## What Our Clients Say

### Pioneering, setting new standard in talent development

Khanh’s approach goes far beyond the traditional scope of HR; she creates a harmonious blend of analytical and intuitive strategies to enhance team dynamics. Her use of data-driven insights combined with a profound understanding of individual strengths leads to not just functional teams, but extraordinary ones.

**Amen Reghimi**, Chief Product Technology Officer at Perx Technologies

### We had consistently high engagement levels

The key goal of this program was to enhance our culture by giving people insights into their own unique strengths. From there we would lift engagement and retention. We surely achieved this as we had consistently high engagement levels across the team in Australia. We also received a lot of positive feedback from our leaders regarding a better understanding of their people and the ability to support them in their career journeys.

**Daphne Driessen**, HRBP International | Hostopia / Newfold
