- Participants earn **0.00675%** daily per level on deposits from levels 2–9, unlocked starting at Pool 3.

- **Deferred Activation:**

- Pools are only activated once at least one participant meets the requirements, preventing premature reward dumping.

Features & Benefits

Five Pillars Staking - Five Pillars Token

Smart Incentives. Real Value. Built for Long-Term Growth.

Five Pillars Staking sets a new standard in token utility by combining asset-backed value with automated reward systems and participant-focused incentives. Here's why the **5PT staking system** is a cornerstone for sustainable digital asset growth:

1. Dynamic Tax System

To support long-term stability and discourage short-term speculation, the Five Pillars protocol integrates a smart, adaptive taxation model for staking-related actions:

- **Deposit & Withdrawal Taxes:**

Variable tax rates between **0–10%**, automatically adjusted based on real-time market conditions.

- **Market-Responsive Adjustments:**

- **High Volatility:** Higher taxes are applied to limit impulsive transactions.
- **Stable Markets:** Lower taxes encourage long-term participation and consistent staking.

- **Auto-Reinvestment on Withdrawal:**

Upon withdrawal, **50% of the original deposit amount is automatically reinvested**, while **50% is paid out**.

This mechanism **increases the user's total deposit** over time — which in turn boosts their staking rewards.

As a result, participants benefit from **compound income growth**, and network promoters can build a **significantly higher passive income** through recurring reinvestment cycles.

This system balances ecosystem protection with investor-friendly incentives — all managed by smart contracts, not humans.

Features & Benefits

Five Pillars Staking - Five Pillars Token

2. Long-Term Value Drivers

- **Token Scarcity Through Burns**

Tokens used in staking are permanently burned, reducing supply and creating a **deflationary effect** that supports long-term value appreciation.

- **Fair & Transparent Rewards**

All staking and pool rewards are distributed **proportionally**, based on actual contributions — with full transparency via on-chain smart contracts.

- **Sustainable Ecosystem Mechanics**

Features like **halving events**, dynamic tax rates, and treasury-backed payouts are designed to promote **healthy, long-term growth**.

3. Aligned Incentive Structures

The 5PT staking system is intentionally built to reward commitment and discourage short-term, speculative behavior:

- **Daily Passive Income**

Earn stable **daily bonuses** and **pool-based rewards**, directly linked to protocol performance.

- **Holder-Centric Incentives**

The model prioritizes **staking and holding** over trading, reducing volatility and ensuring long-term alignment between the protocol and its investors.

Features & Benefits

Five Pillars Staking - Five Pillars Token

4. Milestone-Based Achievements

Active participation in the Five Pillars ecosystem unlocks meaningful rewards and recognition:

- **Pool Progression**

Moving up through the **9 staking pools** reflects deeper involvement and greater ecosystem contribution — with increasing benefits at every level.

- **Referral Achievements**

Starting from **Pool 3**, users unlock **multi-level referral rewards** (Levels 2–9), offering additional incentives for network building and long-term engagement.

The **Five Pillars Token (5PT)** goes beyond traditional staking by merging **real asset backing**, **smart automation**, and **fair reward structures**. It's a model built not just to perform — but to last.

Our Roadmap

Roadmap - Five Pillars Token

MAY, 2025	START FIVE PILLARS PRESALE PHASE
JUNE 30, 2025	ROLLOUT FIRST FIVE PILLARS CRYPTO DEBIT CARDS
AUGUST 30, 2025	END OF TOKEN PRE SALE
SEPTEMBER 02, 2025	START FIVE PILLARS ECO SYSTEM PLATFORM
SEPTEMBER 15, 2025	START SMART CONTRACT
SEPTEMBER, 2025	DEX LISTING
OCTOBER, 2025	START OF 1ST COMMUNITY INCENTIVE
Q4 2025	FIVE PILLARS OPEN MARKETPLACE V1
DECEMBER, 2025	TARGET 10.000 USERS ON SMART CONTRACT
Q1 2026	FIVE PILLARS DEBIT CARD CASHBACK SYSTEM
Q1 - Q2 2026	FIVE PILLARS LOTTERY V1
Q2 2026	FIVE PILLARS OPEN MARKETPLACE V2
Q4 2026	FIVE PILLARS LOTTERY V2
Q4 2026	TO BE ANNOUNCED

Smart Contract Audit

Security - Five Pillars Token

Security is not optional. It is the foundation upon which trust is built.

The **Five Pillars Token (5PT) Network** is fully committed to **security, transparency, and investor trust**. As part of this commitment, all critical smart contracts will undergo a **comprehensive third-party audit** prior to public launch.

This audit will:

- **Verify contract logic and functionality**
- **Identify and eliminate potential vulnerabilities**
- **Ensure compliance with industry best practices**
- **Reinforce transparency and accountability for the community**

By engaging an independent and reputable audit firm, the Five Pillars project ensures that its infrastructure is **robust, secure, and reliable** — giving investors confidence in the protocol's long-term sustainability.

Triple Audit - Maximum Security

To ensure maximum trust and transparency, our smart contracts are reviewed by three of the most recognized auditing firms in the crypto space: **CertiK, Bailsec, and SolidProof**.

Global leader in blockchain security with AI-powered analysis and on-chain monitoring.

Specialized in precise, manual code reviews with a strong focus on emerging DeFi protocols.

Trusted European auditor known for thorough audits and KYC services tailored to token launches.

Next-Level Utility

A Bright Future - Five Pillars Token

Crypto Debit Cards

Seamlessly connect your digital assets to the real world.

Our crypto debit cards allow users to spend their tokens instantly – online, in-store, or at any ATM worldwide.

White-Label Ready

Seamlessly connect your digital assets to the real world.

We offer a fully customizable white-label solution for partners and projects looking to launch their own branded crypto cards – fast, compliant, and scalable.

Cashback System (Coming 2026)

Starting in 2026, cardholders staking Five Pillars Tokens will unlock access to our exclusive Cashback System – turning everyday spending into real value for the community.

4-Year Price Forecast Simulation

A Bright Future - Five Pillars Token

A Model Based on Daily Demand Scenarios

To illustrate the long-term potential of the Five Pillars Token, we present a simplified simulation of possible **price development over four years**, based on varying levels of **daily token demand**. While not a guarantee, this model offers insight into how the token's value may evolve under different market conditions.

Scenario	Daily Demand	Price Trend
Low Demand	\$ 0 – 3.000,00	Price remains mostly flat
Moderate Daily Demand	ca \$ 10.000,00	Price remains stable
High Daily Demand	\$ 30.000,00 - \$ 50.000,00	Price rises continuously

Important Notice:

The information provided on this website, in the whitepaper, and in any related materials concerning the Five Pillars Token (5PT) project is for general informational purposes only and does not constitute legal, financial, tax, or investment advice.

Not an Investment Recommendation:

The acquisition and holding of 5PT tokens involve risk. These tokens do not represent securities under any national or international securities laws and are not offered as investment products. Any references to future performance, yield, or market behavior are purely hypothetical and do not represent guarantees.

No Public Offering:

This project is intended solely for individuals who are lawfully permitted to participate in token-based projects under their respective jurisdictions. It does not constitute a public offering or solicitation of securities in any country.

Limitation of Liability:

The team behind the Five Pillars Token shall not be held liable for any direct or indirect losses resulting from the use of this platform, participation in token transactions, or interactions with contract-based mechanisms. Users act at their own risk and are strongly encouraged to seek professional advice before making any financial decisions.

Smart Contract & Technology Risks:

While the project intends to undergo third-party smart contract audits (e.g., by CertiK, Bailsec, SolidProof), blockchain technology inherently carries risks. These may include, but are not limited to, security vulnerabilities, system bugs, or unexpected contract behavior — all of which may impact user assets.

Jurisdictional Responsibility:

Access to this platform and participation in the 5PT token ecosystem may be restricted or prohibited in certain jurisdictions. It is the sole responsibility of each user to understand and comply with applicable laws and regulations in their respective countries
